**Technology News and Armour Eye to Sponsor Campus Camera Contest**

All IIT Shutterbugs Are Eligible to Compete; Pictures to Cover News and Features at IIT; City Newspaper Photographers to be Judges

A chance to break out the flash bulb and to be awarded to shutterbugs of Illinois Tech in a photo contest sponsored jointly by Armour Eye and Technology News. The contest, which is open to all IIT students, will begin tomorrow.

Entries are invited and are to be submitted by 11:30 a.m. on Friday, November 12. The contest is open to all students enrolled in the photography classes at Illinois Tech.

Entries may be submitted at the Tech Photography Office on the first floor of the Physics Building. Students may enter as many pictures as they wish, provided they are submitted by the deadline.

**Steel Arrival Spurs Building Program Anew**

Administration Hopes for Early Completion of Construction Plans

The permanent building program on the IIT campus is in full swing with the recent delivery of structural steel, and Raymond J. Spiehs, executive secretary and treasurer of IIT on the job site. The work is proceeding at a rapid pace, and all other materials have been ordered. The steel has been delivered and is being processed at the plant.

The steel will be used for the construction of the new buildings, which are scheduled to be completed by the end of the year. The buildings will be used for classroom and laboratory space.

**300 "Serenade in Gold" Bids Sell Out in Recent Record Time**

Dance to be Held in Congress Hotel Gold Room; Vol Grayson’s Orchestra Featured Attraction

A new sales record was established last week when 300 bids to the 48th "Serenade in Gold," an informal dance of students, were sold during two ticket selling periods. Said Kurt Kuhle, vice-president and supervisor of ticket sales, "The big hit on Saturday morning at 10 a.m. and 330 had been sold by 11 a.m. Monday. Since the attendance will be limited to 1000, a few bidders are still available for the dance.

Music, "Designed for Dancing," will be featured by Vol Grayson’s orchestra which will play from 9 p.m. to 1 a.m. Graysen, who has one of Chicago’s most successful dance bands, performs nightly from 9 p.m. to 1 a.m. The orchestra will perform in the ballroom and in the English, French, and Italian restaurants, where they are adjacent to the ballroom. The music will be in the style of the popular dance bands of the day, and the orchestra will play a variety of numbers to please the audience.

The sale of the tickets will continue until 3 p.m. on Friday, and the sale of the orchestra will continue until 5 p.m. on Friday. The orchestra will play a variety of numbers to please the audience.

**Junior Science Class to Have Meeting to Discuss Dance**

George House, sophomore class president, has announced that there will be a meeting of the Junior Science Class on Friday, November 13, at 3 p.m. in Room 211. The meeting is intended to familiarize the class with the science of social dance, and to discuss plans for the Sophomore Dance to be held on February 21, 1947. The class will vote on whether the dance to be formed, semi-formal or informal. The dance, the first all-school social function in the second semester of the school year, will be held in the Continental Hall.

**ATTENTION, ALL VETERANS**

All members of the Veterans Association are encouraged to attend the meeting, which will be held at 3 p.m. in Room 211. The meeting will be held in the Continental Hall.

**Jive Artists**

The junior science class will have a meeting to discuss the dance, which is to be held on February 21, 1947, in the Continental Hall. The meeting will be held in the Continental Hall.
Man of The Week
Bob Czeropski is 4A Treasurer,
President of Three Organizations
by Joe Caffer

The world active if it could be adequately expanded might describe Robert S. Czeropski, this week's Man of The Week. This is especially so in the University of Illinois, where Bob was a student and president of the Illinois Institute of Technology. By the age of 23, Bob had already become an outstanding student and leader in the Illinois Institute of Technology. His passion for the arts was evident in his role as 4A Treasurer and President of Three Organizations. He was a member of the Alpha Chi Sigma Fraternity, Alpha Sigma Phi, and Beta Omicron Nu. Bob's academic achievements were numerous, having earned a degree in Chemical Engineering from the Illinois Institute of Technology. As a result, Bob's leadership qualities and commitment to excellence were recognized and appreciated. Bob's dedication to his studies and his involvement in the Illinois Institute of Technology community contributed to his success and leadership in the university. His achievements in the arts and sciences, combined with his leadership skills, make him a valuable asset to the University of Illinois. Bob's success in his academic and professional life is an inspiration to many, demonstrating the importance of perseverance and hard work in achieving one's goals. Bob's passion for the arts is evident in his role as a leader in the arts community, and his dedication to excellence in his studies and services makes him a true Man of The Week.
LETTER OF THE WEEK: AVID PERSUASIVENESS

This week's letter is reprinted with its sober and intelligent discussions at its national meetings (as contrasted with the unrestrained and often pathological communications from other veteran organizations), its determination to carry out in every possible way its principles of democracy in the military and the elimination of all barriers to the betterment of the American soldier, as well as its desire to provide an opportunity for fostering for all veterans, regardless of race, color, or creed. The organization is a symbol of the democratic principles which have always been embodied in the American military.

Fred W. Grober, Soph B:

"As I see it, people just didn't like the way Denver handled things with regard to abstaining from consuming, recreation, and, of course, the O.A.P. Priests were kept down as heretics just because they couldn't operate on a profit basis; it was a ridiculous thing. Religion doesn't seem to be doing anything right now.

On immemorial occasions I have heard of students carrying their grievances in the streets. They have had their pets killed, and so on, such things as the burning of the files at the University of Chicago or Machinery Hall, booklets in the lunch room and registration, feeding the cats in the study rooms, bookiards, boisterousness, and the like. Yet, to date none of these grievances was so serious as they are now. It is as if we are living in a self-centered and shallow society. We are being denied for this and the change is expected to bring about quicker recreation and lower taxes."
**Four LL&P Department Head Replies To Calls For Speech Courses**

By Dr. Walter Hendricks

The department of English, Literature, and Philosophy is pleased to respond to the inquiries in recent issues of the Tech-
ological Review in speech courses. A correction should first be made, however, of the remark that speech is "never offered." Up to the present time, however, several courses in speech were given practically annually. The present program was used in all its experimental models, in course after course, and in it Dr. Walter Hendricks and Dr. Meche conducted several seminars in speech correction.

Moreover, the work in speech has been a matter of deep concern not only to the members of the curriculum committee as a whole, but particularly to the new curriculum vice-president, Dr. E. G. Greiner. Many hours were spent investigating the work of the schools, particularly engineering schools; and man, trained in speech, were invited to the Institute for an interview.

No definite action resulted from these inquiries and investigations primarily because the war was upon us and it was not possible for the Institute to set up the kind of program that its standards demand.

For this reason work in speech, trained men would have to be hired, men who have had years of training in the field of speech pathology and physiology, men who are sufficiently skilled to become the directors of a sound laboratory, recording devices, anatomical charts, as well as proper rooms or auditories with adequate acoustical, lighting, and ventilating facilities. Besides, the work must not be offered to a mere twenty or thirty students, but required of an entire class, whether undergraduate or senior. Only such a program would be worthy of inclusion in our curriculum.

That is the type of program the Administration demands, and the department is working on. But such a project will be the way I have mentioned would require the services of probably fifteen or more instructors, as at Purdue, and would demand three or six classroom hours of every student.

If it had not been for the war, countless such programs probably would only have been limited to begin with—would have been set up. Since the war was over, the availability of students figuratively shushed us off our feet. Now trained men are very difficult to find, and our problem.

**Newman Club Hears Discussion of Russia As Guest Speaker.**

The Newman Club of the University, discussed the aims and the results of the Russian revolution at the meeting last Tuesday. Dr. M. G. Skolnik, who visited Russia in recent years, now teaches economics at Loyola University.

Commissar in Russia was traced from its state immediately after the revolution in 1917 to its present form.

"Only two percent of the Russians are members of the Communist Party," Dr. Skolnik stated, and "but does the indication of a lack of faith in communism by the people, since only one percent are members, is permitted to join. This permits the party, while extremely small, to be extremely powerful. But in the United States, "he continued, "a person can state his beliefs and form groups to further develop these beliefs, but he cannot resort to violence. In Russia, however, the civil code and constitution is the only one that is true; the only group that are permitted to meet. However, a group may be formed in conjunction with the Communist party, while the civil code does not limit resort to violence. But in America, not in Russia.

The meeting of the Newman Club will be a sister, planned for Tuesday evening, November 25th, James Hartneck, president. Girls from the Chevy Chase Young Women's Christian Association have been invited, and dancing will follow the discussion.

**Pledges of APO Will Compile Directory of Profs, Senior Students.**

Entering freshmen will soon be aided in the task orienting themselves on the campus by a large detailed map of all the above-mentioned students directory of the approximately 1700 students and faculty members will also be published and distributed to the student body.

These are two of the projects being undertaken at pledge dinners by the following men who are pledges:

One of the next projects on the list is the compilation of the Alpha Phi Omega pledge directory and the planning of a chapter flag.

In the fraternity, planning is under way for a video tour on November 8th, at one of Chicago's forest preserves, a tour to be followed by Ed Knoll, social chairman.

Funds for the fraternity will be derived by selling boxed Christmas cards on the campus. A sales booth will be set up in the Student Union lobby in the near future.

**Pan-Hellenic Plans to Hold Monthly Socials**

The first of the newly established monthly socials to be sponsored by the Pan-Hellenic Council will be held in the East Dining Room, tomorrow, from 4:00 to 7:00 p.m., on the second floor of Omicron. All members of the organization and their friends, it is announced, will be present.

**Junior-Eve to Feature Famous Personality**

The Junior-Eve, to be held Friday night at the 14th annual Harry Twieck, president, the junior class sponsored dance is just a few weeks away, so this meeting will be very important in organizing the committee. The meeting will be held at 7:00 p.m. in room 118, the junior class room. The meeting will be held at 7:00 p.m. in room 118, the junior class room.

**ASCE To See Movies of Bridge Failure at Meeting**

Movies of the failure of the Tacoma Narrows Bridge will be featured at the meeting of the ASCE chapter on Friday night, November 1st. The meeting of the committee will be held on the civil engineering and civil engineering building.

**Pi Delta Epsilon, national honorary journalism fraternity, will meet tomorrow, according to Ed Knoll, president.**

**Low-Cost Sulfamic Acid Was Result of Newly Discovered Process.**

Once obscure laboratory chemical now finding widespread use is industry.

Sulfamic acid, which was once a merely obscure laboratory chemical, is today being produced in quantity for a constantly growing list of uses because of a discovery made by a Du Pont chemist.

Believing that urine could be converted to acid, a chemist treated urine with formic sulfamic acid. The reaction was exceedingly violent, and it appeared that decomposition had taken place to give out ammonium sulfamic acid. However, the chemist noted that the white precipitate which had formed did not dissolve readily in water, and further investigation proved that he had obtained sulfamic acid.

**Crystals of sulfamic acid**

Thus the way waspointed to an inexpensive method of making this

![Image of crystals of sulfamic acid](image-url)

crystalline known chemical, and an intensive study of its chemical and physical properties has led to its use in the development for a wide variety of industrial uses.

**First Industrial Applications**

The salts of sulfamic acid are being used extensively as flux-proofing agents. For many years, sulfamic acid has been used in the manufacture of toner in photographic processes, and has been used as a catalyst in the production of many important industrial products. It is particularly useful in the production of toner for photographic processes, and has been used as a catalyst in the production of many important industrial products. It is particularly useful in the production of toner for photographic processes, and has been used as a catalyst in the production of many important industrial products.

Questions College Idea about working with Du Pont

**Is There a Future for Me at Du Pont?**

Your opportunity to ask questions of a specific job in this fine company is once again provided when Du Pont offers its annual open house, the Employment Opportunity and Open House at the company's headquarters, Westville, Delaware.

The opportunity to ask questions of a specific job in this fine company is once again provided when Du Pont offers its annual open house, the Employment Opportunity and Open House at the company's headquarters, Westville, Delaware.

Understandingly, men of Du Pont are proud that their work in the laboratory has created and developed many products like this "chemical curiosity" to help make life safer, more pleasant and comfortable for all Americans.

**Better Things for Better Living Through Chemistry**

Professors Jakob and Morgan Discuss
Advancements in Astronomical Research

Professor Max Jakob, researcher of mechanical engineering, and Doctor William N. Morgan, associate professor of astronomy at the University of Chicago's Yerkes Observatory, were the principle speakers at last Wednesday's meeting of the IIT chapter of the Sigma Xi.

Dr. Jakob discussed the value of astronomical research to a technological institution such as IIT, stating that, "We are in a science of one world, which is a rapidly expanding world. The astronomer is of the same scientific world. We are at Illinois Tech find it impossible to know what goes on in every corner of the scientific world, however, it is desirable to know what goes on in the astronomical corner of the scientific world."

He also pointed out that the practical sciences have been developed from astronomy, e.g., mechanics, dynamics, Newton's Laws and Kepler's Laws. From astronomical research, radio telescopes, for example, were constructed to observe the stars.

Fraternities and Sororities

PI KAPPA PHI

Alpha Phi chapter of Pi Kappa Phi will inaugurate a series of open informal dances this week, according to an announcement made by Ralph Reiker, a member of the fraternity. The dances will be held each Saturday evening, unless the Chapter has planned another activity for the same night.

Pledge period of the current pledge class has continued with active members mixing on an as-needed basis, according to Masterman Van Noes. The pledges are learning their lines on a regular schedule.

DPhi will hold a dance on Saturday night on the northwest side.

DELTA TAU DELTA

To make it a full week end, after attending the "Sermade in Gold" in strong numbers, the Delta are backing a combined formal Dance, scavenger hunt and beer party the next day.

Math Club Elects

Robert D. Teasdale

As New President

At a recent election, the Math Club instated Robert D. Teasdale as its new president. Other new officers of the club include: Secretary, Chandler L. Swanland; and program chairman, Milton J. Bear.

Small announcement that the club will hold a meeting in room 242, Chapman at 5:00 p.m. Friday, Robert Teasdale will lecture on the "Gender Function" and the "Error Function" and Milton Bear will tell on "Prime Numbers."

President Teasdale indicated that the Math Club would like to emphasize that its general object is to present advanced concepts in as clear a Math Club as possible.

Armour Eye Holds
Planning Meeting

New life will be injected into Armour Eye this term, according to Arnold H. Bosler, president, at the regular meeting last Wednesday evening. In order to stimulate activity, a motion was proposed and adopted that all pledges be required to submit at least one saloon point to the club. These points will be judged and those found suitable will be placed on display in the Euston Union.

One of the first projects of the camera club for this term will be the photo contest which the Fraternity News is co-sponsoring. All future meetings of the club will feature either a speaker or movie and all members of the student body are invited to attend.

The meeting closed with the showing of our movie. One scene was flash photography, another was a news reel, the third was Camera News and the last was a war department film on government problems.
**Swimmers Clocked; Lawrence Added to List of Opponents**

Senior Mechs’ Trounce FO’s, Dimwits Eliminate Senior Civics

Soph Mechs to Replay Senior Champs Seven Teams Left in Intramural Play

**Swimmers Clocked; Lawrence Added to List of Opponents**

Senior Mechs’ Trounce FO’s, Dimwits Eliminate Senior Civics

Soph Mechs to Replay Senior Champs

Seven Teams Left in Intramural Play

Capitalizing on missteps, the Senior Mechs touchback team crushed the Senior F.O.’s 38-0 last Friday. The Mechs tallied all of their points in the first five minutes of the game and succeeded to hold the highly touted F.O. attack in check.

The P.O.’s lost the tone and quietude. The F.O.’s have the much-maligned front four who failed to gain, and the P.O.’s parted. After the Mechs failed to gain, Andrew turned and the ball was fumbled on the F.O. ten yard line. On the next play from scrimmage, the Mechs recovered an F.O. fumble. Two plays later southpaw Bill Mc-Donough chucked a short bullet pass to Herb Howse for the first Mechs marker. The try for the point failed.

The Mechs scored their second touchdown when George Elsharbat passed and raced ten yards to paydirt. A no-again attempt for the conversion was missed.

The last Mechs score resulted from a drive which started deep in their own territory. After Elsharbat intercepted an F.O. pass on the Mechs 20 yard line, only two plays were needed for a touchdown. After a short first down pass gained 20 yards, "Midget" McDonald faked a pass into the waiting arms of Elsharbat. The Mechs missed the try for the point.

**Dimwits Nip Senior Civics, 2-0**

The Freshman Dimwits eliminated the Senior Civics last Wednesday when Ed Hodgson of the Fresh caught Steve Lewis behind his goal line for a safety and the lone score of the game.

The Dimwits were constantly threatening the Senior Civics, with most of the play in the shadows of the Civics’ goal posts.

High cross winds prevented a passing game, and distance of punt was kept to a minimum.

The Senior Chums-Grimmies game of last Tuesday found the Grimmies on the top of a 12-8 count, but the game was played under protest of the Chums. The Chums’ defeat was due to an official’s error in ruling which necessitated a replay.

The Soph Mechs forfeited their game to Don’s Freshmen and thus were eliminated from the tournament.

Seven teams remain in the tournament, and it is expected that the champion of the school will be determined by the end of next week.

**Alpha Sigs Remain Undefeated, Beat Theta Xi; Triangle Wins**

Alpha Sigma Phi nosed out a strong Theta Xi team 8-0 in the thrilling finale of the game last Friday.

The Alpha Sigs almost completed the upset, but only one of 12 passes was completed, and the Alpha Sigs made the most of a poor kick to nosed out an aggressive Theta Xi team. In the three minutes left of play, the Alpha Sigs player fumbled the ball over the one yard line. Peterson threw a bullet pass to Gander in the end zone for the touchdown. The Alpha Sigs player, with only seconds left, had his leap inexplicably ended for a safety and the other team.

The Alpha Sig pass nased Phi Kappa Sigma 7-2 in their game last week. A hard fighting Phi Kappa team outpaced the Alpha Sigs through the air, making their two points. The Alpha Sigs are the only undefeated team at the present time. Triangle defeated a spirited but weak Princetonian team 18-0. Two long passes by Knapp, one to Loomis, and one to Turner gave Triangle a 15-0 lead in the first five minutes. Howie Room intercepted a pass in the second half and returned it for a touchdown for the remaining score.

Phi Kappa Phi upset a highly touted Delta Tau Delta team 6-0 in the last 40 seconds of the ball game.

The Phi Kaps turned an impending tie into a victory when Jim Mezare prevented a bad pass from entering the end zone and threw a long forward to Herk Humann for the only score of the game.

Phi Kappa Phi severely trounced Rho Chi Phi, 32-6 and 2 to 2 to eliminate them from any chance at the 15’ cup. The Phi Kaps seemed to score at will through the first half scoring four touchdowns and two extra points. The second half was shortened to six minutes by mutual agreement due to darkness. The Rho Chi lone tally came when a bad pass from center went out of the end zone.

Kim Thompson has added that all games will be started by 4:15 p.m. This week in order to avoid the darkness in the last half.

**I’m all over the map at once**

"I certainly keep you on the go... my job of distributing equipment and supplies to the Bell Telephone company throughout the nation.

"Right now I’m busier than ever delivering telephones, switchboards, cable and countless other kinds of apparatus and supplies. They’re all needed for the Bell System’s construction program of more than $2,000,000,000... to give you better service on telephone service.

"I maintain 24-hour answering at offices, homes, service stations, where I answer every call on your account... and where I also receive telephone equipment.

"And that’s only part of my job. I’m also responsible and in charge of the Bell System... and I must control other equipment also.

"Remember my name... it’s Western Electric."
Planning Board Tells Program For Development of South Side

With a new impetus of assured financial backing, the South Side Development Association, under the leadership of Dr. Henry T. Hadd, has announced a new membership drive. The association, formed four months ago as an organization to help the city in its campaign to attract business, has been assisted in its efforts by a group of prominent leaders in the community. A member of the association is asking for increased support of the drive and to assist its staff of experts in accomplishing the redevelopment.

The program, large in scope (it covers six square miles), bold in its ambition for the solution of the problems of business and welfare improvement, and wealth in leadership (its executive board is made up of Chippewa's outstanding citizens) has been organ- ized by the South Side Development Association.

The area to be affected is bounded by Roosevelt Road and 41st street, Lake Michigan and the Pennsylvania Tracks. In the organization are leaders in educational, civic, industrial, business, labor and welfare groups.

Representative men among the associates are Leigh T. Block of Inland Steel Company, W. S. Townsend of U.S. Steel Corporation, service employees and Rev. Archibald J. Caesar, Jr., Woodlawn AM.E. church. A membership drive has begun.

HAYAKAWA

(Continued from page 1)

announced his departure toward bongo, for only for the fact that they borrowed freely from folk music and used a similar, but not quite so "weat" left hand with the right hand playing what it may.

Dr. Hayakawa's lecture concluded the first of a series of all-school assemblies planned for this term. Both of his jazz lectures were attended by record crowds.

MATH CLUB

(Continued from page 1)

clear a fashion as possible with the hope that the primary line may be grasped by those who have had a minimum of formal training. The membership, therefore, by no means limited to juniors and seniors who have taken advanced courses.

In speaking of the club, Dr. Ana- tol Margol, student faculty ad- viser, stated, "for anyone who is generally interested in mathematics, the club offers an opportunity for contact with topics not usually discussed in the classroom. Furthermore, for undergraduate students, prospective teachers before the club is an excellent preparation for further independent research."

SLIPSTICK

(Continued from page 2)

Youthful: "Are you the executive officer? Do you know my grandson, Bill Smith?"

Reese: "Yes, Mr. Stilp. He's on leave just now attending his funeral."

---

A farmer returned from the city to tell of the vandals of the town.

"They call 'em taxidermy rebels," he said. "because they skin ya."

---

A patient complained to the doc- tor that his hair was coming out. "Won't you give me something to keep it in?" he asked.

"Take this," the doctor said kindly, as he handed the patient a pill box.

---

"Here's my bill," said the lawyer. "Please pay $100 down and $25 a week for one year."

"It sounds like hiring an automobile," said the client.

"I am," replied the lawyer.

---

First Coed: "I'm disgusted at George. I asked him which he would prefer, $2 or a million dollars, and he said 'the million.'"

Second Coed: "Don't let it worry you, he knows that if he had the million he could make the grade with you."

---

In spite of modern improvements, love is still made by hands. -Cultural Outlook

Rho Epsilon Welcomes Prospective Pledge

Last Friday evening Lloyd Geigel, president of Rho Epsilon welcomed a group of prospective pledges to the quarters of the honorary radio fraternity. On hand to assist a band of greeting were Dr. M. B. Rens, and M. B. Rens, the past and present faculty advisors, respectively.

On display to the quarters were the various pieces of electrical equipment used by the members in their projects. Of great interest to the visitors was the nearly complete transmitter, station WBFN. A television set, originally on display at the World's Fair in 1933, was operated and a broadcast was presented as part of the evening's entertainment.

Louis Hart Represents IIT

At Pi Tau Sigma Convention

Louis Hart, junior ME, was IIT's representative to the annual Pi Tau Sigma Convention held in Austin, Texas last weekend. Pi Tau Sigma is the national mechanical engineering honor society.

Hart, who was selected by the members of the local chapter to represent Iowa, left for Austin November 5 and is expected to return to Chicago today. A report on the convention will be given at the next Pi Tau Sigma meeting.

---

BROADMINDED ENG'NS.

(Continued from page 1)

The department today maintains several laboratories and keeps on hand a variety of equipment including transistors, bridges, oscillographs, plan photometer, oscilloscopes, tube, power supplies and a large collection of minor instruments.

Of those students who wish to specialize in special Civil Engineering fields, the department maintains a post-graduate school awardsing advanced degrees in such courses as structural design, sewage and water treatment, structural mechanics and various other related subjects.

Perhaps the most well-known re- gion of the Civil Department is the sewer system which has been run since 1905.

The present site of Camp Armour, is on a triangle of land leased from the state conservation commission, bordering on Trent Lake in Wisconsin. It houses eight permanent buildings the largest of which is Alfred E. Phillips Hall, which contains a dining room and houses most of the students. Professor John C. Penny, who is now in charge, has been succeed- ed by the camp since 1911.

While the Civil Engineering De- partment has had few operations since its foundation here, it does hope to offer more complete courses in municipal engineering, soil mechanics, and also hopes to further improve the astronomical options.

Professor John C. Penny said of the Civil Engineering Department that its main aim is to "develop a broad view point of engineering and to graduate engineers who will be able to keep up with the times."

43 Days Until Christmas!

Make your selection of Christmas cards now at the Alpha Phi Omega booth S U Lobby

All types and grades Engraved Cards

CLEAN, FRESH, PURE America's FINEST Cigarette!

Smoke as much as you can like—the flavor's ALL yours, when you smoke PHILIP MORRIS! And A BERRY SWEET, too...

There's an important difference in PHILIP MORRIS that makes PHILIP MORRIS taste better...and you'll discover it...it's the FULL FLAVOR of the world's finest tobacco that comes through for your complete enjoyment—clean, fresh, pure.

Try PHILIP MORRIS—you, too, will agree that PHILIP MORRIS is America's FINEST Cigarette!

NO OTHER CIGARETTE CAN MAKE THIS STATEMENT!

Of all the leading cigarette brands, PHILIP MORRIS is the only cigarette made by a manufacturer whose products are recognized by the Federal Trade Commission and other authoritative bodies as "safe" products.
Poll Seniors For Socials

Events to be Discussed
At Class Meeting Friday

All senior B students have been sent written questions to determine class policy in coming social functions, announced Joseph Melch, senior secretary.

A meeting of the class will be held this Friday at 11 a.m. in the auditorium at which results of the postal ballot will be revealed. Details of the "Senior in Gold" will also be presented. In order to make the meeting a success all seniors are urged to return the stamped addressed postcards without delay, said Melch.

At the last meeting the class elected to hold voting by secret ballot to determine a maximum number of students voting on their opinions in the class affairs. Primary on the postal ballot was the choice of attire for the Senior Farewell of formal, semi-formal, or informal. With Kinoski, class president, stating the reason for the early preparations to get the best arrangements possible for the best and biggest Senior Farewell on record.

The second item on the cards pertained to the choice of a show party in a stage or both. The seniors were to indicate their choice thereby making known their intentions of supporting the party.

Dean Urges Instructors
To Hear Army's New
Military Training Plan

The army's plans for continuous military training will be explained on the Illinois Tech campus next Friday, Lt. Col. Arthur Snyder will discuss the army's proposed training program at 11 a.m. in room 118, Alumni Hall. According to Dwayne of Liberal Studies A. D. Larkin, "Since our present student body is composed largely of ex-service men who may not be directly conscripted, it is hoped that instructors with no conflicting classes will make a special effort to attend."

It has not been determined as yet whether this meeting is part of the army's "You, too, can retire in 20 years" program of present enlistments, or the latest version of the army specialised training program.

Home Ec. Club to Have
Mary Mark as Speaker

The Home Economics Club will have its great speaker on Friday, November 11, Miss Mary Mark, director of Home Economics in the Chicago Public Schools. Miss Mark has designed her talk as of interest to future teachers, and will tell of the importance of stressing a Home Economics education for girls. Miss Rose Erben will give a report of the recent Illinois convention at the meeting. Miss Erben, a sophomore in the department, is president of the Illinois State College Club.

Campus Comments

(Continued from page 1)

certain reforms for the benefit of the students. I would like to help you in this understanding by any means that I may be available to you. The least I can do for you therefore is to let you know how I feel about certain specifics issues as they arise during the semester. If your reactions of the student body voice their opinions in the same manner you will have a better idea of what your classmates think and do. This will make your paper more truly representative. I therefore respectfully suggest that you share these reactions in some way, such as the following:

1. A vote of the students' opinions on the issues.
2. A discussion of the issues in a class meeting.
3. A letter to the editor of the school newspaper expressing your views.

I hope that these suggestions will be helpful to you in your work.

(Signed) A Student

Quiz and Refreshments
Greet ME Frat Pledges

During the last seven days, the ME Frat pledges have been quizzing on the eleven new Pi Tau Sigma pledges. The officers of the ME Frat have arranged for a mechanical hop on the pledge table to give the pledges a chance to improve their scores. The pledges have been very cooperative and have shown great improvement. The officers of the ME Frat have arranged for a mechanical hop on the pledge table to give the pledges a chance to improve their scores.
