Homecoming hits Tech tonight!

Third annual Slide Rule Bowl Tuesday!
IF, IM champions clash for trophy

The third annual Technology News Slide Rule Bowl will pit the perennial IM champions against the Greensboro, North Carolina, high school for the right to take home the trophy.

Martin Hoef, chair of the Junior Week committee, will introduce the contenders for the title of Slide Rule Bowl champion. The contest will be held in the Student Union on Monday, December 12, at 8 p.m.

The match will feature two of the top slide rule competitors from the state, with the winner receiving a trophy donated by the Student Union. The event is open to all students and faculty.

Sigma Xi will hear Dr. Boden Wednesday

The Illinois Tech chapter of the national scientific research honorary, Sigma Xi, will meet on Wednesday, December 13, at 8 p.m. in Room 101C. The meeting will feature a talk on the latest developments in the field of materials science by Dr. Boden. The meeting is open to all students and faculty.

ITSA picks Hoef JWHO coordinator

The Illinois Technology Student Association (ITSA) has chosen Martin Hoef as the JWHO coordinator. Hoef will be responsible for coordinating the activities of the Junior Week committee.

Lost Greeks legal, no longer 'lost'

The Interfraternity council and ITSA officially acknowledged the Lost Greeks last week, making the group a recognized student organization.

The Lost Greeks are made up of full-time fraternity men who have transferred to ITSA from other schools. The group represents the interests of new members and the interests of incoming freshmen.

The next general meeting will be held on Monday, December 13, at 5 p.m. in Room 101C. Prizes will be awarded for outstanding performance in the competition.
EVIDENTLY there is agreement that our laboratory system is faulty. Since the last issue I've been approached by many—by every instructor—who concurs with the ideas presented earlier. However, mere agreement is of little consequence. Action is essential if anything is to be accomplished.

Honorary and professional societies are in the business of helping others so if you are really interested in a lab setup which subordinates routine operation and emphasizes learning, let the officers of your honorary or society know.

Finally, if your recommendations are submitted to the president, don't let him hang you for not being timely. Follow them up. If necessary, the individual involved until he gets tired of seeing you and takes action one way or the other.

HEARD A FEW gripes about the dormitory rental setup this past week. Some of the boys decide, about half way through the item, to move. When it comes to setting up with the school, however, they find they are indebted for the first semester, and must pay unless someone can be found to occupy that room. There's nothing particularly sinister about this—this is the usual case of the dormitory area. The lazy way they got the contractual obligations for the dormitory arrangement.

Nevertheless, the whole arrangement seems pretty heartless. Wouldn't it be a good idea to abandon the student's attitude, to sustain a little more interest in the students, and, in so doing, establish friendly relationships much greater in value?

ADVICE TO basketball fans. Stand along the west wall. From there you get the next view of six or eight pairs of legs as one cheerleader goes into action. We of Technology News know. We were there Tuesday night.

IFC move dangerous for social well-being

A year ago ITSA, the administration, and other student groups found a problem—a glaring, juicy problem. For the year prior to last fall, the campus was haunted by social disasters. One social affair after another lost money.

So last year a plan was born. A plan of using ITSA the responsibility for scheduling social affairs, and controlling a calendar of social events. ITSA, of course, went with its authority.

ITSA has, during this last year, had one sickening problem. The social set-up. It is not in the system because the system was not working; it was not a problem because your student government was or was about to be in control of a good unit. But it was a problem because certain small elements of campus life felt a curtailment of what they considered their social rights. A new thing to be done on this campus, it was to be done in their way—a way—by them. Of course, this desire came first, and then those of the entire student body.

Last Wednesday more opposition materialized. A letter from the White Collar Girls' group to ITSA, regardless of ITSA's wishes, their dance would have to start before the end of the basketball games.

Next, an administration member, who already knew that the students control their student union, made a motion that ITSA had nothing to say about a White Collar Girl's dance, though it was to be held in the auditorium.

As a final note, the Interfraternity Council presented its resolution asking that ITSA adopt ITSA's social set-up. From this point, the arguments were presented dispassionately. They ran from two-talking words to actual threats that "if our motion (IFC) is not passed, we will be unable to support your social function." When it became apparent that the board might pass voted to stall a vote were defeated, and the motion was passed.

Today we are back at the dog-eat-dog method of selecting social functions. Dates or social functions can be registered on the social calendar, yet need no approval.

We are now completely disgusted! If we let our personal feelings guide us, we would be happy to sit back and watch the majority. Yet we feel we have an obligation to the student body.

Consequently, we feel this entire subject will come before the board again. It is realized that the social system was perfect, yet it worked effectively. To throw it out at this whim of organizations to return to the old system is nonsensical. It is hoped that some salvation will be made of what is important service to you.

They will do anything to get votes

ELECTIONS DEC 13-14

Berezin

Ballot marking found to be most important

Last week's column attempted to aid the election commission in its quest for candidates. This week we attempt to clear up a few of the common misconceptions that many of the students have in the use of the ballot and to urge everyone to vote.

When you vote under the ITSA presidential system, fill out the entire ballot conscientiously. Your vote will be recorded and distributed among the remaining candidates according to the second decisions on his ballots. If none of the remaining candidates has a majority at this point the process is repeated—this time considering even third or fourth preferences on some ballots.

The conclusions we wish to draw are:

1. Don't mark your ballot numerically.
2. Don't put down numbers just for a half. If you actually have no further preferences simply don't mark any.
3. With the change in ITSA's tenure system, this fall semester election has become a difficult one. In theory everyone can vote in some contest, the entire student body can vote for the ITSA junior member of any class. Presently the first, second, fourth, and fifth semesters are electing their class officer. This means that the entire student body is voting five times to the ITSA board. As we mentioned last week these five people are tremendously important to each of us. And yet the cause for more of the students changing as when the other five ITSA officers are open or when the Junior Class are electing their officers, the danger is always present that the same group of people will be re-elected or that the group of people will not become sufficiently interested in the vote.

We hope that these hard heads will not govern the number of students voting. We hope that these student officers will continue to support a lively interest in their activities.

The election commission has endeavored to make the voting procedure as simple as possible. Everyone with an ITSA card and a mind may vote.

Tech News backed up

The second in the series of APO reports was written itself with Technology News. Certain changes have been announced for the newspaper and some evidence was desired.

As was expected, nearly everyone at least picks up the paper on Friday, but an unexpected development by the fact that the students are least read of all the sections. Toppling the preference list, are Slipstick and the cartoons, followed by pages one and two. The feature editor, and last, sports. The popularity of Slipstick probably influenced greatly the wide-spread registered toward sending the jokes throughout the paper. This is partly explainable by the fact that, since the change, the number of these jokes rather than the quality has decreased.

The results indicate the opinion as to whether the paper should take definite stands on controversial issues, and demand equal status for nothing more than student issues be covered editorially.

In the feature department a wide range of opinions were voiced in answer to the questionnaire. Better than two-thirds of those polled favor discontinuation of the crossword puzzles but a similar majority favors reading the "man of the week." The majority received favorable comment only a little over a quarter of the interviews while the same majority rejected a cool column primarily intended for the people with a particular interest in this field. The results of the recent suggested changes. The most overwhelming change is in favor of the stories dealing with Armory Research Foundation work. The results of the final opinion are perhaps most heartening to Tech News people. For this was the percentage that out of 288 people interviewed, 13 opposed furth of the paper's police protection stock.

Slipstick

The end of an old man's prayer: "Ah! Men!"

His sense of balance after a wild party was not what it used to be. As he tried to run down the front stairs of his dormitory, he fell; the bottle on the top was broken, causing him injury. Even in this condition he realized that first aid was imperative, he went to the emergency room, the injuries to the final location and backing up to his reflection made the necessary repairs.

The next morning his wife accused him of drinking too much. He concentrated to the escape. If you were sober last night, how did all that alcohol escape the bathroom mirror?"

Little dog looking up at a parking meter:

"Why, hell, ya gotta pay now.

You can't always tell how far a couple have gone by looking at the speedometer.
Asterisks point to single gals, guys

By Bert Olden

The Tech Center Directory, late because of printing difficulties, was put on sale a week ago Wednesday, and was almost completely sold out by this Monday.

About 1,200 copies of the Directory were reserved for students, with a large quantity set aside for the institute's staff members. Those books that remained unclaimed were to be forwarded to the bookstore for sale over the counter.

This year's Directory, which was the third to be printed at ITT, was improved over the previous editions by the use of different colored sheets in the various sections and the addition of a new guide. Although there were still some errors in addresses and phone numbers, better proofreading decreased these greatly from previous editions.

Despite increases in cost of printing, the price of the Directory was not advanced over the last edition. The cost was met by the advertisers and the sales to the students.

When asked for a statement at the conclusion of general sales, Editor Bill Groh said, "Last year's editor, Cliff Mckee, told me it was a rough job, and I didn't believe him. It isn't easy, but not possible to allocate the hundreds of man hours of labor that book requires, in a way we won't be a good looking, useful directory."

Several people have asked the reason for the use of asterisks in the personals section. In a personal ad, he isunmimar, the public relations department explained that it is to facilitate correspondence with the person's name, if we can name a parking place. I'm not sure if I can make it work, but I'll do it if you'll roll up your sleeves. A couple of the people who have been involved have said it's a wild idea, but I'm going for it. They've been told there's a parking place, and I'm going to make sure it works.

ITWA dolls are flower girls at game

Two hundred artificial chrysanthemums will be sold by members of ITWA tonight at the Homecoming game.

This will be the third time that ITWA's Women's Association has sponsored a sale such as this. Since ITWA is not a service organization, the proceeds will be used for a party for the children of the McKinley Community house.

The artificial flowers were all made by Harriet Milkowski, HES. The colors will be white, yellow, and deep yellow with orange tips.

Uns recalled a meeting at the Community house.

ASME to vote on chapter by-laws

The American Society of Mechanical Engineers will meet Thursday at 5 p.m. to vote on by-laws for the student section. From the by-laws will be a group of members to vote on those new by-laws will help pave the way for a smoother functioning organization.

Peterson also announced that plans are underway for a field trip somewhere in the Chicago area after the holidays.

Open student contest for land econ essays

An essay contest in land economics was announced today by Kly chapter of the International Fraternity of Lambda Alpha, land economics.

The prizes are $200 in cash, YMCA Real Estate Institute, and five certificates of honorable mention.

"The paper should analyze and possible solution to some important aspect of land economics in the Chicago metropolitan area," Richard Nellson, chapter president, announced. "The paper should be 2,000 words long, exclusive of maps, charts, or tables."

Nellson told the education committee that when the following subjects as suitable:故事, location characteristics of retail, or wholesale trade, of light manufacturing industry; relation of land values to the cost of construction; city neighborhood conservation; red development of highrent area or special; master suburban subdivisions.

Exams are to be submitted by Feb. 13, 1951, to Nelson in 32 South Dearborn Street, Room 600.

The judges will be the teachers of the educational fund of the chapter.

Field trip

A trip to Canelco Coke was planned for a wild ride. The group left on their first trip to see the factory. They had put up a parking place near the Canelco Coke plant.

"I'm not as gullible as I look!"

Maybe our little ever-earthly friend is just fishing for a comment. On the other hand, he may have references to all those quick-trick cigarette tests you hear about nowadays.

Well, he's not the only one who's been at sea. Frankly, how can you judge a cigarette by a swift sniff? Or another cigarette by one fast puff? What's all the rush about, anyway? When it comes to making up your mind about cigarette mildness, you think you'd like to take your time.

That's why we suggest:

The sensible test—the one that you make on a day after day, after day, after day, after day, for 30 days. It's the 30-Day Camel Mildness Test! Simply smoke Camel—and only Camelfor 30 days. Let your nose talk (for Thor Heyerdahl) to your taste buds. When you've tried Camels as a steady smoke, you'll know why . . .

More People Smoke Camels than any other cigarette!

Number 8...THE SEA GULL
Newman club plans party for children

December 17 is the day on which the Newman club of Illinois Tech will stage a Christmas party for the young children in the vicinity of the campus.

The club plans to have about 100 children at a party that will feature cookies, candy, toys, games and a moving picture show. A club spokesman claims it is "as accurate for the enjoyment of the children as the kids they are entertaining.

This party represents the first attempt of the Newman club to sponsor a party for children on campus.

Chuck Peschke, president of the Newman club has sent out an appeal to all members of the club, and anyone interested in helping to give these children a happy Christmas. Peschke said: "These children do not have the chances that others do. Therefore, if you can contribute anything in the form of toys, or gifts for the children, or decorations for the Christmas tree, we would greatly appreciate your cooperation or donation."

Teacher (history student): You want to know why you didn't pass your history test?

Student: "I'm not sure."

Teacher: "Well, your answer to the question, 'Why did the Pilgrims go into the wilderness,' while interesting, was, nevertheless, incorrect.

GIRL'S GLEE CLUB preps for program on Christmas concert

The annual Christmas concert will be presented Thursday by the glee club organization, whose members are now reorganizing for their 400 mile tour of Reedsburg, Rockford, Dixon and Peoria. The concert is scheduled for 1:15 to 2:45, arrangements having been made to have a change of scene after the half hour of the program.

A feature of this year's program will be the glee club's annual debate on the question, 'In the 19th century, the influence of the book on the American character was greater than that of the press.' The debaters will be selected from those members of the glee club whose debating ability has been developed through their participation in the debate before the student body.

The program features include a reading by Ralph Waldo Emerson's "Nature," a spoken drama, "The Gift" by Heywood Broun, and a musical program.

Art Institute exhibits old masterpieces

Masterpieces of art from Vienna, an exhibition which includes portraits, sculptures, armor, gold and precious objects which have been lost by the Austrian government will be on view at the Art Institute through January 12, 1947. This great collection of treasures from the royal galleries of Vienna includes paintings by Titian, Rembrandt, Vermeer, and other great painters, along with the art and armor of the fifteenth century, famous illuminated manuscripts and other objects in the field of decorative art.

The progress of English history from 1600 to 1800 A.D. is illustrated comprehensively with these objects, many of which belonged to the Haughsburg. Included are a number of royal portraits and other paintings of historical interest, such as paintings of Sir Walter Raleigh, Charles V and Philip IV.

Lytton's

FOR ARROW UNIVERSITY STYLE!
Engineer's misogamic ideal is 'George' character Paul

By Alan Field

The Dean-Slayer pictured below says he is an M.E. At the time the photograph was taken, he was following, or rather, stalking three lovely coeds into the Home EC building. We wonder if the M.E. means eight for M.E.? With Joe Paul (the man pictured below), Dean-Slayer stands for Lady-Killer.

Joe, who works for the copy desk of Technology News, found that this was the easiest way to overcome his shyness. Now he is a well-rounded character. That is kind of charming we are not allowed to point. Joe is a very good-looking boy. When the typing in Technology News see him, they scream....

All this probably stems from the fact that Joe doesn't see one woman for a period of 12 months while he was overseas with her in the Pacific. However, with a thick Irish brogue, he did manage to meet an Irish girl in the Philippines. As Joe says, "The sooner sets the stage of an Irishman.'

Upon his discharge from the Navy and a brief but wonderful time as a bridegroom, Joe came to the famed halls of Tech where he was promptly discovered at the lack of prettiness. The administrative change in the location of the Home EC department brought the old glum back to his smiling Irish eyes.

It was only natural, that since Joe spent so much of his high school year in the Black Hole of Alumni hall, he has become the president of the Black club and much of the Black humor. Undoubtedly, this has given him some bad publicity in the faculty with which he obtains his women. As publicity chairman of S.M.S. Joe has developed a beautiful vocabulary and the most foul-mouthed lines have ever heard. If Joe is seen walking around with a pretty girl at his side, it is because he is a "Lost Greek" of Sigma Nu.

There is but one organization, however, which can really claim Joe as its own, the I.E.P. association, of which he is organizer and president. Although still in infatuation, the association has managed to increase its membership and has also increased its membership in the Home EC department.

Joe has high hopes for the future in this endeavor, commentating, "It's a wrap-up, all the way!"

One might gather from the above comment that Joe is remarkably attractable by any form femininity. This is certainly untrue. Women play only a small role in Joe's life. He has been known to last as long as ten minutes without even mentioning the opposite sex. This is largely due to his complete lack of prettiness. Women, apparently, are not his forte. He has been known to last as long as ten minutes without even mentioning the opposite sex. Such a man can only be brought about by "skin lifting" (a slang expression rarely used since the reign of Joe's ideal, Harry VIII). Men of Joe's caliber should serve as a warning to all campus engineers. After all, we are in school to gain a mental education and understand, according to Joe, "What being minute weighed on women could be used refreshing the mind with aiding role practice or important consideration."

The latter refers to the daily activities which Joe uses to prepare for the common push-ups and sit-ups.

Think before you vote!

Disaster stalks Tech students!

Voters must act, avert total ruin

The future of your institution, your degree, your life while at Tech lies in your hands. DON'T BE LETHARGIC!

Wednesday and Thursday the GREATEST GOVERNMENTAL PRIVILEGE, given to civilized man will be offered you. You will not be forced to vote in order to obtain a $94/100 percentage. The three societies, in cooperation, will have assembled together for your benefit. You have this opportunity. You can stop the situation before it is too late. You will have a chance to vote. You can stop the situation before it is too late. You will have a chance to vote.

The importance of this election to each of you is NOT EXAGGERATED. Your vote Wednesday or Thursday for the ITSA junior member-at-large will be the deciding factor in the election.

The men you elect with your vote can change the outcome of at least 10 ITSA board votes. BE CAREFUL!

If you feel that you wouldn't have any thoughts on the importance of the ITSA and VASSAR STUDENT BODY, then you've neglected the importance of these positions. If you feel that you wouldn't contribute to your school by voting, then you're missing out on an opportunity to make a difference.

Use your prerogative—be a loyal citizen—be a voter—don't be phlegmatic!

Member-at-large hopefuls present election platforms

Conners states:

I, Tom Conners, would make it obvious that it is time for a new, fresh, student-oriented campus filled with opportunities and activities. I will work to ensure that the ITSA board is composed of individuals who will serve the interests of the entire student body. I will strive for the cultivation of leadership skills and provide a forum for the expression of student concerns.

Guintoli says:

My goal is to ensure that the ITSA board is composed of individuals who will serve the interests of the entire student body. I will strive for the cultivation of leadership skills and provide a forum for the expression of student concerns.

Adress states:

Having been involved in student affairs for several years, I have had ample time to observe the social climate and understand the needs of the student body. My experience includes serving as a member of the Student Senate and participating in various student organizations.

Guintoli says:

My goal is to ensure that the ITSA board is composed of individuals who will serve the interests of the entire student body. I will strive for the cultivation of leadership skills and provide a forum for the expression of student concerns.

Clarification of election procedure

For the forthcoming ITSA and class-at-large elections, the following procedure will be followed:

1. For each office, candidates will run for the position of their choice. If there are more candidates than positions, a runoff will be held.
2. All candidates for the position of vice-president will run for that position.
3. Candidates for the position of treasurer will run for that position.
4. All candidates for the position of secretary will run for that position.
5. All candidates for the position of class-at-large will run for that position.
6. All candidates for the position of student senator will run for that position.
7. All candidates for the position of student trustee will run for that position.
8. All candidates for the position of class senator will run for that position.
9. All candidates for the position of class treasurer will run for that position.
10. All candidates for the position of class secretary will run for that position.
11. All candidates for the position of class trustee will run for that position.
12. All candidates for the position of class senator will run for that position.
13. All candidates for the position of class treasurer will run for that position.
14. All candidates for the position of class secretary will run for that position.
15. All candidates for the position of class trustee will run for that position.
16. All candidates for the position of class senator will run for that position.
17. All candidates for the position of class treasurer will run for that position.
18. All candidates for the position of class secretary will run for that position.
19. All candidates for the position of class trustee will run for that position.
20. All candidates for the position of class senator will run for that position.
**Frosh candidates speak up**

Winder asserts:

*The 'Spirits' realize that being freshman, we are not acquainted with each other and each other's abilities, but we believe that we have assembled the best possible group for the job of leading our class in the coming semester. This group includes Turner, Dvorak, Wenderich, Schott, and myself.*

Although we may lack experience, we have the "Spirit" and the "will" to do the things which are necessary to make the best of our second semester at ITT. We stand for the opening of the 3rd street "L" station and the closing of the 3rd street intersection. We stand for equality of the classes.

We shall seek to make Illinois Tech a refuge from the draft. We'll bring more beautiful girls to ITT; we'll bring lower tuition prices, even if we have to work the staff ourselves (God forbid); we'll bring fresh air to the Chemistry building, even if we have to bring it from the stock yards. In fact, we'll even go to Kansas for you.

Fortunately, girls, we do our best to represent our class at the ITTA, but much is expected and we throw the best "Proctor Mixer" that ITT has seen yet.

**Grant Opinion:**

As a candidate for the presidency of the freshman class, I will endeavor to represent our class fairly at meetings of the ITTA board of control, to back any move toward the building of a new student union, to stage for the increasing freshman on an exceptional advantage of not being obligated to any clique or minority group. For this reason I have chosen to run as an independent candidate for the office of president of our class.

If elected, my goal is personally to contact every freshman to determine his feelings on controversial subjects pertaining to campus activities.

It's up to you, freshmen...

Do you want a class president who is positive and will more than likely be burdened down with obligations to certain individuals, or one who is willing and able to represent YOU in your student government?

**Says Larson:**

Ever since my arrival at Tech I have been amazed by the lack of loyalty that various students have had to their class as a whole. It is my belief that something should be done to stimulate this "class feeling" among the students at ITT. Therefore, if elected, I will attempt to provide activities for our class and for the incoming freshman class such that we will be able to get to know each other much better. This should do the trick since after all we are going to be together for four years...

I hope...

In addition I will try to start the ball rolling on a program intended to improve and add interest to the freshman health stresses. Since athletics play a major role in the students' well-being, I will stimulate interest in athletics, both varsity and intramural, and whatever means possible.

I believe that I am qualified for the office of freshman class president since I have had experience in student government while at Parker High School.

**Says Miller:**

Quoth Hugo Miller:

As a candidate for the office of president of our class, I pledge, if elected, that next semester the frosh class will have active representation in our student government. My party, the "4 Kids and a Mini," is dedicated to this policy. Running for the office of vice-president, we have Dick Carey, a fine prospect who sounds much of his time as a member of the advertising staff of The Student News. One of our prerogatives, who at present is in the final competition for Homecoming Queen, and who is a member of the marching band, the cheerleaders, and Technology News, is our own Beaumont Foltz, running for the office of secretary. Frank Tofolli, a psychology major and Alpha Sig pledge, is our idea of a good man for the office of treasurer.

I feel that the above-mentioned candidates can manage one of the best, if not all the semi-annual functions, the freshman mixer.

**Here are the candidates for Dec. 13-14**

Listed below are your candidates for:

**itta, junior member-at-large**

*Name: Turner, Dvorak, Wenderich, Schott, myself.*

**President:**

- **Hugo Miller**
- **Don Larson**
- **Phil Schott**
- **Bob Dvorak**
- **Jim Turner**

**Vice-President:**

- **Don Larson**
- **Hugo Miller**
- **Jim Turner**
- **Phil Schott**
- **Bob Dvorak**

**Secretary:**

- **Ursula Lier**
- **Al Johnson**
- **Ted Eskridge**
- **Sonny Mann**
- **Bill Hafeld**

**Treasurer:**

- **Al Langefeld**
- **Bob Hoyle**
- **Jeff Langerfield**
- **Bob Dvorak**
- **Jim Turner**

**Social Chairman:**

- **Phil Schott**

**Basis 6th Term Ballot**

**Voting Instructions:**

1. Place the number "1" opposite the candidate of your first preference.
2. Place the number "2" opposite your second choice, the number "3" for your third choice, etc.
3. All ballots MUST be marked in this way.
4. Do NOT mark your ballots thusly: X

**Basis:**

- President: Bert Neighbours
- Secretary: Ursula Lier
- Vice-President: Ken Jader
- Social Chairman: Ted Eskridge
- Treasurer: Al Langefeld
- Al Langefeld

**Aspirants spout altho unopposed**

My decision to run for president of the fourth term class is based on the fact that I have an ambitious group of followers running with me.

We make no definite campaign promises on issue, for too often promises made in the heat of the campaign are forgotten as soon as ballots are counted. Instead, we will serve our fellow classmates honestly and follow our conscience when issues arise that will affect these fellow classmates directly. In this way we hope we will serve best the trust that is put in us by the students who honor us with their vote.

If you want this kind of representation on ITTA, and if you want your class functions to be such as the following people want, then I sincerely feel that success, but I merely feel that success, is not only for the people who are great, but for the people who are great, and myself, Alfred Bode, president.
Techie Techawk's Date Says:
"For the Homecoming
I Prefer
MUMS"
On Sale Tonight
At the Big Game

Stockroom's Paul Miller
a chem institution

Two gallon jug of Mums
brings the village of Paul Millien of the Chemistry building stockroom, where he has worked for nearly ten years.

Paul Millien is undoubtedly known by all Techawks who have taken one or more courses in Chemistry. He is the gentleman who supplies them with the necessary apparatus for lab activities, and has served the students at Tech in this capacity for nearly ten years.

A magnesia as the job of stockroom manager may seem to the casual observer, it nevertheless involves much responsibility. Mr. Millien, in addition to caring for the chemical needs of the chemistry department, is also responsible for the proper functioning of all four of the other stockrooms. His position requires him to supervise inventories, order and keep stock up to par, all the while, keep materials readily available, as well as to determine the cost of all chemical users offered. The remainder of the time is filled with various aspects of the job, which the stockroom must operate.

Before his arrival at Tech, at which time it was still the Armour Institute of Technology, Mr. Millien occupied various positions. In one of these, for a period of ten years, he was an automobile salesmen sideburns in and another he spent eight years working on the staff of an Oak Park newspaper. He is a native of Chicago. Enough the Tech Directory now gives his home address as Melrose Park.

Concerning classified, he is listed severely. On the positive side he enjoys working around his home and dabbling in the field of horticulture. He gets a lot of good news from those who look for bronzes, in the student body and the student corps—neither item, unfortunately, being involved in stock. Mr. Millien has a keen interest in the stockroom as a properly functioning organization, and he believes that with continued all around cooperation, service can be continued at maximum capacity.
Hirsch tells saga of vanishing vet

Two categories of citizens comprise the student body at HT: civilians and veterans, according to the Veterans Administration. The latter category is said to number under the hundred, and the attending school under the well veterans are putting their way through studying and honing combat figures obtained from the registrar's office have been pegged at 132, 941 veterans enrolled in day school with 160 in GI's at evening school. Compare these figures to those of last semester of 42 when 2323 vets were in the school. Of these, 1715 were in evening classes here at HT.

Most of the veterans are attending school under Public Law 507. These days are a healthy one, having left the service with their physical condition remaining unimpaired except for possibly a case of rheumatism, a knee or stomach distress from drinking warm beer or other habits. Discharged veterans attend school under Public Law 515. Of the 340 veterans now in the school, 156 each are attending school here.

What is a veteran, and how easy is he to distinguish from the rest of the thundering herd? Take a walk on campus between class sessions at any other time during which a large number of students are wandering about. The possibility of pointing out at present any veteran student as being a veteran is slight as compared to what it was in previous years.

The government borrowed these from 1945 to 1950. Their lives as all eligible young Americans. As a result, particular military, economic and biological adjustments normally occurring during this period to be postponed until the nationwide economy shored somewhat. Speaks to the average student-veteran and you will find that in addition to attending school he may work and have a family. Further inquiry will show he has adjusted himself very well to civilian life.

The "Welcome-home-old-timer, boy-yes-a-day job" routine went the way of the hobo and busybody. People found that denials of service personnel meant loss of claim on their job, line, job opportunities, and other impediments of a past way of life.

The veteran learned early in his profession of civilian life that the discharge button in his lap meant practically nothing as far as "winning friends and influencing people" was concerned. Consequently he chose the "restaurant duck" unless he had a job or a politics. In addition, the veteran found that on the whole he did not care how many planes he shot down, or the number of enemy he had single-handed with his GI shoe. The wise vet reserved such talk for the background or for the time when junior becomes an enthusiastic old-timer one.

Naturally, many people feel that the nation permanently owes veterans a living. Actually it is up to the vet to make his own way in our modern society. The GI bill is meant to show an ex-service member, to help him in establishing a position of responsibility.

News in Brief

The Institute of Radio Engineers will meet Thursday at 1 p.m. in 399 to vote on important constitutional amendments and movie and refreshments will follow the voting.

Raymond D. Meade, director of placement, will speak at the annual Kappa Phi Founders' Day banquet Friday, this the fortieth anniversary of the foundation of the fraternity, will be celebrated by alumni, actives and pledges.

Campus "Pipe Smokers," are you interested in forming a Pipe Smokers' club? Contact Sherman Roberts by phone at room Sigma Alpha Mu in Brown hall.

The Israel club will sponsor a Chanukah dance Saturday at 8 p.m. in the Moody gymnasium. There will be a barbeque with refreshments. Everyone is invited.

Scenery and decorations for the Christmas concert are underway as the date of the Music Club's annual affair nears. Final touches will be added Saturday. Anyone interested in helping out will be welcome.

The Newman club will elect officers for the spring quarter Wednesday at 3 p.m. in 399. Members may run for any office; four vice-presidents will be elected, all members are urged to participate in elections.

Finalists vie in Slide Rule Bowl
Defending champions recapture IM title

By Bob Schwartz

For the third consecutive year the Grinnellites have captured the Intercollegiate championship along with the right to participate in the annual Slide Rule Bowl against the Boardman School champions. They managed to accomplish this although all competing teams threatened the defending champs, more than any other year. However, they came through undaunted and were awarded the title and the weather conditions prevented the completion of the scheduled playoff games.

They played more, won more, and had less losses than any of the other teams, as well as being defeated by all of their rivals. In fact they have last only one game in the last four years, while the same period of time only six touchdowns have been scored against them. Their overall record for three years is phenomenal, considering the competition during that period.

The Lites became the first team to cross the champs' goal in over two seasons of intercollegiate play. However, they were able to score but once and the missed extra point proved to be their downfall as they accomplished 5. This game was the Grinnellites' toughest of the season and the Lites came out and it contained the worst they could. The Lites allowed, 7 points, which is impossible, however, so their only analysis of the game was on the Grinnellites' superiority.

There was no question as to who was the NESC, who also managed to score the powerhouse goal line, but they could not stop the efficient offenses which were always in the same position of gaining first place. Their final score of 21-6 was the Little Bears.

Playing an inspired brand of ball, they were able to virtually stop the Grinnell attack, but they did not content on a short pass from Bruin Tennant to Joe Lightbody. While all this may sound as though the Gophers were a one-man team, this is not correct. Tennant's & Lightbody's powerful moves were at their disposal and the boys were just that, only a part of the game. Tennant's strong blocking which enabled him to shoot at the Gophers. With Hark and Tennant as the legs of the team, Bob Stork, Tom Conner, Wes Ooms and many others were leading the opposition. The game was played on the Grinnell turf and the boys were determined to win. They were determined to win.

The day was overcast but it was a lovely day and played in the woods. Further, they were as tough as the Gophers.

The boys played the tremendous defense of the Grinnellites, with Bob Dunn and Jerry Max Lichtman running through the line in front of the Grinnellites' defense squeezed the Gophers and turned this into a defensive struggle.

Give them about one more surprise and they are likely to score about a hundred points in one night.

The boys deserve to be congratulated as they have one of the best defenses in the country and they are the most lethal in the country. They were expected to be a formidable opponent in the national championship.

TECH SPORTS

Scalamera to be honored
with most valuable trophy

Among the felicities of the homecoming game will be a award to George Scalamera, captain of the 1949-50 cage squad.

The trophy, most valuable player award of the football team, will be presented to Scalamera by Athletic Director Sonny Weissman. The award is sponsored by Honor I, honorary athletic fraternity.

By voted to his teammate this honor, Scalamera earned it in the ranks handsomely. Leading his team to a round of 12 wins against five losses, he scored two three-time records in the league.

The most points scored in one game, 316, was a mark set on an occasion when he was captain, 1950. He also set and tied the record for the most points scored in an individual game, 20. He went 8-10 in the championship game in individual scoring, averaging about 30 points for every game played according to the ratings of the National Collegiate Athletic Association.

ALPHA SIGS vs. DELTA SIGS
to decide IF league

By Wayne Hamilton and Sunny Mens

Plagued by weather difficulties last two weeks, the Interfraternity league has yet to decide a winner to represent for the Slide Rule Bowl.

Weather permitting, the champion will be named from the two finalists, Alpha Sigma Phi and Delta Tau Delta.

The lineup of these two teams is unknown and the Delta Tau Delta placed in the first Slide Rule Bowl. Losing to the Grinnellites, 6-4, the Delta Tau Delta was in the championship game, losing to the Grinnellites, 6-4, as either team may be declared the winners of the Interfraternity championship, or the three-time national winner, the Grinnellites. While everyone has been watching the two teams, the Delta Tau Delta has been rolling along all season, playing eight games against a lone loss.

They have been extremely impressive in all of their games, scoring 175 points while holding their opponents to just 14.

The playoff of the Delta Tau Delta is generated by Hildeth Whistle, who is coming off the field, with the other teams. From there, the Delta Tau Delta has been running back in each league. In the forward wall, one of the teams, the other in the backfield, running back in each league. That's where the Delta Tau Delta is headed.

With one of the best teams ever to hit the grids, the Alpha Sigma Phi has rolled up 151 points in its three games against their opponents.

Hank Lohr, star all-around athlete for the Alpha Sigma Phi, scored five points in five games to capture league scoring honors. Lohr was also a valuable player on defense, playing both offense and defense.

In the front line, a fast, hard charging line consisting of Hank and Joe Lohr and Don McFarland, the boys have run the ball from their line. Their offensive line consists of forwards, John Stall, Bob Dunn, and Dick Turley, backed by the defensive line, Scalamera, and Joe Zelko, carried the Alpha Sigs in their successful year.

There are two teams, the Alpha Sigs and their opponents, the Delta Tau Deltas. Either team will provide still opposition for the Grinnellites because of their three consecutive victories.
Cagers drop opener; eye U of C tonight

By Ron处罚e Sayer

Tonight Illinois Tech will try to break into the win column against the University of Chicago in the 1950 Homecoming game. Coach Ed Chancy is hoping that the squad will lose its scoring victory.

Bowl rule change to be discussed

Prep Basketball Tournament scheduled for December 22-30

By Len Kohan

Bernard "Sunny" Wiceman, Illinois Tech athletic director, has announced that the fourth annual Illinois Tech Prep Basketball Tournament will be held December 22-30 at the International Amphitheatre. Thirty-seven teams have entered this year's tournament, the largest held in the history of the event.

Originally started by Aman Schoenstatt at the University of Chicago in 1912, the "Schoenstatt" has progressed to be one of the largest tournaments in the country. In its original inception it was designed as a contest in which the top high school basketball teams in the country would compete for a national prep basketball championship. This continued until 1929, when it was discontinued.

In 1952, the tournament was revived as the Chicago Prep Basketball Tournament, and in 1957 the University of Chicago Prep Basketball Tournament, which has grown in popularity over the years, has become the largest high school basketball tournament in the country.

The tournament is held in the spring, and the year's action is divided into four rounds, each consisting of eight teams. The winners of each round advance to the next, with the final four teams meeting in the championship game.

The tournament is open to high school boys teams, and the teams are divided into four brackets, with each bracket containing eight teams. The teams are seeded based on their past performance and are matched against each other in a bracket format.

The tournament begins on December 22, with the first round of games, and concludes with the final four games on December 30. The championships will be held at the International Amphitheatre in Chicago.

The Illinois Tech Prep Basketball Tournament is a great way to see some of the top high school basketball teams in the country compete in a high-level tournament. It is a great opportunity to support local high school basketball programs and to see some of the future stars of the sport.

Prep basketball teams are scheduled to compete in the tournament. These awards are given to the top four teams in the tournament.

Techhawks grapple in Invitational

The Illinois Tech wrestling team will travel to Navy Pier tomorrow to participate in the Chicago Invitational wrestling tournament. This is the team's first non-conference meet of the season.

Most of the college and junior colleges in the Chicago area will be represented at the match. Illinois Tech, Wright, La Grange, Navy Pier, and the University of Chicago are some of the teams which will participate.

The tournament begins at 6:00 p.m., and will be held at the Navy Pier arena. There is an admission charge for three matches. Final and consolation matches will be held on Thursday at 7:30 p.m.

Last Friday the squad met Navy Pier for their first pretournament meet and were defeated 21-18. Although the first meet was held the Pier in a score of 18-15, Al Wiggs of the second team won the only match being the end of the meet.

Of the first string, Al Schulte was the only man able to bleach his opponent's five points. Other Techawks who scored were Bill Stahl, Dean Levy, and Steve Hinkleman.
