Halloween dances will attract more than 400 Illinois Tech couples over the weekend. The majority of these couples will attend the sophomore class dance, which opens at 9 p.m. Friday and Saturday, and the freshman dance, which opens at 9 p.m. Sunday and Monday.

Halloween events will continue on Saturday night with the sophomore class dance. The dance will be held at the Newman Center, and tickets will be sold at the door.

List Tech commuter champs

A record for long-distance college women's basketball has been set by the Northern Illinois University women's basketball team. The team, under the guidance of coach Myra Schel, has broken the previous record of 100 miles. The team has traveled a total of 1,200 miles and has won 10 consecutive games.

New ‘gas house’ takes final shape

The Institute of Gas Technology’s new two-story laboratory and administration building at 4400 S. Dearborn is in the final stages of construction. The building will be completed by the end of the month.

Photo club men starting classes for community

The Chicago Amateur Photography Club is starting a new class for community members. The class will meet every Tuesday evening at 7 p.m. at the club’s headquarters.

Auction hammer hangs to start public bid Friday

A public auction will be held next Friday morning at 9 a.m. in the IU basement. All artifacts from the estate of Mr. and Mrs. John Smith will be sold. The auction will start at the basement level and work its way up to the second floor.

Women cop high grades

The women’s basketball team has been highly praised for their efforts and dedication. The team has won all of their games this season and has set a new record for the most points scored in a single game.

Magnetized stockings a new spy aid

Marvin Cannon, physicist at the National Bureau of Standards, has developed a new technique for creating magnetic stripes on stockings. The technique is being used to create a new type of security device.

Integral rates “tops” in yearbook judging

The 1949 edition of the yearbook has been awarded an All-American rating by the National Scholastic Press Association. The yearbook features a special section on the history of the school, as well as a comprehensive guide for students.

Women’s basketball team

The women’s basketball team has been praised for their hard work and dedication. They have won all of their games this season and have set a new record for the most points scored in a single game.

Auction hammer hangs to start public bid Friday

A public auction will be held next Friday morning at 9 a.m. in the IU basement. All artifacts from the estate of Mr. and Mrs. John Smith will be sold. The auction will start at the basement level and work its way up to the second floor.
"Would you please (lob) check our circuit, Mr. Meier?"

Collegiate world

Vets dizzy from revolving funds
By Milton Miller

For several years now, veterans enrolled in Millikin university, Decatur, Illinois, have had at least one advantage over their counterparts at a lot of other colleges. Millikin has operated a special revolving loan fund to bail out vets who find themselves temporarily deficient in funds as a result of tardy VA checks.

Lately Millikin's loan fund administrator has had to turn 'em away weepin'. "We can't make any more loans," he has explained, "until someone pays us back on some old ones." The revolving fund has stopped revolving for the nonce. Ahh, well, the checks are coming.

When a male student at Loyola university, New Orleans, steps into the student lounge there, he automatically becomes violently anti-feminine. Loyola girls are referred to as "mashuts," and the jesters have found a college which boasts the name there seems to regard them as treasurers. As coed sophomore Nita Yasuma explains, "The boys there obviously resent a girl's intrusion, so I don't go. The girls should use the lounge, maybe go in groups at first until the strangers wear off." And remember, women, last one's a buzz.

Here at ITT where even eight-termers aren't exempt from examinations, it's always pleasant to dream about skipping those pesky "finals." Down at North Texas State, students are attempting to realize that dream—in part at least. One member of the student senate at NT has introduced a proposal to exempt students with a satisfactory average in a course from taking the final exam in that subject.

According to the NCUE, a teacher should be better able to judge a student's work from the 15-week period based on hastily calculated grades at the semester's close. The proposed exemption would allow each student more time to prepare for exams in his teacher subjects, while reducing the instructors of a part of the paper-marking burden at each semester's end.

Letters to the Editor

Chem group gets CB chairs

To the Editor:
The American Chemical Society recently undertook a little venture of which it feels justly proud. It is a well-known fact that there was a dire shortage of chairs in the Chemistry building between exams. Working on the premise that the only reason for a chair shortage was that proper authorities were not aware of it, ACS decided to do something.

A committee was formed which, after a few preliminary inquiries, wound up in the office of Robert A. Morse, business manager of the Institute. When the committee revealed the nature of its business, Mr. Morse was so interested and cooperative that the group decided to go for new lockers.

The story is this: student organizations should take it upon themselves to try to improve their lot, not only because it is their duty as citizens of the school, but because it actually brings results.

Bob Yenco

To the Editor:

Without laboring the question of undesirably high prices at our non-profit (to be taken with as much salt as one has available) bookstores, I should like to lodge a complaint against the general attitude of the clerks employed. It's amazing how a student helper can become so insensitive, and only six weeks after the term has opened.

I, too, have worked behind a counter in a business that encourages monster baiting questions than any other, and I know that a clerk can remain civil toward such a continual barrage. So long as we have to pay exorbitant prices at the store where the motto seems to be the equivalent of "We meet or beat all advertised prices," let's not change it (2) with a smile.

Don't take this or a mass communication, because some of you are smart people. But if the shoe fits, squelch it.

Roger J. Bills

Let's meet to air opinions

I don't know how many of you read "News in Brief," but one of the items referred to a "got-acquainted" meeting in the Dean of Students office at 4:00 Monday afternoon. I called for a little more explanation.

As you probably know, there are about 79 different organizations on campus with very little semblance of coordination or purpose.

Now, as I understand it, the purpose of these "got-acquainted" meetings is so that people can get to know each other and establish a plan so that they can all organize successfully. Now I may well turn out to be a weak apple. I hope so.

In the position I'm in, the occasion very often arises when I'm asked how the students feel about such and such a point of question, and it's necessary for me to give an answer. This I can readily do, but there is very often some doubt in my mind as to whether or not I'm really giving the entire student body opinion and not just my own. Probably a great many of you are often put in the same spot.

All right, what can you do? Here are some things that can be done: you are good at typing, come on in and be secretary. Are you interested in doing advertisements? They are written by professional people. Are you interested in getting a financial aid? We have a thousand dollar business firm, Cliff Nelson, the business manager.

Can you draw cartoons? Bring in a sketch to chief cartoonist Irving Rehboch. Are you a "born promoter"? Do you like the idea of working with group sales chairs in planning yearly dances and meetings? You like people and like to write about them so vividly that their personalities seem mirrored in type? Do you like to read scientific journals and relate your findings to other students in your field? There is room for you on the expanding staff of Technology News.

If you join us, I believe you may develop latent administrative and writing talents and social techniques as well. We do need help, now, and in succeeding semesters.

Letters to the editor pay off.
Sam Lane and Fred Wright have written two columns of Chem Spec for the fourth time. This week's winner is Roger J. Bills.

Slipstick

Papa Rabbit noticed with some interest that his youngest son was looking very content with life. "What makes Junior so happy?" he asked. Mama Rabbit thought for a long moment, then said, "He has a great day in school," she explained. "He learned to multiply." "A cute female shopper asked the manufacturer: "Do you have any sections on this floor?" he sighed and replied: "Yes, but we'll have them among other things,"" the manufacturer continued.

Ira: Daddy, is easterday a bad word? Mama: No, it's perfectly right.

Well, my teacher has a cold and I hope she'll suffer, ha ha.

Confusing any: "He who kisses girl in handshake is not on level."

Hepcat: What was that funny odor in that lab today? Sherwin: Fresh air — somebody opened a window.

They cut down the old apple tree That blossomed each spring by the door, And never has missed it since that day Though he never missed it before.

The new textbook for A.C. machinery dealing with hot circuits will be forever expensive.

Platonic friendship — the interval between one's introduction and the first kiss.

"Do you like looking honeybees?" "I don't know, I've never been one".

She was from Virginia — they called her Virginia for short.

Catholic Free Press
AMA probes marketing problems

The American Marketing association is the largest professional group covering all fields of marketing in this country. It is a division of the international organization dedicated to the advancement of science in the field of marketing; the international association composed of more than 2500 members in the United States, Canada, and fourteen foreign countries. Chicago's chapter—one of twenty-four in the United States and Canada—was organized in 1937, and now numbers 900 members.

At the close of last semester, the American Marketing association was introduced to the student body of ITT; the Illinois Tech Student Marketing club was officially launched October 4. Under the sponsorship of its international parent organization, Tech's chapter will enable its members to hear eminent marketing men discuss current problems, participate in field trips to member concerns, and develop valuable contacts with the marketing profession. Subscription to the "Journal of Marketing" at half-price (optional) and utilization of national and local placement services round out the association's benefits.

Students may attend the weekly after-lunch discussions on specific phases of marketing and the more comprehensive monthly after-dinner talks by nationally prominent men; both functions are offered by the Chicago AMA chapter.

One of the Marketing club's immediate activities is the furtherance of industrial recognition for ITT's training in the various phases of business management. In this regard, AMA is the first professional organization on campus to respond to ITP's new program, and already has had its placement team members accepted by Harold Misler, director of placement.

All undergraduates and graduates, regardless of their major, are eligible for membership in Illinois Tech's Marketing club. The organization also is contemplating affiliation with the National Federation of Sales Executives.

Man of the week

Schosser likes TV, dirty hands

By John H. Sayles

While at the tender age of six, George Schosser, now an S8-term EE, begins his explorations into the realm of science. At that time he received his first pocketknife. Later, at 12, he began using it to sharpen pencils, and secondarily to sharpen nails and cut wood.

Fake named otherwise, for George opened a copy of Popular Science and became engrossed in a design for a two-tube radio set. Then and there George's career as a radio engineer began. Since that time he has graduated to bigger things, namely, television sets. He was interested in the wrestling matches, it was cheaper to build a set rather than buy one. George graduated from Lakeview high school in Chicago in June, 1945. He went to Wright for a year, transferred to Tech and spent one year here. Until George Sam caught up with him. He served 14 months in the Army most of the time being spent at the Fort Lewis Engineering Training Center at Washington.

After his discharge he returned to IT to resume his studies in radio and television. Although he diligently pursued his studies to obtain a 2.45 overall average, George has been active in organizations too.

At the present time he is president of 83a Kappa Xi, post secretary of Eta Epsilon, post president of Theta Chi and member of Tau Beta Pi, the I.E.E. and A.I.E.E. During his first two years here he found time to be the chairman of the EE committee on open house.

Although he does not like the "amateurish rendition of a recording," George has been able to control and control work when he graduated. As yet there is no particular woman in the picture, but when hard on a graduate George is there probably will be an eventual engaged woman.

Concerning school, George has two ideas that merit consideration by students and faculty alike. One is that he would like to "run more student interest in activities"; the other, that "a bit more practical courses in engineering, offering stimulating industrial conditions.

ARF projects $4 millions worth in '49

Industry and government agencies boosted their research programs during 1948, amounting to $4,165,600 for scientific research at the Amoco Research Foundation during the year ended August 31. Halden A. Lessely, President and General Manager of the foundation, reported these figures recently in his annual report to the directors.

He explained that this amount was received for the performance of research and development for the Department of Defense, the U.S. Government, and from Bowen fees on Foundation patents in magnetic recording.

The ARF is a non-endowed, nonprofit scientific research and development organization founded in 1930 to provide a confidential research and experimental service to industry. The annual revenue over expenses is used to finance foundation research and development work of general and special interest and to pay for the Foundation's continuing public service activities, according to Dr. Lessely.

His report stated that Foundation scientists working on 318 research projects (107 were started during the year) during the fiscal year. Of this total 100 were sponsored by industry, 52 by government agencies, and 54 by the Foundation itself.

Freshmen asked for criticisms of orientation

Freshmen! Did you experience any issues during orientation? Let us know what you think! The Residence Admissions Advisory board has received your feedback, which will be used to improve the experience for future students. We appreciate your input and are committed to making the orientation process as seamless as possible.

LUCKIES PAY MORE to give you a finer cigarette!

Yes, at tobacco auctions Lucky Strike pays millions of dollars more than official parity prices for fine tobacco!

There’s no finer cigarette in the world today than Lucky Strike! To bring you this finer cigarette, the makers of Lucky Strike go after fine, light, naturally mild tobacco—and pay millions of dollars more than official parity prices to get it! So buy a carton of Luckies today. See for yourself how much finer and smoother Luckies really are—how much more real deep-down smoking enjoyment they give you. Yes, smoke a Luckie! It's a finer, milder, more enjoyable cigarette!

RAYMOND W. CRUTCHFIELD of Roanoke, N.C., veteran tobacco warehouseman, says: “Year after year, I’ve seen the makers of Luckies buy fine, ripe leaf that makes one great smoke!”

“Crutch” has smoked Luckies for 20 years. Here’s more evidence that Luckies are a finer cigarette!

Nine rules given for job interviews

By Hal Berger

Just what is the score in this business of placement? How should a fellow handle himself? The first two articles in this series outlined the procedure by which the placement office tries to help students. Here's news on that front.

1. In anticipation of an interview, he should prepare himself properly by using the placement office to assist him. The American Society for Engineering Education has wrapped up all the common sense tips a fellow needs to put himself at the top of the class, in the eyes of the employer.

2. He should be prompt in meeting the interviewer and be ready for interview.

3. He should prepare himself properly by using the placement office to assist him. The American Society for Engineering Education has wrapped up all the common sense tips a fellow needs to put himself at the top of the class, in the eyes of the employer.

4. He should know the kind of work he wants to do and be prepared to make his decision far enough in advance of his graduation so that industry can make its plans.

5. He should keep the placement office informed as to his progress concerning his negotiations.

6. He should recognize that in addition to the number of the number of interviews he takes, he should conduct himself in a business-like manner and not expect individual or unusual consideration or entertainment.

7. He should recognize that in the eyes of the employer, he must sell himself and that industry can advance him only on the basis of his performance.

8. He should be prompt in meeting the interviewer and be ready for interview.

9. He should keep the placement office informed as to his progress concerning his negotiations.

Stuttering engineers are doomed

Charles E. Burdick, editor of the Illinois chapter of the American Society of Civil Engineers, told the Illinois chapter of the American Society of Civil Engineers that "an inverlent engineer is doomed to a minor position," in a speech delivered last Thursday at a meeting of the chapter.

"In many cases the ability of expression, oral and written, is a gift of inheritance," he said, "but whether inherited or acquired, the ability to express oneself can be improved by study, example and practice.

"As in other walks of life, engineers succeed on the basis of character, personality, knowledge, and above all-the ability to express ideas clearly and logically," said Burdick.

Office Services publish both quizzes and ponies

Fed-up with a prof who spends half the period scrawling homework assignments or quizzing on the blackboard? Having trouble getting out organizational publicity in volume? If you want to send out a thousand "original" handled secretaries and instructors, before, and within, the 10,100 weekly issues, Office Services will give you time and money.

Poinsettia and other plants classed up the place, and the bulletin board was all green again. A new bulk mailer and a new address were printed on the bulletin board.

A familiar eye-catcher, the red-topped paper on the file cabinet, was a hit on the bulletin board. It was a hit on the bulletin board. It was a hit on the bulletin board.

Popular with many Tech Center agencies, the plant kicks an added touch to correspondence which demands individual treatment.

Facilities of Office Services are available to all divisions, departments, organizations and individuals, at or near the Tech Center.

Cagers commence work; veterans lead way in drills

By Marks Levy

With the varsity squad cut down to workable size, Coach Ed Glancy has started serious work for the opening of the rapidly approaching season. Glancy has some fancy ideas to work out, and this year's squad seems to be the best he has had since he came to Tech. Due to the large number of players who tried out for the team, Glancy has divided them up into freshmen and varsity squads.

The varsity consists of about 15 men, and the freshmen will carry about 10.

Up in the stands, George Schanberger, the squad of veterans seems to be rounding into form sooner than usual. Bobby Leiser, from all indications, is getting out for his greatest year, and with Carl Meister, his running mate, the team has great expectations.

McCue—

Big question mark with everyone concerned with basketball is whether or not Robert McCue, last year's standout guard, will be in uniform for the start of the season. Bobby has had some problems this summer, both on and off the court, and is naturally avoiding the doctor's decision as to whether he will ever play basketball again. Anyone who saw any of the games last season knows that the team looks quite different when "Bobby" isn't in there handling the ball.

Newcomers

In addition to the veterans, several newcomers have been looking good enough to warrant a starting position from the old boys. Howie Kovel, a member of the varsity last year, is working well and may be right in the starting lineup when the opening games roll around.

Standouts among the freshman are Harry Huxman, Ed Cassel and George Simon. All three of these boys have shown such promise that they may make the varsity team.

One of the surprises in the tryouts was Ralph Ladem, third-year transfer student. Ralph seemed to fit in right with the varsity and is now working out at a guard spot.

Future prospects

With the addition of the freshman team, Glancy is definitely counting on his incoming class of 9 to 10 men to form the nucleus of future varsity teams. Now that he has his team in shape, he is working hard to get them into better physical condition. Bobby Leiser is in his last year, and a lot of his playing time is being cut out.

The new players also have a lot of promise, and with the improved team, the team will be a force to be reckoned with.

Grange, Schommer to speak at sports banquet

By Sid Doppelt

Homework getting you down? Disgusted with your instructors? Well, toss away your slid-rules and get set for the annual student-sponsored Honor Income banquet that will give you a chance to get together with the gang for a high-spirited sports confab.

Sharing the spotlight as guest speaker will be no less than Harvard ("Red") Grange, that immortal gridiron great of the University of Illinois.

His comments on sports should be enough to bring up the blood pressure of all pencil-pushing athletes of the student body, and his selection of the speakers platform will have our own present-day version, a "Red" Grange, who needs no introduction.

Football film

But this isn't all, sports fans! By way of a bow shot! A top-labeled "Disgraced Plays in Football" will also be included to give the students a chance to see the game the way it is being made for only 450 lucky ticket purchasers.

Tickets Tuesday

Tickets go on sale Tuesday, November 1, and the banquet takes place in the Tech gymnasium Thursday, November 18, from 6 to 9:30 p.m. You can get your tickets for the low price of 25c at Mr. Kube's office, room 222 MC.

Remember, the $2.50 price entitles you to all you can eat of the sumptuous array of food that will be prepared as well as the sport entertainment that Honor Income has planned.

Don't forget to bring the best and any of your friends who might be interested, for it will be an evening that will be remembered for a long time by all who attend.

Who's Who in Sports

By Vince Marzorati

One of the outstanding athletes in the history of Illinois Tech has returned to the athletic deparment. John Maddelina, assistant administrator to the head of engineering, has been appointed as coach of the swimming team.

His appointment is the climax of a brilliant record achieved through his high school and college days.

John was born about 30 miles north of Gary, Indiana, on the Lake Michigan shore. The proximity of water enabled him to learn how to swim in his early youth.

He was chosen as a member of the varsity swimming team. John is a two-year varsity man and is a senior.

IM Football

Gremlins win again, 24-0

Ray Falkus, head man of the Gremlins IM football team, led his squad to their second consecutive victory in the IM football tournament as he scored two touchdowns in the Gremlins' 24-0 victory over the Gas House team.

This victory gives the Gremlins a total of 51 points in their first two games and definitely changes them as a team to watch in the IM football tournament.

In the only other IM game played Tuesday the Lagoons suspended out an 8-6 win over the Nevada in a close game. The Nevada protested a referee's decision made on a safety pass against them. At the later consultation, the game was upheld, making the game 8-6 tie.
Cross country squad takes second in meet

By Ted Spach

Led by Al Asko, the Illinois Tech cross-country squad finished second in a triangular meet between North Central College, La Grange College and Tech at Washington Park last Saturday. North Central won the meet, mostly due to the efforts of their first two men, who placed first and second respectively.

Askos, Tech's leading man, came in fifth, with Waldo Kabler following in sixth place. The rest of the squad followed close behind, enabling Tech to move second place from La Grange. The score was: North Central, 20; Illinois Tech, 46; La Grange, 57. Still on the lookout for their first win, the harvests will meet

Elmhurst and Concordia in a triangular meet tomorrow at Elmhurst. Coach McCaffrey will send Askos, Kohler, Bill Gallaher, Ted Rashidi, Dick Durand, Harold Denbo and Don Anderson against the opposition.

Hopes are high for tomorrow, as the squad has been improving consistently since the beginning of the season and should be at their peak when they take to the terrain against Elmhurst and Concordia.

Dick Kaplan wins with perfect card;

By Larry Shapiro

Pigskin Prophets' new, revitalized "board" of sports experts are picking 10 favorites to jump into the fray - or river - today. It's a year when people want to try something new, and so the experts were picked to try to successfully predict the football games.

The victims are: Kansas, Michigan State, Notre Dame, Northwestern, Minnesota, Ohio State, Cal, UCLA, Oklahoma State, and Texas Tech. The experts are: Ed Jones, Larry Shapiro, and his "eye-bud" sports editor, Bill Shapley. The experts were chosen at random, and the experts' predictions are based on the cold support of the shaky team of experts.

Jennings very modestly refused to take sides in the Texas Tech-Baylor, and Northwestern-Oklahoma State games and called them both toss-ups. The rest of the guesses were not on a toss with one, but the strong right arm of Lineman Berry of the Hapless Frogs and the fancy foot of Jerry Braly of the Buckeyes to support said picks.

Last week's choices finally appeared a perfect card. 13 winners in 12 games, didn't think it could happen again, in spite of the almost expected continuation of that football expert's delight, the sport.

Richard Kaplan, a third term BB, is the uncanny wizard who called Texas over Northwestern (N.U., favored by two T.D.'s), EMU (without Walker) over Kentucky, Michigan's two beaten Wolverines over "mighty" Minnesota, Wake Forest' Demon Deacons (scores of four to one) over William and Mary, and the upsets of the week with Indiana (scores of four to one) and upset of the undefeated Pitt Panthers 27-14.

Mister Kaplan was unchallenged when he walked off with his lifetime Coka-Cola cooler filled with beautiful Coca-Cola.

So if you can get all 13 this week!
