Glancy’s five seek revenge

By Markus Levy

In one of the quiet periods of the long basketball season, Glancy nailed, "Wait till they come back to Tech next fall—then we’ll get ’em." The Eagles had just lost a heartbreaker to the Fighting Illini, 56-50. It gave them an even split in their conference record, and the Tech whipping was the first contest of the year for the newcomer.

Glancy and some of the boys still remember that night and are looking forward to the "big" game tonight to prove their money trees. Tonight they will have to do it, however, without their new heroes of Hofheinz Gym, Bob Halterman, and Leo Kiley, all out with injuries.

This game may well set the pattern for the season and end the season. If the boys can get by Lake Forest, they seem to be a close to being their own version of the 1938 campaign of nine wins and nine losses. With a few losses this season, and it seems sure the state tournament spot are a plenty, they can win almost all their games.

(See CADDIES on page 3)

Honors assembly to hear Bunche

Noted United Nations diplomat, Dr. Ralph Bunche, is coming to Illinois Tech. He will appear as featured speaker at the Honors Assembly, held to appear Thursday when he will discuss the topic Peace Operations.

World-renowned Dr. Bunche, when he was named as the Palestine mediator following the formation of Bernadotte, has an uncanny ability to speak the language of the Near and Middle East. He was able to carry the message across the Arab world, and it was a successful conclusion.

When it was announced that Dr. Bunche would be in the Chicago area to deliver an address at the Illinois Tech, students and faculty members, as well as the community, were happy to hear the announcement. The December seventeenth, Dean Larkin, announced that Dr. Bunche would give an address at the Illinois Tech, and that he would be in the Chicago area to speak to the students of the campus. The address was to be given in the Illiana hall, and it was to be broadcast on the radio.

ITSA lists 'Who's Who' selections

The Illiana Tech Association of Students listed on the page two, of the twenty-four students from ITSA who were chosen in the 1950 edition of Who’s Who among American Colleges and Universities. These students are:

Johnnie Best, IL; Milton Cox, NE; William Denny, NE; Virginia Duvall, IL; Payton James; Marjorie E.; E. G. Graham, NE; Eugene Heiskell, IL; Russell Heineman, NE; Julius Huff, IL; Martin Lash, NE; Evan Kirk, IL; Robert Link, IL; and Edward Mihal, NE.

Others are Patricia Nash, NE; Clifford Nelson, NE; Ernest Neece, IL; Irene Radkoff, IL; Richard Reeder, IL; Lawrence Shugrow, NE; Robert Shoshone, NE; and John Tyson, NE. These twenty-four students will are the group that will graduate in January. They are Czar, Daniel Li, and Louis.

The selections, limited to 7th and 8th terms, not on probation, were further reduced by a screening of the dean of students’ list of academic records. The screening reduced the list to sixty students.

The selections were based on the recommendation of the individual's campus activities, personality, academic success, and scholarship. The chairs were made by a committee of four faculty members and two students, all appointed by ITSA.

Dance follows cage opener

"Hey Sig, did you hear about Miss Illinois of 1949 coming down to come to our college basketball game? She’s going to be the Outstanding Basketball Player of 1949 to big George Scullamer!

It was little Bob speaking to his famous TechText buddy, Sigmund Angl.

"Yes, she’s a quite a girl. Only 19, but she already won the top Patricia Stevens model. She heard she came out here, so the Miss America contest at Atlantic City and won a trophy for having the best figure at the meet too," he added.

"Well, I’d better raise the dough, Zippy, and repel Bob anxiously, ‘A boy’s a charm if he has that," Harold I can fly alone and a dance in a dance, but Miss Illinois—WOW!" the little man chortled.

"Not so fast, my single-minded pal. Remember what I’ve told you already about the first game of the season and even if you’re not in the back end of a fan you might want to see who your team looks like, Zippy. Where’s your school spirit, huh?"

"Look who’s calling. School spirit up with the little move will be the first one in the NU audience after the game to meet that has head of men they’re bringing down too, Zippy old man!"

"You injured my reputation, Little Big Head. But since you mentioned women, I think I’d better have a talk with this Miss Illinois, that’s a girl who’s going to be the head of a department, you know."

"What do you call her?"

"Here’s the next important clue to Christmas Spirit"

Quite "gussie authors" are urged to try their luck at naming the "Christmas Spirit". The first correct winner will win a "Winter White" bed, an orbicular Versailles, a complete set of champagne, and a whole pyramid of presents.

An official entry blank is available upon purchase of a gift for only token price at the North Union library in the dayroom.

The first clue appeared in fact this issue of Technology News and proclaims:

His name is in the news director, you know about him and you read his publication. My name is in the next director, you know about him and you read his publication. The new director is in the next director, you know about him and you read his publication.

This clue is now the subject of a successful search. It says:

Distinguished... your photon looks like the head of a department... break down both... and give this guy some credit for a change!

New pair of scholarships in February

Two new scholarship funds, effective February, 1959, will provide financial assistance for outstanding students attending Tech. This was announced by Dean of Students, Charles H. Thompson.

Funds have been established by Seymour Oppenheim, president of the Traveling Package Company, and by an anonymous donor through the Chicago Community Trust.

The Annual Traveling Package Award provides two partial one-year scholarships for exceptional junior and senior chemistry majors.

Glamorous gift theme of Home & exhibition: candy safe in offering

The Home Economics club has obtained the services of Miss Janet West, representative of the Tew Enterprises, who will present a series of gift wrapping demonstrations for the patrons of Marshall Field and Company, to demonstrate "too beautiful to spoil by opening." Miss West will hold an exhibition in 3018M during the free hour Thursday morning and is invited to attend, whether student or not.

On Tuesday, December 13, the Home Economics club is planning a candy sale in both halls. Delicious candy made by the home economics girls will satisfy that sweet tooth.

Curtain time on play

The curtain will go up in the NU - assistant Wednesday evening, on the first play to be presented by the Campus Players, "The Night of January 1949" is a suspenseful, thrilling mystery that takes place in a court room.

The play centers around lovely Karen Andre, secretary to the murdered Bjorn Faulkner, as played by Mary Tribble, admissions counselor. The district attorney and the defense counsel are played by Tom ("Frigid") Murray and Ralph Broas, respectively.

Tickets can be purchased at the door. The play will start at 8 p.m. and is scheduled to be held every night. In order to obtain tickets at this time indicates that a student will be selected by the group to select the act play to be given early next semester.
Blowing the Gaff

See games on activity cards

There seems to be some confusion over the question of whether or not student activity cards will be accepted as admission to the ‘Hog Wild’ basketball games tonight. The answer: they will be.

I suppose this news should be given front page space, but, due to the late date at which the decision was finally reached, this is the only place I could get it squeezed in.

Here’s the scoop. Anyone who bought a ticket for the sole purpose of seeing the game will be refunded his money at the door upon surrendering his ticket and presenting a student ID card. If he bought a ‘couple’ ticket he will have to pay the price of admission to the game for his date, unless she also has a student ID card. Surrendering of the ticket forfeits all right of attending the game after the game. All those attending both the dance and the game will receive no refund.

I’ll have to congratulate not getting this information to you sooner but there was quite a problem deciding the structure of this procedure. The reason: our facilities.

Due to the limited seating capacity in our gymnasium, it was felt, and still is felt, that if admission were given front and center room for all interested in attending. But since a precedent has more or less been set in recent games, by granting admittance on activity cards alone, it was deemed advisable to follow the procedure until some definite policy is arrived at. Now it’s a matter of first come first served if you want to get in.

It’s a shame that such conditions have to exist, but it’s one of the problems running a building program and being forced to hold events in temporary quarters.

Jim Ginney, ITS President.

Slipstick

A group of small children were telling each other where they came from and the prices their parents paid for them. One said: “I was born in a big hospital.” Another said: “My mom and dad paid a ‘nurnous’ price for me!” Still another boasted, “My mother and father bought me from the doctor and paid a million dollars!” The fourth little girl then said, “My ma and pa sure poorest and couldn’t afford to buy me. I was homemade!”

Peroxide is an ingredient in a new fuel for jet-propelled planes; but of course, we all know the stuff has been used before to improve the pickup.

Indignant lady to beautiful librarian; “It’s strange you haven’t that book. My husband said you had everything.”

Mother: “When I was your age, young lady, a nice girl would never consider of holding a young man’s hand.”

The Daughter: “But mother, nowadays a nice girl has to hold a young man’s hand.”

A wealthy client insured her wardrobe while traveling in Europe. Upon returning to London she found an article missing and immediately cabled her agent in New York. “Gown Lifted in London.”

The agent replied, after deliberating: “What do you think our policy covers?”

If a girl’s a good leaver at Strip Poker it isn’t always sportsmanship. Sometimes it’s just plain conceit.

“Ann turned off all the lamps ‘cept one fancy little green table light.”

“Then what happened Don?”

“Well. . . I’ve driven automobiles too long not to know what a green light means.”

A cultured woman is one who by the mere shrug of her shoulders can adjust her shoulder straps.

“So your daughter is about to marry. Do you really feel she is ready for the battle of life?”

“She should be. She’s been in your arrangements already.”

Her: “In spring a young man’s fancy lightly turns to thoughts of love.”

She: “Yes, but you think it’s spring every time you get into a warm room.”

When a girl is a feast of beauty every young fellow wants to eat with her hands.

“Wow! Last night I finally persuaded my girl to say that little word: ‘Yes’!”

“Congratulations old man. When’s the wedding?”

“On the third.”

The height of absent-mindedness was recently reached by a boy who was so busy trying to steal some money out of a girl’s stocking and then forget what he went after.

By Carolee Gumble

as I See IT

by D. H. SLIPSTEIN

SLIPSTEIN makes this page this week for lack of space. I would like, however, to comment briefly on one note sent me by a freshman who noted the disrespect shown lecturers in freshman general chemistry. He says in the letter, "Obviously, the students have no ability to understand the respect a student of science owes to a master who is teaching them... if the students stop to think, they should realize they are losing money by their actions."

He goes on to say, "I believe the crux of the thing is that the students just haven’t stopped to think. Certainly, it isn’t the result of malicious intent on anyone’s part."

All students should think this over once:

BIGGER AND BETTER— that seems to be the theme of student publications this year. The New Student Directory is a useful book, and what’s more, it does lay out! Also to be commended are the Parr Crier and the Fowl Growler. Evidence of the high morale in the student organizations, they are filled with news and chatter of dormitory activities. These are healthy signs of increased interest in organized student activities.

TECHNOLOGY NEWS

TELEPHONE COUPON

After leaving your daily newspaper to read the stories which appeared front page, stop at the table of a dress store to read the regular telephone directory of the shop. Now, in a matter of seconds, you could be reading the list of names and numbers that have been entered in a book that is a ready reference for you throughout the year. This book is the telephone directory that is published by the local telephone company, and it is used by the public to look up the names and numbers of people who live in the area.

A printed telephone directory of the local area is an important resource for individuals and businesses, as it provides a quick and easy way to locate and contact people. The directory is organized by name, and it includes information such as the phone number, address, and sometimes the nature of the business or service provided.

In addition to its practical use, the telephone directory is also a valuable source of information for researchers and historians, as it can provide insights into the social and economic development of a community over time. The directory is often used as a historical record, and it can be a valuable resource for understanding the past.

The telephone directory is typically updated on a regular basis, with new entries and changes made as they occur. This ensures that the directory remains a relevant and useful resource for the public.

TELEPHONE COUPON

TELEPHONE COUPON

As you can see, the telephone directory is an important resource for individuals and businesses, and it is a valuable source of information for researchers and historians. The directory is typically updated on a regular basis, with new entries and changes made as they occur. This ensures that the directory remains a relevant and useful resource for the public.
Telephone system coordinates IIT

By Jim Gwewartowski

After leaving one of those "simple" quizzes last week, your writer was in somewhat of a state. With integral signs and force vectors still flowing through his brain, he descended the steps to the MC basement "toboggan" and saw before him the outline of a door. He opened it and entered the room. To his surprise he heard female voices; one asked him what he wanted.

Now, in such a position your reporter had one of two choices—assuming that the situation would probably cause operation about whether one had just come from a BON meeting, or making the excuse that he was a Technology News reporter which might save him embarrassment. Choosing the latter, he took out his notebook and began asking questions.

This, however, was a mischance, or rather a "Mrs. calculation," for all three girls were in the same department. The noisy number available was CA
tone 3IIT-9008. A large switchboard hung on the wall, and suddenly your reporter caught on—this was the nerve center of Ili
tistics, Technology's telephone system, and these were the girls who manned the switchboard.

Mrs. Eleanor Stack, the head operator, is seated by her desk on the switchboard. It seems that it came to the IIT campus on Janu
ary 17, 1949, and took over a job that four separate switchboards had filled before it. Beyond the switchboard, and in the ARB Main and Engineering build
ings, are two switchboards, each a three-operator board and has 500 terminals. Already 422 are in use, each one representing a tele
phone on campus.

About 3500 incoming calls per day are handled from 8 to 6. At 6 the female voice disappears and a male voice says: "Technology Center." Ray Weichmann and Howard Kobayashi handle the late hours. Busy for both of them is the 24 incoming trunk line is connect
ed to a certain telephone on campus. The present switchboard in the type and size used by a city of 4,000 people.

Having a constant clicking sound your reporter asked how they could handle the terminals. This sound turns out to be the campus dial system in action. The opening of the door to an auxiliary room dis
covers the names of the people by which one person on cam
pus can call another, without bothering the operator.

One of the merits of the board is the fact that five different personnel are actually on duty at the same time on a so-called "conference." Any one can come in hand
ily by which the operators can call each other. The Armour Research Lab
building.

Many of the suggestions from the operator. After dialing for an outside call, be sure to wait for the second ringing tone be
fore starting to dial your number. When you wish to connect the

Heat plant nears completion

By Alan Plait

One usually thinks of a steam plant as a maze of pipes and wires. Well, IIT's new plant is rapidly beginning to look like just that. Most of the piping on the ground floor has been installed and the coal pulverizer leading from the hopper has been tested.

The dust hasn't settled yet.

Asbestos installations were along with as soon as the piping circuits are completed. The main job, and bigg
est one, has been the insulation of the large tanks throughout the plant.

Many of the gratings that will be used as flooring have already been set into place. There remain a few galls
 that are being installed at this time.

The gas and water mains coming into the building from the street are all that are in the way of fin
ishing the ramp for trucks that will extend to the rear of the structure's south side. Sidewalks have already been laid for a small strip at the northeast cor
ner, where steam lines, that have been laying around, will be run to the wall.

The view from several vantage
top in the building is impressive to say the least. Master pipes seem to run around in an obstacle course.

The boiler and huge coal hop
per dominate the entire scene, however.

With the completion of tube installation in the bottom of the boiler, it will be fired up and set for loads. This will be done with a few weeks. It will be nec
essary to lead coal by hand into the pulverizer until the trucks to the retaining hopper have been laid down. Work on this project will start as soon as the retaining wall to 51st street is completed.

The dust collector and the air compression unit that leads to the smokestack will operate soon. Elec
tricians are working at a fever pace to get the motors running.

An additional story struc
ture is being prepared at the south side of the smokestack. This will be the gas booster station. Its pur
pose is to keep gas pressure on an even keel throughout the mains. It doesn't look like a long time before student will be walking in the heat of the classrooms that the power plant will supply with steam.

Gene likes fun, passing courses

By Wayne Basello

Gene J. Resebek is an outstanding IE student who is probably better known as "Gene," the editor of the Integral. Graduating from Morton High School in 1944, Gene spent twenty-two months in the Navy. He entered the feeling that he wanted to continue his education and business engineering. Gene chose to follow the management option.

Gene is a member and former president of TriDelta Tfraternity, treasurer of BON, and a firm believer in extracurricular activities as long as grades do not suffer. He

Clamps put on distribution of publicity

By Mary A. O'Brien

Recent enforcement of new handbill rulings laid down by ITSA has been assisted and facilitated by the newly created three-man publicity committee. The committee, working under the management of Student Affairs, was appointed last week to achieve its objective, and authorized by the use of all ITSA controlled publicity mediums, including student bulletin boards, poster strips, and handbill distribution.

The committee, consisting of Dean Clarence Dukakis, Frank Curriston, and Joe Cabas, has announced that hereafter the posting of handbills on the inside walls of all school buildings will be prohibited and the necessary action will be taken to remove the signs. Taping handbills to inside walls is illegal, the committee pointed out, inasmuch as ITSA has several times specifically outlawed the maneuver because of the resounding damage to walls.

Enforcement of the handbill order will be relaxed for one week to enable the committee to give ample warning to student organizations.

Any publicity campaigns employing devices other than those now existing must be approved by the publicity committee, according to the ITSA rulings. In addition, the committee will attempt to advertise properly all events approved by the methods and facilities available. They will also be responsible for the maintenance of bulletin boards, poster space, any other equipment purchased or purchased by it.

Students view modern art as sculptor exhibits at Tech

By Carol Glennie

Adam and Eve attracted hundreds of visitors to the MC lobby this week as Iliam Weinman displayed thirty pieces of semi-modernistic, life-like sculpture. The exhibit contained pieces of such widely differing subjects as the east coast statues of Adam and Eve, the bronze bust of Frank Lloyd Wright, and the fish and horse-shark, carved from pieces of driftwood.

This is the first of a series of such exhibits sponsored by Illinois Tech which will run through December. Other exhibits will feature the oil of Ugo Lavini, water colors by Fritz Biehler, and a collection of miniature paintings by Melpina Neumann.

Cagers vs. Lake Forest in opener

(continued from page 1)

Led by Captain George Schneller, the Lake Forest promies to be one of the best ever to visit the floor at Tech. With Bob Leiter and Carl Readon at the forwands, the boys have that scoring punch so neatly combined with good work in the back rows. At guards are stellar Bob McCue and Jerry Manston. Manston is the only returner to last year's starting lineup and has worked out excellently next to McCue; both boys can really handle the ball and are deadly long shots.

As a sidelight, Scheuermans last week was voted the outstanding player of last season. While breaking the individual scoring record with a tremendous total of 279 points for the 18 game campaign, George was a standout all year. In a vote by the players themselves, "Big George" was overwhelmingly voted the honor. The trophy will be awarded between halves of the game tonight.

The Foresters themselves are no pushovers. With Bob Jeen and Norm Bergdahl back from last year, Lake Forest will be one of the toughest opponents the Techies will face all season.

The schedule of games is:

Dec. 2 - Chicago
Dec. 5 - Crewe
Dec. 6 - Milwaukee (Navy Pier)
Dec. 8 - Lake Forest
Dec. 12 - Illinois
Jan. 6 - Milwaukee
Jan. 13 - Chicago
Jan. 19 - George Williams
Feb. 3 - Michigan Normal
Feb. 14 - Chicago (A)
Feb. 24 - George Williams
Feb. 26 - Aurora College
Feb. 28 - Illinois (Navy Pier) A
Mar. 4 - Crewe
Mar. 5 - Crewe
Mar. 8 - Crewe
Mar. 11 - Crewe
Mar. 15 - Crewe
Mar. 19 - Crewe
Mar. 20 - Crewe

The season promises to be a rugged and tough all the way.

The team has all the qualifications of being a strong, hard-to-beat aggregation, and anyone who comes in to play any of the games certainly will not be disappointed, as long as the cagers are going to be a good team to watch.

The starting lineup for tonight is:

IIT - LAKE FOREST
Leiter - F
Jeen - F
Hill - F
Readon - C
Bergdahl - C
McCue - C

Wrestling team sets schedule

With his squad gradually being whipped into shape, Coach Tony Barbanes is primed to send the grapplers off to a flying start in their coming schedule of matches.

The practices everyday from 4:45 in the gym and Barbara emphasized that the welcome mat is down for any Techies who would like to be interested in trying out for the many positions on the team.

The season’s schedule is:

Dec. 2 - Navy Pier (practise) A
Dec. 3 - Navy Pier (practise) A
Dec. 5 - Bradley A
Dec. 6 - Macomb B
Jan. 13 - Navy Pier B
Feb. 7 - Chicago A
Feb. 13 - Chicago A
Feb. 20 - Open
Mar. 3 - Wisconsin (1) w u ex)

HOMESTEAD - IIT - LAKE FOREST: Tonight Glinsky's injury plagued charges will take the floor against a seasoned and powerful Foresters quintet in the season opener. Last Friday night our boys trampled over Harry's Gym Club, a pretentiously strong independent team, in their final practice scrimmage.

Bob Leiter continued his red hot shooting, hitting 10 out of 15 times from the floor. Scheuermans also contributed a "intensified" back shot with the comforting regularity of a Carter's Little Liver Pill. Manston is getting back into his old form and McCue is having a little trouble finding his touch, since he is in the last out of the first month of practice, but his playing know-how has never slacked. Manston's girl was in last weekend, but he should be back in shape for tonight's game.

Keep your eyes on freshman Allen Hall. If he keeps improving at his present pace he'll be pushing some of the veterans for a first string spot. Lee Kilby, who is always one of Tech's most reliable and consistent forwards, acing up his game, and Bill Martin is again in shape. Bob McCue is getting in good shape and his return to form will be a great game tonight, one that you won't want to miss.

IIT BASKETBALL: Intramural director Ed Glinsky tells me that he has accepted 26 teams into this season's tournament. As usual, the tourney has been divided into four leagues of six teams each.

The winners of the individual leagues will play off at the end of the season for the title. The 12 champions will then play the 12 basketball champions for the newly instated John J. Schonhorn trophy.

Missing in this year's competition are the defending champions, the Trojans. The perennial favorites such as the White Kids, led by "mouse the ball" Van Metter, the black shifted Wolves, coached by "Shoulders" Manston and his understudy Lee "Norte Dane" O'Keller, and last and probably least, the Fabulous Architect five, managed by their fabulous manager, aging Ed "the Iowa" Banks, are completing into form.

COMING THINGS: Watch for the first in a series of guest editorials that will appear in our next issue. Technology News, "Uncle John" Schonhorn will begin a discussion of the pros and cons of football at Tech. Future editorials written by people in the know will discuss problems of athletic scholarships, greater athletic programs, and other facts and figures pertinent to our sports situation.
