White Named Student' Dean
John P. White has been appointed dean of students of Illinois Institute of Technology. He has been the successor of Dr. Henry T. Heim, president. Dr. White will replace Dr. Charles A. Thibodeau, who is retiring after thirty-eight years at the university and forty-two years in the college of engineering, dean of engineering, and most recently dean of students. Dr. Thibodeau received his bachelor's and master's degrees from the University of Washington.

A 1914 graduate of Lawrence college, Dean White was on the Lawrence administration staff until November 1946, when he returned to the university in the capacity of student dean in engineering. He came to Illinois Tech in November 1946, as the junior dean of the administration. In September 1947, he was appointed dean of students.

Rush Week Finds Most Fraternities In Good Condition
The results of fraternity rush week, as announced at a meeting of the student-matriculation committee in the president's office, show that of the houses are in good condition although more work is required to bring them back to their present level.

Integral Copies Are Available
Integral copies are available to students who have written articles or stories for the Tech. Many students who are eligible but have not received the Tech yearbook may also receive integral copies. To obtain integral copies, complete the mailing and distribution form attached to this page.
Editorial
Running Isn't Enough

With the TISA and class elections coming up this week, some of the candidates already have not yet to walk the count of the ballots. They have filed their petitions with the TISA Board, and now consider the job done.

It is not enough to run for an office: A candidate must campaign.

Some of the responsibility for the repeated lack of interest shown by the student body during the elections of their representatives must lie with the candidates themselves. Here at Illinois Tech, the average student has to have a good reason for exercising himself even to vote, or he just won't bother.

In the past, not all of the candidates have canvassed their friends and associates that voting in the elections is important. They failed to sell their abilities to those closest to them.

Who can remember any determined efforts being made to put any man in office? Was it the last election campaign poster put up to advise the student body of the possible merits of a candidate?

It is not the purpose of this column to promote pre-election discussion, but providing has been demonstrated to be necessary before an Illinois Tech man will vote. Probably the idea is to get out the majority of the potential voters would require ten burners, a corps of 20-girls, and free beer.

John Makielach, president of the ISA, has done everything in his power to facilitate student participation in the forthcoming elections. Ballot boxes will be available in the dining rooms.

Every opportunity has been extended to the student body, but no group can be forced to vote by being excluded, or by other means. The student body has been extending to the student body.

The man who is elected to an office will be the representative of his class. He will be responsible, to a large extent, for the guidance of the school spirit of his class. It takes a good man to handle the job properly, and any good man should be brought before the voters so that they may decide.

If a candidate has not enough confidence in his abilities or associates in his election, who will have that confidence in him?

Man of the Week
Jim Brophy, Tau Beta Pi Head, Leads in Activities and Scholastics

by Rocky Sprague

This week's selection of Man of the Week goes to ninth year senior Jim Brophy. Jim is a president of the National Society, Senior Class, Secretary, and Vice President of the National Society. Jim is a member of the Tau Beta Pi, Alpha Xi Delta, and the Engineering Society.

Jim is an outstanding student, having maintained a grade average of 84% for his junior year. He has been a member of the National Society's Engineering Committee, and is currently serving as its President.

Jim is an active member of the Tau Beta Pi, and is a member of the Alpha Xi Delta. He is also a member of the Engineering Society, and is currently serving as its President.

Campus Comments

Letter of the Week

Registration proceeded this year in the traditional IIT manner, namely all faced up. For the benefit of those persons who would like to know-where improvement is in dire need we have:

- Begin with, chaotic and their hall announcements at three weeks before registration and this full knowledge that on the first day after registration all the instructor of each class is class and his students will have "passes" in their possession with which they have never taken, that others who would desire particular instructors will be in dormitory class. This is not necessary. It is as important to know where something is going to be as when and where it is given.

There were two changes in the course of the first day, but those who have been here before may notice that this is different from each one in the past. The changes were:

1. The registration hour on the first day was moved to one o'clock the second day to three o'clock. This was done because there was no one there to do it.

2. The registration hour on the second day was moved to one o'clock. This was done because there were no more students to do anything.

This is a change in the system. It is expected that this will be successful.

I think the new system will be successful. It is expected that this will be successful.

Mattress Measurers Made Mistakes

It may come as a surprise to some housewives to learn that there are a number of them who have never known what to do with their mattresses. The National Association of Housewives has been studying the problem for some time, and they have reached the conclusion that there are at least 500,000 mattresses in the United States that are not being used properly.

The Association has established a series of workshops throughout the country to teach housewives how to use their mattresses properly. They have also published a booklet, "The Proper Way to Use Your Mattress," which is available at most bookstores.

Fraternities & Sororities

KAPPA PHI

Active members of the Kappa Phi chapter and current members were the recent guests of the Kappa Phi chapter at a social event. The chapter members were welcomed by the hostess, who expressed her delight at having the chapter members at her home. The hostess also made a speech in which she emphasized the importance of the Kappa Phi chapter in the college community.

Triangle

Triangle fraternity held a meeting during the week. The meeting was held in the chapter house, and the chapter members held a social gathering afterwards.

DELAU TAU DELTA

With Brothers Austin, Bond, Brown, Dodson, Fizeau, Gossman, Hare, Henshaw, Inman, Johnson, Kahl, Lautman, Lozier, Tinsley, Washington, Ware, Williams, and Young, our chapter was given the honor of hosting the Delta Tau Delta chapter. The Delta Tau chapter was welcomed by our chapter, and a social gathering was held afterwards.

Such is Life

Life is a series of experiences that people generally refer to as the "highs and lows" of life. Sometimes, these experiences are positive and sometimes they are negative. However, it is important to remember that life is not always black and white, and that there are shades of gray in between.

In order to live a fulfilling life, it is important to be open to new experiences and to embrace both the highs and lows of life. This will allow us to grow and learn from our experiences, and to appreciate the beauty of life in all its forms.
**IF Sports Include Tennis, Basketball**

The Intramural Tourney is being held in the gymnasium on Thursday, with play beginning next Monday.

**Penn's Panthers Tourney**

Penn's Panthers have been involved in a friendly game against the Penn students, with games held in the gymnasium and the Rec Center. The Penn students have been invited to join in the games, and the Panthers have shown a strong performance in both.

**Rhodes Scholarship Winners Will Enter Oxford U. in October, 1947**

Eleven Rhodes Scholarship winners have been announced, and all are graduates of the University of Oxford in October, 1947. The scholarship winners, who have been selected from the top student performers in the United States, will be enrolled in the University of Oxford in October, 1947.

**Letter Winners Lead Cagemen**

Another intramural championship will be held this week, with the winning teams receiving trophies and medals. The event will be held on Friday and Saturday.

**Tennis Hopefuls Get Chance to Perform**

Tennis competitions will be held this weekend, with the best players from the university competing for the championship. The competition will be held in the university's tennis courts.
EE's Hear Lecture On Safety in Lab

The electrical engineering department, in cooperation with the safety engineering department, held its first demonstration and workshop in 1960 last Wednesday afternoon and evening. The demonstration is aimed at the safety of each campus department. It was funded by the Department of Research and Development, and the safety engineers were funded by the Electrical Engineering Department.

The demonstration was held in the basement of the Electrical Engineering Building. It focused on the importance of safety in the laboratory and the potential hazards associated with electrical work. The demonstration included live demonstrations of safety equipment and practices, as well as a lecture on the importance of safety in the laboratory.

Committee Formed To Plan Assemblies

Dean White has appointed a committee to plan the assemblies under the TIAA, which will be held every semester. The committee consists of Dr. V. Davis, REE Department, Mr. Robert Short, REE Department, Prof. Sheld, Electrical Engineering, and Prof. Sheld, Electrical Engineering.

This committee has been formed to ensure that the assemblies are well-organized and informative. The committee will meet regularly to discuss the planning and execution of the assemblies.

Women's Activities to Be Consolidated at IIT

The appointment of a committee to consolidate women's activities at the Illinois Tech campus has been announced by Dean W. White. The committee, which is composed of Miss Jean F. Davis, Miss Betty C. Cole, and Miss Mary W. Moisman, new head of the women's activities department.

In view of the fact that women are comparatively rare to the campus, it is necessary to organize and orient them. Women have been checked on the student body and are being directed by the committee. The committee has also been given the task of planning the assemblies to be held each semester.

Placement Office Urges Students to File Forms

The placement office urges all students to visit the office before they graduate. The office is located in the Student Union. Students are encouraged to visit the office to discuss their career options and to file forms to assist with their job search.

Rhodes Scholarship (Continued from page 4)

Of the 12 candidates who are being considered for the Rhodes Scholarship, all are from the United States. The selection process is based on academic achievement, leadership, and community involvement. The final selection will be made by a committee of Rhodes scholars from Oxford University.

Rhodes Scholarship (Continued from page 4)

The Rhodes Scholarship is available to students from all over the world. The scholarship provides tuition, fees, and living expenses for up to four years of study at Oxford University. The selection process is highly competitive, and the committee considers a wide range of factors, including academic achievement, leadership, and community involvement.

Griner Calls for Revamp of Present Training Methods

Finding that the leading statesmen of society are those with the best systems of technical education at all levels, Dr. R. Griner of Illinois Institute of Technology has urged a complete reassessment of present day methods of technical education in an address before the International Technical Congress in Paris.

"Curiously," said Griner, "the present structure of training and education is one of the least effective and efficient methods of training the ablest engineers and scientists the world over today. For engineers and scientists, and for the period of practical training for the same, in the United States this division has become more acute because of the desire of parents to study in a degree granting institution. Many other countries appear to have been more successful in this regard."

The present subdivision of engineering education into civil, mechanical, electrical, and chemical engineering is primarily useful in attracting and holding the interest of the student, he said.

"Clearly, however, different sets of aptitudes are needed to become a successful manager, researcher, professor of engineering, or technician. And within limitations these aptitudes cannot be clearly defined by tests. It is therefore the function of the university to fit each group of students to the aptitudes that the evolution of technical education seems likely to call for."

In answer to a query, Dr. Griner stated that it seems to him that the division should be brought into line with the requirements of industry, rather than the educational requirements. Along with industry go transportation, power development, and communications, all of which require the services of the engineer and the technician.

"We must build in such a way that our universities will make use of more and more technical assistance until industry can be staffed with mechanical, electrical, and chemical products and services; finally, perhaps reaching the point where material things become available to all, high above their reach. Under present conditions of an economy such a technological change seems far in the future," he said.

IIT Camera Club To Elect Officers

The Illinois Tech camera club will hold its first meeting of the year Thursday afternoon at 4 p.m. in the Armoury Scaurus assembly room. Cherry and E. campus president. The purpose of the meeting will be the organization of the club and the election of officers. The club will then be open to new members.

Griner, chairman of the meeting, stated that there are now eight members in the group. They have been active in the club for some time, but it is hoped that an extensive membership drive will bring in enough new members to get the organization back on its feet, said Griner.

The club has facilities for nearly every phase of amateur photography, including a darkroom, two enlargers, a contact printer, a supply of tanks and trays for developing, a paper folder, and all necessary chemicals. Members are entitled to a subscription to a newsprint and to the equipment. Others are admission to the club for admission of new members, and the equipment is available to all, according to the club's constitution.
