Free Period Improvement

Dr. J. T. C. Smith, general manager of the IIT V-13, relinquished his claim to the Friday “free hour” by canceling navy assemblies for next term. He was suggested that IIT have no assemblies, clubs, and society meetings at a time which should cause fewer conflicts and less confusion.

It should also be possible now to schedule the many classes at 11 a.m. during the remainder of the week, which were shuffled to the very early or late hours of the day this term and last. This, it is expected, will relieve program scheduling conflicts and to lessen the strain of the wartime curricula.

Although the last few days of the free hour will actually aid Illinois Tech’s extra-curricular activities is a matter of conjecture. However, one thing is certain; the doors are definitely in favor of the free period and intend to see it that no classes are scheduled for this time.

It is our hope that they will also take definite steps to prevent individual instructors from changing their own classes to the students’ free periods. Positive action should be taken for the instructor who expresses interest in the non-biologist’s classes and will conform to his personal desires is being extremely selfish as he is depriving the students of an important part of their education.

After The Ball Is Thrown

All seem to agree that the summit of current IIT social life was reached with the success of the “Snow Ball.” The events should go to the utilization of the palest shopaholics and freshman who harbored to put this affair at the apex of IIT dance history.

A. B. Wiltui Kostek deserves recognition as a true leader. He managed affairs well and planned with foresight. His energy, along with that of Carvel, Spitzer, Sichel, Gipper, Pickens, Matatik, and Sager puts things over in top style. At the same time the moral support from the freshmen proved valuable. Noteworthy too were the facts that it was not crowded despite the fears held before the dance.

It was just one of those times that a dance committee can gleefully look back on the end of the season. This dance was a success because of the many interested helpers who made themselves pleases by consuming too much liquor.

Men At Work!

Man Of The Week

John Mitchell, Honor Student, Holds Full-Time Outside Job

This week’s Man of the Week works as a full-time outside job in addition to being one of the top honor men on the campus. He is John M. Mitchell, senior electrical engineering student, one of the eight IIT students named to the School of Science, Engineering, and Agriculture’s Honor Roll.

John Mitchell is vice-president of the Beta Pi Chapter of the National Engineering Honor Society, and a member of the Electrical Engineering Society.

He is also a member of the School Telescope Company, and a member of the School Telescope Society.

Mitchell is also a member of the Student Senate, and a member of the Student Senate Club.

After Today What?

by Henry Freeman

At the present time there is very little construction going on. After the war, it is common knowledge that the story will be quite different. The old industrial plant is being replaced by the new industrial plant.

Before the war there were a great many war workers employed by the plant. In the future, many more workers will be employed in the plant to care for the needs of new war. They will have much to do to make things as easy as possible. The work will be easier.

The new plant is a good opportunity, but better results can be obtained with the modern equipment, particularly in the safety engineering laboratory. The lighting equipment is excellent. This equipment is used for testing different types of naval and railroad equipment.

The machinery is not often sold as a building design. The machinery can be found in steel buildings, reinforced concrete structures, and other places.

More space is needed for the machinery laboratory. More and more testing equipment for the machinery laboratory is needed. Again the hope is to have enough supplies to be able to get things done.

Apologies are often expressed that the coal supply will be removed after the war. C. M. Armstrong at 24th Street Club in the spot where the coal formerly stood, spoke this morning. The Sun had a single word.
A Look At Alumni

We have received several inquiries concerning the recent "Look at the Alumni" feature in the February issue. We wish to express our gratitude to the alumni who have been so generous with their time and efforts in assisting us. We are confident that these efforts will be appreciated by the many students who are currently seeking advice and guidance from our alumni. We encourage all alumni to continue to support the Alumni Association and to stay involved in the life of the university.

Letter of the Week

In response to the "Campus Comment" by Bob Spitzer, "How about a campaign to make students and alumnae more aware of the various Alumni groups that are working to promote the university and its students?" we would like to express our appreciation for the efforts of the Alumni Association. We believe that the Alumni Association plays a vital role in the university community and that its efforts should be recognized and supported. We would like to encourage all students and alumni to participate in the work of the Alumni Association and to contribute to its success.

Interviewer's Question

Do you think that the average engineering student is a technical bookworm with limited social life? Why?

A. B. ROBERTS, Mechanical, Class of 1940: Yes, I think that most engineering students are primarily interested in technical books and have little time for social activities. This is partly because of the nature of their work, which requires a great deal of concentration and dedication. However, I believe that this is not necessarily true of all engineering students. Many engineering students are also involved in extracurricular activities, such as sports, music, and debate, which provide them with opportunities to develop social skills and make friends. I also believe that engineering students can still have a social life, even if it is not as extensive as that of students in other fields.

B. A. W. WADE, Mechanical, Senior: I do not think that most engineering students are technical bookworms. While it is true that many engineering students spend a great deal of time studying technical material, they also have a wide range of interests and activities. Many engineering students are involved in clubs and organizations, such as the Engineering Society and the Mechanical Engineering Society, which provide opportunities for social interaction and the development of leadership skills. Additionally, many engineering students participate in extracurricular activities, such as sports, music, and debate, which help them to develop social skills and make friends.

More on Slipstick

How much longer must we at this Institute be subject to the constant drubbing, under the guise of humor, which has been dished out in the past? I can recall a picture of a "Rawhide" comic strip, in which the作者在回答道。
Senior Chems Take IM Lead

Emerging victorious to become the only undefeated team in the intramural basketball tournament, the Senior Chem administered to the senior Math a 30-26 drubbing.

LEADING the team to victory were A/B Joe Clayton with 15 points, Tom Israel with 10 points, and A/B John McVay with 4 points.

Basketball Mentor Wagner Sets Most Successful Record

On March 1, 1946, Wagner, basketball coach of the university, received his third consecutive victory in the basketball season in which he has proven to be the most successful coach in the history of the Wagner basketball team.

On a par with his team-mates were A/B Bob Lindeman who led the team with 14 points, and A/B John McVay with 6 points.

Outcasts Rally to Defeat 2A 52-43

The Outcasts, the independent team of the University, defeated 2A 52-43. The Outcasts had battled for the championship of the University for the last two years, and this victory was just what they had been working for.

Rifle Club Members To Get Ammunition

There will be plenty of ammunition for the first rifle practice of the season. The rifle club, according to the club manager, will be more than happy to accept any amount of ammunition that can be provided by the university. The club will meet at the range at 3:00 p.m. on Monday, February 19, in the armory.
New Theatre Group to Present Comedy; Dramatech Plans to Give Play at U. of Ill.

"Out of the Trilogy," a new play by Frances Newbery, and a new theatre group at IIT, Deuts, for the production are dependent on the availability of financial support, the executive committee of the U. of C. Deuts will probably be the latter part of March before action can be expected.

The play deals with the trials of six stage-struck young people, three boys and three girls, to find financial reasons are sharing the same New York circumstances. Complications arise when the father of one of the girls arranges an unsuitable marriage for the daughter. How they convince the father of their humanity and at the same time save a producer of their ability to make the affection of a famous and popular actress crowns their efforts from both the north and their parents.

Ames Will Instruct Philosophy Courses

Dr. Alfred C. Alpers, instructor of English, will teach two new philosophy courses at Loyola Institute. Practical problems of life will be the theme and the courses Dr. Ames elaborates on the themes will be taught in a new field of learning opened up by the term "Philosophy".

The first course is Philosophy 201, an orientation to philosophy. The purpose of the course is to acquaint students with the language of philosophy. Required reading for the course is "The Pathway to Greatness" by Bertrand Russell, "An Outline of Western Thought" by John Locke and "Meditations" by Descartes.

Philosophy 202, a course in philosophy, will be taught by Dr. Ames. The course will be open to students who have completed Philosophy 201 or have permission of the instructor. Dr. Ames will use a text to be selected from "Introduction to Modern Philosophy" by T. W. Adorno and J. L. Legg.

ASME Students Will Make Trip to Steel Plant on Thursday

The ASME students at the University of Illinois will make a trip to a steel plant on Thursday, February 16th. The steel mill where the group will be visiting is the end of the line and end of the line, and the students will be guided by expert engineers from the steel plant. The group will be guided by experts from the steel plant who will explain the different stages of steel production.

Tomizer Elected Pi Tau Sigma Head

The meeting of Pi Tau Sigma, the electrical engineering honorary, was held Thursday evening for the purpose of electing a new head. The election results were as follows: President, Robert Tomizer; Vice-President, William S. Draper; Secretary-Treasurer, John Erickson; Recording Secretary, Bob Ellis; Corresponding Secretary, Chuck Prewert.

Math Club Meeting to Be Held in Near Future

Because of activities with other organizations, the Math Club canceled its meeting October 3rd but plans to schedule another meeting for the near future. The club is to be continued in order to continue in such an organization.

Fraternities & Sororities

Informal Initiation Held by Pi Kappa Phi

Pledge to Pi Kappa Phi were formally initiated on Saturday evening, October 8th, in the residence hall of Mr. Rees, 311 North State Street. The pledge to Pi Kappa Phi were formally initiated on Saturday evening, October 8th, in the residence hall of Mr. Rees, 311 North State Street.

The formal initiation of the chapter was held on the night of October 8th. A total of 15 pledges were initiated during the ceremony. The pledges were initiated by the brothers of Pi Kappa Phi and were formalized in a ceremony led by the chapter officers.

Virginia Norris Named New Sorority Treasurer

Virginia Norris was elected treasurer of the new delta chapter of the Delta Zeta women's social organization at the Delta Zeta chapter meeting on Tuesday, November 8th. The new treasurer is a senior in the College of Engineering and will serve as the financial officer of the chapter.

Dolby Dinner Dance Set for February 7th

The Delta chapter of the Delta Zeta women's social organization at the University of Illinois is to hold its annual dinner dance on Friday, February 7th. The dance will be held in the Ballroom of the Union, and will feature music by the Delta Zeta orchestra.

For the best girls in the best dress - DIAMOND ENGAGEMENT RINGS AND JEWELRY

Spies Brothers, Inc.

27 South Dearborn, Chicago

Manufacturers of fine handcrafted rings and jewelry.

LON G TOMS—bloating, unseen targets — are directed by radios flashings through this artilleryman's radio telephone "switchboard." His FM set operates on 130 crystal-controlled channels, any two being selected quickly by pushbuttons. Using this many channels, he connects the battleship commandant with spotters up front and in planes then with headquarters on shore by telephone or teletype lines.

As the nation's largest producer of communications and electronic equipment, Western Electric is now expanding its research laboratories, radio and device factories for all branches of our armed forces.

Many college graduates— men and women — are helping to put material into the labs for the first time. And you can, too—come— and keep calm.
