NAVAL NOTATIONS

Quarters #2

Chapel services are the specialty of John Harvey, as has the habit of being among the last to arrive. After injuring his shoulder last week, he has been attending all services. In all fairness, it must be said that after Johnny had his bandage removed, he was not able to walk, much less attend services. Despite this, he has been seen making occasional visits to the Chapel.

Quarters #3

Having observed themselves hang in the same vicinity during the past few weeks, the quarters #3 Tiger fans have discovered a secret location where they can watch the game without being noticed. The location is a small room located in the attic of the dormitory.

Quarters #4

The tiger of "Full Story Men" has been busy preparing for his next assignment, which involves travel to the east coast. He has been seen packing his bags and preparing his equipment for the journey.

Quarters #5

There is a new football player on the team, having joined the squad just before the start of the season. His presence has been noticed on the field during practice, and he is expected to make a significant contribution to the team's performance.

Quarters #7

A new player has joined the team, having transferred from another school. He has been seen practicing diligently and is expected to make an impact on the team's performance.

Birthdayplace of
50,000 RADARS

Two years before Paul harvest, the government asked Bell Telephone Laboratories to help perfect radar as a military instrument. The Bell System, through the Western Electric Company, developed the manufacturing branch, which is now the largest supplier of radar systems.

Bell scientists designed and developed different types of radar. One particular type was standard for B-25s in the Pacific for navigation, target location and high altitude bombing. Another directed all radar development, as it was.

This is not surprising, for radar development and production came from the same roots that produced and continued to nourish this country's team.
