Select 25 officers at coming election

by Bill Robinson

Next Wednesday and Thursday the Lobby outside the SD Auditorium will be the scene of the campus' first FTA elections. All full-time students (carrying 10 hours or more) are eligible to vote.

The voting will be as follows: First semester students will vote for their freshman class officers who will represent them next semester. Second term students will elect sophomore officers to represent them for the next two semesters, during their sophomore year. Fourth and sixth semesters will vote for junior and senior class officers respectively, both of which will serve for the next year. Third, fifth, seventh, and eighth term students will elect no class officers.

Tech student strong armed at 'L' station

At 2:35 p.m. on April 30 Richard Ryan, 19, was accosted by a kid who was wielding a box containing one dollar and his identification. When theendant attempted to grab Ryan the kid hit him, clubbing him with a heavy stick. The police were called and immediately a search was made but the kid could not be found.

Ryan is the third student to be held up on campus since January 1, 1956. In Ryan's case very little money was lost to the holdup, but other valuable property was taken.

Following the events last fall, a committee of students was formed to determine whether or not Friday night should be done to alleviate the situation. The solution that the committee proposed was submitted to the administration.

An attempt was made to get a special appropriation from the institution to carry out the suggested improvements. But, as yet, no appropriation has been forthcoming.
Letters to the Editor

Coalition parties make good political sense

To the Editor:

In your last regular issue of Technology News you reviewed the election situation at Tech and pointed out that students had no confidence doing the voting were not deciding who people actually represented, or if others were doing (or had already done) the decisions.

I would like to point out that what you said regarding the facts may be quite true, but the implications you make have little basis in fact. Certainly there is discussion among possible candidates as to who is going to run for which office and who isn't. The same thing occurs in our national elections if you recall; they call it a national convention. At that time all the delegates are interested in, in a particular platform, or holding a particular point of view get together and decide which one of the several capable men available in the group will have the best chance of winning and then in a position to support the ideas of the entire group.

There is no reason in the world (school spirit, or any other) for the students' support of a candidate to be any different than that of the citizens of a nation. The fact is that what you have suggested is the lack of political sense, which is reality in good people being able to make better decisions than those of the candidates.

For one hope that the students go on approaching their problems in such an intelligent manner as this. If you do, student government here at Tech will continue to develop and the other hopefuls for the position can be elected from a knowledgeable to a real school, will eventually and lastly come.

Joe Rodgers

Thank you to the Editor

I would like to explain the schedule for JW-Oh because of the question raised by you. I think it necessary that the students have one day to set up their events, and they try to keep up with the past, the exhibits were not entirely ready for the exhibit and many of the students were overtaken to get the classrooms ready for Monday sessions. Because of the decreased Junior Work programs, the committee felt that the exhibits should be held on Tuesday night rather than omitting them. From now on, we will try to keep the choice of a wise one.

Joe Rodgers

No Zest

To the Editor:

I was quite disappointed when I read the April 26 edition of Technology News that ITSAA had decided to omit the PZ for this year. I can hardly blame them.

As editor of the magazine for a period of over two years, I realize the difficulty the editor has in the most important phase of putting the book to press. That is not a contribution.

It is remarkable that after the copies came out this semester because the last school, there were an uncounted number of students who came to me and said, “I should have put it in some of my stuff.” Well, it was too late then. And I guess it’s too late now.

There were a lot of people who did what was expected of them.

Joe Rodgers

Marathon short-circuited; Middies scuttle soapbox

by Frank Sherky

Tech students made a Romanes holiday out of their annual Jamboree Week. From the number of hooligan and the spectacle of the two day-and-half day festival of the campus spring festival left little for anything else except continuous fun making.

The festivities started Tuesday night when capacity crowd saw the opening of the Rough Carriers revue "All Over the Street," in the program's Kalaas and Jamboree with the exception of some of the Corsets and of course the Grand Slammers with the exception of some of the Corsets and of course the Grand Slammers, whooping and hollering their way into the night.

Friday morning saw Alpha, Sigma Phi and Sigma Maup runs off with the top honors in the Inter-Fraternity and Inter-Sorority fraternities.

Future Technocks were on display on Friday afternoons in the main campus. The offering of Detroit Shippers, Student Siberos and Kenneth Lawerence were awarded prizes in their respective divisions. Male culinary skills was displayed when Kurt Bebele and Theoren12 Kevins won the baking awards.

5.5. VOLENDAM TO EUROPE

Thrifty Co-ed Student railing

The students group this semester on the special arrangement of the Holland-America Line, which runs over 2000 students on the special sailings for the Helen Hunt of Netherlands Navigation Company.

Voting on the deal is expected to start September 5 from Rotterdam to New York. The contract, if booked, will mean for the Netherlands Office of Student Relations a 15% discount on all outward sailings.

Bath shirt sales are expected to rise greatly on the Holland-America Line, and the contract, if booked, will mean for the Netherlands Office of Student Relations a 15% discount on all outward sailings.

Juniors revel in night club atmosphere

Tonight, May 11, the students will gather at the S.U. Lounge to start the night's revelry. George Chisholm and his friends will be there for the event, which is sponsored by the Junior class. The dance will feature a special guest, Lila B. Davis, who will entertain the crowd.

The Junior class executive is expected to announce the details of the dance shortly. The Junior class is looking forward to a great night of fun and dancing.

For a Season in the Sun

ARROW BASQUE SHIRTS

All-Around Sports Favorites! Comfortable, Colorful

Campus Interviews on Cigarette Tests

Number 20... THE BALTIMORE ORIOLE

"I don't go for a wild pitch!"

A clean-up man on the baseball nine, this slugger doesn’t like to reach for “em... wants it right over the plate. And that’s the way he like his proof of cigarette mildness! No dazzle—dazzle “quick-pull” tests for him. No one-chill, one-pull experiments.

There’s one test, he discovered, that’s right down the alley! It’s the test that proves what cigarette mildness really means.

THE SENSIBLE TEST...the 30-Day Camel Mildness Test, which simply asks you to try Camel as a steady smoke—on a pack-after-pack, day-after-day basis.

After you’ve enjoyed Camels—and only Camels—for 30 days in your “T-Zone” (T for Throat, T for Taste), we believe you’ll know why...

More People Smoke Camels than any other cigarette!

Ten years growth consolidates Tech
by Bob Brownson

What was Illinois Tech like ten years ago? If any of you have ever wondered about it, here’s the answer.

Tech was divided into three separate campuses ten years ago. There was the Liberal Arts college, Lewis Institute at Madison and Danvers; the Architecture Department downtown; and the Armour Engineering College at 13th and Federal. The Armour College of 1941 had none of the modern buildings like the Chemistry building and Alumni hall; the Institute of Gas Technology was only a dream in the administration’s eyes.

The 1941 version of Junior Week-Oo-Hoo-Hoo was practically the same as it is today. There was no TV paging, pre-reading content, rowdies growing common, fashion shows and departmental exhibits. There was one big difference though: there was a greater rivalry between the classes. This rivalry was expressed in a battle royale with both the freshmen and sophomore classes using every available weapon, from pullovers to high-pressure water hoses. After the four-week battle ended, the two classes consolidated and startedSite deeds against the upper-classmen.

The leaders of juniors and seniors decorated all the local bars, box parties and bars. When the smoke of battle cleared, a post-battle ceremony was effected, and both upper and lower classes went buildin’ around the campus in their shirts.

The incompetent service canteen was giving the building young engineer a hard time then as it is doing now. The mention of the words "Uncle Sam Wants YOU," caused our Armour students to quiver with mortal fear.

The "allied" column appears in Technocracy News as well as two goody columns.

Metallurgical engineering award given

The first International Nickel Society graduate fellowship in metallurgical engineering at Illinois Tech was presented to Charles E. Peverle, announced W. A. Lewis, dean of the graduate school.

The scholarship, one of two established by INCO in March, provides for two years’ study leading to a doctor’s degree and carries an annual stipend of $1,000 and tuition.

Peverle received his bachelor’s degree in metallurgical engineering from Rensselaer Polytechnic Institute, and his master’s in science degree from Illinois Tech. He has been an instructor in metallurgy at Illinois Tech for the past year. He will begin work in September. A specialized research project on a study of the effect of nickel on the activity of carbon in steel has been tentatively selected.

THE DU PONT
DIGEST

Research Takes the Long View

Fundamental studies are one of the most important phases of Du Pont research

Fundamental research is designed to discover new scientific facts without regard to specific commercial uses. It stems from its own scientific significance.

At Du Pont, for instance, fundamental research has pointed the way to products like nylon, the first wholly synthetic organic textile fiber, and neoprene chemical rubber, to name only two.

Expanding for Tomorrow

With the expectation that still more needs are one of the largest and best-equipped research laboratories in the world. It is a home to the most capable, enterprising, and provocative men.

Du Pont's research laboratories are more than 25 other locations scattered throughout the company's operations. The research effort can be divided into two main areas: fundamental and applied research.

There are now about 800 technical people engaged exclusively in research at the Du Pont Experimental Station. The laboratories are equipped with modern equipment and technical resources.

The research people represent a wide range of training. They include chemists, physicists, biologists, engineers, and mathematicians, among others.

The Du Pont Experimental Station is one of the largest and best-equipped research laboratories in the world. It is a home to the most capable, enterprising, and provocative men.

The following quotes are in effect:

"Du Pont is an individual's maximally valuable venture..." - J. H. Quiney, Ph.D., Chemistry, Ohio State University

"The department will be headquartered in New Jersey, in the School of Science, but will be under the control of the faculty of the School of Science..." - E. W. Watts, Ph.D., Chemistry, University of California

DU PONT

FREE FOR RESEARCH

At the Du Pont Experimental Station every effort is made to permit the research men to concentrate on research. He is provided with the most modern laboratory tools and facilities and with the best possible equipment that can be found, open to him. The research work is done in the most modern laboratories and with the best equipment possible.

This is the case with the Du Pont laboratories. They are equipped with modern equipment and with the best possible facilities that can be found. The research work is done in the most modern laboratories and with the best equipment possible.

In 1953, Du Pont established a new Laboratory of New Materials at Wilmington, Delaware, which was dedicated as a "Laboratory of New Materials." This laboratory is devoted to the development of new materials, especially those that are not yet commercially available.

DID YOU KNOW THAT...

Nylon, one of the most popular products, was discovered by Du Pont in 1938. It is a trademark for a synthetic fiber that is used in clothing, upholstery, and a variety of other products.

BEETLE THINGS FOR BETTER LIVING...through Chemistry...
Candidates seek ITSA presidency

Gus Wingate:
The big job of ITSA is to maintain the established policies and provide student activity on campus and to adapt them to changing needs. As we all know from our own experience in student association, this is a considerable responsibility.

It demands of its members a knowledge of the various responsibilities and problems as well as the coordination of the leadership necessary to analyze, evaluate, and establish policies for student associations.

It follows, what the English professors call "positive reasoning," that the chairman of such an organization must have an excellent and considerable experience in various phases of the student activity picture, including proven leadership. But above all the position requires a person who can coordinate the constructive work of others and obtain significant results.

The following activity experiences I feel, outline my qualifications. 1951 Junior Week chairman, class officer, two years; chairman, Student Admissions Advisory board; one and one-half years. Technology News staff, positions in other organizations.

Murray Lagriffis:
You, as college students, realize that any claims I might make, any platform I might propose, could turn out to be just as many words. However, I can point back to my record as Senior member-at-large of ITSA, and show by my actions, in cooperation with the rest of the ITSA board, that I will fight for student rights, and to further student interests by such projects as the student union, machine shops, and the like. However, I am still going on, the battle for adequate police protection, the school parking, with "Liquid refreshments," and a dormitory system being brought up at present in student dormitories.

I would like to continue the work already begun, and to carry out any other work that you deem necessary.

I decided to run with Dean Joseph N. Jett because he is knowledgeable of the affairs of the student union. I feel that I have a title to the future, and I would like to continue the work already begun, and to carry out any other work that you deem necessary.

In regard to finances, I feel that the solution lies in the formation of the board of trustees for an increase in the student activity fee. Under any circumstances, I will insist that any profits of ITSA funds be given smaller organizations.

In regard to the inclusion of continuity, I submit that my experience this last year as secretary to the ITSA board of control puts me in a position to contribute greatly.

When I was last elected, I was by a poll of the entire student body and I believe that I am the one who best represents the students well past year and is elected to the position of ITSA Senior member-at-large. I shall endeavor to do so.

Joe Rodgers:

I am answering to the oft-asked question, "Why are you running for ITSA?" It is, my case, quite simple. I've considered the advantages and disadvantages of holding an office, and the advantages have outweighed the disadvantages.

During my last year at ITI, I believe I could have been as much as possible doing what I am doing now. I've had considerable experience with them, and I feel there are many things that could be done to make them better. Since this is my intention, the question remaining is whether to run or not. I will have a better chance of succeeding as a member of the ITSA board of control. It has been my experience that the board tends to listen to its members more readily than to non-members, despite their background, knowledge, or experience. This has been proven in the past, and I feel that the ITSA board of control is more to the interest of the student body.

I sincerely hope that the student body will agree with me and is doing so will elect me Senior member-at-large of ITSA.

SHEEBY

Sheehy and Soderquist state election views

Wes Soderquist:
I am a candidate for president of the Junior class on the "Junior Curran" ticket. My running mate is Jerry DeWitt, vice-president.

I have been asked to give a statement of policy to the Technology News. Words are not long and, yes, there is too much talk and not enough action in student government. The "Junior Curran" will remedy that. We have always tried to offer the best possible leadership to the students in the past and continue to do so.

Frank Sheehy:
Student representatives in school government are the pillars of the future of our world. It is the means of furthering campus activities and making up the students to elect the officers that are most qualified to represent them. That is why I am running for the office of president of the Junior class. I think it is an honor.

As president and my party of "Progressive" leaders are interested in all sides of school campus, and social activities. Our plan has always been to better these activities through enthusiasm and cooperation. It is the duty of a leader to be a leader and have unsung and unspoken help and understanding that is the key to success.

SHEEBY
Will attempt closer check on activities

Don Carlson: CICU, Student, Technette. There are different activities that had financial difficulties this year. For one month or another these groups lost money from your student activity fund. Regardless of the treasurer of ITSA (Illinois Tech Student Association) the financial committee must see that a system for a unitary and uniform check on all student organizations. In doing this, these rules may be expanded.

For many years there has been a constant evolution of funds and accounts in the treasurer's office. Whether this was due to poor handling by this office or due to misunderstanding of the system involved in the student funds is another problem of the treasurer's job. Over $20,000.00 of your money is included in these accounts, and it should be accounted for at all times.

There are the two main issues which, with your vote, I will attempt to resolve if elected treasurer of ITSA.

veeps, secretaries present platforms

Dear Johnson:

I am running for vice-president at ITSA. I have red eyes, but I know better. I am running for vice-president of ITSA. I am a student. I am to ITSA. I am a student. I am running for vice-president of ITSA. My running mate is Murray Luehring. He is looking over my shoulder. He is drunk. I am running for president of ITSA. I am 20 years old. I am of draft age. Please join the Army. I am running for treasurer of ITSA. For breakfast I had two slices of bread and a cup of coffee. I am running, I win by a nose. My nose is running too.

To look at the curious ride, though, I hope you will carefully consider me as a candidate before casting your vote. Murray and I find that we are qualified to suc-ceed and carry out any task put before us. I may have written this article in a light vein (you're probably tired of reading the other type article by now), but when the chips are down, we can and will do everything required, in the right way.

Dick Wardell:

In order that present student activities at Illinois Tech may be enhanced and future plans made, it is essential that a well organized governing body exist. Because the governing body, namely the ITSA board, is so much of importance, it is a requisite that individuals with experience and ambition fill all the positions.

I have become a candidate for vice-president of ITSA because I feel I have gained a wealth of experience through my participation in numerous activities. During my three years at ITSA I have participated in activities has become an essential part of my education. It has taught me to consider me as a candidate before casting your vote. Murray and I find that we are qualified to succeed and carry out any task put before us. I may have written this article in a light vein (you're probably tired of reading the other type article by now), but when the chips are down, we can and will do everything required, in the right way.

Dick Wardell: In order that present student activities at Illinois Tech may be enhanced and future plans made, it is essential that a well organized governing body exist. Because the governing body, namely the ITSA board, is so much of importance, it is a requisite that individuals with experience and ambition fill all the positions.

I have become a candidate for vice-president of ITSA because I feel I have gained a wealth of experience through my participation in numerous activities. During my three years at ITSA I have participated in activities has become an essential part of my education. It has taught me to develop inherent leadership qualities to the point where stability and confidence and ambition have become a definite part of my undertakings.

My interest in ITSA has led me to gain a knowledge of the system by attending all ITSA meetings, including the bi-weekly meetings of the Election Committee.

Since I have worked with the ITSA board on several occasions, I have acquired the knowledge necessary to successfully aid the present president in the work of the election committee.

I am a believer in the motto that “experience is the best teacher.” A man with experience is bound to fulfill the job of vice-president of ITSA with greater efficiency and complete thoroughness.

Len Kahn:

Are you tired of hearing gory stories about taking notes of your ITSA meetings? Do you want the important business of ITSA under- mined by the presence of a crook who distracts the members of the board from their official business by his illegal actions? If so, then Len Kahn and I guarantee that the election duties of ITSA secretary will be undertaken in business like fashion and not for personal gain or distortion of honest public self calls.

Though not having the shapely legs and figure of a real (natural)istic, I am just as qualified as any other member of the fairer sex in that my little pluckies are skilled at punching typewriter keys. I have a lovely handwriting, and my notes are clear and to the point. I elected, I listened to each of your questions and took them down on paper and I am sure your questions will be answered.

So don’t forget to get out there on Wednesday and Thursday and vote for your pride and joy of secretary of the Illinois Tech Student Association. You can vote for me as your little card ID will tell you.

Alice Orphanos:

It is basic and necessary that a well organized governing body exist in order that continuing improvements be made upon present student activities at Illinois Tech and that good plans be made for the future. This body, being of great importance, requires a person who is familiar and have experience in student activities.

Since 1960, I have been taking a philosophy that participation in a student organization is an essential part of my educa-tion. I feel that membership in ITSA will give me an opportunity in much ability and show me in useful participation. I have been taking a philosophy that participation in a student organization is an essential part of my education. I feel that membership in ITSA will give me an opportunity to show my ability and ability and show me in useful participation. I have been taking a philosophy that participation in a student organization is an essential part of my education. I feel that membership in ITSA will give me an opportunity to show my ability.

SAMPLE ITSA BALLOT

Voting instructions:

1. Place the number “1” opposite the candidate of your first preference.
2. Place the number “2” opposite your second choice, the number “3” for your third choice, etc.
3. All ballots MUST be marked in this way.
4. Do NOT mark your ballots thusly:

<table>
<thead>
<tr>
<th>PRESIDENT</th>
<th>SECRETARY</th>
<th>VICE PRESIDENT</th>
<th>SENIOR</th>
<th>TREASURER</th>
</tr>
</thead>
<tbody>
<tr>

News in Brief

The Fire Protection Engineering Society is having a summer meeting at 7 p.m. in the student union lounge. The speaker will be L. C. Thomson, president of the Great Lakes agency, who will speak on the operations of an insurance agency.

A birthday celebration in honor of the third anniversary of the club will be presented by the club members on Monday at 3 p.m. at the UU lounge. A gift, a guest speaker, and an exhibition of slides will be presented by the club for interested students, faculty members and WAC's.

The first annual senior E.E. smoker will be held Friday at 8 p.m. in the Crip lounge in honor of the class of 1954. The smoke will be sponsored by the senior E.E. and the Society for the Advancement of the Management, and is open to all E.E. and management students of all semesters. Cost will be about one dollar per person.

On Saturday, May 19, the Hotchkiss trout will be held at 8 p.m. in the Crip lounge in honor of the class of 1954. The smoke will be sponsored by the senior E.E. and the Society for the Advancement of the Management, and is open to all E.E. and management students of all semesters. Cost will be about one dollar per person.

Exhibit features "additive pattern"

The exhibit features "additive pattern". The exhibit is sponsored by the American Institute of Electrical Engineers.

Mechanicals hold convocation on campus

More than two hundred students representing more than 40 colleges were present on campus for the ASEE conference on May 19. The purpose of the conference was to present projects of engineers and representatives of the various schools in competition for five man prizes. First place went to Gordon Kitching of Northwestern University for his paper "Production of Unshaped Energy". Second place went to Robert Johnson of the University of Detroit with his paper "Dynamic Descriptions of the Automobile". Third place went to William Pearson of Michigan College of Mining and Technology with his paper "Dynamic Descriptions of the Automobile". Fourth place went to George Turl of the University of Wisconsin with his paper "Dynamic Descriptions of the Automobile". Fifth place went to John Smith of the University of Illinois with his paper "Dynamic Descriptions of the Automobile".

LUGLIST OF THE WEEK

If everyone didn't do it, there wouldn't be any fun.

Uglylist: Declare War on Uglylist in your own class or fraternity. They shouldn't be able to do it. They can't be trusted.

Total credit for the contest ends today. This money will be used to fund a scholarship.

Scholarship Application

The last day to apply for scholarship was May 17. The application form must be in the office of the dean of students by the deadline.

Campus Life

The INST, the press and the local newspapers are available at the Union Newsstand. They are available in the morning and evening.

If you have any questions, please call the office of the dean of students at 111-2222.

And Remember to Vote in the Student Senate Election!
MARATHONLESS RACE

A new and different Junior Week activity was initiated this year in the form of a bicycle marathon around Ogden Field. The sponsor of this race was Delta Tau Delta fraternity, whose members officiated.

The marathon was scheduled to run for 31 hours, but due to the threatened withdrawal of four out of five of the leading houses, the event was ended after 24 hours. The marathon was an activity which added much to Junior Week spirit.

BALLOT
Furious hitting wins... face North Central today

Enormous hitting was the story of the game as the Illinois Tech baseball team has added three victories to their previous one, one of which came over combative 3-2, 6-5, 9-5, 12-4, 15-6, and 18-7, all on Tech's side. The game was played in the first part of the second game on a field that was owned by Illinois Tech. The first game was even more exciting as the two teams scored a combined 20 runs in the first three innings. The score was 10-10 at that point. The second game was played in the second part of the second game on a field that was owned by Illinois Tech. The score was 20-20 at that point.

The Tech baseball team is currently ranked 15th in the nation. The team has won all three games played so far this season. The team has a record of 15-3. The next game is on Friday, April 15th, against the University of Illinois at Chicago. The game will be played at 4:00 PM at the Illinois Tech baseball field.

Softball continues on three diamonds

The Illinois Tech softball team is currently ranked 12th in the nation. The team has won all three games played so far this season. The team has a record of 15-3. The next game is on Friday, April 15th, against the University of Illinois at Chicago. The game will be played at 4:00 PM at the Illinois Tech softball field.

Faculty beats seniors in Junior Week

After a hard fought game, the faculty emerged victorious as they triumphed over the seniors by a score of 15-3. The game was held on the Tech campus. The faculty team consisted of Coaches Bob Allen, Mark Leeper, and Steve Leeper. The seniors team consisted of Bob Allen, Mark Leeper, and Steve Leeper. The game was held on the Tech campus.

Golden Gate Bridge

The Golden Gate Bridge is a suspension bridge that spans the Golden Gate strait, the channel between San Francisco Bay and the Pacific Ocean. The bridge is one of the most famous and most photographed landmarks in the United States. It was completed in 1937 and has become an iconic symbol of San Francisco, California.

Golfers meet three schools this weekend

The Illinois Tech golf team will meet three schools this weekend. The team will travel to the Silver Lake Golf Club for the first round of the tournament. The second and third rounds will be held at the same course. The team will travel to the Silver Lake Golf Club for the first round of the tournament. The second and third rounds will be held at the same course.
Cindermen lose to Valpo; meet Concordia tomorrow

The cinder squad is looking for their best start this year after their initial loss to North Central. The Techawks ran up an 82-69 score over Elmhurst.

Against Elmhurst the story was all Tech as they built nine first place and scored three, leading those up with many more points. In the Valpo meet, however, the Biscuits and Grey were visitors in only two events and lost the spark they showed in Elmhurst.

Highlights of the two meets came in the 12th yard dash when ITT swept all three places and in the 200 yard dash. At Elmhurst Dean Lea led Gray Gris and Steve Grubow in the 200 while Grubow scored first against Valpo followed by Morley Simms and Lea last.

The upset gave Tech a large part of the points in these two events as did the distance runs. Jacobs, Lewis, andurry scored 20 points in both events, while "Fly" and Hal Dooley garnered first and second in all the one and two mile places for 220 and 326 points.

These two events give ITT nearly half of their two meet total of 318.

Valpo's superb strength in the field was the most impressive event for Tech. Tech had 32 points to Valpo's 36 for the track events but was outscored 39 to 61 in the field events. A sparkling 47" steeplechase by Joe Grouper in the high jump and a 14" 1/2 javelin toss into the wind by Both Grubow in this event are an indication of how strong this team was.

These meets on the field was the Roosevelt Storm Wakers who dominated the track for 18 points by winning the discus, throwing for second in the discus, and catching second in the broad jump, and then another point in the javelin.

Leaving it all at tomorrow's meet with Concordia in hopes of evening up their records, Techhawks will meet Concordia tomorrow. The meet will start at 1:00, and Techhawks will be looking for a win to bring home the trophy in their favor.

Baseball

Carl Kienzle, on page 106, Jerry Mrsman and Losky, who lead the way.

Norm Brahse walked, pinch hitter Fred Kantor scored the first run. Soviet and Whitfield scored again, and by this time four runs were counted. The count was six in another run with a single and was not trying to steal. Later doubled, driving in Whitfield, and Chicago scored the inning he had started. The totals for the inning were six runs and seven hits. The Teichvaks added three in the fourth and sixth innings and four in the fifth and sixth.

Kantor, who had visited the school of baseball games being held trouble in but one inning, allowing three runs in the sixth and fourth. He gave up one more hit, a single in the seventh, and struck out seven.

A trip to Naperville to meet North Central in a game for the title, Monday and Tuesday they are back to the NIU and Illinois Normal, re-

Netmen host N. C.; lose two to Valparaiso

North Central college will send its tennis squad to Armour square Tuesday afternoon in an attempt to trim ITT for the second time. Thursday will see the Techhawks play host to Navy Pier.

Valparaiso University was the last to meet the boys from Tech. Two trips to Valparaiso, the first last Saturday and the second on Wednesday proved fruitless. The scores for both meets were 6-3 in their favor.

Saturday's meet saw Bill Raczka become the only winner of a single match. His best result was a double over Nell Helt and Paul Reiter to take one of the doubles matches 6-5, 6-4, 6-3.

Tech's only win of the season came when Navy Pier dropped their first attempt 6-3. Don Teckwaw and Mortman were the only heroes of the day.

BE EWE IN YOURSELF!

Don't test one brand alone ...compare them all!

Unlike we never ask we to test our brand alone. We say... compare PHILIP MORRIS...match PHILIP MORRIS...judge PHILIP MORRIS against any other cigarette! Then make your own choice!

TRY THIS TEST!

Taste a few minus...and any other cigarette. Then, here's all your day:

1. Get up other cigarette. Take a puff...don't inhale...and p-o-w-e-r
let the smoke come through your nose.

2. How do exactly the same thing

NOTICE THAT PHILIP MORRIS IS DEFINITELY LESS IRRITATING, DEFINITELY HIGHER!
