Patterson Announces New Safety Program

R. C. Patterson, associate professor of Safety engineering at IIT, today announced a new program of accident prevention on the campus. The new campaign is planned to reduce the accident toll at least 15.4%.

A close study of statistics for 1987 revealed that although many persons on school grounds were injured in accidents, no one was injured while travelling on roller skates. It has therefore been decided that all students and school employees will be required to wear roller skates while in the laboratory.

In a further effort to cut fatality statistics, Patterson introduced a new procedure. "Several accidents have been reported in the past year, and we have decided to install a new system of accident reporting," he said.

All accidents must be reported in person by the injured party himself, the safety chief ordered. This is expected to drastically reduce the number of accidents.

Other projects to guarantee greater safety include mass production of "Safety Shoes" for the self, "Safety brushes" for the self, and "Safety umbrellas" for the self. These "Safety" items will be distributed to all students and faculty members.

Big Grain Shortage Probe Initiated by IIT Chemists

Yell, Kentucky—A delegation of IIT chemists, under the guidance of the Army's Secretary of Defense, was ordered by the Secretary to conduct a thorough investigation of the shortage of big grain. The delegation, consisting of ten members, will be sent to the area immediately.
Slipstick

I asked if they served drinks at the restaurant last week and got this reply: "Yes, sir! We serve anyone. Do you want to go in?"

Mr. Civil: "Hello, is this the Indiana Bridge Commission?"

Voice: "Yes, what can I do for you?"

Mr. Civil: "How many votes do you get for a little slave?"

Modern Proposal

Boy: "Will you have breakfast with me in the morning?"

Girl: "Certainly.

Boy: "Shall I phone you or send you?"

Girl: "I caught my boy friend last night."

Pap: "I taught him the same way."

A fellow called up his boyfriend one night and asked him what he was doing.

He said: "Oh, I'm a good boy tonight and am staying home washing my pajamas."

Girl: "Will you come for me?"

Boy: "Yes, I will."

Just then the operator cut in and in a hollow voice said: "I am ripping them."

Girl: "Oh, hi. A girl's greatest attraction is her hair."

Girl: "Yes, I think it's her smile. What do you think?"

Civil: "I think the same as you guys do, but I'll be damned if I'll lie about it."

Short Story

Two college girls went for a tram.

"George, are you putting in the fire box?"

"Yes, mother, but I'm coming soon."

The story that invented the machines should be proud because millions have been made on his invention.

During last year's coal crisis in England, the government gave the eye-lifting counsel to the nation's heart patients. "Among the shortage of coal, employees are asked to take advantage of their trips to the lakes of twelve and twenty.

HEELED OUT FOR ELLUSIVE WOMEN

By "Witfull" Purcell

Hank Heeled is boilers the rocks of the great unknown-the prostitute club-and high limit too! The man is obviously finding one of the oldest clubs-Woman Pursuing 1942.

It was only a year ago that it was announced boldly that Illinois Tech was to take a new and aggressive attitude toward women—well, it was not to get any.

Great cooks and small whees were set in motion to corral every available skirt that was yet unattached. All in all, the idea was to increase the population, families, that is.

This great and worthy project was under the direction of one Hank Heeled, and Hank's hair laid to a shade white.

Why? Simply because the normal female enrollment in Illinois Tech is 59, or three percent of the student body. Not even in freshman shouldn't one three percent be concentrated on painting.

The continued nonconformist on the part of Hank is reflecting students can recite their experience. For a year the man reported to the faculty, but he has no interest in the super-hip.

Because he has connections, Hank may be explained this courtesy of a personal influence instead of cold, remote banishment through the campus of the U.S. Mail. Picture the scene as Hank waddles fearfully into Heinny Pobbe's office. Jimmy beams uncertainly and scores the story away.

"Hank," he says, "after reviewing your grades here at Illinois Tech, I feel that you are not entirely suited to Woman Chasing. Why don't you follow some line where numerous talents are not necessary—like civil engineering?"

"But Heinny," says Hank, "I like Woman Chasing. I feel that I could devote my whole life to it. Why can't I go back?"

Letter To The Editor

Tech Student Finds Himself Outcast: Girls' Cold Attitude Baffles Him

Dear Editor:

I am very pleased and disappointed to hear about the article that ran in the newspaper recently. It seems like every time I leave the dorm, it's the same. Nobody seems to notice me.

I am a tech student, and like many people, I was not sure what I wanted to do with my life. I am working on a project for my engineering class, and I think it could be a great success.

Writing Home

Puritan Editor Foiled, Sexy Cartoon Printed

Dear Mom,

Big things have been happening around campus lately. I'm sitting on top of the world—well, on top of the Editor, that is. It's a thrilling experience.

It all started at the beginning of the semester. It seems this guy, the editor, is a straight-laced individual. From my high standing in the student body and his lack of knowledge about life, I decided he would be a cinch.

One thing he cannot stand is naked women in pictures. He blinks every time he sees one. Well, we've got one cartoon on the staff that has been around. He knows about life and draws comics. This boy will come in one day and show us the X-rated comic. The Chapt force handsome down—Not in an interesting manner too. He says, "Hey, is that sexy?"

After additional profane comment he remarks that it would go too the editor over his desk.

That was the start of it and it wasn't finished yet. Then came the big comic April Fool's Day. It was a natural, and he was flabbergasted. But not so—after additional profane comment he remarks that it would go to the editor over his desk.

That is all about that is new around here. I'm doing a new girl lately, really. I thought you'd like to know she has a mustache, but I have one too.

Respectfully,

Louis L. Toodle

Writing on the Wall

Dear Editor:

I read Technology News every week and think it is the finest newspaper in the world. I really do, I really do.

R. Matthew Shatoff

P.S. Please forgive me for writing this letter with a crayon, but they don't allow me to have sharp instruments in the place where I'm keeping.
Harvey Son Sets World High Jump Mark

Jet Propulsion Helps Jumper Reach Heights

By G. H. Johnson

Ernest Von, Jit's stellar track star, breaks all existing world records when he cleared the 9-foot hurdle by more than two feet. Before a paying crowd of 10,000 people the sixty-odd year old Jitterbug showed that he was still the man he was when he was in school at hours on duty.

"The jumping has improved considerably since I left the jet propulsion plant," was Von's reply when questioned by a group of cheering spectators.

"When I was still working at the plant, I was on a diet and was always eating mustards and other foods. Now I eat nothing but lettuce and vegetables."

The son of a track enthusiast, Von had competed in the 1932 Olympics in田径, where he finished ninth in the long jump.

Football!

Sports Posenality Of The Weak

Finally yielding to the pleas of the Chauncey Langham, High School hosted Tech. Head announced that plans are well under way to provide a football team for Illinois Tech next season. A tentative nine-game schedule, including Eastern Illinois, Oberlin, Smith, Vassar and Washington, is under discussion.

In announcing the news Head said, "We need an outstanding athlete team and have been in the forefront of competition at Illinois Tech. The Board of Trustees has committed the move and allowed an impressive sum to be used for the finest possible equipment.

Plunge Breaks Leg, Player Loses Grip on Baseball Game

In a between-classes baseball game at the Illinois Institute of Technology, a member of the Illinois Tech team sustained a broken leg and had to leave the game. The injured player, who was said to be out for the season, was taken to the Illinois Tech hospital for treatment.

Inter-morals Banned At IIT

In a statement issued from the President's office at the end of the academic year, President Benjamin announced that inter-moral organizations are to be banned at Illinois Tech.

"It is with deep regret that the President of Illinois Tech has made the above announcement," the statement read. "This action is necessary to maintain the high standards of our institution."

Techawck Trackster Finally Staggers Across Finish Line

"What Day Is It?" asks Gasping Runner As He Concludes Cruel Season

The Illinois Tech Relay, of course, answered the Techawck. "You were supposed to return two weeks ago," said the3 disconsolate runner.

"Yeah, and I probably should have been here sooner for this reason. For this reason my shoes would have been locked.

**Students' Sex Opinions Revealed By Survey**

The Technology News staff this week came up with a series of revealing answers to a survey of sex opinions on a variety of topical subjects. The pollsters produced some startling statistics. Questions were asked in California, Denver, Minneapolis, Seattle, and Washington.

Asked about the controversial Kinsey Report, students reached a virtual unanimity of opinion. The question was stated as follows: "According to the Kinsey Report, if all sexual and sexual habits were surveyed, 99% of the American men would be in bed with men, and 90% of the women would be in bed with women. Do you believe these figures should be enforced?"

Answers: "Absolutely the laws. 5%. Do not enforce the laws. 95%.

Politically, Taboos are divided. Asked if they would vote against Truman for re-election, 90% said yes, and 10% said no. On the other hand, 94% said yes and 6% said no. Politically, Taboos are divided. Taboos are divided. Taboos are divided.

As to the question of "Do you believe that the student body has been influenced by the Kinsey Report?" 90% of the students said yes, and 10% said no.

Three Men To Dark Continent

As a special assignment to the Zoological Society, the S. E. A. Club, and Voodoo, some of H. M. S. "Congo"'s most prominent members were sent on a trip to the Dark Continent to study the different species of animals. Their mission will be to talk to the men and women of this great continent and to study their customs, manners, and habits. The trip will take them to the wilder parts of the Dark Continent and the more remote parts of the Dark Continent. They will not be able to return to the United States until the end of the trip.

More Female ITANLIBL Wins Fight

President Linkey Hardy today announced the conclusion of the recent and violent demonstration by the ITANLIBL, all attempts to arrest female student to ITANLIBL will be discontinued.

At last night's meeting, the president of ITANLIBL (Illinois Tech Anti-Racist Student League) announced that over 95% of the student body had signed a petition to return to the campus where they had been removed.

The demonstration at the meeting was obviously an angry one. The students representing the ITANLIBL, who were bloodthirsty and devoid of culture, had been stripped and were screaming in a Chapel hall where they had been held. They were reading, "WHAT DO YOU WANT WITH GIRLS? WHY ARE YOU HAPPY WITH OUR SIDEBANDERS?" Other signs read, "DOWN WITH BROS! UP WITH STEAM TALKERS."

In a letter addressed to the board, Wainwright, J. B. Rambam, president of the ITANLIBL, said, "If women students, do we want these girls in our lives?"

ewebpage

A special feature in the Technology News is a survey on the "Students' Sex Opinions Revealed By Survey." The survey was conducted in California, Denver, Minneapolis, Seattle, and Washington. The results of the survey are as follows:

1. **Esbah Announces Experimental Class in Student Training**

Esbah announced an experimental class in student training.

Esbah, project chairman of the ITANLIBL, announced that his project is aimed at preparing students for the Institute on the maximum increasing rate of the average TUN. The survey is scheduled to start at the selected class in students in their junior year or at about Sept. 31.

2. **The way survey group has planed survey will begin by taking the same number of students in the most difficult of the assigned task and several of the harder problems for analysis of the student's ability of concentration under strain.

3. **Literary Incentive Awarded**

The next six lectures will cover chapters two at a time and bring in some extra reading material, which is a literary incentive to German, and will be rewarded with a free gift certificate valued at $5.00. The mid-quarter examination will be given short notice and accordingly, the student must be prepared to cover the material involved for evaluation.

4. **Use Mental Telepathy**

In the last quarter of the semester, the instructor will bring in a course of books each period, read the articles, and discuss the material, and explain the final exam will be related to students' earlier classes.

5. **New Course Offered Here; Limited To Grad Students**

A special course offered here was "Amalgamated Mortuary of North and South America" (Bioscience), with a representative of ITANLIBL. The graduate students desiring to enter this field of mortuary work will find Dr. D. M. D. Esbah an amazing character. His earlier experiences are not known with some of the famous bodies in history.

6. **TUN Foundation Reports Advances In Research Work**

The TUN Foundation for Research today announced an advanced program in the field of foundation production and control.

"The field offered promising news to many of the engineering professionals," declared Lota Turner, director of the TUN Foundation.

Fuminaide Durn, M. I. A. and P. L. (member) of TUN, outlined present research activities as directed toward the development of a remarkable foundation, guaranteed with no air voids attached.

7. **Minimum Goal Of 98% Profit For Cafeteria Just Barely Enough**

Mr. Arthur Turner, cafeteria manager, today emerged from his vault to announce new policies for the university's dining halls.

"Wasting money all his life," he told students, "planned students to cooperate to reduce the amount of cafeteria deficit. "According to the first principle of economics," said Mr. H. R. Turner, "cost forms a reasonable profit. At ITANLIBL the cafeteria has set a 98% as a conservative rate of return.

Miracle On 33rd Street

April 10-20
Examination Of Trash Bucket Reveals Horrible Crime

Campus police discovered the body of a mutilated instructor late Saturday afternoon in the trash bin near the bookstore. Murder had been apparently committed with an unusual type of instrument found at the scene. A butcher knife,obelisked with blood, was found near the body, and the police indicated that this was the strongest clue at the present time.

Police commissioner W. J. Pertka is mobilizing his entire force in an attempt to solve the case. He revealed that his first step in attempting to solve the crime would be to give all students talking to the crimes and the third degree in an attempt to bring a confession out of the criminals.

Examination of the body revealed that the body was that of a woman, aged about 50. The head was severed from the body, and the body was found lying on the floor near the bookstore.

The police are currently searching for the murderer, and are offering a reward of $10,000 for information leading to the arrest of the individual responsible.

The community is in shock over the news, and many are calling for a new look at crime prevention in the city.

New Language Course Alloys Tech Despair

A new course will be offered, starting this semester, according to T. P. Van Cott, associate professor of language and literature. In addition, the course will also serve as an introduction to the study of computer programming.

The course, titled "New Language Course Alloys Tech Despair," is designed to help students understand the complexities of computer language and to prepare them for future careers in the field. The course will be taught by Van Cott, who has been a faculty member at the university for over 20 years.

"This course is designed to help students understand the complexities of computer language and to prepare them for future careers in the field," van Cott said. "We want to make sure that our students are prepared for the future, and this course is a great way to do that."

Downtown Center Construction Plans Being Formulated

By Claire Kras

New construction programs are under way at the downtown center, which will make the center a more convenient shopping and entertainment area.

The center has been designed to accommodate the growing population of downtown, and to provide a variety of activities for visitors. The center will include a variety of shops, restaurants, and entertainment venues.

"This is a major step in the development of downtown," said mayor William J. Miller. "We are excited to see what the future holds for our downtown.

"This is a major step in the development of downtown," said mayor William J. Miller. "We are excited to see what the future holds for our downtown.

New DRAFT LAW INCLUDES ALL

Senator Taft in a direct wire re-quest in President Hoover's office yesterday revealed that a committee of Draft Selectors will visit Illinois Tech early next week to examine 500 men on the campus who are shortly to be drafted.

Taft indicated that these men are "as good as guns." When he described the physical requirements for men he is expected to be sent to the front, they are in line to form a body of the finest men that the country has seen in many years.

The men will be examined by a team of three doctors, who will be on hand to ensure that every man is fit for service. The men will then be given a physical examination, and those who are found to be physically fit will be sent on to the front. Those who are found to be physically unfit will be assigned to other duties.

The draft law is expected to bring a large number of men into service, and the President has expressed his confidence that the men will be ready to serve with distinction.

Seniors Farewell Dress Is White Tie And Jeans

After weeks of heated arguements and much discussion, members of the senior class have finally settled on official attire for the Senior Farewell. The approved mode of dress was agreed to by class officers and the Senior Class Council. The attire will consist of white tie and jeans for men, and white dress and jeans for women.

The Senior Class is looking forward to a memorable evening, and is excited to see how everyone will look on the night of the event.

A GOOD OLD AMERICAN PRODUCT MADE BY A GOOD OLD AMERICAN FIRM IN GOOD OLD AMERICA.

GOOD OLD PRODUCTS INC.

ONTARIO, CANADA

HALF PRICE TO INDIANS.
A message to you from the Chief of Staff

April 6 is Army Day. It is a day which will have a special meaning for college men. More than half of you are veterans of the last war. Many of you are members of the Organized Reserve. Many others belong to the R.O.T.C. or National Guard.

"All of you are making a vital contribution toward World Peace and the security of this nation.

"The U.S. Army is the finest army in the world and the only one of its kind among the major powers. It is 100% volunteer. It is composed entirely of civilian soldiers... men like yourselves who realize that a strong America is a peaceful America, and the responsibility of making America strong rests in the hands of every American citizen.

"The U.S. Army is not a large army, as armies go. It is shouldering tasks far greater than any other army of like size has ever attempted.

Our occupation force in Japan is the smallest per capita of any modern occupation army. Our force in Europe is the smallest of the three major powers.

"But behind this Army stand you, men of the Organized Reserve and the R.O.T.C. I have known many of you personally. I have been with many of you in action. I know the fine type of men you are and the realism that leads you to equip yourselves with military training.

"Further, I know the valuable service you can render the nation in time of emergency. A great deal of the success of fast mobilization and the actual winning of the war was due to the 105,000 trained Reserve Officers and the nearly 1,000,000 trained National Guard units which were available for quick action.

"To you, on Army Day, I believe I speak for millions of Americans in offering commendation for the fine job you are doing."
