Honor Board Tries Two Students for Copying; One Fails, Other Freed

At a recent meeting of the Honor Board two men were tried for copying a chemistry laboratory experiment, according to Howard Johnson, president. Hon. Of the two, one was convicted and the other was acquitted. The former was charged with having copied a chemistry experiment, and the latter with having failed to complete his homework assignments.

Part-Time Work Is Offered Students

Part-time positions are now open for students desiring to help themselves to assist in the laboratory work, according to R. J. Shattuck, treasurer. The students are employed in the various sections of the laboratory and must maintain a certain minimum standard of work.

Many Changes Will Take Place in Registration

Senior Students Will Advise New Freshmen Navy to Register Early

Many changes will take place in the registration procedures for the 1946-1947 term, according to John F. White, dean of students.

In order to eliminate the confusion among new freshmen students during registration, a group of senior advisors has been formed under the supervision of Ed Ameen, senior advisor. The new freshmen will be registered on Tuesday, March 6, between 10 a.m. and noon, and a senior advisor will be assigned to each group. The advisor will meet with the assigned advisor in different sections of the campus, and the advisor will attempt to arrange any necessary paperwork and answer any questions the students may have.

The freshmen will then proceed to the main campus, and each group will take its turn to the registrar's office. Another change planned for March is the implementation of a new registration procedure for students in the 145 Navy academic programs. The returning students will be registered in a special section, and all others will be registered in a regular section. The registration schedule is as follows:

Friday, March 3, 8:00 a.m.-10:00 a.m., Special section;

Saturday, March 8, 8:00 a.m.-10:00 a.m., Special section;

Wednesday, March 8, 8:00 a.m.-10:00 a.m., Special section;

Thursday, March 8, 8:00 a.m.-10:00 a.m., Special section;

Friday, March 8, 8:00 a.m.-10:00 a.m., Special section;

Sunday, March 8, 8:00 a.m.-10:00 a.m., Special section;

The subject and room schedule for the students is as follows. The schedule is available from the registrar's office.

Advising, registration, and other procedures are being handled at the registrar's office on the first floor of the Administration Building.
Honor System

The Honor Board of Illinois Tech is a body of students, charged with safeguarding the academic morals of Tech students and entrusted with sufficient power to enforce the Honor System. Honesty is based on a student's own conscience in giving a student the benefit of any reasonable doubt.

Recently, however, several men found guilty of flagrant violations of the system were summarily given "a free" in the course and placed upon the board's probation list. Another conviction will mean the imposition of the most severe penalty: expulsion from Illinois Tech and loss of all credits earned in this school.

The men that are actually charged with Honor System violations represent a very small percentage of offenders. Though conditions vary for different classes, a conservative estimate of the number of those that resort to "posing," or opening tests during closed-book exams, "collaboration and cooperation" and out and out "copying" would be in the neighborhood of a fifth of the class.

This figure is not intended to represent that of a group of students that get in all their courses with a "free"—their number is, fortunately, very small. It is the occasional "quick peek" that hurts and drags down the Honor System.

Someone else, in an idle bull session somewhere, challenged a defender of the system with the statement that there wasn't a person in the school that could say that he had never copied as much as a homework assignment—one that was so pure that he could "cast the first stone." He said that as many, too many have taken continual advantage of every trust given them under the much abused system.

Enforcement of the Honor System must come from within: the student body; within the classes; within the class cliques; and within the student himself. Sometimes it isn't enough for a better-than-average student to set a good example by sticking closely to the system, for some others know only that he gets better grades and that good grades are also hard. He becomes a great sacrifice for the average student in a class room full of "collaborativists" to refrain from cribbing—he's liable to flunk the course.

Respect for the Honor System is growing with school spirit, but it remains for the individual to make it as effective as it is desirable.

With all the cold weather we've been having lately, the Shevel experience has been a bit difficult in getting started this week, but now that said Shevel and his operator are all warmed up (the former by alcohol and the latter by warm rushes), I should imagine that we'll get under way on the newest developments.
Kappa Phi Delta Promotes Both Social and Scholastic Activities

In order to form a pledge of their friendship, a group of girls at Lewis decided to form Kappa Phi Delta. The group met on Nov. 19, 1946, and their efforts have been successful. The purpose of the society is to promote friendly relations among the students of the university and to stimulate interest in high scholastic activity.

To be eligible to become a Kappa, a student must have a 3.0 average, and in order to stay in good standing with the society, she is required to have at least a 3.0 average.

When the society was formed, the student officers of the home economics department were chosen to be the sponsor. Miss Blanche Johnson, Professor of Home Economics, is the sponsor, and she will continue to be so until the Alumnae-Active meeting, Oct. 29, 1947, at which time she will be retiring from the IET staff and resigning her position. The two pledges installed will be Miss Blanche Johnson, who will remain until October, and the alumnae, the Kappas, will be installed in the month of March.

With the installation, the Kappas expressed their thanks to Wexler for her assistance, and she stated that the society remained a strong one.

Miss Ruth Bever, also of the home economics department, was installed as co-sponsor of the society.

The Kappas, like other sororities, have a rule that a member shall not be controlled by the alumnae association. Any member who violates this rule shall be expelled. The society consists of three girls, and the members of the society are:

- A/3 Alva Collins, senior member
- Mrs. Levy's 'eldest' natural-born

The presentation of Prof. Levy's business policy course, to her complimentary team plan, is a good one. Prof. Levy has been an important part of the society.

Dr. Strong was the first to present the presentation of Prof. Levy's business policy course. He, too, is a good one. He has been an important part of the society.

Fraternities & Sororities

Alpha Sigma Phi

Alpha Sigma Phi, one of the original organizations on campus, was founded in 1945. The society is the first to be recognized by the university, and it was established to promote friendly relations among the students of the university and to stimulate interest in high scholastic activity.

The Alpha Sigma Phi has a chapter at Lewis College, and the society consists of three girls. The chapter is located at 117 West Fifth Avenue.

Alpha Sigma Phi is a social fraternity and is open to all male students. The society is a member of the United Fraternal Association.

Fraternities & Sororities

Sigma Omicron Lambda

Sigma Omicron Lambda is a social fraternity and is open to all male students. The society is a member of the United Fraternal Association.

Triad

Triad is a social fraternity and is open to all male students. The society is a member of the United Fraternal Association.

Kappa Phi Delta

Kappa Phi Delta is a social sorority and is open to all female students. The society is a member of the United Fraternal Association.

Alumnae Association

The Alumnae Association is a group of past students who have graduated from Lewis College. The association is open to all past students of the university and is a member of the United Fraternal Association.
Four

Techhawks Lose to Loyola in Return Engagement 41-35
Frank Lake faces scoring with 16 Points
Belo's downfall was 2500 in Ramblers Gym
Playing before a crowd of 2500 at the Loyola gymnasium last Saturday night, the Illinois Tech cage squad bowed to Loyola University 41-35. Only a 15-point spread might not be a real penalty because it was the first time in history that the Techs had been shut out in a Smokey Brown.

Jack Dew, Loyola's star forward who had been averaging 18 points, scored 12 points for the Red and Grey. In the first minute, he found his rabbit's foot to be out of order when shot after shot from the outside failed to sink in the book. He was limited to nine points, three baskets and a free throw, with a prayer from beyond the court.

IRE Tours Taylor Tube Company; Pendleton to Talk on Patents

On Thursday, Jan. 24, the student branch of the IRE sponsored an inspection trip to the Taylor Tube Company at 2314 West 70th Street, which was attended by three faculty members and fifty students.

The tour was divided into small groups and conducted through the plant by officials of the company. During the visit, the manufacturing of vacuum and gas-filled type tubes, including production of the components and ending with the final assembly, was covered in full.

The trip was reported to have been very interesting. This was especially true for the radio amateurs in the台aus Tube Company, which was founded and is run by well-known radio amateurs in the city, as they appreciated the needs of these amateurs in their manufacturing process.

Because of the general interest in tube manufacture, the entire tour of the plant was to be extended to include production of both small and large tubes.

February 3, 1946

Hammerot, Katzmire Obtain Discharges

Two members of the staff of the Illinois Tech V-12 program were discharged from the Army by the Board of Review, Chicago, Ill., and the U.S. Army, respectively.

John Hammerot, V-12 student at Illinois Tech, has been discharged by the Board of Review. He previously held a commission as a corporal in the Marine Corps, and was recently transferred to the Army Air Forces.

Joseph Katzmire, a member of the Illinois Tech staff, has been discharged by the U.S. Army. He previously held a commission as a lieutenant in the Navy, and was recently transferred to the Army Air Forces.

Election to Be Held For AIEEE Officers

Petitions for the nomination of officers for the student chapter of the AIEEE are now being accepted. The petition must be signed by ten members of the student chapter of the AIEEE. In order to run for office, a student must be a member of the student chapter of the AIEEE and a member of the AIEEE.

The petition must be submitted to the AIEEE office at Washington, D.C., by the end of this month. The election will be held on February 15, 1946.

Interfraternity Council Plans Formal at Lunchclub

The Interfraternity council is planning a luncheon for the members of the Interfraternity council on Wednesday, February 10, at the Interfraternity club.

The luncheon will be held for the purpose of discussing the activities of the Interfraternity council and its plans for the future.

Who's Who in Chicago

Helen Kahn

Helen Kahn is a well-known radio and television personality. She has been a frequent guest on various programs and has made many appearances on local and national radio and television shows. Kahn is also a member of the American Broadcasting Company (ABC) and has been a regular contributor to the network.

What's behind this symbol?

This is the familiar symbol of the Bell Telephone System that provides nationwide telephone service — the best in the world. The Bell System is a group of companies that provide telephone service to the United States and its territories. The Bell System consists of two main companies: the American Telephone and Telegraph Company (AT&T) and its affiliates.

The Western Electric Company manufactures telephone equipment and provides technology and infrastructure support for the Bell System. The Western Electric Company is a subsidiary of AT&T.

The Bell System is known for its high-quality service and reliability. The system is designed to provide clear and reliable communication to all corners of the United States and its territories. The system is also known for its advanced technology, which includes optical fiber and digital switching systems.

The Bell System has a long history of innovation and leadership in the telecommunications industry. The system has played a critical role in shaping the development of the telecommunications industry and has been at the forefront of technological advances in the industry.

The Bell System has been recognized for its contributions to the development of the telecommunications industry. The system has received numerous awards and honors for its work in the industry, and it is widely regarded as one of the most innovative and influential companies in the world.
Students May Buy Concert Tickets

Tickets to the Popular Concert Series of the Chicago Symphony Orches-
ta will be available in the office of the Dean of Students during the
first two weeks of February. Mrs. Agnes Ferguson, an agent in charge of sales.
Tickets are priced at $5.00, $2.50, and $1.00, and will be sold until February 15.
Prices (tax included) are $2.50, $1.00, $5.00, and $1.95 (box seats).

Concerts are sponsored by the Concert Committee of the National Council of Women.
The concerts will be held in the auditorium on February 12, 15, and 17.
The concerts will be held at 8:15 p.m., and will be open to all.

Dr. Karl E. Schoenherr To Speak at Colloquium

The regular monthly meeting of the Mechanics Colloquium will be
hosted in the auditorium with Dr. Karl E. Schoenherr, dean of engineering at Nort Dame University,
as guest speaker. His topic will be "Fundamentals of Ship Propulsion."
Dr. Schoenherr is a world-renowned consultant and has contrib-
uted significantly to the field of hydrodynamics.

Navy V-5 To Be Here in March

Navy V-5 air training will report to Illinois Tech on February 28th
and the main organizer of the school. Tickets will be available in the office
of the Dean of Students during the first two weeks of February.
Tickets are priced at $5.00, $2.50, and $1.00, and will be sold until February 15.
Prices (tax included) are $2.50, $1.00, $5.00, and $1.95 (box seats).

Concerts are sponsored by the Concert Committee of the National Council of Women.
The concerts will be held in the auditorium on February 12, 15, and 17.
The concerts will be held at 8:15 p.m., and will be open to all.

Mathematics Seminar To Hold Meeting Friday

The Mathematics Research Seminar will hold a meeting Friday
at 4:15 p.m., in Room 201. The topic will be "The One Dimensional Case"
which has been a series of three lectures to be given this week.

Mrs. Krohne resigns as head of art department

Mrs. Grace Pratt Krohne, secretary to President Haupt, has re-
signed her position as head of the art department.

William Fleer to speak at AIEE meeting

This Friday will see William Fleer, senior student in the Department of Electrical Engineering,
speak on the subject of maintenance of electrical equipment.
