Student budget runs in red

An Illinois Tech Student association budget of $41,940 for the term of 1949 was adopted by the ITSA board of control meeting Wednesday. With a total of only $14,008 available from the $25,000 per student per semester and $2,567.75 carried over surplus from last semester, a $900.25 deficit will arise from the general fund at the end of the semester only. However, a large part of the appropriations were made on a year-round basis. Integral and Brough team had received a total amount of $7,560 for the entire year from the student fund of $3,000 per semester only. Additional appropriations of $700 for honorariums, medals, and institutes of arrangements of technology publishing were spread throughout the year, and any mid-year deficit can be written off by the finance committee which authorized it for the current required funds of the following semester.

Although revenue from the general fund will probably be reduced next year because of smaller enrollment, the necessary appropriations will be reduced also. A new program of the student activity fund, Technology News, $2,442 appropriation, largest item in the budget, was cut $500.

A new organized group, given $30,942 for the first semester, an $870 appropriation to Armour Rye for the purpose of buying an enlarger and lens to be available for general student use, and $400 for the Advisory Committee for the Management of a new expanded film program are the only upward revisions in the next budget.

I still can't believe it, words of Integral Queen

Betty Jean Bunchok stood in the glare of spotlight at the Integral Ball to receive her 14-inch trophy, bouquet and crown, emblematic of her selection as 1949-50 Integral Queen.

The ceremonies took place at the Hotel Sherman on October 10. They followed a brief judging period. Ted Lindsley and Sam Bich represented Illinois Tech on the panel of judges.

Miss Bunchok, nervously taking the arm of chief judge Dave Garrett, local radio-TV personality, walked through an aisle formed by speculators to the bandstand for the coronation. Following her down the aisle was her escort, composed of Urruela Lue, Irene Reddick, Dorothea Williams and Marianne Behne.

After announcing the judge's decision and crowning the queen, Garrett asked her to address the throng. She blurted out her thanks, followed by an invocation, "I still can't believe it; I didn't think I could do it."

Miss Bunchok, whose home is in Whiting, Indiana, is a private secretary in a Chicago automobile firm. She was sponsored as an escort by Junior Delta Kappa.

A photograph assigned to corona mission missed the event because of an accident. Technology News editors were forced to supply the original contain picture of the queen.

Place senior announcements on sale Monday

Senior graduation announcements go on sale Monday in the NU lobby. A booth will be set up to take orders for cards from 11 to 1 p.m., Monday through Friday.

Senior announcement committee chairman Leslie Smith, who is in charge, has directed the former sales manager to sell the cards to the highest bidder. The former sales manager will have programs outlining the interest pitfall, interviewing non-personal approaches and job outlooks for seven firms. These programs are designed to eliminate the last minute worry of filling out forms and allow the prospective employer to concentrate on the highest interview.

This move is the first attempt to modify senior placement procedure to cover a year of activity.

Technology News makes division of charity fund

The Ad's McKinley Community House and Student Association is slated to receive the largest share of United Charity Drive funds, according to the recommendation made by the Advisory Committee on Student Activities. The recommendations adopted by the ITSA will give the neighborhood community house 30 percent of the raised $2,261 in total collected during the campaign.

Other charities and their established allotments are the World Student Service Fund, $1 per community fund; $1, 20 cents; Red Cross, 5 percent; March of Dimes, 10 percent; Salvation Army, 10 percent; and United Community, 15 percent. Each charity has been established to support its own independent activities. No other drive will be sanctioned by the ITSA this semester.

The ACSA, an advisory committee of ITSA, charged with investigating and suggesting action in fields of organizational activities, Glenn Diner, ITSA member, was elected chairman of the committee and Philip Thomas, executive secretary, at the first meeting of the ACSA. The function of the ACSA consists of Bud Deniger, vice-chairman, Paul Schueler, secretary-treasurer, Al Hawes, constable, and Mrs. Karen Y. Jones, Armour Rye and Jack Kelly. Members of the staff are representatives of all miscellaneous clubs.

Handy Technette features are described to freshman by Jim Gaffney, associate editor of the handbook.

Technette sales continue

Technette will be on sale again Wednesday in both Student center and the book store, between the hours of 11 a.m. and 4 p.m.

Published yearly, Technette is the Tech Center student handbook containing all pertinent information on student affairs. In previous years, the book was only a small paperback publication which soon deteriorated, but this year the staff did much research and came up with something new and different.

The book now in pocket size and sports a new tasteful cover. Included containing information on the administrative student organizations and their functions and the Tech Club, Tech Center, basketball games. Papers are set aside especially for these purposes and phone numbers and vital statistics of data are presented.
Dances need bus service

As you've probably already noted on page one, ITIA is now operating as a bus. But don't worry, everything is under control, it's not mismanagement. It was done deliberately.

I hope you are aware of the fact that since some enterprises are your long projects (Integral,Bough Cushing, etc.), it is necessary that their appropri-ations for the entire year be given during this term. This means that your expenses next semester will be a good deal less and it is that we hope to get out of the hole and even get a little ahead if possible.

Don't get the idea that we're all closed up as far as appropriations go. Since about a certain amount of our income for next semester is certain, we can still draw on it. I will admit that things are tightening up. Due to the present drop and expected drops in enrollment, student finances are going to be a great help on the chis. This year we had to allocate budgets and, in odd, I have to say I'm afraid it's going to become a long term trend. I don't think you're surprised. The Crisis are just about over.

One of the problems was there was another thing that may be of interest to a number of you. ITIA has issued a bus service.

We're not running the buses, but we will appropriate money to hire them.

In the past there have been some complaints about the fact that this feminine dance guest has been treated, so we're attempting to correct the situation by applying the school dance to all school dances in the extent of a transportation fee.

Any all school dance can be set up to $30 from ITIA for hiring the bus to pick up guests. This amount is to be returned if the dance is run for profit and if the profit exceeds the price appropriated.

If the profit is lost, however, the monies made is turned over to ITIA. If the dance is non-profit or breaks even, ITIA pays the entire amount.

The $30 applies only to organizations holding all-school dances once a year, the money is requested by administration more than once a year, ITIA applies only 50% of the amount, the amount to ITIA for each succeeding request. Anyone interested can get more information from the ITIA Secretary, chairman of the Social Committee.

Jim Gaffney, ITIA Press

Slipstick

Fashions Note: They're wearing the same thing in brasseries this year.

A true music lover is one who, upon hearing a song in the room, puts his ear to the keyhole.

Mrs. Murphy: "What's a jeep? My boy Mike writes that he's running an automobile." Mrs. Casey: "It's an Army automobile." Mrs. Murphy: "The parents are pleased. I thought it was a female jeep."

There was a great many more bromides to this effect, if any. no one didn't dye.

Mistress: "I'm glad to see you're engaged. Dotty. When are you marrying?"

Dotty: "Oh, our wedding night, maybe and not a minute before."

Letters to the Editor

Parking situation under fire; Activities are still on gift list

To the Editor: What gives on the parking lot situation.

When the parking lot south of 32nd street between Federal and Dearborn streets was first created it was not possible to all on a first come, first parked basis. Before long, the outside row on each side was reserved for faculty and staff members. Later the second row on each side was also reserved, giving the staff half of the parking lot.

Meanwhile the lot north of 32nd street was opened and students who came after 8 a.m. had to park there because campus parking space was filled. Nine o'clock students had to park close to 31st street in the north lot, though the reserved space in the south lot often remained half full all day.

The trouble seems to go on too far. As of October 13, the north lot was used by faculty and staff until 9 a.m. This gives them almost as much reserved space as is made available to students. Does this make sense? I don't think so. Are there any faculty or staff members who live on or near the campus? They are there are not. But, if so, perhaps a percentage of staff members drive to school than students, but the difference in percentage driving still would not mean that as many staff members drive as students.

I live 20 miles from school in Middlebush, Illinois. Ridding the North Island and CTA takes 50 minutes each way if one makes connections. An automobile this time is reduced to 45 minutes during the rush hour. I feel that automobile transportation is not a necessity because of the time it saves, but if this parking situation continues, the only parking space available to students soon will be a ten or fifteen minute walk from school.

Something must be done!

John G. McCoy

To the Editor:

Last week Technology News carried an article by Jim Gaffney, president of ITIA. In this article he mentioned that the degree of student freedom on this campus is relatively high as compared to other colleges around the county. Accepting this as fact, students at ITIA, it seems, can't appreciate a certain thing when it is given to them. For a school where such freedom exists there are probably fewer students engaged in student activity than on those campuses where freedom is at a premium.

As one goes through the Integral, he finds few seniors listed with the rare exception that majors maintain their names, and from the recent report on the number of seniors in fall classes, one can be taken, one finds that a great percentage of them will not even bother to have their picture taken to include in their class yearbook.

Certainly this campus freedom is of little value if it is unmind and unpracticed. The time will come when engineers as professional men will want more to remember of their college days than a series of classes and homework sessions.

Don Cunningham

To the Editor:

For the recognition of a filing system of old tests, homework, and lab reports at Fair Hall, results have been of great interest to small groups will not be able to help. The "file" has developed into a silent tutor that has aided many students and has been acclaimed by all users.

The idea of a file is nothing new. Fraternal groups on the campus have taken such prodigious care in developing their file that is a matter of conjecture whether various departments or fraternities have any more material on which to base coming tests.

The only flaw in this benevolent system is that the unattached student (or non-student), who are in a majority, are left to shift for themselves.

Few of our departments have recognized this injustice and have made a file available to all. Yet, the proponents of the "old school" persist in guarding back-number tests at top secret. Why? Objections loudly raised by some of the student organizations can help to correct this situation. This sounds simple enough, but here is the "pinched": an overwhelming plurality of fraternal group members serve on all such organizations and consequently these organizations reflect their views. Why should these people kick?

Only the interest of all the students can solve this problem. Certainly, everyone must do his part, and that is what this is referring to. "Those that help themselves"
Job interview procedure given

Placement interviews have come to be a stock item on the activity lists of IIT eight-timers. Not until recently, however, have these interviews commanded such attention as they do today. If they are well done, they may serve, not as an afterthought, but as a real asset.

Although the job procedures have become more important, the placement office is still prepared to offer the graduating student the opportunity to win himself a good position. The interview can be at least as much an asset as a liability, depending on the individual to see that he makes the best of the opportunity.

The graduating senior may sign up for interviews with all companies of his choice. At the same time, the company may reserve the right to interview in the student's home. The interview process may last up to three days, during which time the student will be seen by many companies.

The placement office contacts each of the firms for which they have a pre-registration list. The company then has a chance to ask for an interview with the student. The interview is usually conducted in the company's office, and the student is expected to bring his résumé, transcript, and any other relevant information.

Music writer brings era of noiseless composer

By Bert Colm

The musical composer of the future will sit down to the console of his typewriter, and compose, with its keyboard, a symphony, or a sonata, or a chamber music, using only his fingers and the sound of the typewriter. The composer will be able to type his music, and transfer it to tape, using ordinary photofacsimile methods, to the sound of a conventional picture film.

Then, by the same means he will be able to reproduce sound in motion picture houses throughout the world. The composition can be played as if by a full orchestra of all the conventional instruments, and some new ones, too, with the composer's own interpretation as to tone, timing, and dynamics.

Robert E. Lewis, associate physicist at the Armour Research Foundation, calls this "the sythetic sound on film." Lewis was the first to operate all the theoretical data on this process, and his work has prepared it for commercial applications.

Lewis teamed with Norman McLaren, of the National Film Board of Canada, who invented the first sound-on-film equipment made with a sound-on-film device.

"The typewriter-like machine is in no sense a reality yet," Lewis said. "This is the ultimate end of the evolution of sound. It may be forty years before a typewriter-like machine is on the market, but other forms of sound may be used within five years."

As to the advantages of this method of recording sound, Lewis said, "In my opinion, on film is not necessarily dependent upon the skill of the player, or the knowledge of the musician. Unlimited time may be taken to record, permitting the composer to exercise more thought and choice for each passage needed."

"It is possible that at the present moment no other method approaches the theoretical possibilities of this as a tool of the composer. It also should provide a wider opportunity and research into the nature of sound relations," stated physicist Lewis.

Sky writing thrills Ogden spectators

The model airplane club entertained several hundred students, faculty members and local residents Saturday afternoon with its first outdoor meet of the year, attended with 10 flying models and several balance aircraft. Approximately 10 members staffed the event, and all interested personnel are invited to attend.

The club's big event of the year is the contest during Junior Week when each member brings out the best of his craftsmanship to compete for prizes and honors. The contest will be held on the field. Various models will be entered, and judging will be done by the officers of the club. Several of the members are pilots, and the members will fly the models.

Don MacKenzie, president of the club, plans to have another similar contest for the benefit of any new members who are unable to attend Saturday. The club holds regular meetings every Tuesday at 1 P.M. in 101 C and all interested personnel are invited to attend.

Engineers’ exam date set

Examinations for registration as professional engineers in Illinois will be held on campus Thursday, December 9, if there are enough or more applicants listed. Any graduate of the institute is eligible to take the exam together with those students who are in the last semester of study. Application forms must be submitted to the Department of Engineering, Illinois Tech. Additional information will be released to the candidates at a later date. Further information may be obtained at the EE department.

Luckies Pay More
to give you a finer cigarette!

Yes, at tobacco auctions Lucky Strike pays millions of dollars more than official parity prices for fine tobacco!

There's no finer cigarette in the world today than Lucky Strike! To bring you this finer cigarette, the makers of Lucky Strike go after fine, light, naturally mild tobacco—and pay millions of dollars more than official parity prices to get it! So buy a carton of Luckies today. See for yourself how much finer and smoother Luckies really are—how much more real deep-down smoking enjoyment they give you. Yes, smoke a Lucky! It's a finer, milder, more enjoyable cigarette!

L. Murray Mangum, independent tobacco grower of Oxford, N.C., says: "You after you've seen the makers of Luckies buy the kind of tobacco that tastes good and smokes good!" Mr. Mangum has smoked Luckies for 30 years. Here's more evidence that Luckies are a finer cigarette!

Power plant is alive with activity

Now that the steam lines near the power plant have been tested, work will soon begin on the final connection to the boiler. Boilermakers completed their part of the job last week. The 200-foot smokestack with its twelve-foot "ITT" letters stands patiently awaiting the hot hardwood draft.

With their leaving, the pipelayers have had more room in which to work, but the interior of the plant is still a scramble of overlapped workmen. Their main task consists of connecting the boiler to the condensation tanks on the ground floor and final installation of all seating and incoming pipe lines. At the moment, the heavy metal pipe that fits onto the top of the ash storage bin is being put into place. When this is finished, all the stacks and some of the floor grating will be set. Stairs are already being installed on the first floor. Trucking-in is being done on the brickwork, by Supervisor Herb Mestas. This requires walking of plants where brick meets metal. The north and east sides of the interior are roped off with signs that read "ALIVE." What turned out to be alive were the electrical power circuits. The entire installation, from the transformer vault at 34th and Federal streets to the power relays in the plant, has been ready for a week and power is now being supplied to the complete lighting circuit. Electrical workmen must have their own power supplies, sometimes driving heavy duty drivers current generators.

The subfloor is ready at the north, east and south elevations of the building have been removed, making way for the railroad quay that will feed coal cars to the plant. A retaining wall to extend the present wall to 31/2 street west of the south building building was the project; any small buildings on site have been torn down to permit this operation.

The area at the north and south has been cleared out before the onset of winter in order that old foundations and concrete embedded in the ground could be easily removed.

Defeat of "undefeated," surprise tie foul Prophets

By Larry Shapiro

Please! Let us have a moment of silent prayer for the six college teams (in Pigskin Prophets) that suffered the twings of defeat for the first time this year. The "holding sit" are Southern California, Wisconsin, SMU, Pennsylvania and, Brown, Michigan and Navy. They are suffering too. uncooperatively a conduct of the Wildcats of N.U. and the Badgers of Wisconsin.

The Prophets are crying too, because Tennessee and Alabama fought a seven-seven tie which was missed by 100% of the "experts." Not to be outdone, Minnesota and Boston College staggered to a 23-23 draw to help continue the issue.

Grant's, that bares two games to account for—guess what—no upset! Penn State clipped the Nebraska Cornhuskers 21-7, and TCU's Lindy Berry steered his boys to a 26-6 romp over the Texas Aggies.

All in all, the 853 entrants in Pigskin Prophets had a sort of a "foot weekend." There wasn't a soul with even nine right out of ten, as about 6% of the contestant pooled Michigan over Northwestern, 50% chose Duke over SMU over Rice and 82% refused to believe that Pappy Waldorf's Golden Bears could trip up Southern Cal's Trojans.

Struggling out of the monster of losers came Mike Storn and Jack Schiltz in photo finish for first place. Both had balanced the Tennessee-Alabama tie, Mike had stumbled on SMU, and Jack went down with Minnesota's Wolverines. Mike was just a shade closer on the scores of the tie breakers and came up with the C-O-C-O-A-C-O-A-C-O-A. Winner filled with—yes, granted it—dilettante C-O-C-O-A-C-O-A. Mr. Schiltz will be crowned by watching the clash between the Green Bay Packers and the Chicago Bears. (Whoa! make any predictions!)

Watch next week's Technology News for a new twist in our "Game of the Century." The experts will give their choices for the games of the following day. Well, it will be one of greater than that which the games so far in advance. Follow the action!

Intramural football, tennis tournaments enter stretch

By Vince Marsolais

The Fowler Hall team opened its season by defeating a strong M.E. Eng. team 19-6. The "Holding sit" was based on an excellent performance with Alan Hall, Bob Zevits and Floyd Bolton spiking the attack. The Chem. Drugs and the Gas House Gang battled it out 6-6 for 45 minutes. The Fowler Grant passed two 6'6" backs, Jim Oldham and John Basche, for several scoring chances but the outstanding Gas House Gang refused to give under pressure. The outcome was decided in a 60-second dink into Monday evening.

Last year's champions, the Chemicals, surprised the Industrial Zone 21-2. Ray Dallio and Eadward Burke drove the team on to the victory with an outstanding performance.

IM Tennis

Willa Veenstra, of Bending Sone, shot top form in defeating Jack Zeman, 6-4, 6-1. Al Burcher defeated Ed Jennings in two sets by the same score. Gregory Anderson beat Dick Miller, 6-0, 6-1.

In one of the closest matches held all fall, Tom Yung and David Marks defeated Larry Levy 6-4, 6-4, 6-3. Levy, unseeded until this match, was one of the better seeds and this match may well be classed as one of the biggest surprises of the IM tennis tournament this far.

Swim squad gains record turnout, coach

By Henry Hubbard

A grand total of thirty-one candidates for the swimming team turned up Monday as the first day for the team to gather under the swimming coach.

Through the efforts of John Kabash, former captain of the Texas A&M swim team, there is a great boost in the membership. The team numbers forty-two members and is expected to grow as the season progresses.

From Where I Sit

By Ed Jennings

LOCAL GRIPS FOR OCTOBER 31: Concerning the Dead Belt (Overpaid Fable). . . . As per usual, it seems that some of the maintenance guys dug it up again last week, left a miasma unseen right in the middle of the football field, and quite expected the football game to be played around, or in, or some place.—anyway, some really nice weather was wasted waiting for it to be filled in. . . .

Well they finally did fill it in, but I've seen better jobs done by two year olds. . . . There are now two very good stunted depressions only partially filled with loose dirt. Why is it that they NEVER leave that place in the same condition that they dug it in when it is necessary to dig up for some reason? I would be glad to print any word of explanation that the responsible parties will come with . . .

This latest rendition, I know, is a small win, but, for the girls at least, it has happened before and probably will happen again. Why can't the athletic department show a little more of a cooperative spirit toward the athletic department . . .

BRA' IN STORM: There is an improvement that is definitely needed in the locker room—the plates get unbearably hot (a definitely unhealthy condition) and is really in need of some kind of ventilation that would provide a change of air in the place. A little action on this could be very helpful.

VARSITY BASKETBALL: The 15 bids that survive this week's cuts are going to be a mighty strong squad . . . Bob Loezer and Carl Monson are starting to show the form that they did two years ago . . .

The two "hubs" from last season's intramural tournament, Howie Eppstein and "Queen Max" Mantanov are really looking good . . . The freshmen backcourt is already starting to gel and is looking strong . . .

BEST GAME OF THE SEASON: The Alpha Big-Delt game of last week was really a thriller and extremely well played on both sides. . . . For the second week in a row, Hank Lalonde of the Alpha Bigs was the outstanding player, undoubtedly takes the honors. He did a tremendous job both on offense and defense . . . so did everybody else for that matter . . .
Here's the dope on the IM swim meet
Coach Glenn announced today that the deadline for all entries in the IM Swimming meet is Monday, October 24, 1949, at 5 p.m. Entry blanks are obtainable in the gym. Varsity swimmers and swim team winners are not eligible.

Ashurst wins; team loses Navy Pier meet

By Ted Speth

Only Al Ashurst, stocky veteran of last year's squad, was able to overcome the efforts of the Integral Ball as the Tech runners lost the opener of the cross country season last Saturday, Ashurst, star distance runner of the team, beat four of the Illini to earn first place in the cross country marathon. However, the score was 41-23 in favor of the men from the University of Illinois, Navy Pier.

Roy McCunley, track coach, is looking forward to meeting North Central College and Lawrence College in a triangular meet tomorrow. From all indications the meet promises to be a close one.

McCunley will send Al Ashurst, Wally Kohler, Ted Sandblom, Bill Cullith, Bob Durnin, Harold Dukow and Don Anderson against their opposition.

Following this Saturday's meet, there will be a triangular meet, November 9, in which the hurlers will duel teams from Elmhurst College and Wisconsin College. This also promises to be a busy contention match.

Illinois Tech Tournament... The athletic department is now finishing up plans for the annual basketball tourney, held during the Christmas holidays.

Season Schedule:
Dec. 1 - Lawrence College 7
10 - Bradley University 2
18 - University of Illinois (Navy Pier) 10
Jan. 7 - Beloit College 1
13 - George Williams College 1
Feb. 10 - North Central College 7
17 - University of Chicago 2
24 - Illinois Wesleyan 7
Mar. 2 - University of Chicago 2
College Championships. "Indicates tentative date."

Call for Philip Morris

Everybody talks about PLEASURE, but only ONE cigarette has really done something about it. That cigarette is PHILIP MORRIS. Remember: less irritation means more pleasure. And PHILIP MORRIS is the ONE cigarette proved definitely less irritating, definitely smoother, than any other leading brand. NO OTHER CIGARETTE CAN MAKE THAT STATEMENT.

YOU'LL BE GLAD TOMORROW - YOU SMOKE PHILIP MORRIS TODAY!

News in Brief

C. R. Deshine, dean of students, this week extended an open invitation to presidents of Illinois Tech student organizations to attend a "senior salute" session. The meeting will take place at 4 p.m. Friday, October 28, in the conference room of the dean's office on the second floor of the North Student Union.

The U. S. Civil Service has recently announced a number of job openings. Examinations for junior professional, junior management, and junior engineering positions will be given at 8 a.m. on October 30. For additional information on the placement office, second floor, MC.

Interested students are urged to attend a meeting of the Jazz Club Tuesday, October 25, in 102 SMC. The group has openings for students interested in the use of musical instruments.

The band, when formed, will provide music for various all-school functions.

Weir to study electronics here under RCA plan

Collin G. Weir, graduate of the University of Edinburgh, has been assigned to RCA by the Economic Cooperation Administration to study electric power transmission.

Weir is one of eight engineers selected by the British Government to receive advanced technological training in American methods under the RCA's technical assistance program. This advanced training is designed to enable these men with experience not available elsewhere.

The eight men, first of a group of fifty, will be placed in American plants to get actual experience in American methods and techniques.

Sigma Xi meet postponed for diesel confab

The Diesel Engine Manufacturers Association will hold a symposium at Illinois Tech Thursday from 9 a.m. to 4 p.m. Talks will be given by industrial diesel engineers and inspectors made of ITT's diesel laboratory.

This symposium postpones the Sigma Xi meeting originally scheduled for the above date. Instead, the meeting will be held on Wednesday, November 1, at 8 p.m. in 150 CH. Richard A. Brundin, head of the ME Department, will talk at the pump, called the ideal heating and cooling system for future homes.
