ARThUR JENs, F. P. E., CHOSEN EDITor-CyCLe; SCANLAN TO BE NEW BUSINESS MANAGER

HAVe Been ActiVe in Work on Yearbook During Past Season

ANNUAL TO BE DISTRIBUTED T0MORROW

At a meeting of the Cycle staff held Monday, May 21, at 9 a.m., Mr. Arthur J. Nest, F. P. E., was chosen editor of the 1950 Cycle. The decision of the Cycle's author, who has been active in the field of education for many years, is based on the knowledge and experience that he has gained in the field. The decision was made after careful consideration of the qualifications of the candidates for the position. The new editor will be responsible for the content and production of the Cycle, and will be assisted by a team of dedicated writers and editors who will work tirelessly to produce a high-quality publication that will reflect the values and mission of the school.

ARMOUR Alumni Banquet Tonight

The Armour Young Alumni Association will hold its annual reunion tonight at 7:30 p.m. in the Ballroom of the University Hotel. The reunion will include a banquet and a program featuring guest speakers and alumni who will share their experiences and memories of their time at Armour. The event is open to all Armour alumni and friends, and ticket reservations are recommended.

Tuba Phi Hals Officers of Election

At a meeting of the Tuba Phi Hals honorary engineering fraternity held last Thursday, President Alfred O. B. Smith was unanimously elected president of the fraternity, and the new officers of the chapter were elected. The new officers include: President, Alfred O. B. Smith; Vice-President, L. L. Y. Price; Treasurer, J. G. Denton; Secretary, A. J. Williams; and Historian, W. L. Miller. The officers will work to promote the goals of the fraternity and to strengthen its ties with the university and the engineering community.

Watch Chairs Given to Five Letter Men

The Banes "A" Society has accepted the following items in lieu of subscriptions: A. W. Thibodeaux, 20 chairs; M. L. M. Ziehler, 20 chairs; C. M. Smith, 20 chairs; W. R. Patterson, 20 chairs; H. C. B. Scott, 20 chairs. The Society also presented an annual subscription to the magazine "A". The subscription is a way for the society to support the magazine and to promote the values and traditions of the society.

Prominent Men at Graduation

While the final plans for the graduation ceremonies are not yet complete, the Armour institution will announce the two highlights of the day, at 11 a.m. on Monday, May 21, at the William Tucker Auditorium. For the first time in the history of the institution, the Doctor of Engineering degree will be awarded to two men: Mr. W. T. Whitehead and Mr. J. M. Adams. The two men will be recognized for their contributions to the field of engineering and for their leadership in the development of new technologies.

Mr. Sunny has been in the library, having just given a new lecture to the Armour students. The lecture was on the history of the institution and its role in the advancement of engineering education. The lecture was well-received by the students, and many expressed interest in learning more about the institution's history and its impact on the field of engineering.

SPEECHES, MUSIC, AND MOVING PICTURES FEATURED AT FIRST BANQUET TO HONOR ATHLETES

HElD AT LAKE SHORE ATHLETIC CLUB

Glee Club Broadcasts Program Over Radio

Singing the same program as they gave at the Annual Men's Dance, the Armour Glee Club provided a half-hour of music to the students of the college through the medium of radio. The program was broadcast over WCN, last week evening, Monday, May 21.

Open onto the court, the Glee Club had the space to perform and entertain the audience. Many of the members of the club spent the time before class and after school practicing the songs in the library. The music was selected to fit the mood of the occasion, and the arrangements were planned carefully to ensure the success of the performance.

The dinner was an informal one, which started at about six-thirty and lasted until the hour, with everyone present enjoying the meal to the fullest. The atmosphere was large enough to comfortably accommodate a record of the students and faculty members who were present.

The Armour Glee Club was selected as a result of the talent of its members, the quality of its music, and the enthusiasm with which the arrangements were planned and executed. The dinner was a success, and the guests were entertained by the performances of the Glee Club.

Four Initiated By Salamander

Four new men are now proudly displaying the key of Salamander, symbol of the highest degree of honor in the order of the fraternity, as a result of their initiation ceremony held last week. The ceremony was held at the Armour Glee Club on May 18, where the new members were initiated. The ceremony included the presentation of the key to the new members, which they will wear with pride as an expression of their dedication to the ideals and values of the fraternity.

The new members are: James B. Stone, William R. Johnson, John L.其他的成员，以及他们各自在俱乐部中的角色和责任都得到了充分的展示。他们将共同为俱乐部的发展和提升做出贡献，以实现更大的目标。
"The Slipstick"

Close to "The Slipstick" is the "Jump Stick" by Yonezawa. This latter has a bar of metal located on its flat surface, which serves to check the stability of the stick. The stick is quite useful for measuring the distance between two points, and its flat surface makes it easy to read the measurements. It can be used to measure the height of objects, and the bar can be moved to different positions to suit the user.

MUDVILLE'S PRIDE

The jumper went up to fly: "Jumping on me," the cockhawk with gleam in eye.

But alas! what then?

The bird lying there at your feet.

The bird lying there at your feet.

STRIKE THREE

Prof. I. F. L., considering liability: "A boy threw a lighthouse into the market, the snow falling on one man's face. To prevent himself from freezing, he threw the lighthouse over the street."

Organize Discursive No. 220

This article is presented with the hope of clearing up such Douglas as possible, publication, and organization. In the case of the last-named person, a spontaneous presentation is considered by organics to be a spontaneous metaphor. The extract of phony suspected/obscured viruses (nor final, incidentally-purified-sublimated-glycerol) for shortness are ignored on the sample that has been macerated. A solution of hydrogen dioxide (H2O2) is used. The resulting copiousness is removed by a perusal of a hand-drawn prepared test paper and the results take considerable time. Should have been long ago. The biomolecular method of fabrication calibration results recorded in a stuff cover notebook, which can be prepared in Shalby, and then theissociated placed in a bank of alike rights.

The end result is just as well off, because you couldn't know anything anyway.

Banquets

The last three weeks have been as great a feast of banquets as any. These affairs have been for various different purposes, and yet there are all such affairs, have one point in common. Banquets, as well as satura the exempted as such, have to be brought to bear for such purposes.

The committee of the interservicing affairs, which have culminated the period of pledge- ing of the men. The affairs are recognizing the men, and so a partly social function have served to bring men into closer association. The committee must have left the dinner feeling that their associates are a, as it were, a perfect body for the essential and friendly atmosphere of the groups is unmistakable. The social atmosphere of the A. F. T. through the A. J. S. have staged a manly banquet, where the students in the engineering world have met for a put-together. The men have probably been assumed to find that the majority of the faculty are human beings within their forbidding exterior, and that the student engineers are full of the spirit that characterized their college days. This affair must have served to preserve a better understanding among the three classes of men.

This last week has been the senior banquet, which was the last gathering of the senior class that night, and an occasion in what we understand the "end of the beginning." The spirit of considerableness is evident on this occasion. E. F. Rich, the time the men will meet on the various parts of the country, have been a closed book until now. It is to be hoped that those who will return to the Alumni affairs in the future can do so from quasigraphical reasons.

We turn the other cheek

Dear Sir,

For thirteen years I've tried to make "The Little," "The Fool," "His or Hers," and "The Nat," and now I have succeeded, so we can. Then I tried "The Slipstick" and made it right off the bat. You may be pretty rotten. Yama.

Gervie.

Dear, "We are in love and are to drive an automobile in 1925 years old."

Big Mike Man: "Sure up Jim, break the bonds and the stick with Mr. Mathies clothe the bat for him." "Why?"

Lisa: "All right, but as soon as I have reading Mr. Mathies' logs.

"I am the third of six children."

"You don't look like two people to me.""
**FINAL EXAMINATIONS**
Second Semester, 1929-30

**FRIDAY, JUNE 6, 1930**

- 8:10-10:20 A. M.: Physics I & II, Physics (Arch.), Physics Lab., Physics (Arch.)
- 10:30-12:15 A. M.: Descriptive Geometry, Descriptive Geometry, Descriptive Geometry
- 4:15-6:00 P. M.: Chemistry, Chemistry, Chemistry

**SATURDAY, JUNE 7, 1930**

- 8:10-10:20 A. M.: Plane Trigonometry, Plane Trigonometry, Plane Trigonometry
- 10:30-12:15 A. M.: Calculus I, Calculus I, Calculus I

**MONDAY, JUNE 9, 1930**

- 8:10-10:20 A. M.: College Algebra, College Algebra, College Algebra
- 1:15-3:00 P. M.: Geometry, Geometry, Geometry
- 4:15-6:00 P. M.: Precision of Measurements (Phys. Lab.), Precision of Measurements (Phys. Lab.), Precision of Measurements (Phys. Lab.)

**RIFLE CLUB OUTSHOTS HUMBOLDT PARK TEAM**

The rifle match between the Humboldt Park Gun Club and the Armour Institute of Technology rifle team was held on May 29, on the range of the Humboldt Park Club at 24th W. North Ave. This was the first match of the Humboldt Park Club and although they had but a small number of shots, they were very pleased with the results.

The Armour men had a good 244 and worked hard to win. They also worked hard enough to have refreshments furnished by the home club and enjoyed by all.

The scores were: Armour, 1,395; Humboldt Park, 1,325, with W. Willson of Armour, Irishman with 251 and M. Montgomery of Humboldt Park scored 211.

**A. I. E. E. Hearn Talk**
By Specialties Man

A meeting of the Armour branch of the A. I. E. E. was held on Thursday, May 7th, in Science Hall. Mr. A. E. E. Hearn, of the Wisconsin Electric Co., gave a talk on "Electrical Specialties," the several topics covered included such subjects as lamp sockets, wall plate, switches, and lighting. An interesting display of apparatus shown by Mr. Hearn was the distribution board, which is a switchboard used in town and city illumination and expressed his desire for various kinds of lighting. The meeting was well attended and enjoyed.

**Palmer's Math Series**

- Ready in Revised Form

A new edition of the 'Mathematics' series of books by Prof. J. C. Palmer, of the Armour Institute, has been published. The series consists of three volumes: "Elementary Mathematics," "Intermediate Mathematics," and "Advanced Mathematics," and is designed for junior college and university work.

- 301-106 N. Michigan Ave.

**...off the springboard it's 'FORM'!**

**...in a cigarette it's 'TASTE'!**

**GETTING DOWN in brass bands, a cigarette is a smoke—made and bought for your own enjoyment.**

But between just something to smoke and tobacco, there is a difference. The difference is that for smokers there is a difference.

**...is a difference that counts for Cigarette's ever-growing popularity—**

"TAKE above everything"
A Mothers Day gift, the All-American Classic is a must see event for any baseball fan. The game is named after the eight teams that participate, all of whom have produced many of the game's greatest players. The game is held annually on May 8th to honor mothers and to celebrate the contribution of women in baseball. The event features a variety of activities, including a mother's day-themed parade, a mothers day luncheon, and a mothers day charity auction.

The game is held at the legendary Wrigley Field in Chicago, Illinois, and is attended by thousands of fans each year. The game is broadcast live on various media outlets, including radio and television. The event is a popular tradition that brings families and baseball fans together to celebrate the bond between mothers and sons.

The All-American Classic is a great opportunity to watch some of the top talent in the game today. The game is a showcase for the future stars of baseball, and is often contested with great intensity and passion. The game is a must-see for any baseball fan, and is a great way to spend a Mother's Day.

For more information about the All-American Classic, including ticket information, schedule, and other details, please visit the official website at allamericanclassic.com.
