Seven Undergraduates and One Alumnae Initiated Into Pi Delta Epsilon Fraternity, and an honorary member were initiated into Pi Delta Epsilon, national honorary journalism fraternity, last Wednesday. The initiation was held at Mason's Cathedral, 125 S. Lincoln St.

Bill Burkheat Chosen Editor For Fall Term

Bill Burkheat, junior, was recently elected editor-in-chief of Technology News. The position places him at the head of the newspaper's staff and publication for the fall term, according to Dr. A. H. Davis, head of the department.

Plan To Reactivate and Expand Institute Business Department

The management board of Technology News will soon undertake a program of reactivation and expansion according to Dr. A. H. Davis, head of the department.

Next Term Classes To Begin Sept. 23

Classes next term in both the day and evening divisions will begin on Monday, Sept. 23, according to the Register's office.

The classes will be as follows:

- Tuesday, Sept. 24: Dynamics, Fluid Mechanics, and Heat Transfer.
- Friday, Sept. 27: Mechanics, Structural Analysis, and Stress Analysis.

The classes will be held at the Illinois Institute of Technology, 1701 W. Van Buren St.

Voting on Changes in ITS Constitution To Be Tomorrow

Voting on changes in the Constitution of the Illinois Institute of Technology will be held tomorrow, according to Dr. A. H. Davis, head of the Department of Business Administration.

Changes proposed are the result of the recommendations of the ITS Constitution Committee, headed by Dr. A. H. Davis. The proposed changes will be voted on by the students in the evening division.
LETTER OF THE WEEK—Polish Reports

Dear Campusites—

Poland, Warsaw
6/19/1946

I am a Polish student in the University of Warsaw, a 21-year-old writer. After many years of study, I have decided to take a trip to the United States. I am a member of the Polish Student Society, which sponsors cultural and social events.

I am particularly interested in American history and culture, and I am eager to learn about the experiences of other Polish students in the United States. I would be grateful for any information or resources you can provide.

Sincerely,

[Signature]

ILLEGAL Tech Vets

Although the bill has not yet been passed by Congress, the trend towards a new form of technical education has already begun. The bill, sponsored bySenator John F. Kennedy, proposes the establishment of a new form of technical education, the "Technical College," which would be similar to the existing "Community College" system.

The bill would provide funding for the establishment of Technical Colleges in each state, with the goal of providing technical education to a larger number of students. The bill also proposes the creation of a new federal agency, the "Technical Education Administration," to oversee the operation of the new colleges.

Many educators and policymakers have welcomed the bill, seeing it as a way to address the shortage of skilled workers in many fields. However, some have expressed concerns about the potential for the new colleges to become a "two-tiered" system, where only those who can afford to attend the new colleges receive the best education.

The bill is expected to come up for a vote in Congress in the next few weeks. It remains to be seen whether it will pass, but many are hopeful that it will provide a significant boost to technical education in the United States.

SLIP STICK

Choice for the Slipstick—Let the Slipstick Fall Where It May

As this is the last issue of the semester, this column will consist of the best jokes obtained—$2.25 at the newsstand.

Do you like your new evening dress?

"No, it's too short for my modesty to bear!"

A handsomely wrapped package was found on the doorstep of a young girl. The girl's father said, "Oh, I'll bet it's a new dress!"

"Isn't that so?"

An engagement is like a hunger; you can't tell until it's satisfied. Now the real question is, how long do you wait before you accept?

THE WOMAN'S ANGLE

by CAROL MOORE

As we approach the end of the school year, let's put pressure on our students to do well in their exams. This is the time of the year when students are most likely to become overwhelmed by the pressure of tests and exams.

To help our students cope with this pressure, we can encourage them to set realistic goals for themselves. By setting realistic goals, students can avoid feeling overwhelmed by the pressure of tests and exams.

In addition, we can help students develop effective study habits. This can include setting aside specific times each day for study, creating a study schedule, and using effective study techniques such as outlining and summarizing.

Finally, we can help students feel supported by providing them with resources such as tutoring services, study groups, and counseling services.

By taking these steps, we can help our students feel less pressure and more prepared for the challenges of the end of the school year.
Lack of Imagination in Authors Is Cause of Droll Textbooks

Not too far down on the list of what this school needs is the lack of originality. The fault does not too much with the school but with the lack of imagination of authors when writing textbooks.

With popular authors such as J.R.R. Tolkien, some of the books are a severe disappointment by change. By putting in a second or third edition editors have been able to evade the challenge of original thought. Poor editors are usually hastening toward looking for a new, breezy meal, merely to sate their own possibilities of their tastes.

This, of course, is an interesting analytical test. The author has shown the most interesting method of disposing his thoughts in a. It must be noted that the whole point of the question.

In order to make the book seem more meaningful to the people who are reading it, a writer must make the words on the page more meaningful to the people who are reading it.

**AS I SEE IT**

(Continued from page 1)

At the IIT office. He always had the inside dope on what the world planned to do with his books. We always had a good time with the editors together.

Helen Hysen, after switching with the women's columnist for a time, turned her talents to providing insights for that well-read column, Stammtisch.

It is not for me to say what will be the effect on the book, but it is to be done in the best way possible.

IIT Model Plane Club to Elect Summer Officers

The IIT Model Plane Club will elect officers for the summer term on July 20, announced its temporary chairman of the club.

The Drone Club, founded early in the summer, is open to all model plane builders. The present membership consists of 100, all high school and college students.

The annual FLYOUT, but having for better positions—marriage, Myrle D. Blank, IIT's informed chairman.

The last week of school has rolled around, and it is the number one drawing card on the student activities list. Sports are in the air with all the coaches picking up for the new term. There are, of course, a few odd events to be cleared up and explained by Technology News and its staff before the ads are placed in the newspaper.

The intramural scene hasn't been entirely cleared. Manager Mike Jones of the basketball team has not yet drafted his final rosters. Larry March of the football team has not yet completed his rosters. J. M. Biggins and the basketball team have not yet completed their rosters. Larry March of the football team has not yet completed his rosters.
Institute Reopens Camp Armour For Summer Surveying Course

Camp Armour, the Institute's camp for field practice in surveying, was re-opened last summer. It is located on a 500-acre tract of land near the Biological Station. The camp is under the direction of Prof. J. D. Johnson, who has directed it for the past two years.
