Seniors to Be Photographed
No "Eight Term Men" Will Be in Senior Part

Graduating seniors have only one month to get their portrait taken for the class record. James Alexander, photographer, says if pictures of seniors are not taken before Memorial Day, the individuals cannot be expected to have their pictures taken. Eight term men who will graduate will have individual portraits taken.

Enrollment at IIT Announced
Mech. Engineering Claims Most Students

Dance Club to Hold Meeting
The first meeting of the dance club for the semester will be held by the Senior Wives Club at 7 p.m. on Wednesday, March 23, announced A/S John Bye.

Graduation Day
The class of 1944 will be graduated on May 25.

Officer Rating To Be Posted
The first list of officer ratings will be posted sometime this week.

Link Reorganized To Serve Students

Scholarship of Many Below 1.0
One limited and eight free student scholarships will be made available this term, James P. Pender, academic dean, announced at the recent meeting. Of the total 125 new seniors, and the remaining 75 are eligible.

Sau Beta Pi Elects
Thurston President
The new president of the Tau Beta Pi national engineering fraternity is a freshman engineer, Thurston S. Parker, of the University of Illinois. Additional officers elected are: Vice-President, Robert C. Sorrentino; Secretary, Robert F. Schulte; Corresponding Secretary, Dr. H. W. Hill, treasurer; and Assistant Secretary, Dr. H. W. Hill, treasurer.

Ladder to Success

Man of the Week
Wide Interests of Crosley Cover Art, Music, and Science

Frank A. Crosley is a rare combination of scientist and artist. He will be one of the top graduates in June with a degree in chemical engineering at the same time he continues private study in oil painting.

Project in Frank opened at the age of six, almost as soon as he could hold a pencil. It was further developed by two scholarships to the Art Institute during his last semester of high school and by four semesters of study at a private school in Chicago. His first studies were in the field of chemistry under Dr. Frederick K. Heider, professor of German at the University of Illinois.

"Tropical Brew" (And it must have been the action in that made him remember Frank had been painting a little figure)

Frank entered IT as a citizen in September of 1946 and became a navy student in March 1947. Although he was a graduate student, he never took advantage of any system that has been in the school continuous throughout his first assignment.

Last summer he was initiated into the Delta Pi 26 with a 25 average and into the Chicago chapter of the Alpha Phi Alpha fraternity. He has been certified for Technical News, for the newspaper, as a member of the Beta Club (26 in the Junior class), and in the Senior class, he added a French major.

He attended Dubois High School where he was president of the Student Council, chairman of both the Student Council and the Beta Club. During this period, he was a member of the school's track team.

Frank was born in Chicago and has an older brother in the army and a younger sister who just graduated from high school. Frank's parents work in the textile industry. His brother, who works in the industry, and his sister have just graduated from high school.

The story of Frank is an example of how hard work and determination can lead to success. His dedication to his work, both in science and art, is evident in his numerous achievements.

Techman Talking
Philip C. Renfry, Dean of Civil Engineering Department

One more plus one-half years plus one year ago there was a rumor that there would be a topping off ceremony at 3 P.M. on December 4th. The rumor was based on a letter from the Dean, Mr. Renfry, stating that the topping off ceremony would take place at 3 P.M. on December 4th. However, this rumor has not been confirmed by any official sources.

The topping off ceremony is an important event in the construction of a building, symbolizing the completion of the structure. It is a tradition in many countries to have a topping off ceremony, where the last beam is placed in position and the building is declared complete.

The topping off ceremony is usually attended by the architects, engineers, and contractors who worked on the project, as well as the owners of the building. It is a moment of celebration, marking the end of a long and often challenging process.

The topping off ceremony is also a symbolic gesture, representing the coming together of all the elements that go into the construction of a building. It is a reminder of the hard work and dedication that goes into building a structure, and a testament to the people who have worked on it.

The topping off ceremony is a tradition that has been observed for centuries, and it is a symbol of the importance of the buildings that are constructed. It is a moment of pride for all those involved in the project, and it is a reminder of the significance of the buildings they have created.

The topping off ceremony is a moment of celebration, a moment of triumph, and a moment of pride. It is a moment that will be remembered for years to come, and it is a moment that will be celebrated by all those involved in the project.
LETTER OF THE WEEK: Lt. Blake Suggets

It has been observed that there has been some laxity on the part of the navy man to maintain the standards of military bearing and courtly that others should observe.

A Look At Alumni

Just to prove that ITT engineers are a romantic breed, about a week or two ago, the town hall of the medical administrative section was being held in the auditorium. The auditorium had been a driving force for the navy.

From Brigg Bob Roberton sent the following: "It arrived aboard the USS Perro on December first and took up the job of sound recording officer. Yes, it's true! Bob has participated in radio bringing the news as an added duty of his occupation.

J. M. L. who received his degree in ITT is now working on the design of the "biggest movie stars" in the industry. He is employed by Harry P. Benson, president of Benson Paper Corporation. Benson received his degree in England and brought him with him for making signs, the final product of the paper is to be delivered to the British army.

Sergeant for ITT is to be proud of is Lt. J. B. Robertson, who has been in the Service since 1943. After serving in India for 3 months in the Indian air as a "navigator-heavily armed" with the famed "Hindenburgs" of the Ninth Air Force, he has returned to duty

Jim Olds, former editor of Technology News and now on the staff of Technology News, has been in the war for almost a month. Jim is stationed with a special unit and is studying mechanical engineering in the school.

In the Juke Box

Why doesn't the Joke Box have more use in the service instead of here? Also the menus of most of the movies here are available in the waiting area. The men who waste time in front of the Juke Box will not gain anything by it.

D. H. Back, Officer

ITT V-12 Unit

COLLEGIATE WORLD

While the commercial American press claims to be entirely free and uncorrupted, the American press is currently being disturbed by the increase in activities of support for a truly free college newspaper and a growing antagonism on the part of college faculties towards student freedom.

Recently, at Williams and Mary College, an editor was removed from campus and publication of the campus newspaper was refused by order of the college authorities due to the editorial opposition of complete freedom. Whether or not the college authorities had agreed with the editor, this was the action that was taken. Instead, the student who had been treated fairly enough to be chosen editor of the college paper was given a job with another college and was forced to suspend publication of a sufficient number of students in order to allow them to improve thinking people.

Evidently, at the University of Virginia, 22 members of the editorial staff of the University News resigned on a notice to the president, among other things, "freedom of speech." Someone who doesn't like "uncontrollable censorship, perverted"

Returning to the more pleasant side of life, I have found a pleasant retired life with the Central Timca School. I've maintained the same two jobs referring to the president of University News, whose name is given to me; here, with whom I have been in contact for the past three years.

Another college group which approves of the Juke Box is the student government at the University of Wisconsin. IU's Rock School, which is connected with the campus newspaper, and the girls who are interested in its activities are also interested in it.
Norman Schmitz To Succeed Hank Koch
As New IM Manager

Norman Schmitz, Senior Chemist, has been named to succeed Henry Koch as the manager of inorganic analysis. Koch has accepted the position of Manager of the Physical Chemistry Laboratory.

First Call Wed.
For Baseball

Honor to Discuss New Memberships

A meeting of Honor I, consisting of members of the baseball team, was held in Memorial Union on Tuesday evening at 6:15 p.m. The meeting was called to order by its President, John S. Smith, secretary of the Honor I organization.

Tennis Team Meeting To Be Held Thursday

A meeting of the tennis team will be held Thursday afternoon at 4 p.m. in the Student Union Auditorium. The team will meet to discuss matters concerning the upcoming matches.

Dutton to Get Gold Honor Award
Rated as Outstanding

By Chicago Engineers

Dean Henry F. Dutton has been selected by the students of the Electrical Engineering Department of the Illinois Institute of Technology as an outstanding instructor in the field of electrical engineering. The award was presented at a special dinner held in the University Club.

Dean Dutton has been associated with the University for many years and has made significant contributions to the field of electrical engineering. His teaching methods and approach have been highly regarded by students and faculty alike.

The award consists of a gold medal and a prize of $1,000, which will be presented to Dean Dutton during a special ceremony.

New Red Cross Drive On Soon

On Wednesday, March 21, at 10:00 a.m., all members of the Illinois Technology faculty, staff, and students will be invited to participate in the Red Cross Drive. The drive will be held on campus and will continue until midnight.

The goal of the drive is to encourage as many people as possible to make a donation to the Red Cross. The drive is in response to the needs of individuals affected by the recent disasters.

The Red Cross is a non-profit organization that provides assistance to those in need. Your participation can make a significant difference in the lives of those affected by disasters.

Journalism Group

Is Largest Since Draft Cut Staff

The Journalism Group has grown significantly since the draft cut staff was implemented. The group now includes over 50 members, who are actively involved in producing the college newspaper.

The growth of the group is due to the strong leadership of the staff and the dedication of its members. The group continues to produce high-quality content, and its members are proud to be a part of such a dynamic organization.

Subscriptions Offered To Evening Students

The college offers subscriptions to evening students for the college newspaper. These subscriptions provide students with the latest news and events on campus.

Students interested in subscribing can contact the newspaper office for more information.

TEACHERS WANTED

We are currently seeking qualified educators to teach at our institution. Interested candidates should have a strong passion for teaching and a commitment to educational excellence.

For more information, please contact our human resources department.

Graduate Fellowship in Power Engineering Established By Gift

A graduate fellowship in power systems at IIT has been established by the Westinghouse Education Foundation. A grant of $5,000 is to be applied over a three-year period. The fellowship will be awarded for the first time next fall. The recipient will be selected jointly by Illinois Tech and the Westinghouse Foundation.

Work of the fellowship will be in power systems, theory, and research, with major emphasis being placed on the development of the new AC network calculator. The 160,000 network calculator built by Westinghouse has been completed and is now being used at various locations in the United States.

At the end of the three years, the fellow will be eligible for candidacy for the degree of master of science in electrical engineering.

The fellowship was set up by the Westinghouse Educational Foundation under a plan developed by A. H. Gruntholz, representing the Foundation, and Dr. John S. Reed, formerly dean of the electrical engineering department at IIT and now director of the Westinghouse Research Foundation.

Naval Notes

Quarters: New

Last week quarters #1 was visited by Capt. T. F. Canfield, Capt. J. H. Johnson, and Capt. J. S. Ahern. Each of these officers had much to say about the new quarters and the improvements made to them.

The modernization of S14A Paul Bierdinger is being supervised by Capt. R. B. Johnson, 4th section, and Capt. J. S. Ahern, 5th section. The new quarters will be ready for occupancy by November 15th.

Quarters: Old

The old quarters have been cleaned and painted. The new furniture has been delivered. All the old equipment has been removed. The old quarters will be vacated by November 15th.

Liberty Log

Each week the social activities attended to by the men in this activity will be listed here. Any men interested should contact 1st Lt. M. E. Hine, the current officer of the log.

March 29th: Alpha Xi Phi of the University of Chicago hosting dinner to senior class of private home.

At noon on Wednesday the 3rd of April, Capt. J. S. Ahern will be hosting a dinner for the officers and guests of the base.

Quarters: New

The new quarters have been completed and are ready for occupancy. The new furniture has been delivered. The old quarters will be vacated by November 15th.

Quarters: Old

The old quarters have been cleaned and painted. The new furniture has been delivered. All the old equipment has been removed. The old quarters will be vacated by November 15th.
