Staff man discovers new gender

By Jack Ullum

Foreign Correspondent

Slightly over a semester ago a seminar meting was held at my office, a Mr. Tech MF, and several native boys, started off into the wilds of Mary Pox. Since then we have written several articles and notes, and the plan is longer than this.

Our first mishap occurred when our brains deserted us, allowing us to find our own language. "Cherry-pick your own words". This would be translated into something more preferable in English, but not here.

There are two types of brains which are active in today's society. One is known as "the liberal brain" and the other is known as "the thinking brain". On the other hand, you have heard about "liberal brains" which are known to fight for their own rights. We do not have any engineering subjects.

The other article is known among the natives as a "we-ma" (pronounced "wah-mah"). The existence of these creatures demonstrates the truth of the saying that "there are many kinds of brains".

In order to conduct this publication, you may have been aware that these creatures exist, I would like to give a brief description of one. It is the kind of brain which does not suffer from any impairments. It has two main abilities: to think and to speak. These two abilities are not in conflict, but rather they complement each other. The brain of a "we-ma" is quite powerful and versatile, as it is used for both thinking and speaking.

The "we-ma" has a unique ability to adapt to different situations, which is why it is often referred to as a "thinking brain". The "we-ma" brain is capable of understanding complex concepts and solving problems. It is also able to learn new things quickly and efficiently.

In conclusion, the "we-ma" brain is a highly developed and versatile type of brain. It is capable of understanding complex concepts and solving problems. It is also able to learn new things quickly and efficiently. Therefore, it is highly recommended for use in today's fast-paced world.

Truman signed by campus syadicate

Paul Fox, proprietor of the South Union Department Store, today revealed that the latest of the two men who signed his expanded merchandizing activities, Harry S. Truman, an obscure politician, has been taken by the university as the new man, which will, in his opinion, "be a great step forward for the future of the store and the whole campus.

Truman Confident: His plan will be optimistic because it is nothing more than a plan for the future. He will be in charge of the store and will be able to make his own decisions. His plan will be optimistic because it is nothing more than a plan for the future. He will be in charge of the store and will be able to make his own decisions.

Eighth termers' doom sealed

Tense suspense of the 23rd street election ended today as the results of the election were announced. The outcome was expected, but many were surprised by the final result. The candidates had written advertisements, but none of them were able to win.

The result was a victory for the incumbent candidate, who had been running for the past four years. He was expected to win, but the outcome was uncertain until the last moment. The candidates had written advertisements, but none of them were able to win.

Cafeteria to use new payment plan

Cafeteria manager Frank Harriman announced today that only recipients of the "lucky number" cash register receipts are entitled to any cash in the school cafeteria. All others must charge their meals according to a scale of eight cents a meal.

All tips, however, will be charged to the cafeteria, and the person using the card is entitled to a portion of the tip. The person using the card is entitled to a portion of the tip.

In conclusion, Mr. Harriman commented favorably on the new system, which is based on a scale of eight cents a meal. He also mentioned that the cafeteria will continue to use the "lucky number" system, which is based on a scale of eight cents a meal.

Girls, girls, girls: pyramid toward Illinois Tech

Hank Heed has come up with a new pyramid that is intended to increase the enrollment of girls at Illinois Tech. The pyramid will be centered on the Illinois Tech campus, which is located in the heart of the city. Hank Heed has come up with a new pyramid that is intended to increase the enrollment of girls at Illinois Tech. The pyramid will be centered on the Illinois Tech campus, which is located in the heart of the city.

In addition to the pyramid, Heed plans to use a variety of other techniques to attract girls to the school. These include providing additional financial aid, offering special scholarships, and creating a more welcoming and inclusive campus environment.

When asked about the success of the pyramid, Heed said, "We have seen a significant increase in the number of girls enrolling at Illinois Tech. We are confident that this strategy will continue to be successful in the future."
Smoke a LUCKY to feel your LEVEL best!

Lucky Strike means Fine Tobacco — mild, ripe, light tobacco. No wonder more independent tobacco experts— auctioneers, buyers and warehousemen — smoke Lucky Strike regularly than the next two leading brands combined! Get a carton of Lucky Strike today!

Madam, I'm representing the East Mountain West company. Would you be interested in some cabbage?

They said, let's hear a couple.

There is an engineer on campus who never takes a drink. You girls have it so bad.

What's the difference between ammuns and mulephants?

The fellow with ammuns doesn't know where he's going.

A Techwick entered a show with his wife and three-year-old child. "Two straight whites," he said. "Hey Pa," the kid asked, "aren't we drinkers?"

Father, "Your mother and I won't be home tonight, Junior. Do you want to sleep alone or with mother?"

Junior (after some deliberation): "What would you do, Daddy?"

Curbace, Conc

**Girls leave machines in busted condition**

For four hours last night,26 Rollie C. students and faculty pounded on the stanchly bolted door that is to the entrance to the Illinois Tech host hall.

Your Technology News reporter finally succeeded in gaining entrance, but only with the aid of a bombshell and a few bars of yarn. Thus is a hit story.

The Hostess' department, with the permission of the dean of liberal arts, Mrs. Nicki Sparklin, and the dean of engineering, Earl Rumble, had taken over ETS' quarters bust hib.

Every machine in the lab was being used by the girls to test the various devices which make food at the students of anatomy. The 28-ton testing machine was engaged in a hostile test of farm tractors. There was quite a crowd of Techs around the Rockwell testing machine. The "A" cup Rockwell machine now up and under its moderate hold, and the same may be used by the "B" cup machine. However, the "C" cup machine, because of overloading, was rendered useless for further operations.

Everyone was in a competitive spirit.

The testing equipment was used to investigate the average lifetime of elastic rubber bands. They all agreed that they came out with a pretty ready answer.

After deciding to get down to bare facts, the girls brought the electric strain gauge to test the amount of drive in highly stressed test beams. (Here the girls departed from usual engineering procedures.)

Reactions believe that facts such as these should be performed with normal equipment.

By this time your reporter had, through conversations, managed to get a thread of yarn caught on a torque machine, and after wandering around for a while, began to look rather knotted. The Hostess finally discovered this knot and, unsuburbed him to hammer out of his notorious man-slinging methods before she finally returned.

NEW GRADE SYSTEM—As a
attempt to standardize gradings among
students at IT, a new grade point
system is to be installed. Based on
the highly successful psychol
dy of the pinball machine, the
new plan awards one million
points for an "A," while "B," "C,"
and "D" are worth 750,000,
and 250,000 points, respec
tively. A mathematically
new calculation is being specially
constructed for the purpose. Duri
ing registration, each student is
given a key bearing his code
markings. When this key is in
serted in the new machine, a large
selected light up with the
point-average calculated. "Dean's
List" students receive a large
envelope for five free trips
through the registration process.
Students on probation hear a
powerful story as the machine
rattles first strident word: TILT.

MEDICAL SERVICE—A broad
ended policy of campus medical
service was announced today.
Many convenient office hours are
scheduled for the doctor and nurse
on duty and a greater supply of
pharmaceuticals is on hand. Added
features include a quote system for
pharmacies, under which students
expecting treatment may apply for
prescriptions to be filled. Should stu
dents fail to receive medical attention
is given, an official declaration
of death must be issued. East
sider students will not have
grades of "E" recorded by the regis
trar. Dr. John H. Wilson, further stated that an student cur
riculum be designed for eight class hours
daily will be permitted liberal. Less
than eight class hours, he explained, is detrimental to health
and well-being.

New building
to facilitate
indoor sports

In a test administrative move
to boost school spirit and
enroll the student body in
indoor sports, plans were
announced today for immediate con
struction of a new facility in the
Technology Center building
plan. The new structure, to be
known as "Gymnasium," will
provide space for a complete
range of activities. It
will furnish a gymnasium,
swimming pool, and
tennis courts.

"Mike" Weisman, president of
the Student Council, revealed that
all campus recreational activ
ities, including sports, band,
and dramatics, will be transferred to
the new building. "We've not to get
our ten percent," Weisman said.
