Brief senior job hunters

Well-known authorities on college placement will put numbers of the class of January 20, in the "know" about job opportunities at a placement forum to be sponsored by the Society for the Advancement of Management in Metallurgy auditorium, Madison Monday.

All phases of activity available to the job-seeking graduates will be exposed in this three-hour session. The forum will be designed to stress dramatic shifts which will graphically illustrate factors conducive to upward climatic movement. A question-and-answer period will conclude the program.

Top speaker on the program will be Fred H. Leforty, college recruiting officer of Carnegie-Illinois Steel company, Pittsburgh, who will talk on "Concepts of the Personnel Interview." Also featured will be Charles Bartlett, recruiting for Allis-Chalmers, Milwaukex, who will take up the "Job Outlook for 1960 Graduates," and Kenneth Hooper, college official of Illinois Bell Telephone company, who is to speak on "Letters Writing and Other Social-Personal Job Appraoches."

"These speakers are widely regarded as top authorities in the placement field," Ray Zschokke, KAM chairman, said. "We are grateful for the cooperation of Harold L. Miehler, IIT Director of Placement, in obtaining their services. Others who urged eighth-formers to secure their priority on spaces early were pointing out that Metallurgy auditorium has space for only 150 persons.

Greetin Meetin' comin'

"Greetin' Meetin'," the first freshman all-state mixer, will be held October 8, in the S.U. at 4 p.m. Yes! This is another initial get-together, which offers many enticements to any and all. Entertainment, lighthearted and entertaining as it may be, will be a high pitch throughout the evening according to Al Siede, freshman class president. Bob Rose and his harmonizers will be on hand to lead up the proceedings and a shift that promises to make every IIT student will be there.

Both the attending and unattending students will be especially interested in being acquainted with the new crop of freshmen. To those on the "IIT Hot List" this event could prove quite worthwhile while considering what the newly enrolled freshmen faces mean up to.

The dance committee promises plenty of dancing and fun for all who attend. The music will be of the best and tasteful type, and, best of all, the admission is free. Refreshments will be available in the S.U. throughout the evening and will remain open for the event.

For a full and complete list of dates and times for everyone come out and join the fun. Meet your friends without your school bang-up for a type change.

Specialty acts top 'Doll Parade' tonite

Tonight at 9:30 Sigma Kappa sorority will put on its Paper Doll Dance in the S.U. auditorium. The purpose of the admission-free dance, according to Patricia Nash, chairwoman of the dance committee, is "to create social interest and friendly term." Therefore, all students who have heard or have not even worked up will do well to come to this gala affair. Girls will be provided with these without dates.

The dance committee plans an interesting lineup of entertainment, headed by a Specialty Trio dancing on stage, followed by Audrey Hinck and Al Berbeck. Bob Rose, harmonica player, and Bob Bannerman place spot, will be featured on the program.

Refreshments will be sold at the moderate price of 6 cents, given away as previously announced.

Members of the dance committee include Shirley Adkins, Boba Tohy, Cruella Lees, and Arlene Edwards.

Draft!

Dr. Peter Berman has been appointed principal of Farmington High School. He will return to full-time duties in the fall.

T.P. R.J.

PRIZES for Pupils! Prophets winners are examined by students. (See this next story block on page 1.)
Guest Editorial

Placement a student problem; emphasis on personal qualities

The most important topic of conversation in college halls these days is the subject of placement. Unfortunately, too many students do nothing more than daydream about professional employment until their last semester of college. Compared to three years ago, the placement picture is "foreboding." At this time it was unusual for a senior to make an appointment with his placement officer to discuss offers of employment on his day of graduation. Now it is common for a senior to make an appointment to discuss employment offers. There are several reasons for this. The first is that the "job market" is down for college graduates, and they are more eager to find a job as soon as they get their degrees.

Placement, each of you will have been exposed to an amount of knowledge. The amount of placement knowledge will vary with the individual; however, all students should benefit from improving your placement knowledge during your undergraduate years. Think of what you will be doing in your future careers. Have you ever thought about your future careers? What will you be doing? Will you be working in a professional field?

Plan for jobs now

The time to start planning for employment is during your freshman year. Develop your placement skills, cooperative, and social skills now, before you graduate. Your college placement office can provide you with information on improving your placement skills and job interviews. Campus interviews are important, but they are not offered to give seniors "employment interviewing experience." Industries spend thousands of dollars every year on college recruitment, but they expect to interview seniors who are interested in their businesses. Before being interviewed by any company, it is in your best interest to become well versed on the location of the plant, its products, financial status and attitude toward employment guidelines. You should be familiar with the placement office and the library.

Local engineering markets

Most of you are interested in the Chicago area in the school year. Illinois Tech graduates are employed in the best engineering school in the city. Many of the largest independent and major businesses firms in the city limits and an additional 1,000 will be found in the suburbs. Over 4,250 firms employ fewer than 100 people. Only 117 firms employ 1,000 or more. These firms would tend to indicate that there is still an excellent market for engineering graduates. There is still an opportunity for you, the college graduate, in many of these firms. The field is relatively fertile and the graduate of today must cultivate that field to obtain the best yield.

You can apply any of the 5,000 firms personally or interview with your competitor from other schools must make an appointment with the placement officer or procedure. The larger percentage of IT graduates have had industrial experience and are ready to graduate. Furthermore, this same percentage has worked in the U.S. through college in some extent. In the college of engineering of 1950 going to be an overcrowded item with no market? Newspapers would lead you to believe that this is true, especially those of you who are graduating with engineering degrees. The fact is this: Only about 10 percent of today's college students are studying engineering curriculums. There is still a need for good engineers in this country. As we have already mentioned, this may not be as rapid as in the last few years; however, new opportunities are available for us today.

Final outlook

As a prospective graduate, you have undergone rigorous tests. The very fact that you were admitted to IT speaks well of your record through high school. Your college diploma will show further evidence of your ability to succeed in the engineering competition to be found in any college or university today.

There will be positions for all of our graduates providing they are willing to work. Advancement will not be automatic or as rapid as it recently was. You must be able to understand your fellow men, show ability in leadership, cooperation, initiative and social adaptability. If you have not developed good personal characteristics, you may have difficulties selling your services. The placement office acts as an extension of your personal sales efforts. It furnishes hundreds of leads yearly to graduates. If you are willing to work, have not and does not guarantee a job to anyone. However, it does assist in finding leads for you to follow. It also collects information from your instructors and passes it on to prospective employers. Cooperative by keeping the placement office informed of your progress in obtaining a job. You are not required to register with us in advance, however, you do so for the advantage, however, you do so for the advantage.

Please remember one thing: It is up to you to sell yourself; we are only a means to an end.

Hal Minter, director of placement.

as I see IT

by Dr. Albert B. Abercrombie

For the past three years, I have charged out EE requirements and lab reports, thinking that industry would simply be clamoring for my services once I graduated. Like all waltz bands, this has come to an end.

Hal Stinflter, who wrote the guest editorial on this page, has the latest information on job outlooks since he is in close contact with the placement officers. It is true that there are several difficulties alerting to the various potential getting angles being left out in the cold.

One saving point in his comments is that payroll signers want "personal energy" in their job applicants. With student initiative in activities having administrative encouragement, this should not be too big a requirement for active Technikus. But, will the "homebody" realize now that experiences in student activities can pay off financially? Even if we could produce "God's personal gift" to the industries here, we still can't assume that opportunities will automatically fall their way. What about the boys who insist on filling out applications and picking up stupid interview questions and answer questions incorrectly in return, write in the office of inquiry a small gettng letter to check out, duplicate, and fail to show up for placement interviews? If these practices should continue, how much longer can we expect firms to send interviewers at great expense to visit IT?

I know one woman who is trying to remedy these drawbacks. She is going to get a $200 by Aug. 1st. The Professional Council is holding a meeting Tuesday to discuss with the firms which difficulty can get their students to get a line on placement. If these difficulties are from the student's angle. Now, here is a fertile field for sophomores and juniors; the results may well pay off in cash.

One of the editors of Technology News decided recently to change his major field. I'm losing a good associate, Mr. Otto Kruse in Chicago, but he has another job. This was the extra time he'll have to spend in making up defective credits. I congratulate him on his determination to follow a career that promises lifelong satisfaction and I will miss him when he is necessary to do so. Johnnie Wilt will be placed soon.

Finally, some fellows just came into the office and asked me who put up the "hot" in the chemistry building. I've always been on the run to get to classes over there, so I'll have to slow down next time and take a good look.

Slipstick

By Milton Miller

In a recent survey at the Women's College of Northwestern University, it was found that 67 percent of the student population said that they had a psychology major, while physical education majors were 20 percent. A number of student organizations were found to be receptive to this phenomenon. What goes on with this Freud business, we wonder?

D. D. Reardon, dean of students at Pacific University, is moving swiftly to "clean up" three local fraternities. He warned that unless such practices as black-balling, unnecessary interference in the academic affairs of the student, and certain initiation methods are halted, he will be forced to disband the organizations barred from the campus.

Law students at the University of Southern California declare a "boom" holiday this year. Outright aphis are prohibited for instructors who have their own ideas about justice.

To all fraternities, you are better off than you think you are. At Georgia Tech in Atlanta, freshmen are referred to as "frosh." They must wear rugby shirts and pants for a dollar, participate in a "chess" night at the baseball club, give a party in the Tech Post Office, have their pictures taken for the 1940 Annual at a dollar per picture, and must attend, among other athletic games, the annual basketball game where they participate in all shirt-tail parades that follow the game. Ah! good old IT!

Ah! good old IT!
Directory shaping up

Student Directory cards filled out by students during registration were checked against the registrar's list and the early part of the week. This was done to catch any last-minute changes of addresses or phone numbers. All telephone numbers were also checked, as they have been changed to a two-letter, five-figure setup.

The cards being prepared for printing total 3,067, with two per cent of the freshmen being absent from the list. Pertinent information, to be found in the front and rear portions of the booklets, is almost nearing completion and directories will go on sale November 1.

Integral sales hit $3,000; some last year books unclaimed

Integrals were bought by approximately 150 of the student body during registration. These sales amounted to over $3,000, according to Germa E. Zuidema,Integral sales manager. There was a renewed drive during the early part of the week, but complete results are not yet available. It was expected that there would be a big rush during this drive.

There are still over 100 paid-up copies of last year's Integral that are unclaimed. The names of these owners are on record. The integral office requests that these owners appear to claim their year book.

Give integral photo times

Bernard Korka, photo editor of the 1964 Integrals, has announced the scheduling of the first group sitting for the coming yearbook. Arrangements have been made for Tuesday and Wednesday for honorates, fraternities, and sororities. Pictures will be taken near the north entrance of Alumni hall or on the North Student Union lounge. Depending on the weather, to facilitate a smooth running schedule, the integral requests that the members affiliated with these groups be on time. Otherwise, they may be omitted from their organization's picture.

Other organizations and undergraduate groups will be scheduled at a later date. The week's schedule is as follows:

THURSDAY MORNING

9:00 a.m. – Mrs. Bolling Smith, Mrs. Lila Miller

11:30 a.m. – Mr. Bolling Smith, Mrs. Lila Miller

TUESDAY AFTERNOON

2:00 p.m. – Mr. Bolling Smith, Mrs. Lila Miller

WEDNESDAY MORNING

9:00 a.m. – Mr. Bolling Smith, Mrs. Lila Miller

WEDNESDAY AFTERNOON

2:00 p.m. – Mr. Bolling Smith, Mrs. Lila Miller

APO book mart builds

The Student Book Exchange, operated by Alpha Phi Omega, has formed a call for used book lovers to donate needed to enlarge its stock.

Ira Graham, director, stated that since its opening this week, the exchange has already sold over fifty books. For this reason, however, we are concentrating on building up its stock. Our full-scale operation will be achieved between now.

The exchange now has books for about half the owners offered at ITT. To have a book for resale, a student may take it to the Alpha Phi Omega office, Room 317 NU. Items will be stipulated by the owner, who is notified by post card of its sale. There is no commission taken except for a five-cent service charge.

The book exchange has been praised by Clarence R. Dinkins, dean of students. He remarked that there has been quite a demand for such a service in the past.

"A pocketful of dollars" has been provided by Graham to students who bring in their discarded texts to the exchange. He emphasized the need for the books before the end of the semester.

CAMELS FOR MILDNESS!

Yes, Camels are SO MILD that in a coast to coast test of hundreds of men and women who smoked Camels and only Camels for 30 consecutive days, noted throat specialists, making weekly examinations, reported not one single case of throat irritation due to smoking Camels!

**Prophet's prize list swells; Bear-Eagle tickets added**

By Larry Shapiro

"OK," football fanatics, you asked for it! The three great co-sponsors of "Pigskin Prophet," Coca-Cola, Chesterfield, and Technology News, have done it again! Once more the voice of the prophet has been heard and answered—we offer you a new prize-ticket to the top professional football games played in Chicago.

This week's prize list will be found to contain two postcards which will entitle the lucky owner to choose seats at the Philadelphia Eagles, champions of all they survey in the National Football League, on the Civic Opera House stage at Wrigley Field.

Back to just plain college football we find another tough card facing the "Prophet" with such games as Army-Michigan, Northwestern-Wisconsin, and Oklahoma-Texas as standing blocks. (What do you expect, a path of roses on a new football field?)

To help our entrants overcome these difficulties, "Pigskin Prophet" suggests you try the uncharted waters of our uncharted "Route of All"!

"LEADING OFF the parade in "Sonny" Wasiluski, our famous athlete supporter. Aiding Mr. Wasiluski are coach Ed Glorius, our reporter extraordinaire; Jack White, our dean of development and football; and "Jill" Robinson, the Ararat, Technology News Jack of all trades; Ed Mitchell (have to be a sport, he's our fella); Malvin Gant, our sports editor now living on his old age pension, and our Fresh eager, "Tubby" Painter of the "Sunset.""

This omnipotent group agrees to the result of the Army-Michigan title (riding with the student body, of course), and expects to "shovel" State pix to Iowa State over Colorado. Keep pegging!

**FROM WHERE I SIT**

By Ed Jennings

**LOOKS LIKE** this week's "Pigskin Prophet" contest is a cinch to get new records; the addition of the much coveted pro football slate makes the current prize list the most valuable ever. The only hitch is that you eager forecasters are limited to ten entries each. This was deemed necessary when it was realized that a certain group of crusading gentlemen connected 1500 entries in a single contest last year!

Well, poor old Old Timers is right back where it started. The all too familiar shears of dust and public voice which have replaced last year's newly planted grass... it will be interesting to know just how much real grass was tossed out the window in this well meant but obviously badly run venture. I suppose the lack of rule this column could be blamed, but as far as I know there was no lack of water in the mains.

**QUESTION...** Just exactly who is responsible for the upkeep of the "Pigskin Prophet"? (I don't know who is supposed to do it, but last spring the track team had to spend several days digging up and reseeding the track to put it in some semblance of condition for a meet... the baseball team had to pull and rake the infield before each practice to try and prevent a crop of grass and mints... and "Tubby" put to all of this in the opinion of this humble gripper is one helluva bunch.

Let's hope that things will be different in the future. It would take only one of these natty uniformed workmen a short time to keep the place in decent shape.

One of Tech's hardest working members has announced that the coming team will hold its first meeting today at 5 p.m. in the gym. Coach Seymour Bann will take over this sport for the season, and is sure to have a good team to try for a check in the Pennsylvania-Broadway series.

From where I sit, the newly organized "Tech News/Twrkout" lack the mighty stiff contenders for the Intramural Football title... the player named "Jimmie" may be the key to the Grid... and it is hoped that the Gridiron will be able to prepare four all-star teams in their first game next Saturday at 1 p.m., at Soldier Field.

Just heard over the grapevine that Tech's ball games will be played this year by night. That's right... LIGHT-enthusiastic club female cheerleaders... Top's here to stay...

**ANOTHER SUCCESSE...** Could any football fan be content with a trip to the East Coast at the expense of spending a Saturday night on the sideline? The trip is a definite must for a trip of this type. No less than eleven games are shown on the football card, and the only sure bet is that it will stay there at least until the end of the season.

**Honor I originates SAC to promote Tech athletics**

Under the sponsorship of Honor I, athletic honorary fraternity, Student Athletic Committee is being formed. The purpose of this group will be to help organize and supervise all phases of athletics at Illinois Tech and to improve them by these means.

Four Honor I members, preferably captains of the various teams and the president of Honor I will compose the committee.

Any Honor I member may receive complaints or criticisms about unusual or interfraternity sports and present them to the SAC. If any action is warranted, the committee will take the necessary steps.

Best Newman, as president, will head the committee and the remaining members will be chosen from the fellowships of all major students: Tow Andera, Leroy H. Anderson, Ross P. Anderson, Carl Pieta, Fred Pieta, Jr., Grover McDermott, Harry McPherson, Ray McPherson, Bob Mizing, Paul Figuer, Loren Waller, and Carl Wallace, with Frank Oller, Howard Smith, Leo Tollefson, and Paul Madison.

These men will meet hand in hand to promote better athletic conditions at Tech.
LUCKIES PAY MORE to give you a finer cigarette!

Yes, at tobacco auctions Lucky Strike pays millions of dollars more than official parity prices for fine tobacco!

There's no finer cigarette in the world today than Lucky Strike! To bring you this finer cigarette, the makers of Lucky Strike go after fine, light, naturally mild tobacco—and pay millions of dollars more than official parity prices to get it! So buy a carton of Luckies today. See for yourself how much finer and smoother Luckies really are—how much more real deep-down smoking enjoyment they give you. Yes, smoke a Lucky! It's a finer, milder, more enjoyable cigarette!

DAN CURRIN, independent warehouse operator of Oxford, N. C., has smoked Luckies for 20 years. He says: "To me, Luckies taste better. I've seen the makers of Luckies buy fine, prime tobacco, you know!" Here's more evidence that Luckies are a finer cigarette!

L.S./M.F.T. — Lucky Strike Means Fine Tobacco
So round, so firm, so fully packed — so free and easy on the draw
See success for drama venture

"Died entertainment of high character" is the aim of the Campus Players, newly formed dramatic group on the Illinois Tech campus, according to Henry Knepler, instructor in English and faculty adviser of the group. The announcement of the new group came on October 1, the day before the annual Dramatic Festival in Chicago.

Knepler also stated that the group will be formed to fill the void left by the annual Dramatic Festival, which was discontinued this year. He said that the group hopes to have at least two meetings each week and that all students are invited to join.

Unreserved Ball bids for resale at 2 p.m. today

Three-hundred bids for the October 14 Intermural Ball are now sold or reserved. It was announced by M. J. Polanski, head of the Dramatic Society, that the remaining 900 tickets will be sold at 2 p.m. today. Bids may be placed at the door of the Tech Union, and the first 200 to arrive will be admitted to the event.

Queen pix needed for publicity

Only a few applications and pictures of Intermural Queen candidates have been entered to date. Each candidate must be a student, or a member of the Crew, and must have a photograph taken by a professional photographer. The deadline for entries is October 15.

Tech timetable

Friday, September 29
- 6 p.m.: Tech Student Council meeting
- 7 p.m.: Drama Club meeting

Saturday, October 2
- 8 p.m.: Tech-City High Premiers game

Monday, October 5
- 7 p.m.: Tech-City High basketball game

Thursday, October 8
- 7 p.m.: Tech-City High football game

Rushing ends as Greeks pledge 138

Formal pledging ceremonies by the 15 campus fraternities, September 21 and 22, resulted in 138 new pledges for the fraternity system. The organization of the fraternity system has been undergoing a period of transition, with new members being initiated and old members leaving.

Rush Day activities included a formal dinner and dance, followed by a formal initiation ceremony. The ceremony was attended by parents, friends, and members of the fraternity. The new members were initiated into the fraternity and were presented with their new letters.

Check on your Tech student council phiếu

The Tech Student Council is preparing to send out their phiếu, which are used to vote on various issues. The phiếu will be distributed to all students on campus.

French film
SAM opener
Wednesday
Technology Center's own "Bijou Theater"...Metalurgists production goes "big-time" this week as the SAM presents the first showing of a full-length, 90-minute feature picture. The film will be shown Wednesday from 8 to 10 p.m., with a repeat showing at 8 p.m. Thursday, with "It's a Wonderful Life." Lancer French-mode produced thriller.

Selling Jean-Louis Bertrand, Pierre Frehy, and Vittorio Alagna, "The Partisan's" will enter Tech Center for 90 minutes, as it unfolds the story of a fictional, yet very real, man who warns a girl when he considers her to be in an overly dangerous situation.

A comedy and a sports event will precede this week's feature, according to Walter Cassini, SAM film chairman. The programs will be presented in cooperation with the department of visual education, language and literature department, industrial engineering department, and TSTA, Cassini indicated. All admission fees are collected, and all students and personnel are welcome to attend either of the programs.

Two new prose
in psychology

Two new instructors have been appointed to the psychology department. They are Dr. R. D. Grever, who was awarded a BA and MA at Vassar College, and a PhD at Buffalo State College.

Dr. Grever is now teaching two courses in psychology, while Mr. Renfree is teaching in Parsons Testing and Introductory Psychology.

Pride of gold
coast
a tenement eyesore

Twelve years ago, IIT obtained ownership of what was once one of the most exclusive buildings in Chicago. It was built to accommodate the elite gold-coasters who populated this area more than a century ago. The building is the Mecca, and it occupies an area of a block half between Dearborn and State on 12th street.

It was said that one could live a life in the Mecca without ever leaving it. Full of upper-class residents, the Mecca was a showcase for many of the center's finest apartments. This four-story red-brick building was designed to the highest standards and was considered to be a model for the city's housing stock.

The building's future is uncertain. Demolition would be consistent with Technology Center development plans, but the city has allowed the building to remain standing.

The building's historic significance and its contribution to the city's architectural heritage make it a valuable asset for the city of Chicago—home of many contemporary businesses and residents.

Arents aide to dean of engineering

Chester A. Arents has been appointed assistant dean of engineering at Illinois Tech. He was announced last week by Dr. John H. Rettig, dean of engineering.

Arents has been associate professor of mechanical engineering. He joined the staff in 1947, after serving a year as associate professor at Montana State college.

Last Wednesday, Arents was initiated as an honorary member into Delta Lambda Xi fraternity, for which he will serve as faculty advisor.

The American Marketing Association will meet at 12 noon Tuesday in 1998. All students interested in the field of sales, production, marketing, and/or management are urged to be present.

William E. Hammond, formerly director of the department of men and boys at the Hallie G. Brown Community house, St. Paul, has been appointed director of the Ada B. McKenney Community house.

Illinois Tech's photography club, Armour Eye, will hold a membership meeting at 1 p.m. on Tuesday, in the club's quarters, 901 C. Plans for modernizing the club's facilities will be discussed.

The Business and Economic club will conduct its semester elections at 1 p.m. Wednesday in 221. All club members are promised an enviable record of excellent speakers and large audiences for the coming semester. All Illinois Tech students are invited to join the organization.

Phi Sigma, honorary research society for the biological sciences, will hold an inaugural meeting on Tuesday at 1 p.m. in 377C. The acting chairman will conduct an election of officers and the chapter's policies will be discussed.
