Larkin Reveals Lewis Courses Current History, Dutch and German Settings Offered by Liberal Arts College

Although the new Arts and Science building at IIT may not be open for classes until the fall, we have already begun to see signs of the changes that are planned for the program. The new building is expected to house the departments of arts and sciences on the upper level, with the schools of engineering and architecture on the lower level. The design of the building is intended to provide a modern and functional environment for students and faculty.

Tau Beta Pi Selects Semester’s Pledges

New members of the Tau Beta Pi honorary engineering fraternity were announced last week. The new members, who were selected from the senior class, will be initiated at a formal ceremony to be held later this month. The Tau Beta Pi chapter at IIT is one of the oldest in the country and is known for its high standards of excellence.

Integral Staff Will Be Chosen

The staff of the IIT News will be chosen by a committee of students and faculty. The committee will be responsible for selecting the editors and writers for the newspaper, as well as the layout and design. The goal is to create a student-run newspaper that is responsive to the needs of the student body.

Del Renee Presents Opening Address

Del Renee, a senior in the College of Engineering, delivered the opening address at the annual Student Awards Banquet. Renee spoke about the importance of hard work and dedication in achieving success. She also highlighted the accomplishments of the students who were honored that evening.

ASME Views Picture on Casting of Metal Alloys

The American Society of Mechanical Engineers (ASME) recently held a conference on the casting of metal alloys. The conference was attended by experts from around the world, who shared their knowledge and insights on the latest developments in the field.

Phi Lambda Upsilon Picks New Pledges

Phi Lambda Upsilon, the national honor society for undergraduate women in the fields of education, business, and law, has announced its new members. The society is known for its high standards of excellence and its commitment to serving the community.
Freud vs Students

For many years at Armour and the Illinois Institute of Technology, it has been a tradition that only upper classmen and faculty were allowed to ride the elevator in Main. For the past few semesters this rule has been generally ignored, leading to the exclusion of those students who previously had the privilege of riding it. Last Wednesday about thirty students gathered in the third floor of Main to protest any further exclusion of students from the elevators.

As it was necessary that the new students not know the fate awaiting them, the juniors and seniors were very stupid. Suddenly Dr. R. B. Fried burst from a chem lab and ordered the men off the floor. Immediately protests were mounted as to why should they be barred, to which Dr. Fried responded, "I don't care what you think." The men showed no inclination to leave on such a foolish errand. Protests continued from 11:00 a.m. until 2:00 p.m. from Hugh McDonald and his assistant, who called his old man to the floor and said, "Why shouldn't the students in Math to come over and discuss it with me?"

After Dr. McDonald left, the students again rose to the occasion of Dr. Fried's imperialistic attitude and one of the more imaginative students said, "If you haven't got those people on your shoulders anywhere else, you've got them here." Dr. Fried remained impassive (see picture) and said, "I don't care what you think." He then dismissed his students and left the building. With this announcement, most of the upper classroom department had been achieved. With the administration's decision to discuss Dr. Fried's disciplinary policies with the authorities, the students were able to discuss the matter in the main floor of the building, as the dean's embassy, the last student to dispute their right to ride.

The administration has announced the rule about elevators effective, and Dr. Fried has expressed the intention to maintain it.

A Look At Alumni

Pvt. Edwin J. Hermack of Chicago has received his first overseas assignment in Mani- as an aerial controller in the 48th Infantry, a mapping battalion which recently was awarded the Mer-Curian Service Unit award by command of General MacArthur.

Pvt. Hermack is the son of Mr. and Mrs. Joseph Hermack of 513 S. Whipple St., Chicago, III. He received his Bachelors of Science degree in mechanical engineering from the Illinois Institute of Technology in 1943. Before entering the service in August 1944, he was doing experimental work at the Bendix Aircraft Corp., South Bend, Ind.

The 48th Infantry was the first army mapping battalion to arrive overseas and has been functioning as the Base Mapping Unit for the South Pacific for more than five years. Last year the photo-mapping company to which Pvt. Hermack was attached was mapped more than 150,000 square miles of enemy-held territory.

Pvt. Hermack's duties as a topographer include the determination of ground elevations and other topographic details from aerial photographs.

Men of the Week

Damon Martin Plans Career in Industry After Graduation

Outstanding performances in scholastic and in military affairs, as well as a French foreign-fund scholarship, brings Damon Martin into the Men of the Week spotlight.

A student of E.E. major, one who is due before his draft board this summer, Martin has been an officer in the V-12 program for the past three years. Martin was the first officer to complete his education on the V-12 program and was appointed as a captain in the Corps of Cadets at the end of last school year.

The Man of the Week has been of particular interest in the last few months as he has been involved in the development of the MAP program, in which he has been the University's MAP program coordinator and is currently working on a degree in aeronautical engineering.

Martin was followed by admittance to the V-12 program at Illinois. He is now vice-president of the scholastic organization and is due to graduate in June.

Damon is no mere scholastic, as his second ranking in the V-12 program and the V-12 Honor Society indicates. Through eight semesters, he has maintained a solid B average.

A friend of our own, he is the son of a professor and a farmer, and a former student at the University of Idaho, Martin has applied for a position in the engineering department of a large corporation.

"I was offered a job in Chicago," he said, "but I turned it down." While in Idaho, Martin was a member of the engineering society and is currently working on a degree in aeronautical engineering.

"I am interested in the engineering field," he said, "but I am not sure which company would accept me." Martin is due to graduate in June and is currently looking for a position in the engineering field.
