Publication chiefs named Cole trio to promote charity

Basic changes in the structure of ITSA are expected to be announced by the ITSA Board of Directors on Tuesday, April 11, which will include the possibility of changes in the composition of the Board. The changes are expected to be announced at a meeting of the Board on Tuesday, April 11, which will be held at the ITSA Board of Directors.

Sophomores to discuss plans for activities

Sherman Roberts, sophomore president, announced today that the Sophomore Class will hold a meeting Tuesday at 7 p.m. in the CB auditorium to discuss interserver athletic competition and the Sophomore-sponsored street dance for the new Junior Class activities.

Several other matters that affect Sophomores, such as planning for a senior deuce and reviewing the new ITSA proposal to change the structure of classes, will also be taken up at the meeting.

Administrator to discuss ECA effect

Techweeks will have one of the first authentic experiences of the Marshall plan in the administration of the plan. Henry B. Arthur, associate professor in the Engineering Economics club, will discuss the plan at a meeting on Tuesday, April 11, at 7 p.m. in the CB auditorium.

Contest papers to be presented

Local presentation of papers written for the AIEE students contest will take place Tuesday at 7 p.m. in the CB auditorium.

HIGHLIGHTING THE OPENING DAY Ceremonies of the charity fund drive will be King Cole and his famous radio trio. This newly instituted annual drive will replace various collections during the year.

Castings' dance in NU tonight

The high voltage dance in the Short Circuit, the all-St. architecture, will be presented tonight at Castings' dance, appropriately named "Firelight Time," in the NSF auditorium. In addition to other entertainment for the students, the dance will present a novelty of tunes from the last year's production and a playskewer of a new year's collection.

The harmonious harmonium of Robert Bous features the remainder of the entertainment. While the fire show is in progress, refreshments will be supplied by the Radio Castings.

Tickets to the dance may be obtained from Mr. and Mrs. Donald McKee, Mrs. L. H. Bous, or any other member of the sponsoring group. Proceeds from the dance will help support the Radio Castings' forthcoming admission-free play.
The Pause That Refreshes!

By DAVE PASIE

Under the leadership of George Bissell, the Illinois Tech student government during the last year has functioned more efficiently than at any period that I can recall, but Bissell's efforts in this direction have turned up some weak spots in ITSA's organization.

Before the end of this term you will probably see the pols to vote to correct this situation, changes that would have a profound effect on the organization of the Illinois Tech student government.

Fundamental, the improvements have been proposed because ITSA is only a student government in a very loose sense. Although studenters watch the salaries of non-student members rise to sky levels, the students have been powerless in the face of such insensitivity. In the meantime, about 85% of the discipline and policy determinations have been carried out by the administration and occasionally parceled out, all grey-hairers bored and experienced in past procedure. Very rarely does a student writer have a committee, as opposed to the politician who is read in the constitution.

I don't mean to imply that the student government has been run against the interests of the students. These student members have hardly been carrying out the jobs created for them in the old constitution, and the present situation is actually written into the constitution.

Many a wise writer of the present amendments, I feel, should students have a more active voice in determination of policies that have direct effect on them, and each of the changes has been proposed to provide that.

The new terms of one year will provide for a greater degree of continuity than does the present semester system, and the division of classes into single regular semesters will be more flexible than the system, with less interference in the work of the students. This situation actually exists in the student body.

The situation has left me nothing but the conclusion that some groups are not ever discussion of the ordinary student in the important social activities.

Warren R. Gregory

Letters to the Editor

Doubts social status of non-frat student

To the Editor:

Most of the social fraternities or organizations are considered to be important of the social scene. And it is the only student who takes pride in the fact that he is a member of some other social group. This is to be expected, of course, but it is the only student who takes pride in the fact that he is a member of some other social group. This is to be expected, of course, but it is the only student who takes pride in the fact that he is a member of some other social group.

The bids for the Junior Prom went on the all the tickets and tables were reserved. A powerful backlash against the success of accounts, however, reveals that accidents may still be anticipated, and interaction also produces problems of the type that is sometimes no social event.

A very good and an ambitious plan on call is the situation inseparable, but does not necessarily mean the absence. Effective solution can be only achieved by the maintenance of necessary records--the source of important social activities.

To the Editor:

I was quite pleased to see that the students upheld the decisions on the type of dance at the Junior Prom by participating in all the activities within 4 hours after they went up sale. The list was then established on which about $300 per person have been allocated up to the present time.

As the limited number of bids at the time ECMC was elected it was too late to obtain one of the larger ballrooms. Even the Junior West alumni, who had arranged for the rooms in previous years, were appointed only a week or two earlier. Obviously, unless this unfortunate situation is to be respected next fall, something must be done.

I plan, within the next few weeks, to place a tentative hold on two or three of the more spacious ballrooms in the downtown area for the Junior Prom of 1947.

John F. Christian
Natural Science Chairman
Junior class

More first aid

To the Editor:

The occurrence of laboratory accidents during evenings or on Saturdays, during which time experimenters are alone, while there is neither student, nor lab supervisor, on campus, has severely indicated the need for more complete medical services. Due to the lack of trained medical doctors, however, this type of service at present, and it is probably not safe to say that the problem does not lie here.

The normal laboratory instruction offered to the student represents a basic knowledge of medical care but none other.

Mandy went into the bank and dug into her purse, which was full of money. Then, "Plll hai new, yah?" asked a窗or.

Mandy said, "No, thank you." She turned her head and looked at the cashier. "Why, you're leavin'," said the cashier.

Mandy replied, "No, I'm just here to buy a book of stamps." The cashier said, "Oh, is that so?" and handed her the stamps.

"Thank you," Mandy said, and walked out of the store.

"Do you believe all that business about the "Plll hai new, yah?" one day," asked the cashier.

"Oh, no," replied Mandy, "I'm just saving my money for the weekend." The cashier said, "Oh, ok, then. Bye."
Student counseling a complex problem

By James Gajewski

Since the consolidation of Lewis and Armour, Illinois Tech has been constantly striving to improve its counseling system. As the merger itself did not create enough obstacles, the war added its contribution of difficulties for a school trying to develop an efficient counseling program.

During the war, the mechanical engineering faculty has taken great strides forward. Evidence of the improvement in the faculty and student morale is the number of students who choose mechanical engineering as their major.

A highly developed department in this respect is the business and economics department. After a personal interview with the chairman of the department, Dr. Magee, each student is assigned a special faculty advisor for his major. The advisor is encouraged to see his student often. Through his knowledge of the student, the advisor is able to offer advice on his progress at the institution.

The advisor is also responsible for the student's career counseling. He is responsible for helping the student choose a major that is right for him. He also helps the student to find a job after graduation.

Man Faints at Low Prices

Chicago, April 13

The high cost of living took its toll on one man today. Joe Serafini, a 32-year-old laborer, collapsed on the crowded street while he was waiting in line at the post office.

"I'm alright, just fainted," said Joe, "I ate a sandwich and drank a cup of coffee."

How much fun can you cram into a record?

Hear Ray McKinley's musical bidding in "SUNFLOWER" (the RCA Victor Release) and you'll know!

You'll have a lot of fun with Ray McKinley, his band and his vocalist as they pluck the "throat" for your listening and dancing pleasure. Yes! Ray knows about musical pleasure - and enjoying pleasure, too! As Ray beats it out on his drums - "Camels are a great cigarette - they're mild and full-flavored!"

How mild can a cigarette be?

Smoke Camels for 30 days - and you'll know!

In a recent coast-to-coast test of hundreds of men and women who smoked only Camels for 30 days - an average of 20 cigarettes a day - there was no single case of throat irritation due to smoking.

Settlement House seeking funds

A meeting of the committee to raise funds for the Settlement House will be held in the Executive Conference room at 1:15 Wednesday. Speakers at this meeting will be Mrs. Ada McKinley, resident director of the house; Mr. Francis Stratford, who will speak on the history of Settlement House; Mr. Robert John of the Council of Social Agencies speaking about the value of a settlement house in a community and Dean John V. White who will speak on IIT's role in community with the Settlement House.

Mrs. Lloyd H. Donnel, who represents the Faculty Women's Club, states that there would be a raffle made the week after to raise funds for Settlement House. She requested that all students submit any articles that can be used for sale. Those donating articles for this purpose may bring them to the Executive Conference room at the time of the meeting or have them delivered at the campus post office.

ME, EE seniors excused for power talks

All seventh and eighth term ME's and EEs will be excused to attend the eleventh annual Midwest Power conference at the Sherman hotel April 18-19-20.

During the course of the three-day meeting about 50 technical papers will be presented at various specialized sessions. Topics of general interest will be discussed at the opening of the conference April 18 and at the general session the following morning. In all about 90 papers from the fields of power production, transmission, and consumption are expected to be presented.

A feature of vital interest being discussed this year is the search for power problems in the electrical industry. This symposium will be presented on the afternoon of April 19.

The All Engineers' dinner to be held on the evening of the second day in the grand ballroom of the Sherman, will climax the conference. All the dinner, will be presented by Lt. General Raymond A. Wheeler, former Chief of Engineers of the U.S. Army.

Here's the cream of them all!

gives your hair that "Just-combed" look - all day long!

new Vaseline cream hair tonic

NEW FORMULA WITH VIRATOL* works wonders in the looks of your hair. It looks natural...it feels natural...and it stays in place! Try a bottle.

*This special requested loose hair...keep hair in place without stiffness.
Foreign schools calling

Two similar scholarships for study abroad offered by different agencies are available to students at Illinois Tech. The American-Queensland Foundation offers scholarships to graduates who are citizens and have a sufficient knowledge of the foreign language to carry on a proposed research study. More details about the scholarship are available at the registration office.

The Finnish Student Entrance Scholarship, established by the Finnish government, offers scholarships to students between the ages of 18 and 22. More information is available at the Danish government.

Concert in Jazz set for Junior Week

"Experiment in Jazz," led by Bill Russo and his 22-piece band, will be presented in the NU auditorium on the first day of Junior Week's activities, which begin April 7.

The program, consisting of three groups of musicians, plays an important role in the jazz scene. The site of the experiment is the JCC auditorium, and the event will have a special venue. The hosts and the band have given a series of events throughout the auditorium.

Many well-known musicians have come from the ranks of the organization. Among them are Bill Russo, who has been performing with local groups for many years; Henry Mancini, who has been performing with big bands for many years; and John Powell, who has been performing with local groups for many years.

Counseling

Counseling (Continued from page 23)

The counseling center is now open for the students. It is located across from the counseling center on the second floor of the dormitory. It is open from 8:30 a.m. to 4:30 p.m. Monday through Friday. It is staffed by a counselor and a secretary. The counseling center is open from 8:30 a.m. to 4:30 p.m. Monday through Friday. It is staffed by a counselor and a secretary. It is open to students and to the public.

Brochure lists job-seeking grads

By Henry H. Holt

Most right-handed students looking for employment after graduation have probably noted the special efforts in this respect this year. Employers have been quite helpful in placing students in suitable positions, but not always able to place all students. This year, however, there has been a considerable increase in the number of students seeking employment.

The placement office has compiled a list of all students who have sought employment. This list includes students who have indicated that they are interested in a specific field, but have not yet found a suitable job. The list is updated weekly and is available to students who are interested in finding a job.

Chemists in Pictures

How Du Pont and studio scientists solved the problem of movie film

Who'd ever expect to find Du Pont chemists in Hollywood? When motion pictures suddenly started to fail, a whole new series of perplexing scientific problems was before the lift of which was "movie" film.

As you know, sound is usually recorded directly on film, if you hold a strip of motion picture film to the light, the sound track is seen as a narrow band of irregular lines. A light ray passing through the moving sound track produces these irregular patterns of light and dark as it passes through the photographic material.

The film has a course grain structure, it needs to give lines that are uniformly fine rather than coarse. Such problems are not so devastating in Hollywood, actors, actresses speak their lines, with no technical restrictions to cramp their acting. You may have a place in Du Pont research.

Du Pont scientists of the Photo Products Department started a program of research in cooperation with technical experts from the studios in Hollywood. They worked with noted sound engineers and film directors, and the result was a strip of film that could be exposed to the proposed glamor of the studio.

The Photo Products Department, however, is just one of ten Du Pont departments, each of which engage in continuous research. Operated much like separate corporate centers, each department is responsible for its own research. Du Pont not only tries to select young men and women of promise, but also to provide its first attempt to help each one develop as rapidly as possible. Whatever your interests, we will find the right combination and friendly interest you need to do the job.
Tech meets Pier Illini in Ogden field track duel

By Dave Miller

Everyone on campus has, at one time or another, stopped in Roy McAlley’s office or his house to watch a group of fellows clad in sweatsuits energetically making their way around the Ogden field track. Who are these men who practice daily, rain or shine? How do they stack up against others elsewhere?

Tomorrow at 1 p.m., for the first time in the memory of the oldest student, the track meet will host a strong squad from Navy Pier on its home track. An effort to give the men with Saturday classes a chance to use his fellow students to train, Coach Roy McAlley has established the home meet for the outdoor season.

The competition between these personnel crews will prove to be as spirited any Olympic meet though no world’s records are expected. Led by Captains Jim Sauer and Bill Cray, chief rebuilding coach, the thinners expect to make the men in their indoor debut a successful one.

Surely, a slim, quiet manner is ready for the coming of the IVT California. One of the most prominent men on the team is the captain, Jim Sauer. A student athlete, he is known to come up with a winning spirit at the end of the race when necessary. In the cross country match last fall in addition to being the men’s top distance runner.

The meet has been a good job of fine line-up of the graduates of the National Rifle Association at Michigan University. In addition to the team entry, Henry Henrich will represent Illinois Tech in the individual event.

A pan of Illinois Tech members to the meet is an indication upon the applicants’ only the team is made up of only 10 men. Mid-year graduates ranked first in the nation from the squad were Coach Jim Anderson still has Henrich, Ken Macon, Dave Stolman, Jim Dierken, and Captain Leo Donovan, the lone Anderson. Each, the team’s mechanical engineers, competes on the team in addition to handling the coaching system.

The members of the team believe that the recent birth of the club is the greatest to the range handled them by the Navy. The 18-foot range has virtually wails that are only slightly unimpressed, automatic target, and an entrance to the club, a feature which has encouraged attendance at practice immensely.

Techhawk nine primes for opener with Chi Teachers

By W. Gilley

The 1949 ITT baseball team will open its 15 game schedule against Chicago Teachers' college at 3:30 p.m. on April 14 at Hamilton Park, 73rd Street and Normal Avenue. Following this first contest, the Techhawks will get only five days rest before taking on George Williams in their first home appearance of the season at Armour Square Park.

Sr. Archs, Wolves win initial IM softball tilts

By Ed Rosepower

The intramural softball tournament started off with a long home victory Tuesday night over the StuShotters, 13-2, and the White Kids, 18-12. Fred Vorderer paced the Wolves' attack with four home runs, and a double in three times at bat for a total of six RBIs. The White Kids were victims of shaky pitching and a flurry of hard hits by the visitors.

A total of 23 teams are entered to compete for the championship and second place awards. The teams are divided into four sections that will run on a double elimination basis. The winners of the sections will then compete in a single elimination playoff for the title. The personnal Senior Men's team, last year's champs, are back in strength to defend their title.

If all games are played on schedule, the title game will be played sometime in the last week of April. The Chicago weather being what it is, it may be necessary to postpone games for several days, but games are still making a full round of play impossible. This year the leading teams in each section will play off for the title. The section champ has not been determined.

Ralt Hoffman will act as commissioner of the tourney, being assisted by his usual assistants, Jack Hoffman and John Zgraggen. The tourney will begin on Thursday on the North and South Pavilion basketball boards as well as in the gym.

In addition to administering the rules of the game, Commissioner Hoffman has obtained a fine staff of umpires, to officiate at all the games. A complete list of rules is available at the office.

Ogden field has been divided into two diamonds, one in the northeast and one in the southwest. All games will be played on these fields.

Shopping Can Be Fun

And Refreshing, Too

MILT COX, timber topping Techhawks

It is all in a day's work for J. Paul Sc stocky* Switched to Wildroot Cream-Oil

Because He Thunked The Finger-Nail Test

Paul and Betty had a busy dog before he tried the Finger-Nail Test and switched to Wildroot Cream-Oil. Today—she's a big billy binker. Regular use of Wildroot Cream-Oil not only gives him a supper, well-groomed body, but keeps him, bushy by dexterity and smooth, supple skin! He's out of the dog house for good with his girl friends. Why not dog hair out of your hair now for a better title of non-aesthetic Wildroot Cream-Oil right now! And ask your barber for professional applications. You'll find that once you start using Wildroot Cream-Oil containing lubricant, you're a dog in even the best society.

Preregistration ends April 22

Preregistration will end April 22 irrespective of any time lost due to spring recess or a Pomer conference, according to Raymond Meade, registrar.

Each student is asked to submit a list of desired subjects to his advisor before that date.

The courses are to be chosen from the preregistration bulletin which may be obtained from the registrar's office. This schedule is in consultation with departmental heads, and enrolled subjects will not be offered during the column term.

"Students who are in new and administrative arrangements are made on the basis of this preregistration survey. If a student does not submit a tentative schedule, we cannot know what course he needs. Also, to register may mean overcrowding of certain classes. For these reasons students who do not preregister will not be allowed to register with their regular class. Instead they will be required to register on the last available of registration week," said Meade.

Meade stated that a program of 15 semester hours in the normal full-time academic load for a semester.

In some institutions departments require 16 or 20 hours. A student of exceptional ability may take a maximum of 24 semester hours by securing the approval of his academic dean. Semester hours are limited to one-half the permissible load of a regular semester. Students are asked to make an unofficial list for their own use of the subjects they will pursue in the fall semester. Preregistration cards will not be available for inspection after they have been filled, stated Meade.

Ellery Plotts

to address fans

Ellery Plotts, CBS engineer, will speak in members of the Institute of Radio Engineers April 19 at 7 p.m. in 193McC, according to Fred Hatfield, president. Plotts, with 26 years of experience in broadcasting, research, and management, will discuss the responsibilities of a radio engineer and the opportunities for graduates in the commercial radio field.

During his career Plotts has served with Westinghouse Electric where he was in charge of design, manufacturing, and installation of radio equipment for Westinghouse radio stations.

In a ten-year period with CBS in Chicago, he directed FM broadcast and participated in a research program in synchronous FM and WLM radio station WFLM. Plotts designed and supervised the audio system of radio station WSFM.

He is currently developing a new voice recording system in radio engineering and serving as technical director of radio station WLS in Chicago. When he was asked to fill the unavailability of the usual method of locating lost signals at the Institute of Radio Engineers, Plotts replied, "The results were outstanding."

After his discharge from the army, Plotts returned to college and studied better of things academic. He attended the University of Illinois and eventually found his way to Illinois Tech in February.

Concentrating on his extra-curricular interest in a new organization, Plotts has joined the ASME, WSL, and has served as president and chairman of the student branch. This organization, the Institute of Radio Engineers, has been the Society for the Advancement of Management, of which he is the current president.

As second-year sophomore in 1947, Seymour Lorber worked on the I-H.S.M exhibit within the first year of that year's Junior Week and has been active in the organization ever since. His 1944 exhibit which called the most recent exhibit which sparking to the most recent exhibit which sparked a living competition.

During Lorber's tour of duty at SAM convention, the group has sponsored a series of management seminars, established an Annual Mystery Dinner, and a series of special events for high schools and industrial associations, and developed a society-sponsored book club. It is no wonder that membership in the SAM has doubled and is still growing.

Currently, Lorber is participating with Bill Flower in drafting a computer system for the student newspaper. The project is expected to save the newspaper $1,000 per year.

But Lorber admits that the editors now have more trouble with the information. "To do its job we must have more than the minimum amount," Lorber said. "We have even put more time into our society than any other society in the school. We have even put more time into our society than any other society in the school. We have even put more time into our society than any other society in the school."

The program also includes a wide variety of cultural events, films, and discussions, as well as an annual Christmas party for students.

Dedicate new dorms Monday

Fair and Fowler halls, first two dormitories completed and occupied in the language development program, will be dedicated Monday, it was announced last week by John E. White, dean of development.

Dedication will be held at 3:30 P.M. in the dramatics lounge of Fair hall at the southwest corner of 33rd Street and Michigan Avenue. All students are invited to attend.

Other speakers will include Dr. Henry T. Stoll, president of Illinois Tech; James D. Cunningham, president of Bapak’s Finco Motors; and chairman of the board of trustees, and Newton C. Fair, Chicago realtor and member of the board of trustees.

A plaque for each hall will be unveiled at the dedication. Descriptions will read:

"Fair Hall--in memory of Charles Fair, this dormitory is dedicated by her son, Newton C. Fair." "Fowler Hall--in memory of Mr. and Mrs. James M. Fowler, this dormitory is respectfully dedicated."

Seek Open House exhibit workers

With Junior Week rapidly approaching, the call is out for students to submit their ideas for the various departmental exhibits. Students who are interested in working on the Open House projects are also being sought. Information may be obtained from the following majors:

- Architecture: Kenneth Anderson
- Biology: Robert Herman
- Business and Economics: Harri Blankinship
- Chemistry: Irving Mandell
- Chemical Engineering: Charles F. Nagel
- Civil Engineering (bio): H. R. Rice
- Electrical Engineering: George Schlessman
