Farrell Wins Secretary Contest; "Hank" Pype Is Favorite of Girls

Building Program of $13,200,000 Approved by Board of Trustees

A $13,200,000 program for Illinois Institute of Technology during the last decade was approved by the Institute's board of trustees meeting at the Chicago club yesterday. President Henry T. Reddick, in presenting the program to the board, pointed out that since 1941 industry and individuals have invested over $27,000,000 in the Institute in all ways including gifts to plant, equipment, and endowment and stipends. The original proposal of Illinois Tech, approved in 1941, has been expanded to include a $10,000,000 plant which will cost $20,000,000 for the first year. One of the items included in the plan for the new buildings is the addition of $3,000,000 in 1944, and if the total for the current year is $7,000,000 it will be submitted for the full amount. The new buildings will be used for various purposes, including new research facilities and a new medical center.

Pype Appointed Sports Editor

Henry Freund, editor of the Technology News, announced the appointment of Henry Pype as Sports Editor. Pype's promotion was the result of the recommendation of the Sports Board. Pype will write a sports column called "Sports Highlights" and as a former Tech All-star, which was written by Killinger, Pype, a junior B-24, has been on the Tech's football staff for two years.

Navy Ball to Be Held at Stevens

May 19 - Features Henry Brandon

Stock Holders Will Decide Fate Of Engineers Co-op by Election

The board of directors of the Engineers Cooperative, Incorporated, have decided by a majority vote to hold the annual meeting of the company at the early hour of 8:00 P.M. on Wednesday, April 3, 1940, from 11:00 A.M. to 2:00 P.M. in order to provide for the election of directors and to submit the annual report to the stockholders. The board of directors has recommended the appointment of a new president, Mr. John H. Reddick, and a new secretary, Mr. Henry Brandson.

IFC Will Sponsor Dance on May 26

"The long-expected inter-fraternity dance will be held on Saturday, May 26," announced Tom Brown, president of Inter-fraternity council. Fred Glenn, of the Alpha Phi Alpha, will be in charge of the dance, which will be held on the campus at 8:00 P.M. and will last until 10:00 P.M. "The dance will be open to all members of the university community and guests invited," said Glenn.

White Sox Ball Park Declared In-Bounds

Comiskey Park has been declared in-bounds for V-3's by the National League. The field is expected to be opened for a game of baseball on Thursday night. The game will be played by the Chicago American Giants, and the White Sox, who are scheduled to play the Giants in the World Series.
Machovillcan Tactics

Student government????

The greatest threat to student government at IIT was revealed at the latest meeting of the Illinois Tech Student Association, commonly known as the ITSA.

The basic principle of free government is that the summation of individual ideas will make a general policy that is for the betterment of the group as a whole or of the majority of individuals in the group.

It was with this in mind that a congress was formed in the United States, England, established a Parliament, and down the line until eventually you have the students of Illinois Tech forming a similar representative board to carry on its services.

Each representative to that board is bound by the position he holds, to have the interests of the group be represented foremost in mind and to see the only weapon he has, his vote on that board, to fulfill the duties of his charge. His voting on any subject should follow the dictates of that student group he represents and all others so voting should be ignored or the board will not administer representative government but instead develop into "boss rule" which is individual student party politics.

Both "boss" rule or rule of the ITSA by a minority group was indicated at the last ITSA meeting when a minority group of student representatives were present. The President of the ITSA, Bob Freeman, was unable to attend the meeting due to a conflict of dates that week. This prevents the正常 functioning of the ITSA as a whole.

There are two assumptions behind that question. First, that I am a civil engineer. Actually, I studied mechanical engineering. That does not mean I would be ashamed to be a member of my best friends are civil engineers. However, I don't want to go against the student body.

The second assumption—that a civil engineer should know something about chemistry—suggests that his knowledge of his departmental curricula. This is a misconception, although popular among students, is wrong.

For example, application of mathematics in engineering is becoming increasingly popular. Probably most conspicuous in the use of electronic devices for this purpose. As a consequence, graduates in mechanical and chemical engineering should have an opportunity to work with electronic circuits.

In time, most students will have an opportunity to work with electronic circuits.

Invention of the advanced laboratory for the sciences departments was a development that will be important in the future. However, no organized effort on the part of the independent student groups brought this distribution program was removed from service. Something will have to be done to improve student representation in the future!

Man Of The Week

Smiling A/S John Enander

Leads Varied Life at IIT

John Otto Enander, senior in mechanical engineering, has maintained a high scholastic standard without sacrificing social activities.

"John Otto" entered IIT first as a "pre-engineering" student who still had not graduated from high school. In 1966 he was drafted in May of 1964 and was shipped to a base in Italy for training. After two years he returned to his studies.

His life, like that of his fellow student, has been a non-stop series of studies and activities which have kept him busy with everything from the classics to the social sciences.

Though he won't admit it, John Otto is also quite good in the classroom. In fact, he was president of the class and a good student.

Techman Talking

Robert Bowes, Instructor in Civil Engineering

I was asked to come to a party for the members of the ITSA department who are not attending a meeting. My presence at the party was at first unsettling. I was not certain what to say or do when I arrived. However, I was invited by one of the members of the department to their house and introduced to their friends.

Immediately after the party, I was asked to come to a meeting of the ITSA department. When I arrived, I was greeted by several members of the department who introduced me to the rest of the group.

I was asked to speak about the importance of the department to the university and to the students. I explained that the department is one of the main focuses of the university and that it plays a crucial role in the education of civil engineers. I also emphasized the importance of the department's role in promoting the profession of civil engineering.

The meeting ended with a question and answer session. I was able to answer all the questions that were asked and to provide additional information about the department and its role in the university.

I was impressed with the knowledge and enthusiasm of the members of the ITSA department. They were all very interested in the department and its activities and were eager to learn more about it.

The night ended with a dinner at a local restaurant. I was able to meet some of the members of the department and to get to know them better. I was surprised to find that they were all very friendly and welcoming.

In summary, I had a very enjoyable time at the party and the meeting. I was able to learn a lot about the ITSA department and its role in the university. I look forward to attending more events like this in the future.
A Look At Alumni

From all over the world these days, ITT students are returning to campus, ready to take their classes
and prepare for a new semester. Students are eager to see old friends, catch up on the latest news, and
get ready for another year of learning and growth.

Dear Alumni,

We hope this letter finds you well and enjoying a fulfilling academic year. ITT is proud to continue
providing quality education and support to our alumni.

Sincerely,

[Signature]

Professor Linder R. Ford, Chairman

The Collegiate World

At the University of Illinois, Dr. Reid Berlin, professor of English, and former head of the department, has been
appointed head of the new department of English and Comparative Literature.

The new department will be responsible for the instruction of all students in the English language, as well as
the study of literature from a comparative perspective. The department will offer courses in English literature,
American literature, and comparative literature, including courses in Chinese, Japanese, and Spanish.

The department has received a $1 million endowment from the Illinois State University Foundation, which
will be used to support the department's activities and operations.

Dr. Berlin has been a member of the University of Illinois faculty for over 30 years and has served as
chairman of the department of English for the past 10 years. He is a distinguished scholar and
teacher, and his appointment as head of the new department is a significant milestone for the University
of Illinois.

The department will hold its first meeting on September 1, 2023, and will begin offering courses in
September 2024. Applications for the new department are now being accepted, and interested candidates
are encouraged to apply.

Sincerely,

Dr. Reid Berlin

Dean of the College of Arts and Sciences

The value and substance of the question school should be to prepare students for the working and professional world. This is the mission of Artiesen College's education mission. Students prepare their own questions, based on practical teaching experience, and ask them of the professors. We hope that this will continue to be the case at Artiesen College.

谢谢！祝你有美好的一天！
Netters Card Six Matches
Lawrence, Chicago, and Beloit to Oppose IIT

A tentative tennis schedule for the upcoming season was recently announced by Paul Harms, coach. Making the schedule is the two meet with Lawrence College, Herman's Alma mater.

Beloit and Tech enthusiasts are anxiously awaiting news from Great Lakes College with A.A.F. Trophy still in the air. A group of students from the latter school has taken a share of the National Intercollegiate Championship. The "A.A." team, hampered by last minute withdrawals, scored a narrow margin of victory over Tech.

GOLFERS—28 players gathered at the suburban Links of Wagner Lavernia to play the annual golf tournament sponsored by the Illinois Intercollegiate, May 28. The event was won by A.A.F. and Tech, who tied for the top honors.

Intramural Baseball to Start
Schedule States Schmitz
Quarters 7 Will Be Pitted Against Quarters 5
Sonny's Office to Handle Game Results

The intramural softball tournament schedule was recently announced by Mrs. Norm Schmidt. The results will be started Tuesday with Quarters 7 pitted against Quarters 5. As previously announced it will be played on a double elimination basis and the four remaining teams will play a final round to determine the champ. As in past years the games will be played both on the north and south diamond on the east side of DePaul Field. The games are to be played as scheduled and any forfeits should be reported immediately to Schmidt. A minimum of 9 runs will be allowed to play, the scheduled games and to finish up for the game within twenty minutes will result in a forfeit. Results should be turned into the intramural office, A. A. F. office or Schmidt's office immediately following the game. This will greatly facilitate the handling of the tournament.

Track Team Rests After Displaying Hidden Power in First Four Meets

For the first week-end in Tech track team has been in action, setting records by breaking several track records that indicate the potentially most powerful track team in IIT history.Already two school records have been broken with several others threatened.

Following last week's successful meet, Coach Roy McClyde rounded up his remaining material plus new to the last week of the indoor season and started to get them in shape. In their first meet of the indoor season on March 10, the Tech team posted good results in three events over North Central.

The next track of the Tech's schedule came at the North Central Institutional Baccalaureate where IIT topped first place with twice as many points as the runners-up Whiskers team.

Following the AAU indoor championship meet, the I.T. & T. A. T. arranged a meet with a triangular meet with Tech scoring 93 points, Lawrence, 34, and Morton, 14. The next meet on the schedule is against Gompers Community College in the Forest River Preserve.

In the next meet, the Tech's team scored 93 points, Lawrence, 34, and Morton, 14. The next meet on the schedule is against Gompers Community College, 93 points, in the Forest River Preserve.

High point men, record-breaker, and co-captain, A.A. Norm Rodhick, broke the 440 yard dash record by clipping a foot off the record of 50.6 at 49.8. Unfortunately, he has broken several other records and I know he will do more at his next meet with official recognition.

The record broken by the Tech's team was the half mile relay former record time of 1:07.1. Two minutes were clipped off the time by a relay team composed of A.A. Dick Thomas, A.A. Dick Rodrick, A.A. John Gunderman, and William Rankin.

In the triangular meet held a little later in the season in 1:07.1, two minutes were clipped off the time by a relay team composed of A.A. Dick Thomas, A.A. Dick Rodrick, A.A. John Gunderman, and William Rankin.

The triangular meet held a little later in the season saw the 440 yard dash come within three seconds of the record set by Tech's team. In the same meet co-captain, A.A. John Gunderman, ran the half mile in 1:07.1, a new record of a second of the best school mark.

As the season winds up Tech should be ready for their final meet with official recognition. The Tech's team scored 93 points, Lawrence, 34, and Morton, 14. The next meet on the schedule is against Gompers Community College, 93 points, in the Forest River Preserve.
IRE Holds Its First Meeting

"Education, Industry, and the Alliance of Radio Industry" was the topic discussed at the first meeting of the student chapter of the Institute of Radio Engineers held last Friday evening.

Dr. L. T. Raider, director of the department of electrical engineering and the group director of the IRE at the University of Illinois, presided over the meeting, which was attended by about 50 students.

The group was organized to bring together students interested in radio engineering and to work on problems related to radio technology.

National Vice-President of ISME to Talk Here

Mr. T. B. McMillan, vice-president of ISME, will speak on "Radio Engineering and the Student Group" today and in the next two weeks.

The meeting will be held at 7:30 p.m. in the 601-02 room.

Radio Code Grades Ahead of Schedule

The progress of the radio code classes sponsored by the ISME is ahead of schedule, according to A. S. W. Lambert. The course is designed to prepare students for the radio code examination.

National Student Chemical Society Meets

A business meeting of the ACS was held last Wednesday at 4 p.m. at McCormick Hall. The meeting was attended by members of the ACS and students interested in chemical engineering.

Sigman Alpha Chi Will Start Pledge Class

Sigma Alpha Chi fraternity initiated A.S. Sheldon at a meeting last Wednesday. The initiates had been delayed because they had to spend the first few weeks of the session working with the fraternity.

Pi Kappa Phi Holds Stay and Initiation

Pi Kappa Phi, an engineering fraternity, initiated 25 members last Wednesday.

Over 50% Favor Honor System; Students Express Their Views

More than 50% of the students at IIT are in favor of the honor system, but most of this group feels that the system isn't effective enough; such are the most important findings of the recent poll conducted concerning the honor system on this campus. 38.5% of the students favor the honor system, and 43.5% expressed to have seen where they were interviewed.

All of the students interviewed, 47.5% felt that the rules of the honor system are not being enforced sufficiently. Most students feel that the honor system can be improved by the addition of a faculty member to help them to understand the system. 11.7% of the students feel that the honor system is a good idea, and 15.2% think that it is not the right idea.
Tutoring Help May Be Halted

In view of the fact that, to date, only seven students have taken advantage of the free tutoring service offered by the Student Council this semester, the service is likely to be discontinued in the near future or at the end of this semester.

Several months ago the free tutoring was initiated by F. Th. Perry, national mechanical honorary fraternity, in order to help troubled students out of difficulty. That semester all the home offices on the South Campus were unable to provide tutors due to lack of the students' interest. The marksmen of the Coaches' Association were taking advantage of the free tutoring service, and the service was improved for those who needed assistance.

However, in the five weeks that the tutoring has been in operation, only seven students have used the free tutoring, which is not enough to keep the service going. The students who have taken advantage of the service are the ones who have been helped by John Johnson, a student at Smith College, who is doing his best to keep the service going.

In the event that the number of students using the service is not increased, the free tutoring service will be discontinued.

In addition, the free tutoring service is available to all students, regardless of whether they are enrolled in the Mechanical Engineering program or not.

Senior Dinner Dance

Dinner Dance—Celebrating the senior pianist held by the senior class of the Class of 1936.

NAVAL NOTATIONS

Quarters #1

The quarterly was honored last night by the Naval Reserve Association and Alpha Chi. The guests were welcomed by the officers and a toast was given to the good health of the guests. The speeches were delivered by the chaplain and the chairman of the meeting.

Quarters #2

The latest arrivals to take over the position of MAA is Quarters #2 located in the Bldg. at the Naval Reserve. The new MAA was welcomed by the officers and the guests.

Quarters #3

Occupants of the Navy office seem to be following this practice rather closely. A week after the last meeting, the office was closed. The reason given was that the office was occupied by a student who was not a member of the fraternity. However, the office was not closed to other students who were not members of the fraternity. The office was closed to all students who were not members of the fraternity.

Quarters #4

Last week George "Viking" Holley joined the Naval Reserve Association and Alpha Chi. He was welcomed by the officers and the guests.

Quarters #5

The quarterly was honored last night by the Naval Reserve Association and Alpha Chi. The guests were welcomed by the officers and a toast was given to the good health of the guests. The speeches were delivered by the chaplain and the chairman of the meeting.

Juniors Plan Three Affairs for Term

Plans for the rest of the semester, including an informal dance and an annual formal banquet, were formulated last Friday at the first meeting of the Junior class. At the meeting, the plans for the Junior class were announced.

Speaking of Operations!

An invasion fleet of several lmm-fed warships used some 6,000,000,000 telephones, from 1,900 to a battleship, to 10 on a motor torpedo boat. That's as many as by all the states of New York, New Jersey, and Pennsylvania.

The fleet is not at all a new concept, but the invasion fleet of the future. It is a fleet of many small ships, each equipped with its own minesweepers, and all under the control of a single master, who can coordinate the activities of all the ships in the fleet. The invasion fleet of the future is the fleet of the future, and it is the fleet of the future.
