Annual Slide Rule Bowl—See page 10

TECHNOLOGY NEWS

SHEA TO SPEAK TO ALL SCHOOL GROUPS

Frank R. Shea, foreign correspondent for Time and Life magazines, will speak at an all-school assembly, sponsored by the International Club, on Nov. 13. The theme of the speech is "Europe after the War," and Shea plans to stress the necessity for the world to work together to prevent future wars.

JUNIOR WEEK CHAIRMAN NAMED AT ITSA MEETING

The ITSA Board of Control announced the appointments of the top positions for the Junior Week committee at Wednesday's meeting.

Alice Orphanos, HE 7, was appointed chairman of the Junior Week committee, and the Junior Week chairman was awarded to Bob Young, FPE 5.

Paul Seder, CH 5, was chosen assistant Open House Chairman, and Chiea Liu, CH 6, was chosen assistant Open House Chairwoman.

SELECTIONS FOR "WHO'S WHO" ARE ANNOUNCED

Twenty-four seniors were selected for Who's Who in American Colleges and Universities by the Board of Control at last Wednesday's meeting. The selection was made by the faculty of the University.

CAMPUS PLAYERS GIVE MYSTERY NEXT WEEK

The play is "The Stars at Nine," a comedy about the life of a little girl who is a star in her own right. The play will be presented in the auditorium of the new building on Monday, Nov. 13, at 8:30 p.m. It is the first production of the new school year.

FINALS IN INTEGRAL QUEEN VOTING RESULTS

After two days of balloting on the recommendation of the Student Union, the final results of the election for the Student Union's first Queen of the Integral Ball, Saturday night, were announced.

The six finalists were chosen from a field of eleven candidates and each of them submitted a speech to the judges, who were the members of the Student Union. The speeches were judged on their originality, style, and content, and the final winners were chosen based on these criteria. The winners were announced at the Integral Ball, which was held on Saturday night.
Carbolic Gus defends ribald Slipstick humor

Dear Editor:

Quite often in the past there has been varied amounts of criticism levied at Slipstick by those of the faculty who are responsible for student activities. It seems that periodically the faculty members must concern the same bits of humor that they privately chuckle over in the interest of keeping up the moral standards of the students.

In the many years of its existence, Slipstick has outlived plans of students and survived presidents of the Institute. There is no record of any of the students (or the staff of the Institute) being led down the wrong path of morals by the effect of a few jokes which deal with one of the more important facets of this life of ours.

No other school publishing humor for the consumption of the students has reported any similar effects.

In short, if the greatest proportion of the readers enjoy a funny stunt to their humor, why not continue to give them this relief from the drudgery and responsibilities of college work. If a very few (especially those who hold positions which warrant periodic demands for a "clean-up" of the humor column) are offended, then let them avoid the material which might produce such a reaction rather than practice "thought control" and force their whims on the majority.

If other school newspapers have thought enough of our material to borrow it in large quantities (as we do from them), then perhaps the administration would think back to their own columns and days and leave the choice of jokes to the conscience of the editors who are responsible for the humor.

Sincerely yours,
Carbolic Gus

We apologize

Dear Editor:

I was surprised to see the headline on the housing story in your last issue, the headline which said, "Rent Increases in Apartments is Announced." The fact is that there were no increases and, in some cases, the rents were decreased. It is a little discouraging, after having held the line in rents in addition to reducing those in some categories, to have the campus newspaper say that we were raising them.

I presume this error happened when the person who wrote the story was not aware what the current rents are. I am always happy to give all the background information on a news story when I can, and if this had been done in the case, the Tech News would not have created a mistaken impression.

William John Gard Jr., Manager of Housing

"Who?"

Dear Name Withheld:

(Political) opinions (especially—but not only) that are no longer shared by at least a few others, worthy of print are certainly deserving of authorship. The person who refuses to stand by what he says cannot have much faith in either himself or in what he says—why should the reader?

If one is not afraid to think it (2) admit that he thinks it, and (3) say it—then why should he be afraid to (4) sign his name?

Sincerely,
Kod Camp

Criticism pointed at faculty for low morale

Student morale is an ambiguous term. With Library Recruit it may be defined as the feeling or lack thereof of being "shattered." A great many shifts are now being felt by Tech students.

The present situation is a way for much criticism to be aimed at the faculty and administration. This feeling, however, is intended to be constructive rather than destructive.

Number one on the list is the misuse of academic freedom. A teacher is granted very liberal freedom in the personal administration of his course. With this liberty comes responsibility, also. A line must be drawn between an instructor giving passing test grades to only forty percent of a class of close to fifty students.

There is a standard which the instructor wishes to maintain, and a standard of which the class is capable. To keep these two inseparable is highly discouraging to the student. In such cases as these, the student is shunted.

The present cheating situation is directly harmful to the student. In some cases, however, this blame may also be shared by the faculty. Administration of a course in such a way as to encourage cheating puts the responsibility of the incident upon the instructor as well as the student.

Another administrative shortcoming is the system of faculty counseling. Group instruction is necessary in any educational institution. When teaching engineering courses, where one principle may lessen the comprehension, individual instruction also becomes a necessity. There are cases in which instructors do not welcome class questions, individual counseling, and general interest in the content of the lecture. Such an attitude could lead to the feeling that Illinois Tech is a factory instead of a school.

It is not a one-sided picture, however. The administration is aware of some of these facts and is trying to correct them. The process is slow and needs the emphasis and comments of students.

Let it be noted also that the incident cited are in no way unusual and not in a majority. However, one bad apple can spoil the lot. It is hard to escape the repercussions of such a situation.

As a student, can you do your part to correct the situation? Here are your comments, suggestions, and other letters addressed to Technology News will be of help in improving the morale of the school.

Do You Qualify? Technology News needs writers

Tau Beta pledge pleads IHC of Chicago

Elective pledges in Illinois Beta Pi, a Tau Beta Pi chapter, is to be elected on Monday. Those who have already been elected must arrive today.

Among those outstanding pledges are: Alvin Adler, Chicago; Adolph Fischman, Chicago; and Bernard Bittner, Aurora. The Tau Beta Pi chapter is to be elected to the IHC of Chicago.

Senior proofs and back numbers

Senior proofs and back numbers are available at the following prices:

- Senior proofs: $4.00 each
- Back numbers: $1.50 each

For more information, call 312-596-3141.
Register now for draft exempt test in April

The registrar’s office announced that students who have not completed their Fall term work for the test to be given on Dec. 4 for the test to be given on April 23.

This is the final deadline for application. Nov. 1, Madison, March 5 is the deadline for application for the April 23 test.

The student who has completed any portion of the application but not the test, may not receive the application before March 5.

NU invites Techawks to square dance

Joyce Kach of the Northwestern University Techs. for rally, reports that all ITT students are invited to a square dance tonight. Admissions to the dance will be held at Thome Hall, and the drinks will be provided.

Music for the “Runaway Shuff-1,” as the dance is called, will be furnished by “The Country Boys.”

The “Country Boys” will also provide music for basketball dancing for the guys and girls who aren’t too partial to that burned out dance.

We are also informed that square dancing instruction will be furnished.

Casual clothes will be the style of the evening.

"Is that girl’s dress torn or am I seeing things?"

"No!"

News in Brief

There will be a meeting of the Student Council Club on Wednesday, December 15 from 10 to 10 p.m. in the Executive Conference Room, Student Union.

Tau Beta Pi pledges clean IHC offices

Election of new members to Tau Beta Pi was held on October 25. Fifty-one were elected to pledge this national engineering honor fraternity. Those who have been elected are as follows:

Barkley, Bernard A., Fink, J., and Stetson, F., are among the elected students who are interested in both the engineering and in their service to the student body. Only two are elected under this classification.

Frigid plateaux have taken a more practical aspect than ever before. A test will be given every 12 months on the plateaux. The Tau Beta Pi plaque holds the chemistry student’s name and represents a distinguished achievement in the chemistry field.

The new plaque was awarded to the best student in the chemistry field.

The plaque will be presented to the best chemistry student in the nation.

The Tau Beta Pi plaque will be presented to the best chemistry student in the nation.

The plaque will be presented to the best chemistry student in the nation.

The Tau Beta Pi plaque will be presented to the best chemistry student in the nation.

The Tau Beta Pi plaque will be presented to the best chemistry student in the nation.

The Tau Beta Plaques at both the national and the regional levels are sponsored by the Tau Beta Pi association. First prize will be $100.

Senior photo proofs due back Nov. 8

Stevenson Hall at the studio of the Daily Northwestern, is the location for the photo proofs. If these are not turned in during their designated time, they will be returned to the studio.

The studio is open from 8:00 a.m. to 5:00 p.m. located at the studio.

Student enlightened on windows in Main
by Tom Delahanty.

As you began your long, hard trek to frame and fortune (if you’re lucky—even a degree) by heaving your impatience to TID, you may have noticed the stained glass window in Main building. The question: how old is it? The answer: 150 years.

The window is one of the oldest stained glass windows in the country. It was designed by the famous American stained glass artist, Louis Comfort Tiffany. The window was installed in 1860, and it is still in excellent condition.

The window is located in the main lobby of the building, and it is composed of 14 different stained glass panels. Each panel is intricately designed and features a different scene from the Bible.

The window is a beautiful example of the art of stained glass, and it is a wonderful addition to the building’s architecture. It is a testament to the skill and talent of the artists who created it, and it is a reminder of the rich history of the institution.

The window is also a symbol of the university’s commitment to education and the arts. It is a reminder of the importance of art and culture in our society, and it is a testament to the enduring power of beauty and creativity.

ITSA constitution guides students activities

Second and final installment

The constitution of the Illinois Institute of Technology Student Association (ITSA) is published once each year in Technology News as provided by Article XV of the constitution.

Article I

STUDENT ORGANIZATIONS

A. The Student Government is an official body with the various constitutions of the Illinois Institute of Technology. The Student Government is composed of the senior class and the junior class, the senior officers being elected by the senior class, the junior officers being elected by the junior class.

B. The purpose of the Student Government is to provide a forum for the expression of student opinions and to serve as an advocate for the student body in its dealings with the administration.

C. The Student Government shall consist of the following officers:

1. President
2. Vice President
3. Secretary
4. Treasurer

D. The Student Government shall meet at least once a month, and the minutes of each meeting shall be recorded.

E. Any student organization wishing to associate itself with the Student Government must first secure the approval of the Student Government Council.

Article II

STUDENT GOVERNMENT COUNCIL

A. The Student Government Council is an advisory body composed of the senior officers of the Student Government and the senior class officers of the various student organizations.

B. The purpose of the Student Government Council is to serve as an advisory body to the Student Government and to coordinate the activities of the various student organizations.

C. The Student Government Council shall meet at least once a month, and the minutes of each meeting shall be recorded.

D. Any student organization wishing to associate itself with the Student Government Council must first secure the approval of the Student Government Council.

E. The Student Government Council shall approve the constitution of any student organization seeking to associate itself with the Student Government Council.

Article III

GENERAL RULES

A. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

B. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

C. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

D. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

E. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

F. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

G. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

H. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

I. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

J. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

K. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

L. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

M. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

N. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

O. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

P. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

Q. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

R. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

S. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

T. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

U. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

V. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

W. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

X. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

Y. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

Z. The constitution of any student organization seeking to associate itself with the Student Government Council shall be submitted to the Student Government Council for approval.

Vis. Ed. Dep't serves IIT in numerous ways

Upon entering the office located in 401 of the Main building of IIT one sees a maze of equipment lining the walls. Partly assembled speakers shone under tables, movie projectors, amplifiers, slide projectors, films, microphones and small tools are stacked throughout the room. This is where the offce, storage, projection room, and repair shop of the Visual Education department is located.

The Visual Education department is a service department established to handle the obtaining and showing of movies and film strips for all campus personnel, setting up and maintaining sound systems for special occasions on campus, keeping track of the films owned by the school, and recording and maintaining any visual aids needed in the course of instruction. The services of this department are available to any organization connected with Technology Center. Hosted by Vincent L. Man- leau, the office hours are from 9:30 a.m. until 5:30 p.m. Monday through Friday. There will be no hand in his office or around the campus to discuss any problem you have and aid you in rooting the right solution.

In a few weeks the various instructors and teachers shall be able to use a permanent sound system in the Chemistry auditorium. The major project for the year is the installation of this system. In large classes and laboratories, a microphone can be obtained from the department for lending students to students and guests seated anywhere in the room to be able to hear the lecturer without strain.

At the present time the director and two of his student assistants, Bill Robinson and Jane Honour, are putting in much time on their own to complete the installation of the amplification system dreamed of by the Student Union commission for the past three years. The boys feel that this system should be completed by the end of the semester thus allowing taped music to be played in the Student Union auditorium, concert hall and library. Spor announcement services of importance to all students can be made that will be heard in each of these places and over the speakers of the auditorium also.

November 15 date for H.E. rummage day

The Home Economics club is having a Rummage Sale on Saturday, November 15, from 9:00 a.m. to 4:00 p.m. The facilities of the Progressive Baptist Church at 135 W. 37th street will be used for the sale.

The committee for the sale is headed by Mary Blake with Dolores Arnold, Frances Gisbig, and Elaine Unknown assisting her. The purpose of the sale is to raise funds for the Home Ec Scholarship Fund. Those who wish to contribute clean, usable articles for the sale, or of course, visit the sale.
Lives saved: blood drive is huge success

Early in the morning of November 4, the Student Union building was filled with the noise of students giving blood for the American Red Cross Blood Drive. After making their contributions, the students were welcomed by the smiles of the Red Cross workers. The number of students who participated in the drive was more than expected, and it was a great success.

Land locked sailors invited to get dunked

by Paul Phillips

Have you ever dreamed of being dunked in a pool of water? Well, here's your chance! The IIT Sailors are inviting all landlocked sailors to come and join them in the pool. The event will be held on the second floor of the Student Union. Mark your calendars for this exciting event.

Pan American Institute holds guidance forum

The first of three guidance forums for Latin-American students, open to all faculty members, was held on November 5. The forum was facilitated by Dr. John Smith, a noted Latin-American author and scholar. The forum was well attended, and the students were eager to share their thoughts and experiences.

Students map plans informally in cafeteria

The students at IIT are always looking for ways to improve their campus life. One of the latest initiatives is the creation of a map of plans for the cafeteria. The map is used to inform students about the location of various food items, such as the salad bar and the pizza stand. It is a helpful tool for students looking for a quick meal.

Pan American Institute of Educational Relations for Latin-Americans holds forum on guidance for Latin-American students, open to all faculty members, was held on November 5. The forum was facilitated by Dr. John Smith, a noted Latin-American author and scholar. The forum was well attended, and the students were eager to share their thoughts and experiences.

Student government plays vital role at I.D.

The unassuming visitor to the Institute of Design is likely to find a piece of abstract sculpture in use as a doorknob. Tremendous quantities of light sculpture he runs into mobiles swinging from the ceiling, and experiments in eye-appeal hang from the walls.

On the top floor are the photo labs, populated with technically minded students—all working feverishly on the various technical theories of art students; art students working with models and light modulation.

The approach to design at the Institute is one of application of the technological advances of today to design. Its curriculum is built around the following areas, beginning with the Foundation Course: Design and Photography, Sculpture, Design, Architecture, Industrial Design, and Art Education. Combined with these is the ultimate goal of the Institute of Design.

It would seem to play a vital role in determining the direction of the dynamism of the Society for design, the growth of the design organization, the increasing amount it makes in the interdepartmental relations within the student government. This body has as its purpose, "the unification of student opinion, and the expedition and execution of rewarding action." This organization is affiliated with the larger Illinois Tech Student Association, as a semi-dependant body. Policy is determined by the Executive Committee, composed of the president, vice-president, treasurer, and a representative from each class. The administration consists of the vice-president, secretary, and a fellow board chairman: Professor Social Service, Social and Athletic Board, Alumni Board, and Student and Social Welfare Board. Attempts toward mutual cooperation and understanding have been accomplished through the Student Faculty Advisory Committee, TDCA, and the Public Information department of Illinois Tech.

In the final analysis, the student government has organized and initiated the following: chamber music programs during the noon hour, weekly modern dance classes, audio-visual workshops, lecture series, student association in Green House, and the Annual Student-Navy Arbor for student aid.

The Executive Committee consists of: president, George Vassos; vice-president, Lawrence Gilliam; treasurer, Howard Fish; class representatives, Allen Johnson, Jesse Pearson, Len Gilliam, John T. Emerson, Carl Anderson, William Bres, Peter Domenick, Howard Fish, Carl Wilson, John Bledsoe, and John Ford; secretary, Delores Schuster.

The administration consists of the above plus: Professional Service Board, Len Gilliam, Social and Athletic Board, Dennis E. F. Emmett, and Philip Wilson; Student Social and Economic Welfare Board, Ben Pollock and Paul Draetz.

A representative of International Harvester will be on campus during the week of November 15th until November 19th. If you are interested in a position with IH, see your Placement Director for an appointment.

Kappa's "Toy Harvest" on November 21

"Toy Harvest" is the title given to the all-school dance to be presented in the Student Auditorium on Friday, November 1, by Kappa Delta Sorority.

Beverly Vien announced this week that admissions to the dance will be by invitation only. The toys collected in this manner will be turned over to the Anti-Social Workers for their annual party.

The dance, which will feature an eight-piece band, will start at 9:00 p.m. and last until midnight.

According to present plans girls will be invited from neighboring hospitals and schools.

To order out such events to be added to the program, a discussion and a meter study in the luncheon room of the American Legion will be presented. Those interested in the meeting, pick up the cards at the entrance under the guidance of one of the officers. The entertainment for the evening is expected to start at 8:30 p.m.

Tech exhibit to be shown at Hilton hotel

"A Technological Aids to Industry," an exhibit of the office of Technical Services, the Patent Office, the Government Patents Board, and the National Bureau of Standards of the U.S. Department of Commerce, will be held at the Conrad Hilton hotel from 9 a.m. to 6 p.m. on Nov. 16, 17, 12, and 13.

This exhibit is being brought to the public in the six regions where the Patent Office formerly worked in the U.S. and is being sponsored by the Patent Office. The exhibit will be open to the public without charge.

The exhibit will feature a number of exhibits and demonstrations, including a demonstration of a new type of machine tool, a new type of copying machine, and a new type of machine shop. The exhibit will also feature a number of new and improved products, including a new type of airplane, a new type of walking machine, and a new type of machine shop.

The exhibit will be open to the public from 9 a.m. to 6 p.m. on Nov. 16, 17, 12, and 13.

For more information, please contact the office of Technical Services at 312-467-3300.
Wrestlers and Swimmers to open schedules in December

by Ed Koeva

The grapplers have now completed their first week of practice for the coming season, which opens December 19 when the Teutons will travel to Navy Pier.

Having vistoed the boys for only one week Coach Barbara stated, "Things look pretty lean this year but we'll be working harder than ever to keep that victory streak going."

Barbara's biggest problem will be in finding heavyweight, and men wrestling to the 117 and 137 pound weight divisions. Graduations have left these belts and it's going to be a mighty reach to fill them. However, with only a week's practice it's hard to say what any of the newcomers have to offer.

Looking forward to this year's schedule Navy Pier and Naperville appear to be the strongest spots that Tech can face. Coach Barbara, however, has lined up two practice meets before the regular season which should really get the fellows ready for the opener. On the twenty-fourth of the month the squad will head to Evanston to test a little big Ten competition when they play Northwestern. Two meets will make the trip, December 4 Navy Pier will be Tech for the other practice meet.

Tech Sports
IF, IM champs to meet Nov. 20 in annual Tech News classic

Football is just about over here at Tech and the “Fifth Annual Slide Rule Bowl” on November 20 will ring down the final curtain on this year’s battles.

The Slide Rule Bowl was the brainchild of the 1958 Technology News staff in order to eliminate interest in touch football which was a very sad state. It gave an incentive for students to enter and participate in campus sports which got rid of one of the greatest sources of the sports staff, morale.

O ur continuous talks with you engineering seniors in schools from coast to coast convi nces us of one thing: Most of you hope to find a job in a company of constant stature in its industry to supply a real challenge to your brains and to your technical training.

A General Motors job is many ways gives you just such an opportunity. And here’s why.

First—GM makes all kinds of products requiring all kinds of engineering talent—mechanical, electrical, architectural, chemical and industrial. These products range from automobiles, refrigerators, and fractional horsepower motors to Diesel engines.

And, as a leading defense contractor, GM runs the production gamut from shells, shockwaves and range finders to turrets and jet and Turbo-Prop engines.

Second—all this huge variety of work is decentralized among GM’s 54 manufacturing divisions in 54 towns and cities throughout the country. And each division operates as an independent unit with its own engineering department. Yet each can draw on the resources of GM’s central research and engineering laboratories.

Thus you—be it one or the many times the friendly, personalized setup of a smaller company and the opportunities and facilities of a large successful organization—a leader in many major fields.

All of this naturally spells out a real challenge and a real challenge for the man who has the get-up-and-go to make the most of what GM has to offer. Many engineering graduates grow up in jobs at GE to satisfy to that fact.

So why not check with your College Placement Office and arrange for an interview with our GM College Representative the next time he visits your campus or write direct to us.

From Where I Sit
by Bob Abrams

The annual Illinois Tech Prep Basketball Tournament is ready to go into its sixth year right now still under the able direction of Sonny Welsman. Invitations are now being sent to the usual small high schools who will make up the tournament. The tourney is set up a little earlier this year, with finals to be played a week before New Years so that the winning teams can get off. This will be a big selling point and may increase the number of entries. In the past the basketball coaches did not like to give up their whole Christmas vacation to bring their teams down to the tournament and since this objection is somewhat reduced, we may see the largest tournament to date this year.

The dates for the tournament are: preliminaries on Friday, December 19; afternoon and evening elimination games on Saturday, Monday and Tuesday, December 20, 22, and 23,. Quarterfinal games will be played on the afternoon of the 24th, and semi-final games on Friday night, Dec. 26. The championship game and the consolation third place run-off will be played out on Saturday December 27.

Ed Clancy and Sonny were remarking this other day how highly the athletes in the 1A and 1B leagues are with regard to their proceeding. It seems that no matter what sport is on tap, months of "Preparing for the Best of the West" are always surrounding the gym and IFC for the stupendous reasons. This eligibility business, they say, is the worst. Ed and Sonny came up with a

Girl cops second prize in Pigskin Prophets try

The many upsets during the week of New, held the perfect entries down to a total of one. The one was submitted by Bob Greenwood, Arch B. & Sonny wasn't pleased in the win and lost column, so his kicks weren't what he was after. This will be a big selling point and may increase the number of entries. In the past the basketball coaches did not like to give up their whole Christmas vacation to bring their teams down to the tournament and since this objection is somewhat reduced, we may see the largest tournament to date this year.

NOSE, TOOTH, ROAT, and Accessory Organs not Adversely Affected by Smoking Chesterfields

A responsible consulting organization has reported the results of a continuing study on the effects of smoking Chesterfield cigarettes.

A group of people from various walks of life was organized to smoke only Chesterfields. For six months, this group of men and women smoked their normal amount of Chesterfields - 10 to 40 a day. 45% of the group have smoked Chesterfields continuously from one to thirty years for an average of 10 years each.

At the beginning and at the end of the six-month period each smoker was given a thorough examination, including X-ray pictures, by the medical specialist and his assistants. The examination covered the sinuses as well as the nose, ears, and throat.

The medical specialist, after a thorough examination of every member of the group, stated: "It is my opinion that the ears, nose, throat, and accessory organs of all participating subjects examined by me were not adversely affected in the six-month period by smoking the cigarettes provided."

Help Stop the dam August 10th at Wolf Creek

Have you ever wondered why we have dams?

This happened several years ago. I was standing on a dam. The river was running so fast that it didn't have anywhere to go. So they built a dam to keep the water from flowing through.

No, it's not true. The river flows through the dam. It's just that, when you look at the water, it seems like it's going to another place.

Perhaps you can help us solve this mystery?

Chicks are in every club, in every state, in every country, but you can see them in the future. And if you're not in a fraternity, you can be in the Young Republicans. The Young Republicans have a meeting every Thursday night at 8 p.m. in the Memorial Union. Admission is free. There will be a special guest speaker who will discuss the history of the Republican Party. Whether you're a member or not, you're welcome to attend.
