Deakins explains draft situation

At the request of Technology News, Dean C. E. Deakins called a meeting of headquarters this week to determine accurately the position of students under the present draft law.

The outcome of this conversation was to bring to light some encouraging information for students:

1. Belonging to all students who are currently registered in a full-time course in the day division of the University of Illinois, attending class, a deferment until the end of the current semester must be granted by the local draft board.

2. Students may be granted occupational deferment and classified as 2A provided they are in the upper half of their class. This deferment is intended to permit extension of a degree, when it is granted, and the decision in this instance is left to the discretion of local draft boards.

3. Upon registration for selective service, students are advised to report to the nearest draft board to whom they have been notified of a letter certifying their individual status.

Graduate students are requested to contact Dean Lewis for their certification.

Members of the various reserves, when called, should contact Deakins' office for their deferment requests.

Laura to be first film on TFU program

The film "Laura" will open this year's Technology Film Unit program. Included in the schedule are such outstanding films as "First and Festive," "Squash" and "The Other-Boy Incident.

Preliminary billing to these productions have their choice of either pork or beef, since both are available at the door, or purchasing an associate membership card (for $25), which entitles the holder to view the entire year's program, including the special privileges of sitting in the club meetings. Membership cards may be purchased between 9 and 10 daily in the NU ticket booth or from members.

Technette now available to students, staff

Limited supplies of Technical's student information handbook are still available to students and staff members of TFU. The handy booklet not only contains details on activities, clubs, and sports, but in addition has a useful calendar for writing down information on important dates. There are also several addresses and memos pages in the back.

Revised edition during the summer by a four-man staff, this latest edition uses the same format as last year. However, various attractive title pages were drawn by Allen Edelman of the Illinois Institute of Design, and a more complete coverage of campus organizations was attained.

APO again operates student book exchange

The student's best bet for books is the Alpha Phi Omega book exchange. Here books may be bought and sold at the best advantage of both the seller and purchaser.

The exchange, located in room 207/NW, is open today and will be open Monday through Friday from 10 a.m. to 2 p.m. In its second semester it is starting a new day in transactions.

APO officials express gratification at the large number of transactions. They say that there is a greater demand for junior and senior textbooks than for any other.

They remind the upperclassman that now is the time to sell before his books are made useless by edição change.

Students wishing to sell should dispose of them at the price quoted. Likewise books, a small amount of other equipment such as drawing sets and slide rules are handled.
Solution is IT

Pessimistic predictions of long hours of caffeine consumers are exaggerated, just say—especially at dinner. Much to the surprise of many of us, the provisions made to guarantee the loss of the South Korean cafe and cafeteria seem to be adequate.

The additional fee of $10 for the Union auditorium as a dining and study area could not offset the loss of $5 for the room. Therefore, it would appear that increased efficiency in the cafeteria is not being used to its full extent.

In conclusion, since we are the ones who benefit by coming to the cafeteria, it is our responsibility to follow the rules necessary for adjustment to the limited space. Let our habits of studying and engaging in long winded conversations in the cafeteria not be abandoned if the happy situation is to continue. In the interests of all of us, it's not "inconsiderate of Clyde."
KOREA

(continued from page 1)

involves a number of 170 in prisoner. The 212 men and departmental mice to be evaucuated by a United States air force ship from Kuppo island.

Due to the fact that communications from Kuppo had been interrupted, a volunteer detail was sent out to keep in regular touch and see if the field was still in operation. Kapt Levanoff, office manager in the KIT Office of Administration, volunteered as an armed guard to accompany a member of the Security Staff. Upon reaching the field, which was clear, evacuation began, though there was a protective smoke screen until the last group reached the last group. They

The Yokho, which was down by one of the mountain fighters. It was the last enemy plane caught in the war, and the pilot received the Silver Star. Shortly after their arrival in Japan, Kapt Levanoff died. Censorship probably, due to the excitement of the situation.

Tech News announces changes

With the coming of the new year and more contacts on campus, Tech News has come up with a few changes of its own. Among these is the elimination of the Tech News column. This is a result of the new group of students taking the Technology Center and the "dream that is IIT."

On Monday afternoon, and continuing through most of Tuesday, the incoming students were held in the "new student" part of the cafeteria, bumbled by John Kohlhammer and Jim

The Tech News column will be made available in common areas of the campus in the next few weeks.

IIT women get more snaring info

According to the latest and final registration figures, the male to female ratio at IIT is about 24:1. Are you one of the 24% of men? There is 16% of the woman per man. Obviously, this is not enough. But what there will be well-advised to the last big thing that a rival daily Chicago paper did. All it may be... although Monday isn't the New Year's Day, to the frustrated fraction of IIT's population it may as well be just that. On that auspicious day this rival daily Chicago paper will begin a series of short articles entitled "How to Get a Husband."

The articles, broken down, will cover various types of men and how to catch each kind, the relationship between food and catching, and where a girl can meet the opposite sex, although we don't know that problem here. Since the news releases don't mention a coordinated course with the newsreel, it can be assumed that medieval conquest weapons won't be used, but Techrons can take heart in the old saying, which will take the liberty of quoting: it's not the kind of club you use, it's all in who you use it on.

or something like that.

Zest editor requests literary material

A call for material for the third issue of Zest, student literary magazine, has been made by Alan Plait, editor. Due to excessive demand of last spring's edition, it has been announced that the magazine will be delayed until the fall semester, depending on cost considerations.

The editor stated further that if the magazine is accepted into ITSA's domain, it will be printed by the new Multilith process or by commercial printing establishments.

Sixth term ME submits prize design paper

John R. Ward, MNE, has been awarded a prize of $100 in a national student competition for his paper entitled "Proposed Rail Carrier" submitted to the Homestead Engineer. The award was announced by the James F. Lincoln Arc Welding Foundation.

Further information may be obtained from the Placement Office.

Arch Congresses, Work of IIT, Tech loses White

Two staff members and a department received highest awards in their respective fields at the annual Meeting of the American Institute of Architects, held in Chicago in September 1960.

Ludwig Mies van der Rohe, director of the School of Architecture at the Illinois Institute of Technology, was awarded the Honor Medal for his design of the IIT student center, which is now under construction. Mr. Mies also received the Honor Medal for his work on the Pan American pavilion at the World's Fair in San Francisco.

Tyros offered responsible positions with publications

Last June saw the greatest surge of students in the history of Illinois Tech. Along with this boom of graduating classes went a good number of the many people who were working on campus publications.

The editors of Technos and Technical News and Editorial, together with the support of IIT Delta Sigma Phi, honorary engineering fraternity, are sending out a call for students to work on campus publications. The most drastic need is for editors. All students interested in prose and feature writing and for business and art staff members.

There are no qualifications for the positions other than an interest in them. Experience is desired but not essential. With the expected decreases of student staff in January and June, there will be many managerial and editorial posts open in students who have worked with the paper and the yearbook.

Interested students are invited to a meeting in 1010B Thursday at 1 p.m. Cobbs and lounges will be served.

Andres pens new book on electronics

Andres, a member of the electrical engineering faculty at Illinois Tech for over ten years, Professor Andres is also a graduate of Harvard University. His new book is an up-to-date description of the fundamentals and applications of modern electronics.

McCauley resigns as track coach

Accepts position to teach at Ohio State

Roy McCauley, track and cross country coach at Illinois Tech, has resigned to take a full time teaching position at Ohio State University. McCauley, also assistant professor of Metallurgical engineering, was appointed to the coaching position two years ago as successor of the late Paul Mueller. He is continuing his graduate study at Ohio State.

After his appointment as track coach in 1948, McCauley picked up the standard and improved it to the level of a national powerhouse. Earlier, while a player at Illinois Tech, McCauley had won the indoor mile and four-mile relay titles at the Big Ten meet.

McCauley, in his five years as coach, has never had a bad season. He has won only onemeet in five years, the 1948 Big Ten meet, and one in 1949, the Illinois State meet, but in the other three years, the team has been competitive.

For the past three years, McCauley has had two runners in the Big Ten meet who have been selected All-Americans. However, McCauley believes that the program is not as strong as it was two years ago when he had two runners who were All-Americans.

On the other hand, the new Illinois Tech track coach, Jack Saur, has a strong team. Saur, who was an assistant at Illinois Tech for three years, will take over the team next year and is expected to continue the program's success.

The new Illinois Tech track coach, Jack Saur, has a strong team. Saur, who was an assistant at Illinois Tech for three years, will take over the team next year and is expected to continue the program's success.

Prophets—here's your pigskin preview

Notre Dame, Stanford, Illinois, Texas top field

With football in the air, Illinois Tech is ready to start on its fourth year of Pigskin Prophets.

Suspended to start in two weeks, the annual contest is expected to be bigger and better than ever. But before plunging into the task of picking the winners, here's the preview of things to come on the pigskin this fall.

**East**

The Black Knights of Army will undoubtedly come up with another top team, but Red Bluff, head coach, can hardly expect it to match his championship aspirations. Army, with a new coach winning in a row without a loss all season.

With the exception of the loss of All-American Arnold Goffin, Bluff's backfield will be the same as last year. Witha Bluff supporting fullback and Floyd and Cain at the halfback the odds will be an experienced and hard running aggregation.

**Southwest**

If Texas will watch out for its team to do better than the rest, I'm sure the Longhorns will launch a bid to shake the jinx that cost them four losses by the Utah and Oklahoma in the 1946 campaign. Chaves will have more of his talent that performed so well in the battles against Iowa and Oklahoma. All that he needs is a replacement at quarterback to fill the shoes of Paul Campbell. He hopes to find one among Ben Tampin, Phil Davis, or T. Jones. The quarter back shows a good deal of talent.

**Southwest**

Here come the Indians! With blood-curdling screams and war hollers pelting, the St. Louis Cardinals are bearing down on the Pacific Coast Conference football wagon train. A study of the men indicates that the Cardinals have the best chance of breaking the circle, due to a good playing team and coaching staff. A trophy of battle known as the Rose Bowl.

Dance dates approved by ITSA

At the request of Don Gifford, advertising manager of the Student Directory, the ITSA board of control Wednesday adopted a motion that "committees of ITSA be required to secure bids from organizations advertising in our publications, and other campus organizations be urged to do likewise." Explaining his request, Gifford stated that advertisers were unwilling to buy space unless such a provision were made.

Dance committee's report stated that arrangements have been completed for the Sherman hotel for the Integral ball to be held November 6. The Freshman mixer sponsored by the Freshmen class, will be held October 30.

A by-law was added in the ITSA constitution outlining the structure and duties of the Student Union committee and providing for a standing committee consisting of four members from the Junior and Senior classes and three members from the Freshman and Sophomore classes. It has jurisdiction over all matters in regard to the student union and other union facilities which affect the student body. A second by-law was passed providing for a public relations committee of eight members.

News in Brief

The Alpha Pi Omicron inductee ceremony will be held at 7:15 p.m., Oct. 11, in the North Student Union upper lounge. All formal events are invited to the get-together of ITSA's service fraternity. There will be entertainment and refreshments.

Semiconductor and dependent organizations that need funds for the coming semester must present their budget to ITSA next week, Bill Combs, ITSA treasurer, announced today. Last year's budget, books and Tucker register must be presented along with the new budget at the ITSA office between 1 and 2, Monday through Friday.

Graduating seniors are requested to attend a placement conference Thursday at 1 p.m. in 110CB. Harold Minkler, director of placement, will preside and give a talk on the essentials of job applications, including forms, references, pictures, etc.

Minkler, recently returned from a placement conference in Detroit, where Tech's system was analyzed, announced that Tech's system is being used with the G.I. Bill.

Tom Glossop, 8th term presid, also announced that during the conference a placement committee was established. Discussions and seminar will be held concerning the senior pros and class rings.

Today is the last day for students to purchase student accident and health insurance without a physical examination, Dean Dean announced. The insurance is on sale through the Burson's office at a cost of $10 per semester.

Late registrants may obtain their ITSA Student Identification cards at the ITSA office, second floor of North Union, next Tuesday and Thursday at 1:00, Don Lynch, ITSA president, announced this week. Students are required to present their tuition receipt in order to obtain the identification card.

The White Cedar girls have announced a "get acquainted tea" to be held next Wednesday at 4 p.m. in the Executive Conference room. Admission will be free.

Engineer-in-training examinations will be held on November 18. It was announced today. Applicants for the exam may be obtained from the Office of the Department of Registration and Education, Division of Professional Engineering, on or before November 3.

Seniors who will graduate in June are eligible to take this examination. Complete information in being mailed to each candidate for graduation by the office of the registrar.

Home ece set up camp in Tech

A major step towards consolidation of Illinois Tech's department at Technology Center was accomplished this Summer with the remodeling of the old South Union to accommodate the Home Economics department. The entire department of forty-five students moved this Fall into classrooms and offices formerly occupied by the South Lounge and cafeteria, the Internal and Technology News.

Home ece classes were conducted at the Downtown center, 18 S. Michigan. Another Illinois Tech adjunct, the Institute for Psychological Services remains at the Downtown center.

A new lounge for women has been incorporated in the department's quarters as part of the facili-
ty job on the rear sections of the South Union.

The department offers a four year course leading to a bachelor of science degree in home economics. Miss Mary L. Mendenhall is chairman of the staff consisting of three full time associates and assistant professors and four part time instructors.

"Home economics fall find many interesting opportunities for positions as dietitians, designers, and teachers in home and household's practical arts," Miss Mendenhall stated.

The home economics club has also moved to Technology Center and will meet in the Home Ec building.
