Student Grade Point System Revised

'D' Will Assume One Unit Value; Probation Policy Reconsidered

Student grade point averages at Illinois Tech will be computed by a new system, to be in effect during the fall semester. Under the plan, adopted by the Academic Council Wednesday, a grade of 'A' will receive four points, 'B' three, 'C' two, 'D' one, and 'F' zero. This major change is part of a plan to give the evaluation of the grade 'D' a new dimension. Under the present system, this grade receives no credit points, John F. White, then of students and chairman of the Academic Council, has but the matter under consideration for some time. He stated, 'The grade analysis made by the registrar's office that indicated that the grade 'D' is more frequent than any other quantity on the evaluation scale.'

'T' Will Assume Two Unit Value; Probation Policy Reconsidered

May Apple Stated At Lake Shore Club Saturday Evening

'May Apple' the sophomore dance, will be held Saturday evening at the Lake Shore Athletic Club.

No Damsels

Today's Technology News survey shows that by the time engineering students reach their third or fourth year they've become somewhat disillusioned with the advantages of being a star-studded joker. Perhaps they're finally discovering that all engineers can't run around staining formal invitations or receiving beautiful damsels at Lake Shore Athletic Club.

Bidding, the pay is low.

Kiddies On Kampus Promises Exciting Time For Youngsters

Invitations for Kiddies On Kampus, a party for the children of the students of Illinois Tech, have been mailed to 254 freshmen, Mr. and Mrs. Ward O. Osborne, and their four-year-old son.

A party for the children under five will be held May 21 at the North Union lounge. The party is sponsored by the Parent-Teachers Association and the Home Economics Club, two other sponsoring groups, in order to entertain the youngsters.

Setup plans are for refreshments and games.

Expect Large Vote In Class Elections

Elections for class officers will be held in the North Union Sunday. All candidates' petitions must reach the ITSA office by Friday afternoon.

This will be the largest election held at IT, according to Warren Brennan, chairman of the election committee. He pointed out that the last general election in 1959 was held in the North Union, and the large number of candidates running.

There are 41 elected officers in the 4 classes and ITSA, candidates who have turned in their petitions, are listed on the election bulletin board in the North Union.

As in last semester's elections, the voting will be run on the preferential systems. The voter, when marking his ballot, grades all of the candidates for a position in a class in the order of his choice. The candidates with the highest zero-preference ratings will be elected, and their ballots distributed to the other candidates in the order of their choices. The candidates with the highest preferred ratings will be elected, and their ballots distributed to the other candidates in the order of their choices. The candidates with the second-preferred ratings will be elected, and so on.

Several revisions of the ITSA constitution will be offered for voting. Revisions to the constitution will appear in the next issue of the Technology News.

Travis Assumes Director's Job June 1

Fred R. Travis, admissions counselor at Illinois Tech, was named director of admissions on May 21. Travis succeeds George L. Hasstedt, who has held the position since 1945.

Travis joined the admissions department staff last summer after attending the University of Illinois. His duties include recruiting, counseling, and job placement for incoming students.
Letters to the Editor

Roar of Political Battle Nears; Claims 'Machine Politics' Grow

Dear Sir:

As it seems to be another Kelly-Nash or Dugger-Dastar machine politician growing at the polls, the present issue of the bulletin board in the student union or the student union president's office will mark him "very enthusiastic."

But this favorable mark here, according to all available research material on the matter, shows negligible correlation with the actual number of votes cast for him by the students. Students evidently don't think much of this sort of enthusiasm. It seems that enthusiasm is a "preparation for change meetings" is "carefully planned."

A typical comment from a student administration that has been used and not used, but very often, is the official's (the old governor's) "It can be seen in the eyes." This comment, according to all available research material on the matter, shows negligible correlation with the actual number of votes cast for him by the students. Students evidently don't think much of this sort of enthusiasm. It seems that enthusiasm is a "preparation for change meetings" is "carefully planned."

Petition Information

Dear Sir:

During the last few days several students have approached me inquiring about the possibility of a petition for some of the students to attend the first World Atomic War. Any students who would like to be listed on the petition should contact me at the office in the Student Union.

Economics Professor Talks It Over; Examines Problems Of Registration Counseling

It wouldn't be a bad idea for the individual to have an idea of what he wants to register for in the future. For example, one of the more interesting problems arises in the registration of courses. In the past, students have been very much interested in the registration of courses, but now, as the number of students increases, the problem of registration becomes more difficult. The problem is not so much one of how to register for courses, but rather how to keep track of the students who are taking courses.

In the past, students have been very much interested in the registration of courses, but now, as the number of students increases, the problem of registration becomes more difficult. The problem is not so much one of how to register for courses, but rather how to keep track of the students who are taking courses.

By Henry Hata, Professor of Economics

There are always the possibilities, if I advise incorrectly, that he might register for some subject and then become interested in something else. This is the reason why I advise students to choose their courses carefully. The value of an education is in the process of acquiring knowledge. Unfortunately, however, this is not always possible. If I were to recommend a specific course, I might be considered as a fool. My advice is not to suggest courses, but rather to help the student find his own course of study.

M. Most of our courses can only give you a conceptual general principle which might be useful in managing a large number of jobs. But you really don't have any serious problems managing students for specific jobs. One reason for this is that there are thousands of specific jobs and only a limited number of courses.

H.: Well, I think the course in industrial relations is practical, don't you?
H.: It must be. We have to help students find jobs. We have to help students find jobs.

M.: Practically, you need to do something practical. There's no way of getting that situation without a serious change in the curriculum—perhaps a series of lectures on the philosophy of higher education. (Paternalistic)

H.: I'm not sure what I'll do after graduation but there's a chance that I might become a graduate student in economics.

M.: That's fine. We'd like to have you as a student. If you are interested in the curriculum, you might want to take an additional course in economics.

H.: I've had that course. That's what I want to do. So, should I take an additional course in economics?

M.: That's fine. We'd like to have you as a student. If you are interested in the curriculum, you might want to take an additional course in economics.
Great Time—Great RECORD

It’s Bob Eberly’s version of “You Can’t Run Away From Love.” —Decca Record Release

Bob Eberly, the romantic ballad singer, gives some old but good advice to cuddle-uppers.

And Bob has another good word for smokers. As Bob sings it, “I’ve tried a lot of different kinds of cigarettes, but Camel’s suit me best.”

Try Camel on your "T-Zoos"—"T For Tobacco..." T For Throat. See for yourself why Bob Eberly and countless other smokers who have tried and compared, Camel’s are the "choice of experience".

And here’s another GREAT RECORD

More people are smoking CAMELS than ever before!
Instructors' Origin Revealed; Some Arrive Via Grape-Vine

By Henry Holmes

Where do ITA's instructors come from? There are a few native individuals among us who think that the stock brought them, but the time has come to be more honest, cold facts on that matter. Though faculty procurement to department, a more or less informal procedure is used by all. Because of the closely integrated condition of professional fields and the need for a professional person to fill a particular post, the ITA's of necessity to be "discovered" at professional congresses, such as those of the ASME and ACME.

Keep Tallest Flags

Now instructors are also brought from the grapevine method; very often when there is a need for a "schatz" with a high-ranking faculty member, one of the members of that department will comment to the department head that "I heard Dr. Jones at XXY university is a good man," or "I read Dr. Jones' latest paper, and he seems to have some good ideas." Comments of this type are often the beginning of a beautiful friendship between Dr. Jones and the department. Most department heads keep files of professional men who would be useful for the occasion.

Tucky Minnow

A technique in some departments involves a letter societies, requesting information on outstanding graduates. These requests are often directed toward department heads in landing outstanding candidates, and are given considerable weight in the selection to ITA.

A Confidential faculty review has been developed, a period of period evaluation. The influence on the entire faculty is amazing, and it has been effectively to look over ITA and meet his potential sources of supply. It is an excellent method of selecting experienced, reliable, and committed members, and requires no additional effort on the part of the university.

Tea-Time Jobs

Investigation of the candidate increases as the tenure of his prospective position increases. Instructors are hired for part-time teaching in the summer periods and may be retained (with sufficient)

Leedy Names Jett

As Assistant In Research Foundation

Edgar A. Jett, III, has been named assistant director of Armour Research Foundation of Illinois Institute of Technology. It is an appointment which was made by President Leedy, director of the foundation.

The appointment became effective May 1.

Mr. Jett joined the Foundation, in 1941, as its director of sponsored research. Previously he served with the General Electric company as director of sales for the state of Ohio and his associates in Cleveland.

As a member of World War II, Mr. Jett served in a Third Army tank combat team. He was called to active duty and was awarded the Luxembourg Croix de Guerre, the last European award. In 1945 he was assigned to the Inspector General, Washington, D.C., where he worked with industry on quality control and production.

Top Technology News

Staff Positions Open

Applications for the positions of Director of Marketing, Director of Research, and Director of Technical Assistance of Technology News are now being accepted, according to John T. White, director of the group.

Any regular day school student may apply for a position. Qualifications are not limited to a full-time position at the White residence. The position is open to all students.

ASME To Hold Joint Banquet Meeting Tonight

The Chicago junior branch of the ASME will hold a banquet meeting tonight in the South Union lounge at 6 p.m. The meeting will be open to all members of the ASME, president of the ASME, and officers of the ASME.

The meeting will be held at the South Union lounge today at 5 p.m. The meeting will be open to the public and all members of the ASME, president and officers of the ASME, and the ASME. The meeting will be open to the public and all members of the ASME, president and officers of the ASME.
Techmen Talk
By Sarah B. Neudelmann

Question: How does it feel to be the only girl in your class?

Marilyn Jensen, freshman, Chemistry.

It’s okay, but I imagine the debates get a little heated sometimes. I think a girl can do anything in this world, but I do feel a little nervous about starting college. But when you see that there are only two men in your class, you realize that it’s not as big a deal as you thought. I think it’s important to be yourself and not let others define your role in the classroom.

Clinical And Industrial Psychology Courses Scheduled For Summer

Informational and clinical psychology courses will be offered through August 4. These courses, which are scheduled for early morning and afternoon classes, will be taught by experienced instructors. The courses will include lectures, discussions, and hands-on activities to help students develop critical thinking skills.

Techawks Drop Youthful Squad Drops Games To C.T.C., Lake Forest, DePaul

The Techawk varsity basketball team stumbled badly while playing for the first time against opponents at C.T.C., Lake Forest, and DePaul by the respective scores of 12-12, 10-1, and 9-2.

The losing streak began as the Techawks took on the试卷的解答部分并将其翻译成英文内容。
Sports Personality Of The Week

By Ed Jennings

Jim Sauer was one local student who has lately been showing that he is the man for the job of breaking tapes at Tech track meets. Without doubt, the most improved runner on the Colonials’ squad, Jim has been consistently besting his efforts, and is a consistent winner. Upland comes here or an improvement in the offering. Sauer stands to crack the all time Illinois Tech record for the half mile run in the very near future.

Jim attended Eastern High at Aurora where he was a member of the cross country track team and specializing in the distance events. After graduation in 1944, he started in the bright lights of Grandpa’s track where he has found himself in the current outdoor season, where he recently executed a grand slam by winning the Illinois, Indiana and District meets. He is a member of the winning team in the mile relay all season in that meet.

Toscano visited Chicago Teachers H.S. at Armour Square Stadium, Saturday, 1 p.m.

In the third quarter, Tech’s band played Blithe Spirit Classics, while Tech was leading, 21-17. The band performed its best and the fans turned out to support it. The game ended with the band in control.

Tennis Team Down North Central, 4-2; Hall Triumphs in Record 21-19 Set

In a meet highlighted by a 21-19 set in the second singles match, the ITU tennis team suffered a defeat by Miami of North Central. The second set of the match was won by ITU in two sets, and the third set was lost by Tech in two sets. The second set was won by ITU, 8-0, and the third set was won by Tech, 8-0.

The singles by Techs were won by the singles by winning the first set over North Central. The second set of the match was won by ITU’s, 8-0. The second set was won by Tech’s, 8-0.

Because Philip Morris is
DEFINITELY LESS IRRITATING
than any other leading brand!

All over America, smokers who have changed to Philip Morris tell us...they now enjoy a milder smoke, a fresher aftertaste than they’ve ever known before.

Yours, there’s a difference in Philip Morris that distinguishes it from all other leading brands...

If you’re tired of “cigarette hangover” — that stale, musty taste in your mouth — that dry, smoky feeling in your throat...join the millions who call for Philip Morris, and remember...

Of all leading cigarette, Philip Morris — and only Philip Morris — is recognized by ambient nose and throat specialists as definitely less irritative!

NO OTHER CIGARETTE CAN MAKE THAT STATEMENT!

Read What One of America’s Top-Ranking Doctors Says about Philip Morris.

I have often suggested to patients who smoke that they make the switch to Philip Morris, and I continue to believe that Philip Morris is the best cigarette because Philip Morris is definitely less irritative.

This is a set of professional statements.

I’ll be glad TOMORROW you smoked Philip Morris TODAY!
Orchestra, Glee Club Journey To Starved Rock For Concert

Starved Rock state park will again welcome the Illinois Tech music clubs on May 29, when the second time in two years, they will perform there for park visitors.

In order to arrive in time for their first performance at 3 p.m., the clubs will leave the campus by bus at 2 a.m.

Between the time of their arrival and the concert, the groups are to explore the many paths at the famed outdoor playground.

At 3 p.m., the program will begin with a concert by the band in the pavilion, followed by a glee club program in the nearby lodge. Following the concert, the clubs will go to the area.

In the evening, the students will journey to Starved Rock when they will appear for the local Rotary club, chamber of commerce, and a church. A variation of the program used at the Spring concert will be presented.

WSE President Will Speak Tuesday

William V. Kahrer, president of the Western Society of Engineers, will speak at the all-school assembly Tuesday on the subject "Engineering as a Profession and in Industry." A member of the Illinois Tech Board of Trustees, he will be sponsored by the Illinois Tech Branch of the WSE.

From 1921 to 1924, Mr. Kahrer was assistant director of the construction section, production division of the National Defense Advisory Committee. He was then appointed assistant vice-president of the Illinois Bell Telephone company and, from October 1924 to August 1926, was the general manager of the Illinois area. At present he is vice-president in charge of operations of the Illinois Bell Telephone company and president of the WSE.

Second Term Sophomores Take Tests Tomorrow

The Department of Psychological Services of ITT will administer an all-day achievement test to 352 second-year sophomores tomorrow.

Results of this test, to be given to all colleges throughout the nation, will be pooled and compared with those of similar tests administered in other institutions.

Less than 10 percent of the students take a battery of tests comprising a comprehensive evaluation in general education, while engineering students take tests in a mathematics and science program, sponsored by the American Society for Engineering Education, Engineering Council for Professional Development, and Carnegie Foundation for the Advancement of Teaching.
