Golden Curtain Opens On 'Male Animal'

Dean J. C. Peebles Plans Retirement At Year's End

James Clinton Peebles, dean of engineering, today announced he will retire at the end of the year, after an association with Illinois Tech and its predecessor institutions which extends over nearly a half century.

At 67, this "grand old man" of the faculty is the only individual now associated with Illinois Tech who attended both Lewis Institute and Armour Institute (now IIT) in 1899 to form Illinois Tech and who in 1905 was a member of the academic staff.

48 Years With Institute

His association with Lewis began in 1899 as an undergraduate. After two years, he transferred to Armour, from which he received a degree in electrical engineering in 1895.

After a brief period as a high school teacher in Wabash, Indiana, as instructor at Cornell, from which he received his master's degree in mechanical engineering, he returned to Armour Tech in 1905 as an instructor in machine shop engineering. He will complete his 50th year in June.

"Fredly," as he is known, Dean Peebles has been a fixture in the tech scene for more than 50 years. He has been a leading research engineer in the field of automation and robotics.

"Graded" Flow Institute

He designed and built an instrument for measuring flow levels, also adopted as standard by the American Society for Testing Materials and used as standard equipment in

Open House Committee Discusses Future Plans

The Illinois Tech Open House Committee will meet tomorrow at 11 a.m. in RM 474.

Student representatives of all departments and students interested in participating and procedures for open house activities will be discussed.

Friedrich To Talk On European Reconstruction

All classes will be excused Friday at 11 a.m. for the special all-campus assembly at which Dr. Carl J. Friedrich will talk on "European Reconstruction and the Future of a Democratic World Order."

Dr. Friedrich, now speaking at Illinois Tech under provisions of a special appointment by President Eisenhower, was appointed to IT from the National Foundation for Education in American Citizenship and an anonymous graduate of Armour Tech.

Called to Washington

Dr. Friedrich, recently called to Washington as a consultant on special occasions, is the Harris professor of international relations at the University of Chicago. He will return to Armour Tech next fall.
Two articles... NSA In The Soup?

tional facts are obscured in strange and wondrous ways.

During the last decade, the multitude and complexity of agencies and bureaus in federal government has fostered an indifference and cynicism to the 'them' in favor of the 'us.' The situation in the alphabet soup is the WPC, FBI, CIA, NSA, DIA, and other intelligence agencies and bureaus. Each operates with its own rules, regulations, and ignorance which occurs when a label replaces that which it stands for.

NSA stands for the National Security Agency--a fact which some Illinois Tech students know--but how many know that students at colleges and universities all over the country are faced with problems remarkably similar to those at IIT? That apathy to social affairs, student voice in disciplinary committees, and other problems familiar to IIT students are also matters of grave concern elsewhere? And that the National Student Association is an organization primarily conceived to find a joint solution of such problems?

Although the Illinois Tech Student Association has not yet affiliated with NSA, its effect has already been felt on the campus. The rapid strides made by the newly-formed Student Coordination Committee of the association in accordance with recommendations made by the assembly of student problems gauntlets.

There's a great deal behind the letters NSA.

My Head Is
Bending Low

We can't count on our crooked "the world has come to an end!" Our Morality, is our Punctuation editor has resigned.

And our Editor-in-chief has been attempting to control his operations -- and home with a temperature of 105. (Our last one was 103.)

All this events coming at the same time have a tendency to appeal to the Ann Arbor "Hells Angels" -- even the witness. HA, HA.

But there facts also point the way; they are a forerunner of the future -- a not-such-distinct future -- a future that will be willing to spend from 15 to 30 hours a week as a member of the Michigan Tech News. The reason is because it is becoming increasingly difficult to put out a campus newspaper -- a newspaper that will be a credit to the biggest and ever growing Illinois Institute of Technology.

In space no larger than a pre-war classroom, the enrollment of 50 students around to trying to put out a paper, between afternoon and evening morning lectures.

More for the working quarters. All stories must be made available now and not put off by the unsaid reason. "Well, where will we get our sugar?"

We are trying to build a newspaper staff, not kill it off.

Letters to The Editor

Student Blasts Placement Jobs; Calls For More Thorough Probe

Dear Sir:

I wish to bring to your attention the fact that our Placement Office has been giving job opportunities to students who have not been properly prepared for the work.

I believe that it is important for the Placement Office to give proper training to students before sending them out to companies.

I am confident that if the Placement Office would take the time to properly train students, the number of complaints that are made against them would be greatly reduced.

Sincerely,

[Signature]

Student

New Publication Sought

Dear Sir:

I am writing to express my interest in starting a new publication at IIT. I believe that such a publication would be beneficial to the students and faculty of IIT.

I have conducted a survey among the students and faculty of IIT and found that there is a significant interest in a new publication.

I would be happy to provide more information about my proposal and be available for any questions or concerns.

Thank you for your time and consideration.

Sincerely,

[Signature]

Collegewide News

Stipend for Food-Have $?

By Don Goldstein

One student claimed that the food plan, which requires a minimum of $200 in food purchases, is unfair. The student argued that the food plan should be adjusted to meet the needs of all students, including those with lower incomes.

Another student suggested that the university could provide more options for students who are unable to purchase the required amount of food. This could include increasing the number of dining hall options or offering more affordable meal plans.

The university responded that the food plan is designed to provide a balanced and nutritious diet, and that it is important for students to stay within the budgeted amount. However, the university acknowledged that there may be room for improvement in terms of affordability and accessibility.

Student Union

Tech News

Looking with alarm at the "inflation" that just took place at Northwestern University, the Tech News, in a series of articles, tries to prove the validity of its claims.

"The Three Centenarians"

"That brings a smile to my girl's face;"

When I run to Smith the other day and talked with an old class as good as I am, and when I saw the people who were interested in it, Mr. Gold, I want to introduce you, and Mrs. Hicken, of Pottawatomie county, Kansas. Said Gold, "Black? No, you don't know what I do with Hicken here in New York City."

Hicken: "Yes, I can't say that I do."

But I know darn well what we do with Gold and Kansas.

Talking about see.

Reporters: What shall I write about those three?""

We have a girl who's as bold as she looks and she's a scholar of Kansas.

Saturday Classes--They're Wonderful!

By "WIP" Bill Furrison

Just when the registration procedure is becoming more complex--acceptable to the people in the first half of the alphabet--the whole system in-coherent to foreign students.

There's a time, now, when a student who registered at Illinois Tech was reasonably confident of the classes he was going to take. Now, he's at a loss for what to do.

Now he grasps any available, unless copies of the catalog are available in every classroom, and he is left to arrange the classes for "morning convenience." The new system is fine, but it requires a great deal of planning.

Typical of the new system is the fact that a student who registered at Illinois Tech was reasonably confident of the classes he was going to take. Now, he's at a loss for what to do.

The university responded that the food plan is designed to provide a balanced and nutritious diet, and that it is important for students to stay within the budgeted amount. However, the university acknowledged that there may be room for improvement in terms of affordability and accessibility.
Paul Gives Up Editorship—After All, You Gotta Eat!

By John C. Dobin

One of the big news stories of the district fall semester of '67 was the resignation of Paul A. Thompson, Editor-in-chief of Technology News. Thompson's unusually interesting article appeared in this issue, but it was not a great surprise to his close friends and associates. Paul's dilemma is a familiar story on every campus in the country. It means the loss of stimulating extra-curricular activities for some, but no great loss for those closer to the heart of the U.S. Army and U.S. Air Force Recruiting Service.

Paul A. Thompson is a senior at Illinois Tech, majoring in electronics and having a minor in mathematics. He has been a member of the Illinois Tech chapter of the National Society of Engineering, a member of the Illinois Tech chapter of the National Honor Society, and a member of the Illinois Tech chapter of the National Association of College Women. He is also a member of the Illinois Tech chapter of the National Association of College Men.

Paul's resignation was accepted by the Illinois Tech chapter of the National Society of Engineering with much regret. He has been a very active member of the chapter, and his resignation will be sorely missed.

76 High Schools Send 620 Alumni To Illinois Tech

Alumni of 76 high schools throughout the country are represented in this year's Illinois Tech alumni group, according to the Illinois Tech Alumni Association. Among these schools, 36 are public, 22 are private, and 18 are parochial. Of these, 29 are located in the greater Chicago area, 22 are in other parts of the state, and the remaining 25 are in other states or countries. The alumni of these schools include a wide range of professions, from teachers and doctors to engineers and scientists.

Freshmen In Need Get Chemistry Tutors

A new tutoring service is being offered by the Chemistry Department to freshmen in their first year. The service is designed to assist those students who need help with the basic concepts of chemistry.

Tonight and Tomorrow Night - 8:15 PM

"I'll be up there soon!"

Up where the ceiling's unlimited and the horizon's as wide as the world! Up where there's freedom and adventure—and a man can dare to do what no man's done before!

You're on your way up there when you join the Aviation Cadets. After a year's pilot training, it's silver wings for you—and a commission as Second Lieutenant in the U.S. Air Force Reserve.

The opening of the new}

U. S. Army and U. S. Air Force Recruiting Service

Colliers, with a future

U. S. Army and U. S. Air Force
Staff Will Cooperate
On Junior Week

With Junior Week only eight weeks off, the student Open
House committee, together with its faculty counterpart is laying
plans to create an interesting program for the multitude of people
expected to visit the campus during Open House this
year. President Henry T. Halil has arranged for the academic
staff to cooperate with these committees in order to coordinate the
Open House program of Junior Week into an established activity at Tech-

nology College.

Faculty Recommends

The Faculty Coordination commit-
tee, under the chairmanship of Rob-
ert C. Kistner, dean of the gradu-
ate school, has revised its pre-
vious lukewarm attitude toward the
traditional campus tour and will look to co-
operate with the festival to make the semester's program a success.

Under a revised schedule, students will no longer be required to pay for equipment used for the bene-
fit of the university or for materials in which student activity is not incl-
ed. As a means of facilitating the identification of the various ex-
hibits, which will be set up during April 24, 25, and 26 and the under-
standing of the purpose of Open House and Junior Week, visitors will no longer have to rely on articles periodical in Technology News.

Instead the Faculty Committee has authorized the publication of a spiral-bound pamphlet containing information about the various exhibits which will be set up during April 24, 25, and 26.

Music Clubs Face
Crowded Schedule

The music department, directed by Dr. Gerald Bankrus, started prepara-
tions on new pieces of music in anticipation of the six recitals sched-
uled for this semester.

These programs will consist of two recitals of fifteen minutes each, the Spring Concert at the Civic Auditorium on April 4, the Biennial Concert at the Civic Auditorium on April 7, and the summer trip to Springfield and Pe-
oria April 10, 11, and 12. Tickets will be available in the auditorium, and tickets will be issued to the students.

Chords Help

New arrangements are now in effect for the appropriation of funds for exhibits to student organizations.

Realt lovers Lectures
On "Jet Propulsion"

"Jet Propulsion" will be the sub-
ject of a talk by Dr. T. J. B. Real-
lis, director of the mechanical engi-
neering department, in be given at 11 a.m., tomorrow in the North Union auditorium.

The lecture, illustrated with slides, will be given by the IVY chapter of the Institute of Aeronautical Sciences. Large audiences have heard Dr. Real-
lis's presentation, in cities throughout North America.

The future of the gas turbine, as associated with jet propelled aircraft, will be discussed. The subject will include the American, British, and German jet fighter planes as well as future possibilities and trends of jet propulsion.

Dr. Reallis will also enlarge upon recent developments in the adaptability of jet propulsion to automobiles.

SCC To Ease Meeting Jams

The Student Consultation Council was officially installed at the student organization Thursday, its aim of getting better attendance in assemblies and club meetings through cooperative scheduling of events was explained at this time.

The meeting was attended by a hundred students representing almost all of IIT's recognized clubs, societies, and associations. Copies of a tentative constitution were distributed and discussed prior to a call for participation by the membership of each organization.

Warren Brodsky opened the meeting with a discussion of the aims of the SCC. Although the bulk of the constitution was reviewed by the executive committee, Brodsky made several tentative suggestions, among which was the proposal for all professional society meetings to be held at the same hour, if possible, since there is no conflict between the organizations. At the same time, the proposed regulations between the professional societies and other clubs, whose meetings will be affected, was also the subject of the new organization.

Dr. Hobson Resigns Foundation Post

Dr. James E. Hobson has resigned as director of Arizona Research Foundation of Illinois Institute of Technology, it was announced last week by Hank. T. Heaton, president. Dr. Hobson, professor of electrical engineering at Illinois Tech since 1914 and director of the research foundation since 1944, will become director of the Stanford Research Institute of Stanford University.

He plans to assume his new duties March 1.

Research simplifies print making with development of "Varigam" Paper

Chromatists and physicists make important contributions.

Photographic film that has been overexposed or underexposed nearly always shows a "salt and pepper" negative image in which the light and dark areas are superimposed. The opposite effect, a "soft" or very light exposure, results from underexposure or underdevelopment. At one time photographers used to stack four or five grades of enlarging papers to correct for various conditions and get the right degree of contrast.

To eliminate this expensive, unwieldy situation, scientists developed "Varigam"--varied contrast photographic paper. With Varigam, the whole procedure of getting different degrees of contrast is reversed. Instead of using several sizes of paper, the photographe

varies the light on the film. He gets a contrast in which the light and dark areas are not superimposed. The action of "Varigam" depends on the ability of certain dyes to absorb the light in the emulsion as the blue and green regions. This is explained in detail in the new book published by Du Pont.

Du Pont Digital for Students of Science & Engineering

To ease the problems of science and engineering students, Du Pont has developed new photographic papers and chemicals for use in the classroom. These materials are designed to help students understand scientific principles and concepts more quickly and efficiently.

Better Things for Better Living--through Chemistry

What types of training are needed? The training for the right kind of work. In the years ahead, we may need many more chemists than we have now. This need is the result of the increasing use of modern technology. In turn, this means that chemists will be needed in many different fields--industry, medicine, agriculture, and others. The answer is given in the "Chemistry and the Future" of the American Chemical Society. How can you get started? The reply is "Get started now!"
Swimmers’ Rally To Win Triangular Meet

Nip Loyola In Last Event On Friday 13th

Defeated In Another Close Meet By De Paul’s Demons

The turnabout win-Bad Friday for the Trojans was accomplished by nosing out Loyola University and Indiana State Teachers College in a closely contested triangular meet. The scores were 39, 35, and 28 respectively.

A record-breaking packed Valparaiso Boys’ Club in the afternoons as the game went on for the first event. It was “standing room only” for many of the spectators.

The Trojans got off to a slow start and were unable to garner any points through the first two-thirds of the meet. The Trojans slowly came up to the mark and after the 200-yard freestyle, Loyola led, 18-12. The Trojans then put a third in the 200-yard freestyle.

Ray Klinka took a second in the 100-yard freestyle. Next, Ray Klinka finished his first of the season with a second place in the 40-yard freestyle. Loyola took two points by picking up 100 points as compared with Ray’s 52.4 points.

John Stilwald of ITT took third place.

The Trojans finally pulled ahead to overtake Loyola for the first time when John Stilwald in 15 seconds.

At this point Loyola was winning with 29 points, while ITT and Indiana were tied with 16 points each.

The 200-yard butterfly put the Trojans in a position behind Loyola as Kirby Stockland and Art Altmann placed second and third while Hatch and Parker of Loyola won first and second.

The Trojans now stood Loyola 23, ITT 20, and Indiana 15, with some time left to go.

The Trojans’ hopes looked rather bleak since Ray Klinka pulled out of the meet. He was unable to stay in the pool due to a Senior Class meeting of which Les Carman and Eric Stockman were the speakers.

The Trojans were leading Loyola by two points when they had to switch ahead of the Rambler’s in the 200-yard free-style relay to edge out Indiana. Indiana won this close meet, but the Trojans were not far behind.

Wednesday the team traveled to Osborne to take on the Eastern Illinois University. Once again the meet was decided early with Trojans leading.

The preliminaries last contest mostly because of a lack of numbers and spirited men. Ehrman and Peters was first and second in the 100-yard backstroke and van Laanen and Tanfassik first and second in the 200-yard freestyle. Loyola won the remaining events, both relays, and the diving, giving the Trojans an unassailable lead of 39 points.

Thursday the team will have a chance to prove itself. The meet will be held at 7:00 p.m. at the Valparaiso Boys’ Club.

Harrison Stars As Techhawks Open Indoor Track Season

Taking up where he left off last season, Arnie Harrison, the Techhawks’ track star, carried the scoring load but Saturday as the track team placed fourth in a quadrangular meet. Arnie, who is co-captain of the team, garnered a second and a third in the high jump and a third in the long jump for a total of seven points.

A promising new comer, Bill Conley, tied for fourth in the high jump and placed fifth in the high hurdles. The rest of the Tech team scoring was done by seniors and a third in the field.

The meet was won by the University of Chicago, followed by Loyola, De Paul and Indiana University.

“I’m Western Electric, I backup your Bell Telephone Service with equipment and supplies.

There’s a good reason why WESTERN ELECTRIC is in this family circle

Western Electric is a member of the Bell Telephone family circle and is fully the same reason that your local Bell Telephone company is a member—to serve the consumer best. That's what makes us Western Electric. We don’t try to be the biggest, we just try to be better. We give our customers the best service we can give. And that service includes more than just the telephone. It includes our entire family of companies.”

There are many reasons why Western Electric is in this family circle. For starters, we provide the telephone service that keeps America connected. And we do it better than anyone else. Our commitment to quality and customer service is what makes us Western Electric. We don’t try to be the biggest, we just try to be better.”

Since 1882, Western Electric has been a member of the Bell Telephone family—helping to make your service the world’s best at the lowest possible cost.”

Western Electric
'Just Wait'... Is The Word Among Illinois Tech Cagers

By Jim Wagoner

In 1946 the Brooklyn Dodgers said "wait till next year," and in 1947, they were National League Champs. St. Louis University's Eddie Staley did the same thing in 1947. "Give me another year with my cagers," and in 1948, they were again the Champs. "Give me another year...I'll go on forever. What am I trying to get? I'm just here in 1948, Coach Ed Gilley of Illinois Tech said... "I'll go on forever. OK, I don't divorce..." So the "wait" goes on.

At first glance, which is about as far as most of the student body gets, it appears that Illinois Tech's basketball season is over for this year. But the 1947-48 Illinois Tech basketball revenues were far more than meets the eye. What Voices These Motors Be?

I agree. I think that if we were to look at the season during the summer of '47, as the fall season opens, the game was synonymous with basketball at Illinois Tech.

"Oh, boy, a new sports era..." said the student body. "Big game basketball..." said the coach. "Yeah, let's go into the tournament..." said the students.

The record of Tech's season is unimpeachable, but one expects the leaders of collegiate institutions to set examples of sportsmanship. Thus it is to be hoped that the officials of Tech's athletic department work to develop a better program of competitive athletics.

Notes off the Cliff

Bill Gwaltney has finished a long and faithful career with the basketball team by virtue of his graduation last month. It seems doubtful at present that Carl Macion's is the last time to play tennis at Illinois Tech. Carl Macion's high score in the last several basketball games has him fighting with Bergstrom for the individual lead.

Top of the deck Record!

Herci's Monica Lewis' Top Decka recording

"The Gentleman Is a Dope"

HER MONIKER is Monica (Lewis, that is)...and she has one swell set of pitch pipes. When it comes to cigarettes — well, let Monica sing it:

"My cigarette is my choice — they just give me a T.

Millions of smokers agree with you, Monica. That's why more people are smoking Camel's than ever before. Try Camel's, discover for yourself why, with smokers who have tried and compared Camel's are the ones of experience!"
Junior Week Questionnaire Deadline is March 3

All students are requested to submit the questionnaire before March 3.

Meade Takes Over As New Registrar

Raymond D. Meade has been named registrar and associate professor of education at Illinois Institute of Technology, the appointment to be effective March 1

Meade has been on the faculty at the University of Chicago for the past ten years. Before that, he was a teaching instructor in secondary schools for about 32 years.

William B. Kelly, present registrar, will assume the position of assistant registrar.

Sign Integral Contracts

The Integral business office has requested the participation of all teachers in the school organization who have not signed their contracts with the yearbook. The contracts can be obtained at the Integral office in the South Building.

Refreshments and Movies at AIEE Meeting

Refreshments and movies will be the highlights of the AIEE student chapter’s first meeting of the semester. The meeting will be held tomorrow at 11:00.
