30 tickets given for parking

Within the last 30 days, 30 parking violations have been issued by the city police to IIT students who have reported the area under the railroad viaduct near Assembly hall as a legal parking place.

There are no special signs under the viaduct because parking under such a structure is expressly prohibited by city law.

The city police have advised W. J. Purvis, experimental building assistant, that they will be enforcing the no-parking regulations more strictly within the next few weeks.

Mr. Purvis advises that students who have parked under the viaduct are at risk of having their tickets canceled and of being cited under the IIT parking rules which are taken seriously for the protection of students who drive to school.

AlChE plans tour to Kraft company plant

The student chapter of the American Institute of Chemical Engineers will visit the Kraft Foods processing plant at Grayslake, Ill. on April 14. The group will leave the campus at 10:30 a.m. Those interested in attending are to sign up on the bulletin board in the Student Center, said Ray Mohr, president.

AlChE members are invited to join the lunch and tour at the Kraft Foods plant. The New York employees will be furnished with lunch and a tour of the plant for the AlChE members.

English commerce still shaky," says Amory

Derek H. Armitage, a British member of parliament, predicted that the British Conservative party would sweep into office at the general election, and that England "cannot get away from her difficulties in the next four years."

His prediction, made during his first visit to the United States, was based on a survey of the political scene in Britain. He said that the Conservatives had "a very strong hold on the electorate," and that they would "continue their policy of economic stability and social reform."
Letters to the Editor

Active students risk grades, states writer

To the Editor:

There was a feature in Technology News several weeks ago about the purposes of Tau Sigma. Although that article was in jest, it brought out a problem that faces those who curricularly activities of the school.

While there are undoubtedly some people who can enter these activities and still receive high marks, the majority suffer by giving their time. Just what do these students receive for their work from the school and the rest of the student body? First, if the work they do doesn't satisfy the students and the administration, they receive destructive criticism from the anonymous journalist, politicians and others. Those critics are the same people who would rather be seen dead than be on stage five minutes after their last class. When the final grade, obtained by hard work, is delivered to the student body, those critics spoil their appreciation by non-interest or by non-interest.

The question that I raise is this: Are these persons who spend their time trying to be service to the student body fools? From all indications they would seem to be. Per recollection in the other activities of the school they are forced to compete with men who devote all their time to pursuing high grades. At graduation they are placed with low averages. The rest of the time they are surrounded by the critics and the non-interest of those whose money is being received.

It might be a good time to stop jesting about Tau Sigma and recognize some of the hard work that is being done on campus.

Dan Canna

as I see IT

By Dave Paske

FOR THE SECOND WEEK running, Technology News is drooping the dailies' with a Friday morning news brief.

What was just a readable hole at 10 o'clock last night is filled with the first piece of yesterday's election results, and what mixed-up machine we had to get it.

Although not getting a record in terms of total votes, the turnout was a new high for percentage of eligible voters participating. The June elections, with ITA positions and constitutional amendments up for student approval, were open to seniors, sophomores and juniors, all of whom voted enthusiastically.

Technology News promised the election for "all it was worth"—I gave it a page one space for an entire month, and felt well—it's the first time we've ever run a column on the front page.

FRIDAY NIGHTS' HOMECOMING game and dance surprised everyone with the results, but the crowds packed the gym with their bellwethers. The inadequacy of our facilities for spectacular sports events, however, prevented students and other classies from even getting in to see the ceremony.

There's plenty of space in the gym, but its mischance right now because of the season was getting the roof. They could be done away with at marketable cost, learning rubber taxpayer expense by about $6000 a year.

Not only could our own home games be played on a cost-of-rent court, but the gym would then be of high enough caliber to host the annual JIT pep basketball tourney, being held this session in the International Amphitheatre. And, so the potties come. No, nor, be here for this—

The players must go.

And here's a prediction—Technology News will open the biggest dance this school has ever run, just as soon as they're done!
Cops secure Tech peace
Take lovers, gold-diggers in stride
By Jahnke Bennett

The police service has grown with the school. As late as 1945, the foot patrol was handicapped by manpower shortages and had to rely on the support of the local police department. However, with the addition of a full-time police force in 1946, the campus has become safer and more welcoming for all students.

The pattern of crime on campus has changed. Unlike in the past, thefts are now rare, and the few that do occur are usually reported promptly and investigated thoroughly by the police department.

One of the most notable changes has been the increased security on weekends, particularly during the warm weather months. The police have increased patrols during these times, and students are encouraged to take precautions to ensure their safety.

PETITION CTA for reduced college fare

St. Xavier College has initiated a campaign to reduce transportation costs for students, appealing to the CTA for a fare reduction. The student body has shown strong support for this initiative, and the college administration is hopeful that a positive response will be received.

The petition has gained momentum, with hundreds of students signing on to the cause. The college administration is committed to ensuring that all students have access to affordable transportation to and from campus.

Chest X-rays offered by mobile TB unit

"Take a deep breath—hold it—that's all."
It's just like the Army—with two exceptions: no necessity for removing clothing, and no dog tags to get out of the way.

For ten days, from January 4 to 14, a mobile X-ray unit will be on the campus for the benefit of every person with enough foresight and courage and consideration to make use of it. This service is free and open to everyone, and no medical or physical examination is necessary to take advantage of it.

Early tuberculosis has no symptoms, gives no warning. One may feel "the tick," but that doesn't mean that his lungs are not being destroyed at that very moment by the kingdom's invisible tendrils.

About 500 people in the United States die each week from this disease. The great majority of these deaths are due to the carelessness and negligence of those who still feel that "precaution is a waste of time, money, and energy." The signs of advancing tuberculosis are: feeling of tiredness not relieved by rest; loss of weight; loss of appetite, a cough that lingers, a hoarseness, and spitting blood.

What may or may not be TB is a good doctor should investigate. And he doctor who will soon be here: the mobile X-ray unit.

PROVE CAMEL MILDNESS FOR YOURSELF!

Prove for yourself what throat specialists reported when 30-day smoking test revealed NO THROAT IRRITATION due to smoking CAMELs!

More doctors smoke CAMELS than any other cigarette

Money-Back Guarantee!

According to a Nationwide survey

MORE DOCTORS SMOKE CAMELS THAN ANY OTHER CIGARETTE

CAMEL

Smoke Camels, and only Camels, for 30 days. Prove for yourself how mild Camels are:

1. Hundreds of men and women, from coast to coast, recently made a similar test. They smoked an average of one to two packs of Camels a day for 30 days. Their throats were examined by noted throat specialists. After a total of 1,270 days—those throat specialists reported not one single case of throat irritation due to smoking Camels!

Prove it yourself... in your "T-Zone." Try YOUR OWN TABACCO and tell us the difference. Ask for a CAMEL and see for yourself! No choice tobacco. Let YOUR OWN THROAT give the good news of Camel's cool, mild cigarettes.

‘Terry’ doubles easily on viola or slide rule

By Frank Valvoda

Resolving the question, “Is Engineering or Music?” with typical engineer reasoning, Salvatore Terranova decided on the most ambitious and time-consuming—“Both.”

As a freshman at IIT, Terry’s most vivid memories center around these two fields. For example, there was the time he traveled to the national orchestra concert with the Bloomington High school orchestra, only to find they weren’t eligible to play because the music director had neglected to send in an application blank. Terry also strongly remembers the 12 weeks he spent as an engineering student at an Army university in Europe.

His admiration of Illinois Tech began in March, 1961, in the cooperative mechanical engineering program. Industry service called him away for two and a half years. Returning studies at IIT on another tour, he became Pi Tau Sigma and Pi Nu (an elite society).

Maintaining a grade point average of 2.6, Terranova is at present special chairman of the senior class; has been president of the seniors’ section where he plays the violin; and has served as corresponding secretary of Thea. 3.

Terry’s outside activities are concentrated in the music. He plays in a string ensemble at the university of the First Methodist church of Chicago Heights and a few at the American Conservatory of Music. Oddly enough, he is being taught by an instructor at the university of the same institution from which he studied music.

After his graduation in January, Terranova plans to enter the teaching program of a small company, with eventual location in Atlanta engineering.

IIT goes under fund quota

Illinois Tech has exceeded its assigned quota in Chicago’s 1964 Community Fund drive, President Fredric announced this week.

Members of the staff and students contributed $4,138.23. Illinois Tech’s quota was $1,490.

Donald McGregor, professor of naval science, served as chairman of the campaign drive. The campaign organization—The Illinois Tech Women’s association, Alpha Phi-Gamma service fraternity, Kappa Kappa Gamma, and the Interfraternity Council—campaigned for student contributions.

Polish club plans party

The Polish club will celebrate the holiday season with an informal dinner and social December 15 at the Division YMCA. Music will be supplied by several bands and refreshment will be served. Tickets may be obtained from the club’s president, Edwin Manly, or any member.

Everyone is invited to attend, and Manly.

Any student who is interested in joining the Polish club and has not been contacted by post card should contact Manly.

TVA documentary to be presented by SAM

“TVA,” a 30-minute film documentary on the Tennessee Valley Authority, will be shown in the IIT auditorium from 10 a.m. to 2 p.m. on a Saturday, sponsored by the Society for the Advancement of Management.

AIMME ends ‘successful’ semester

The American Institute of Mining and Metallurgical Engineers student branch will meet at 1 a.m., January 9 in 125MC. This meeting will conclude the AIMME first semester at Illinois Tech.

President Ed Morris announced that next semester’s activities will begin with a trip to a steel mill. Meetings will be held every week next semester and a complete schedule will be available.

R. J. Demopolis, secretary, announced that he will hold a meeting of the student members in their first and second year classes in the first week of the semester to organize the installation of the new student chapter of AIMME.

Grads must pre-register

All day graduate students now in residence who plan to register next semester must pre-register by Sunday, January 6 and 2 p.m. on Saturday, January 5. It was announced this week by Ernest W. Kelly, associate registrar.

Graduate students can obtain registration forms and class schedules at the registrar’s office, 1304 S. Michigan Ave. Monday through Friday from 8 a.m. to 4 p.m. After securing the advisor’s approval, students must register at the registrar’s office in the morning hours for the day agreed.

Cagers drop ’48 finale to Cougars
Techhawks engage Beloit swimmers
Seals hope to make Blue Devils second ’48 victim

By Henry Robley
Tech seals McNeely, Klitzke, Campbell et al., fresh from their victory Friday over the Milwaukee Extension of the University of Wisconsin, took on another team from the Badger state in a tournament they travel to the Badgers. The Hawks are hoping of making the Blue Devils their second victim of the season. Against Milwaukee, Jim McNeely, captain of the ’48 squad, led the scoring with 12 points. He was both the 20 and 100 yard freestyle events, while Bob Cruver and Paul Volma easily took first and second in the 100 yard backstroke.

The remaining members of the roster were Jack Madison, who was second in the 100, and Fred Denner, Jim was second in both the 50 and 100 yard freestyle events, while Paul Denner and Paul Volma easily took first and second in the 100 yard backstroke.

The Tech team is entered in the annual meet, which will be held at the State University, Madison, Wisconsin, from the University of Chicago, and Chicago public schools sponsored since 1877.

Afternoon and evening sessions will be held on the 23rd, 24th, 25th, and 26th, and the championship and consolation brackets will be held on the 25th and 26th, respectively.

Squad gets rest after 58-56 loss
Coach Ed Glancy’s greatest concern will be to adjust to the January 8 engagement with George William. Despite the efforts of Big George, Stalnaker, and few, the Hawks fell before Wisconsin 56-58. The Hawks broke a 24-24 tie with 10 seconds left in the game. Wisconsin gained 9-0 to miss the scoring.

Despite Stalnaker’s heroic efforts in the first half, the Hawks trailed all the way. In the second half, the Hawks had 24 points and 30 points, respectively. The Hawks were 1-0 and 2-0 in the second half. At this point Bob McCue missed three of the four free throws, but the rebound, Hering, who led the Cougars, was too fast for the Hawks.

Phil “Plunkett” Archer and Bob McCue spearheaded the Techhawks to a 24-24 victory in the bottom of the game. The win was the biggest of the season, however, the highlight of the season.

IF basketball hits high gear
By Marks Levy
The Illinois Intercollegiate basketball tournament, which opened with the New Year’s Day games, will be resumed after the Christmas vacation. The tournament will play games a week until the completion of the tournament. Playing at the varsity court, University of Illinois Panhellenic Alpha Sigma Phi hauled Bob Lans, Illinois to their defeat 49-19. The Alpha Sigma Phi were never to score, and the complete tournament throughout the game.

After a second half, Theta Xi whipped Tau Thadon Phi 38-18. After setting down late in the second half, Theta Xi whipped down the final count of 18-18. The final score was 18-18. In the second half Theta Xi scored 18 and won the game by a six-point margin.

Marked by smooth offense, Theta Xi is certainly Alpha Sigma Phi. The Alpha Sigma Phi were never to score, and the complete tournament throughout the game.

To the rousing roar of the student body, the Alpha Sigma Phi hauled Bob Lans, Illinois to their defeat 49-19. The Alpha Sigma Phi were never to score, and the complete tournament throughout the game.

The tournament of the night was won by the Alpha Sigma Phi hauled Bob Lans, Illinois to their defeat 49-19. The Alpha Sigma Phi were never to score, and the complete tournament throughout the game.

The tournament of the night was won by the Alpha Sigma Phi hauled Bob Lans, Illinois to their defeat 49-19. The Alpha Sigma Phi were never to score, and the complete tournament throughout the game.
Gremlins win Bowl game, 7-0
The Senior Gremlins, firing on all six cylinders, grabbed the champion Delta Tau Delta fraternity's football team, 7-0, in the first annual Technology News "Slide Rule Bowl." Consistently showing their vaunted offense, the Gremlins monopolized the game throughout, scoring only once. Upending their defensive record, they displayed a punt return that held the Delta’s to nine completions in 24 plays, while they completed one in 20.

The one reached touchdown came in the first half, after a fumble by the Gremlins, which was recovered by Quarterback Brannan, scored on a 10-yard plunge. The Gremlins’ second touchdown was on a second-straight completed pass in the same area.

Wanna fight? sign me up!
Bob Murphy
If I were to start a fight, about 85 percent of the students would feel they had to be involved. The other 15 percent are women. Yet the lack of men in general, weight classes, and touch, is what makes our intercollegiate teams successful.

Practice sessions are held three nights a week in the gym under the guidance of Coach Seadon. Meetings are mandatory attendance. The sessions are geared towards fitness, conformation, and strength. The emphasis is on teamwork, cooperation, and the fun that comes with sport.

New participants still have a lot of practice time, but the drill is dehomogenized. Squads are now on their own, and the coach is an assistant. This puts the athletes in charge, and they learn about their sport.

The athletic department provides bar and voting sleeves, and they do the same for all competitions.

Because He Knocked The Finger-Nail Test

**career keynotes named**

ITTA’s party in the Career conference will be held on December 23, when an estimated group of 5,000 students attending from sororities in various fields will attend a lecture given by the president of the industry. The initial part of the conference will be highlighted by a group of industrial leaders speaking on their chosen topics. The following week is expected to attend.

*Dietrich Kroll, president of the Chicago Technical Society, will be an example of the speakers. B. E. Dirtz, vice-president of the American Society of Civil Engineers, R. E. Dietz, president of the American Society of Civil Engineers, and E. H. Hirsch, president of the American Institute of Architects, will be present. Other speakers will include members of the Chicago Technical Society, the American Society of Civil Engineers, the American Institute of Architects, and the American Society of Civil Engineers.

Shutterbugs get Lindgren as advisor

Aronic Xre has announced the appointment of Ted Lindgren, director of photography, to the post of chief advisor to the club. Mr. Lindgren, a member of the Chicago Technical Society, will serve as a symposium speaker at the club's annual meeting. The event is open to the public and is free of charge. For more information, visit the club's website or contact the club's president.
GE 'Magic House' show due Jan. 19

Arrangements have been completed for the General Electric company's "House of Magic" show to come to Illinois Tech. Two shows will be presented in the North Union auditorium January 19, the first beginning at 1 p.m., the second at 8 p.m.

The "House of Magic" is a science show which makes seemingly impossible things happen—actually not "magic" at all, but proof that scientific fact can be stranger than fiction.

The demonstrations intend to show students a few of the many useful, unusual things which scientists, at work in the General Electric research laboratory, have discovered.

Sponsorship of the show is being handled by the Illinois Tech branch of the AES.

Chem graduate jobs open here

Graduate teaching and research assistantships are available to graduate students in chemistry. The department has allocations for 24 teaching and 15 research assistantships.

Journalism fraternity initiates 10

Members of the Illinois Tech chapter of Pi Delta Epsilon, international honorary journalism fraternity, initiated 10 pledges at a banquet held Sunday evening at Thornton's Restaurant.

The new initiates were selected for membership on the basis of their interest and work on campus publications.

"Give 'em by the Carton"

 says Arthur Godfrey:

"And believe me, at Christmas time or any time, a carton of Chesterfields is a 'load of good cheer' for every smoker! So, give 'em by the carton, because they're the Milder cigarette.

Olene Karp
ABC GIRL of Long Island University

Always
say CHESTERFIELD

More college students smoke Chesterfields than any other cigarette...
