Faculty and students to mix without malice

The Illinois Tech Women’s Association will inaugurate a new type of dance at 9 p.m. tonight in the new student union. The “Student-Stuff” is designed to promote a closer relationship between the students and the faculty and the administration in the classroom.

The faculty will be the organizing force of the event, while the students will provide the entertainment. Scheduled are vocal selections, interviews, and a speech by various members of the faculty.

The event will be open to all students and will be held in the Student Union. The Student-Stuff is sponsored by the Illinois Tech Women’s Association and the Office of the Dean of Women.

Campus jobs still available if your schedule permits

Are you looking for a job on campus? At present, approximately 250 students are employed in various capacities. However, there are still a few openings, especially in the office of the Dean of Women.

The requirements for these positions are few. In order to work twelve hours a week, you must be a full-time student with at least two years of college credit. You must be able to work at least 20 hours a week.

Applications may be obtained from the Office of the Dean of Women. Interviews will be held on campus.

Dynamax structures, energetic geometry, jet autos discussed in Fuller’s speech

The function of the designer is to bring the old and new life together, stated Buckminster Fuller, speaking at the first annual abstract art and film seminar, which was held Oct. 5. A. M. at the Institute of Design. In conversation with the meeting, an exhibitor by former teachers and students in abstract art, was shown from new building developments to package design. More specifically, the inclusion of abstract art in the curriculum is a method of self-expression.

Most highly honored for developing what is called the Dynamicast principle of energetic geometry, Fuller said that it is all based on his principles of energetic geometry. The first Dyna-}

Chancellor question arises at Tech Center

With the recent top level shakeup of the administration the question has come up concerning a new type of organization. This question regards the possibility of including the ITT in the reorganization. President of ITT is also involved in AFR, IG, ID, IPS, and fourteen outside businesses. However the advantages of interests are not to be abandoned and is an area of chaos. The organization of our interests in ITT are left to other hands. At present this phase of Tech activity is delegated to the various deans and one of the three administrative assistant the chancellor. Does the school need one to fill this post?

If we look into the set up of other colleges and universities we find a very small minority of institutions in which both a president and chancellor hold active positions. At the University of Chicago, the office of president was vacated this spring with the departure of Robert Hutchins. The office is still vacant and there is a possibility of it not being recouped. Chancellor Kumpus holds the top position in administration. We are looking at the departments with responsibilities as our president.

To kiss or not to kiss?

It's hardly a question

Four Techawks recently made a trip to Chicago to look around the University of Chicago. They had the opportunity of viewing a collection of their four quotes was a girl having a conversation with a boy before the kiss.

The answers to this vexing problem were gathered up by the editor of the Tribune, Gale Hayeck, Dick Solomon, Jim Ryan, and Dan Nalls who ventured their opinions on the bene- fit of kissing.

The view represented a good section of American opinion. The conclusion of the Tal- lers that the first kiss should should be a kissing."

Gale Hayeck made a clarification of his position. "I say that the first kiss should be a kissing," he stated, "It seems that when I was a kid I was more into kissing than kissing.

Unfortunately, the attitude of most Techawks is, "Off with the gloves, let's make love." The making of love, however, consists of grabbing the woman, kissing her, and then proceeding from there. It is a sad situation when sexual intercourse should be mixed with a scientific approach to things, should have a bare face such as "kissing for love.

We hope that you who read this will realize the errors of your ways and remedy those errors. The dis-advantages that kissing might bring will compensate for the extra work extra imposed in scientific seduction.

Letters to the editor

Students desire ball games, other events broadcast

To the Editor:

Why hasn’t the Student Union com- mittee arranged for the World Series and other important events to be broadcast over the public address system in the Student Union?

Many students have no access to a radio during school hours and so miss such important broadcasts as presidential messages, election speeches, the World Series, big football games and similar events.

Although our complaint is not under the jurisdiction of Technology News, we are well aware of the power of the press, and we hope that publication of our grievances will result in some action by the Student Union committee.

Frank Sheehy and Jim Spangler

Poor taste...

To the Editor:

Stlipsticks in the September 28 issue of the Technology News shows very poor taste.

Weekly award for best letter

In line with its policy of preserving the best-letter-to-the-editor every issue.

All persons, whether students, faculty, staff, or employees of the Institute, are eligible for the award.

Rules are as follows:

1. Letters must be 250 words or less.

2. Letters must be signed, although the name will be withheld on request.

3. Comments pertain to the current issue only.

4. Letters should be based on the Technology News as a whole, as well as a general idea of the campus.

Deadline for any issue’s award will be 2 weeks after the Tuesday preceding the date of issue. Letters should be deposited at the Technology News mail box in the Student Union or in the office, 401 T.

STUDENT OPINION

Techmen opine on Heald's departure

by Gale Heyer

There has been much talk and speculation since President Heald accepted the position to become Chancellor of Illinois University. Now that things have blown down a bit, it might be nice to know what the students themselves think of the situation.

"A few Techmajors were interviewed the other day and asked the question, "What do you think about Dr. Heald's leaving and how do you think it will affect Illinois Tech?"

Here are their answers:

Sara Miller, BSBE: "No, I don't think he will hurt the school. The only way it might hurt Tech is that the students won't appreciate his leaving. I also think we need someone better than our next president.

Wayne Hamilton, EE: "I really didn't think about it too much. I don't think it will be good for the school. I am one of the opinion that President Heald is doing the best of any other President in Illinois Tech up to where it is among the other colleges and universities.

An unidentified IE: "President Heald has a very good liberal attitude towards students. I don't think there will be much change if his successor is also liberal. I would be glad to get an outside man for our next president.

Everal Heron, Engineers: "President Heald has a definite personal interest in Illinois Tech. He is not merely putting in his time. I think he has kept the place going.

Jas. Fehlman, NE: "I think it will basically affect the election between our school, industry, and city government. Illinois Tech has a lot to offer when Mr. Heald leaves his seat in the Southside Planning Board. It will also probably cause a decrease in the numbers of industrial contributions to industry.

"I think the other men on the administration has the reputation President Heald has. The relationship between faculty and students will be about the same, but I do not think that any of the effects will be realized by the time in 1967.

Lee Schaller, PPE: "Twenty-four years now is a long time enough I think he deserves a break."}

Sharon Segal, Arch 3: "Personally I think the school will miss him very much. Holden Lakey, the head of ARB will probably be the successor, but if he is, the school will probably see more ARBs. Within the school itself, I think Dean Johnson is the best man for the job, but it would be far better if we got an outside man.

Bad Schott, Phys 3: "I think he is a very great man to have Mr. Heald leaving. He has devoted much time and energy and deserves to be appreciated. I really don't think that his leaving will affect the language program of Illinois Tech because a technical institution can't be held from achieving a high position among universities by such a tragedy."}

Lee Rainisaki, Phys 5: "He will never see his old friend again."

Advice to all Freshmen: stay home tonight--it's safer

By Leslie Smith

Be a lesson to all! There isn't even safety in numbers and Glenn Brown has the scars to prove it. Brown and two comrades-in-arms, Mac Corless and Bad Schott ran into a slight difference of opinion with a gang of the neighborhood residents.

The trio was making its way to a local pub to pay a visit to Bruce, the proprietor of the "House of Angels." The night was in the vicinity of fifth and Cottage Grove was suddenly filled with storage objects—beer bottles—empty cases.

Corless and Schott opened the street scene with an unoffending roar for the 196 yard dash. Brown held the line with bravado and the runners lost all faith of "Don't run, men; we can take care of any six of them."

The excitement of this statement soon became evident. The impetus grew and a club on the back of the head gave Brown the needed start to catch up to his buddies.

One hour and six stitches later, matter of busier, Brown had this advice to offer: "All inexperienced freshmen should be made to work out for 10 weeks. They should also be taught that Ohio State is the better part of wisdom!"

Very easy slow by adding colored glasses to it. Make the dressing of mayonnaise blended with a little olive dressing, marinated, marinated, incubated mustard, and one pint of gin.
Platoon Leaders program offered

Recruiting has begun on campus to enlist students in two programs, Platoon Leaders class for Officers Candidate School, and a reserve officer commissions program for civilians.

Requests for further information should be addressed to Capt. Charles M. Mead, Jr., Director of Military Personnel Procurement, Headquarters First Amphibious Force, Allied Air Force bases, New York.

For those who have qualified, the Platoon Leaders class is a training program for future officers in the Marine Corps. The training includes four years of college and approximately six months of military training.

Requirements for the Platoon Leaders program include good academic standing, physical fitness, and a commitment to serve as an officer in the Marine Corps.

Tech offers course for orphans

The Illinois Institute of Technology has offered a contract to train orphans, providing them with the skills necessary to become self-sufficient. The course includes education, vocational training, and support services.

The course will be given in six sections, each of which will last approximately six months. Each section will enroll 30 students.

The course will be taught by experienced, certified instructors, and will include practical training in various fields.

Campus Interviews on Cigarette Tests

No. 24
THE CLAM

"I should have kept my big mouth shut!"

Clark named new trustee here at Tech

Vic Clark, president of the Chicago area, was elected last night to the board of trustees of the Illinois Institute of Technology.

Clark's appointment is in charge of the teaching program. Further information about the program may be had by contacting him.

Out of Rival, N. J., he arrived on the campus all bug-eyed and his big mouth hanging open. He was immediately sucked into "a smoke cloud" and found himself making all the quick-trick cigarette tests.

But his native instinct told him that such an important item as cigarette maintenance couldn't be tossed aside lightly. Millions of smokers everywhere have discovered, too, that there is but one true test of mildness.

It's the sensible test...the Day Camel Mildness Test, which simply asks you to try Camel as your steady smoke...the pack-off-pack basis. No snap judgments! Once you've tried Camel's for 30 days in your "T-Zone" (T for Thrust, T for Taste), you'll see why...

After all the Mildness Tests—

Camel leads all other brands by billions

Air force seeks grads for design and development

A university degree and professional experience in the basic sciences (physiology, mathematics, biochemistry or engineering) is required for application to the Air Force. Many will enable men in civil life to apply for an officer's commission in the Air Force, according to an announcement from the First Air Force, Medical Air Force base, New York.

The "design and development engineers," as they will be designated, must have qualifying experience in one or more of the following areas: psychology, pediatrics, engineering, medicine, or related fields. A bachelor's degree is required for this position.

Requests for further information should be addressed to Capt. Charles M. Mead, Jr., Director of Military Personnel Procurement, Headquarters First Amphibious Force, Allied Air Force bases, New York.

He was made neat in the parlor and he said inside the light. "Either you or I, old fellow, will be turned down tonight."
Katz picked Yankees; also a gal named Lila

by Jim Seybold

Politics, sports, romantic scholarship, makes the campus roll. Norm Katz, this week's "Campus Wheel," qualifies in all of these. For three successive years of his class, Duluth student, Katz has been the only one to file a nominating petition for the office of student representative, and was elected to the position by the Student Senate and the College. He was also chosen by YSRA as an observer at the National Student Association's congress. His friends refer to him affectionately as "Prof." Those who have had the privilege of working closely with Katz have been impressed with his ability to see the humor in the most serious situations. Katz has been a perpetual source of good humor to all who know him, and he has put over several classics of humor. His efforts in his sophomore year to persuade the campus to stage a "Hearts of the World" dialogue, a gala all-school event, were quite successful. Katz is an active member of Sigma Alpha Chi, social fraternity, besides which he is a member of Phi Eta Sigma, the freshman honorary fraternity, and the American Society of Chemical Engineers, the professional society.

Fraternity pledging hits new high

Fraternity pledging hit an all-time high this semester with 177 men, mostly freshmen, being pledged by 12 fraternities. With a total of 655 pledges, this year's pledge rate is 31 percent. Although the fraternity system has expanded to a "panic" point in many colleges, our own fraternity system is still considered excellent, mainly because it is a small and close-knit group.

"Panicked" freshmen were looking in the Greeks with the idea of finding a safe haven for their money. Phi Kappa Psi led the fraternity with 21 pledges; Delta Tau Delta was second with 17 pledges, while Theta Chi was third with 14 pledges.

Faith breeds: heart of speech

"Children who are poor readers may become even poorer under pressure from their parents to improve," said Professor Ernest W. Jones, head of the Department of Sociology at Illinois State University. "When parents are cowed by others, they tend to become cowards themselves." A recent study conducted by the University of Illinois shows that the more parents pressure their children to improve, the less likely the children are to improve themselves.

"In this sense, the parents can become worse as a result of their own behavior," Dr. Jones said. "When parents pressure their children to improve, they may actually be acting in a way that will hinder their progress. The key to improving reading skills is to provide a positive and supportive environment for the child."

Schedule listed for second week of Pigskin Prophecies

by Ed Kervinos

As another hectic weekend of football approaches, it’s time to roll out the crystal ball and take a guess at the big games being played across the country.

In the East, Army’s hard-hitting Cadets will tangle with a sprawling Harvard eleven. The Black Knights from West Point were barely edged by Northwestern last week, and look as though they’ve picked up enough steam to down Harvard by at least two touchdowns.

Down South, Kentucky’s Wildcats are looking for revenge in a big way. They meet Whiskey in an intersectional battle that should see the victory claimed by Kentucky.

Northern California could prove troublesome for Maryland, but the Terps will have to work for the win.

Texas A&M and Texas Christian meet in one of the Southwest’s most historic rivalries. The Aggies, who lead the series 18-14, have won two of the last three games. The Longhorns, however, are the team to beat in the Big 12, and they are expected to salute once mighty Texas.

Ohio State faces Indiana, an imposing Indiana eleven in a game which could be much closer than early predictions reveal. The Buckeyes should win, but not by too many points.

Purdue plays host to Wisconsin in another classic Big Ten game. The Boilermakers already own one victory over the Badgers in the season, while Wisconsin must win to stay in contention for the Big Ten West title. Give this one to the Badgers by one touchdown.

Mary gave Princeton quite a scare, but the Tigers were able to hold on and win. Minnesota takes on Nebraska in a game that should be a tight battle. The Gophers have had their share of tight games, but look like a stronger unit than the Cornhuskers. Minnesota has lost the valuable services of All-American tackle Don Clark.

On the West coast, California’s Golden Bears will continue their rough road over their opponents as they meet Southern California in a traditional rivalry. The Trojans just don’t have this year’s team, and USC will be victorious.

Southern Methodist should topple Rice in a rugged contest, and Colorado should come into their own with a close decision over Kansas.

These are the games which could flare up to the game of the Week. Check the winners for the first time, and keep an eye on power, but also on close contests for the top two. That’s all there is to it.

Fraternity Row

by Ed Braun

FORE! Four hundred and thirty-six names begin in the yearbook this week as winning freshman men posed for Alpha Sigma Phi. The composite was composed of Bob Porter, who was for the journeyman’s second best score of 99; John “Indian” Bell 106, and Jack Putnam 110. This big group of men is the Phi Kappa Sigma Fraternity’s second best group, the third best being the Phi Lambda Kappa Fraternity, which scored 191 earlier this season.

Phi Lambda Kappa has made a great equalizer of seven men on its team. The Phi Lambda Kappa men have been very successful in the fall season, and their team has been steadily improving. The Phi Lambda Kappa team will continue to grow in the future.

Varsity leaders set for new year

by Tom Watson

Within the next few weeks, practice sessions for all winter sports will get underway. The varsity teams of basketball, swimming, and wrestling will hope to qualify on last year’s mark of 21 wins in 38 tries for all three sports.

Leading the pack this year will be Bob “Chief” McGee, one of the best basketball players in Chicago. His team will stay at the top all year long.

McGee has averaged 18 points per game so far and is expected to be the key player for the team.

The swimming team will be led by Bob “Duck” Davis, who has averaged 20 points per game so far. Davis is expected to be the key player for the team.

The wrestling team will be led by Bob “Rex” Reed, who has averaged 15 points per game so far. Reed is expected to be the key player for the team.

The cheerleading team will be led by Bob “Moose” Johnson, who has averaged 20 points per game so far. Johnson is expected to be the key player for the team.

The track team will be led by Bob “Buck” Brown, who has averaged 15 points per game so far. Brown is expected to be the key player for the team.

The field hockey team will be led by Bob “Bill” Harris, who has averaged 20 points per game so far. Harris is expected to be the key player for the team.

The basketball team will be led by Bob “Pete” Peters, who has averaged 15 points per game so far. Peters is expected to be the key player for the team.

The baseball team will be led by Bob “Tom” Smith, who has averaged 20 points per game so far. Smith is expected to be the key player for the team.

The football team will be led by Bob “Mike” Taylor, who has averaged 15 points per game so far. Taylor is expected to be the key player for the team.

Finally, the soccer team will be led by Bob “Ted” Anderson, who has averaged 20 points per game so far. Anderson is expected to be the key player for the team.

With these leaders set for the new year, the winter sports teams are expected to have a successful year.
Fall tryouts for golf at Silver Lake course

Reversing the regular football procedure, the Illinois Tech Golf team will hold fall tryouts in order to fill the vacancies caused by June's graduation exercises before next spring's schedule. The preliminary auditions will be held Saturday, October 13, at the Silver Lake Country Club.

If interested, prospective golf players should contact Coach Bill Stahl of 11th Fairway Golf Club, and 2000 Chapel, between 12 and 2 on Tuesday, October 10. He is particularly interested in freshmen but upperclassmen are also welcome. Last year's golfers set a terrific example for their successors by winning 16 matches while losing only once. Included amongst their triumphs was the Central Collegate Capital Championship which closed the season. The only loss was a triangular meet with Toledo and Wayne University, but the latter were averaged later in the season.

VARSITY BASKETBALL PRACTICE

MONDAY, OCTOBER 15th
4 P.M.
ALL INTERESTED TECHMEN INVITED

Lugs, Gremlins win openers; Archs, T-Men triumphant

Intercollegiate football got off to a roaring start this week with four decisive triumphs. First round games are usually pretty dull, but the eight teams that were played on Thursday and Sunday really went all the way in fire for their high put.

Yesterday the Senior Archs triumphed over the Trojans by a score of 26-14. The victory got off to a quick start and held the second defensive play of the game with a massacre double reverse punt and int.

The Trojans were attempting their surprise, backed up for the referee of the first half and no time was allowed until the period ended. Not to be denied, the Senior Archs came back in life for the second half when a short pitch clicked for their second TD. The conversion made the score 36-14. After a few exchanges of downs, the Archs again kicked off their tram on a reverse screen pass and lit the 'Ops'. The extra point made the score 36-14. The game ended with the Trojans blocking in vain upon the Archs' door.

On the same afternoon last year's champs, the Gremlins beat the Little Bears by the margin of 16-8. Although the Gremlins lost most of their key men through graduation, they are still a powerful opponent against their opponents.

DO YOU INHALE?
Then you're better off smoking PHILIP MORRIS

Job interviews begin; post-weekly schedule

This year there is again a shortage of qualified engineers. Starting next week representatives from many companies started interviewing graduating seniors interested in positions with their firms.

There are two places where companies will interview students. In the first place a company’s representative will hold a personal interview which the student must attend. Those who wish to attend will be given a personal interview. The second place is the company representative will visit the company and/or student.

The only requirement for the interviews is that a graduating student submit a personal interview form. These are obtained in the student’s union. The schedule of companies coming to Tech each week will be published in Tech News.

integral organization photos to be taken Oct. 22, 24

Photos of Tech organizations will be taken in the Tech Union, according to the following schedule:

1:00 P.M. 10:00 A.M. 11:00 A.M. 2:00 P.M. 3:00 P.M.
