COEDS SPARKLE ON COURT

Illinois Tech vs. Vassar... Thursday afternoon in the new gymnasium. Although the race was not close, all students are proud of the team.

Good game, darling! It's not too far from home...

Probably the only engineering school in the entire country to field an athletic team composed entirely of girls, Illinois Tech's gymnastics team is rapidly increasing female enrollment, putting pride in this new development.

Every Thursday and Tuesday afternoon from 7:30 to 8:30 p.m., from the fall of 1947 onwards, the "50-Man Affirm" sign hangs in the gym. The team, made up of 15 appropriately dressed Techbuckettes, has been trained and schooled in the art of this form of entertainment.

"Our immediate goal will be to challenge and defeat a team composed entirely of men," agrees the girls. "And for as far as they are concerned, we'll come in dead last!"

An added note: the girls wear black tights and a white blouse, but they will not be allowed to wear any other form of protection. The men will be given the option of wearing either black trunks or black shirts.

New System Eliminates Long Virgil For Convicted Classes

Starting 50-Man Contingent Chosen by Lot; Following Lower Groups Go Next

A new registration procedure will be put into effect this coming semester. The purpose of the new plan is to provide a fair system of registration for all students and to eliminate the necessity of arriving six to eight hours ahead of schedule.

The new system is based on alphabetical distribution and will operate as follows: each class will be broken up alphabetically into groups of approximately 500 students. These groups will then be given a certain time to report for registration. Those who arrive late will be given the option of registering at the time the group ahead of them has completed its registration. Those who arrive late will not be allowed to register on the same day as their respective group.

The students will register first, then junior classmen will be registered, followed by senior classmen. Freshmen and sophomores will register on the same day, 30th and 31st of classes, and will register on the same day as the sophomore class. The freshmen and sophomores will register on the same day as the sophomore class.

Changements in registration and new requirements for registration will not be made until the first five days of registration have passed. The changes will continue until the last two weeks of registration. Registration at the downtown center will be discontinued for the remainder of the semester.

Reorganized Dramatemy Needs Amateur Actors, Actressmes, Stagehands

A revitalized Dramatemy will soon make its appearance at IIT due to the efforts of a small committee of students.

A group of interested students recently announced that they will be reorganizing the Drama club, and that the free-for-all attitude of the previous group will be replaced by a more serious approach to the theater.

The group will function as an extra-curricular activity, under the guidance of Dr. Robert B. Peterson, assistant professor of English.

The group will function as an extra-curricular activity, under the guidance of Dr. Robert B. Peterson, assistant professor of English.

The committee will meet on Tuesday, November 15, 1947, in the auditorium of the Administration Building.
Soy, Dad Dearborn—
It's Time For Action

On June 6th, 1982 a forward slide was made by the planning faculty when they constructed the elevated system to support the streetcar lines. Also in 1982 the school now known as Illinois Institute Technology was founded. Since then Illinois Tech has grown from 1000 students to over 8000 students. In this time, many important innovations, the general scheme of transportation has remained the same.

The truth is that we're being picked on or suppressed, it's just that we're forgotten. Everything has happened so fast, and others were so distracted with the good-natured bunch of engineers who worked to and from 33rd and Lake, we feel the draft from the gap in our transportation system.

Our patience has been exhausted. We feel this is the time for ACTION. Let's mobilize the entire campus community to fight back. Now we would like to see the fruit of our forbearance, namely improved facilities, but for the time being, please.

We are the proud of the entire gymnasium, which, although not a permanent structure, is a 6000 sq. ft. of floor space to the campus. However, this gymnasium where all our home basketball games are played has no seating facilities for spectators.

Although little room is available for these bleachers on the north, west, or east walls of the gym, adequate seating arrangements could be provided between the two courts. Several companies offer a roll-away type of bleacher seat that would be ideal for this purpose.

Spectators are as much a part of the collegiate basketball games as the players themselves. Let's not deny students the chance of watching outstanding games for our team when they play on the campus.

Technology News

Although many WebNodes have been installed on the campus, the installation of the new system has been delayed due to technical difficulties. The system is expected to be operational by the end of this month.

1924 Urbana-New York Blowout Champ Now IIT Research CE Professor

Although Linton H. Griswold, professor of civil engineering, is listed in several volumes of "Who's Who," and is a noted author, consultant, and research associate, one of his proudest claims to fame is for "number of blowouts from Urbana to New York in one season." In 1924, he led his team to victory in the Chicago Daily News trophy.

Jeepers - No Bleachers!

The frequency with which IIT's E5800 hardwood basketball courts are mentioned in Technology News is probably a reflection of the campus. We know these courts have been mentioned quite often but we're proud of them.

The results of this expansion are probably most noticeable in research progress. This is due to the fact that the university now has a 200,000 sq. ft. building for use by all students. We look forward to seeing the increased activity in the research field.

Dr. Preston Bradley Inspires Chicago

Changes have been forthcoming in our lives. In addition to the usual things we've been doing, there have been some exciting changes. One of these is the installation of a new tennis court.

The court is located at the corner of 33rd and Lake, and is open to all students. The court offers an excellent opportunity for recreational tennis as well as competitive play.

World Seems Far Away In Parly Sound-Proof Room

Close to the Rock Island's thunder, and even closer to the chance of the South Union collision, can be found what is probably the quietest spot in Chicago. This is the sound-proof room in the Parly Foundation for auditory research, where Graham a sound drop of eighty decibels—a reduction in sound energy of one hundred million times. The shivering window shews 99.9% of the sound in the room above 150 cycles per second.

Man of the Week

I. C. Hamilton, Student Gourmet, instructs Wife in Art of Cooking

I. C. Hamilton's greatest virtue is that he is not a technician (for your information, a car top is in the variety of men who can't see beyond the end of his nose). As a matter of fact, we were both of the opinion that he is the only one in our circle of friends who really understands the meaning of the phrase "a gourmet". But for this, we should never have thought of him as such. His wisdom in the kitchen is without parallel. His wife, who was taught by him, is now taking lessons from another chef.

In the kitchen, he has a table set for two, with a letter from him: (1) his meals are well balanced; (2) his cooking is simple; (3) his wine list is limited. He is also a great reader, and his bookshelf is always full of new works.

When asked to name some of his favorite authors, he replied, "Levi Strauss and Walt Whitman. I don't read much, but I do like their work."

A. C. Hamilton, a graduate of Chicago, has been teaching at the University of Illinois for a few years. He is a member of the American Chemical Society and the American Association for the Advancement of Science.

For the future, he plans to publish a book on the chemistry of cooking.
Tunnel System Connects All New Tech Buildings

Upon completion of Illinois Tech’s $150,000,000 post-war building program, the IIT Polytechnic is now a fully integrated complex. The new buildings will be interconnected by an extensive system to provide for transmission of a central heating system, central air conditioning, telephones, and intercommunication, and trash disposal. One of the most advantageous aspects of this system is the elimination of duplicate plumbing and electrical systems.

New Men Added to Board of Trustees

Several important changes have been made in the administration of Tau Beta Pi, announced Grant L. Hansen, president of the national Tau Beta Pi chapter. The changes include the reclassification of a number of positions, the addition of new members to the board of trustees, and the establishment of a new annual meeting. The new board includes three new members, including Alvin L. Diller, chairman of the board, Paul A. R. Anderson, president of the Illinois Tech Student Senate, and John E. L. Ross, president of the National Association of Student Actuaries. The new board also includes three new members, including Alvin L. Diller, chairman of the board, Paul A. R. Anderson, president of the Illinois Tech Student Senate, and John E. L. Ross, president of the National Association of Student Actuaries.

High School Graduates Offered Fee. Admission

New high school graduates are eligible for a fee. Admission to Illinois Tech offers a chance to earn a degree in one of the many fields of study available. The new program is designed to provide a strong foundation for students who wish to pursue a career in engineering, science, or other fields of study. The new program is designed to provide a strong foundation for students who wish to pursue a career in engineering, science, or other fields of study.

Kubas Named Head of Alumni Relations

David Kubas, vice president for student affairs and director of alumni relations at Illinois Tech, has been named head of the alumni relations office.

**Six Techawks To Represent IIT Under Proposed NSA Membership**

If Illinois Tech affiliates with the National Student Association, at least six IIT students will have the opportunity to take part in the formation of NSA programs and policies each year. Under the NSA constitution, a system of proportional representation was devised which allows Illinois Tech three delegates and three alternate delegates at the annual national student congress. This group, which will consist of from one to seven delegates from each of the student bodies which are members of the NSA affiliate association, will meet annually at a prominent university campus.

At these annual meetings the delegates, in addition to forming NSA programs, will have the opportunity to enjoy the fellowship of campus members from all over the United States. They will be back to their campuses with new ideas and plans obtained from fellow delegates to supplement the NSA programs of student bodies. During the period between the annual sessions of the national student congress, the Illinois regional assembly will meet several times.

In order to provide the programs contemplated, a fund of $250 for NSA activity was set up by the delegates at the national convention this summer. It is an integral part of NSA policy not to accept donations or funds from outside organizations or groups. Therefore it was decided that such school would pay them in proportion to its representation, and a similar method of financing regional activities was decided upon.

The sum from Illinois Tech to the national organization will be $25, or approximately four cents per student. In our case the money would be provided by the IITA fund, with which it is formed from the student activity fees. The regional class has not yet been decided upon but will be from one quarter to one half of the size of the national class.

Kolloway To Speak At Sports Smoker

White Sox Star And Varsity Matches
Head Alumni-Honor I Program

Don Kolloway, star second baseman for the Chicago White Sox, will speak at an annual Alumni-Honor I Banquet and Games. This time, he will not only discuss the personalities and happenings in the White Sox, but also share stories of his time as a student at the University of Illinois.

The program will be held on campus Wednesday, November 15th. It is open to all members of the student body and alumni who are interested in hearing about the experiences of a famous alumnus.

Fencers Book Three Meets

Illinois Tech's fencing team, formed just last year, is now rapidly gaining popularity here. Hoping to better their first-year results, the team now has four meets scheduled with three schools—Calverton Military Academy, a Junior college, LaGrange junior college, and the University of Chicago. These are aimed to build and make as a total of 16 matches scheduled. Illinois Tech has not been involved up to now, and there are several other schools from whom a report has been received. The total number of 16 matches is expected to end in

"New" is the word: Not "Yes," or "No," but just plain "New," and how can they help it when talking about Illinois Tech's baseball situation for the 1948-49 season.

To begin with, the Techbaseball is boasting a "new" coach in Steve Jones, who is in turn a "new" system. All the home games will be played in "the "new" gymnasium, and practically all the "new" will be "new stories of the fans.

In September, a former star at the school, took on the head coach of the team. In June, with the beginning of the school year in September, he returned immediately to his proper position. He refused to be substituted, without the understanding of allowing a staidold guard to take his place, which incidentally raised as another "new" in our list, and probably two of the most important ones.

You gotta start at the beginning, and that spells Techbaseball in our book.

With the introduction of the "new" coach and his "new" system, the "new" system of baseball is now in full swing. Long a game among the higher novices Eastern quintets such as Rhine Island, the "new" coach has made the game more popular than ever before. The "new" coach, with Carl Seipert, the 6-foot 6-inch center fielder, will play the pivotal position.

The remaining situations—

"a" battery, is building a mound of compliments and freshmen for the first-string positions.

Wrestlers Schedule

Meet, Prospects Good

Three dual meets are scheduled for November: November 19, third meet at the Alumni Banquet; November 25, University of Illinois; March 15, Bradley University; January 16, University of Chicago; February 28, Western Illinois University; and March 13, LaGrange College.

The programs are expected to be competitive, with prospects for good results.

Sports Personality Of The Week

S. N. Salati

Jim Gibson, better known as "S. N. Salati" in the sports world, is a student at LaSalle High School where he played football and basketball. He lettered in football and basketball his senior year at LaSalle.

In September, he began his freshman season at the University of Illinois and quickly became a key player for the Techbaseball.

In his first season, he scored more than 200 points and was named to the All-State team. He is expected to continue his strong performance as he enters his sophomore year.

Intramural football has brought forth several outstanding players. Les Johnson, forward player for the Freshman Grid, was named to the Nebraska "all-state" High school squad. Bob Wilkes of the Junior Grid also

Wrestlers Schedule

Meet, Prospects Good

The "White Collar" grid is also faring well this season. While a few wrestlers might prove to be the most promising, the overall team is expected to have a good season.
**Pigskin Prophet Entries Break All Previous Records:**

**Purdue And Columbia Score Upsets To Mar Perfect Card**

We don't like to continually start out our coverage trying to refrain from boasting, you know. This shouldn't come as a surprise, but when the number of entries approaches 300, we must admit we're impressed.

And in this case, we're not just boasting. Pigskin Prophet has drawn more entries each year than the glass electron from vote each year. All we've got to say about it is, thanks in a lot for your support.

The same Green Bay Packers win over the Chicago Bears last week provided the upsurge that is being experienced by Pigskin Prophet fans this year. The result shows that the enthusiasm is carried to the highest level.

Pigskin Prophet fans are invited to submit their picks for the last two weeks, including an upset upset, and the prize will go to the one who correctly predicts the outcome of both games.

**Frosh Soph Play Friday**

The Frosh-Soph football game to be played Friday, November 7 at the Laushey bowl, will be a battle of the best. The Frosh team, led by Freshman Quarterback Joe Valparaiso, has a strong defense, while the Sophomore team, led by Sophomore Quarterback Bob Valparaiso, has a strong offense.

The game will be played on a 3:00 p.m. field, with a few hundred thousand people expected. The game will be played after the Frosh-Soph game, and the winner will be determined by a coin toss.

**UK QZBD**

"I'll read the last line first---it says Dunster Chewing Gum."

"Why? That's because it's the best, and it's made by Dunster."

"More people are smoking Camel's than ever before!"
