"Shop at Sly Corner" given; accolades to Campus Players

by Jackie Leiter

Campus Players has opened the theatrical season at Illinois Tech earlier than usual this year, and with a very entertaining play, "The Shop at Sly Corner," a mystery by Edward Perry, featuring and amusing, it runs the gamut from humorous to absurd in the lower reaches of comedy to the higher reaches of emotion.

Help Santa; bring toy to dance November 21

Have you ever seen the face of a child who has stopped believing in Santa Claus because he didn't get a toy for Christmas? This happened several times last year, because McKinley Settlement House and other groups couldn't gather enough toys to go around. This year's toy drive promises to be the best one ever.

Father-son alumni dinner held Nov. 21

The Illinois Tech Alumni Association will stage its second annual Father and Son Sports Weekend Dinner one week from tonight, in the Illinois Tech Gymnasium. The evening will feature a discussion by many of the larger and more successful furniture dealers, in which to discuss what courses they wish to take next semester.

Pre-registration begins November 26

Students must pre-register by November 26.

Equipment needed for new McKinley house

The new McKinley Community House is expected to be completed on or about Jan. 1, 1953. The structure is located on the corner of Thirty-third Street and Assembly Street. Although this building does not have adequate space and facilities, the community needs for the children participating in its activities will be met.

IHC faculty rating form to be revised

Members of the Instructional Evaluation Policy Committee of the IHC are conducting interviews with a random sample of this school's population. Chairman Erwin Durst, Don Larrmore, and Jim Price have been meeting with faculty members. Student interviews are being conducted by Kent Kneess, Bill Robinson, Bill O'connell, Ralph Svorak, Ernest D. B., and Jack Carcetti.

In spite of this being the fourteenth anniversary of Galton's invention, it is expected that the 16-inch interviews will gain excellent indication of what the students think should be added or dropped. Kenneth Noyard, a graduate student in the physiology department, will examine and analyze the results. The students should be able to provide the students with an idea of what the differences are of those who take or not take this course. The faculty rating form will be revised.

Advance orders for the 16-inch interviews are being placed through the Galton's Inventions, with whom she works very closely. She assistant is approved by Galton himself and is supervised by her.

Equipment for this new McKinley house will be need of such essential items as holding ladders, chairs, parlor sets, lamps, etc., as well as additional equipment.

A drive will start as Dec. 1, in order to complete the equipment and materials for the new McKinley House, to be known as the students' house.
Poor attendance makes farce of school function

All school assembly.

The poor attendance that should follow. The all school assembly is a farce. This is not intended to be disrespectful to Frank Shaia. He delivered a speech that merited more attention than it received.

Six thousand students were notified by the absence of the students that turned this function into the farce that it was.

Remediable by his presence was Professor Buschkofer. To my knowledge he was the only person who represented Illinois Tech teaching staff.

This editorial was almost written. When the school plans an assembly to feature a known and interesting speaker, and when only a hundred students attend, the situation is so disgraceful that it should be heeded rather than exploited. This, however, would tend to add rather than remove student that was evidently.

If the administration was interested about the caliber of the teaching staff, there is a very definite weak point. In school he should be more than textbook readers. They should be leaders in the college phase of life. In not one of the classes that I attended was anything more than a crotchet of students present from the sparseness of the instruction. Surely such a well informed and his professional Chicago was by no means present should have appealed to a larger percentage of the student body.

The assembly with rubber bands is an assembly. The student body and faculty must support the functions that are now given for their benefit.

* * *

To the Editor:

I wish to thank all students who were indifferent or busy about attending the Integral Ball. Without you, the dance floor wasn't crowded and I had the opportunity to dance without getting tired.

I should have been more like your students who attended the Integral Ball. I wish to thank all students who were indifferent or busy about attending the Integral Ball. Without you, the dance floor wasn't crowded and I had the opportunity to dance without getting tired.

To the Editor:

We have been wondering why the Integral Ball ended so early this year when it was published in the Technology News that the Ball would continue to one o'clock. The group at our table was not much surprised when it was announced at 12:30 that the last dance was being played.

This brought about the end of the good time that was being had by many of us and left us with the feeling that we had been cheated of this half hour which would have been the most enjoyable part of the evening.

* * *

To the Editor:

As you well know, it has been a struggle to try to make an attractive campus in this area.

We have had a few plots of grass, which have been maintained only with great effort. Because of the dry weather this has turned quite brown, with the result that our students are walking indiscriminately all over the grass plots.

I am wondering if we can enlist the aid of Technology News in some concerted effort to point out that just because we are in the middle of Fall does not mean that the grass area does not need to be protected. Any help that you can give on this matter will be appreciated.

R. P. McShane

Dear Pop:

Everything fine at school. I'm getting along well and I am studying hard.

Incidentally, I’m enclosing my fraternity bill.

Your son,

Frank

Dear Frank:

Don't buy any more fraternity.

Our pop,

Pop

Teacher: "Now, children, every morning you ought to take a cold bath that will make you feel and look like they ever are. There are any questions?"

This is the back of the room: "Yeah, teacher, tell us more about Ruthie."

Ludwig went hunting. A sad tale to relate.

"Cause he left his shotgun, walking. But he came back in state.

He was moving through the woods. Looking for something.

When I cut a log, he is stuck. A charge of buckshot in the tail.

Oh, the wound. It was not fatal, not it had been with a knife.

But when he assessed the damage, he raised the gun to his head.

Poor Ludwig, you will say, he took it all hard.

But you would too, if you were shot in the headbeam.

Letters to the Editor:

More comments offered about instructor situation

To the Editor:

Congratulations to Technology News on the courageous editorial which points up one of the long enduring evils of ITT's teaching staff. It seems to me that this is one pro-Noise to many others such as the building situation, that could be solved in a short time by a determined and conscientious Administration. The problem does exist.

From personal experience I should like to cite a few examples. First, in all of my classes the average grade on one of the tests was approximately 20 out of a possible 100.

The instructor stated that we were the dumbest class he had ever taught in his long career. He did not return the tests stating that a large percentage of the class was going to fail and he was warning the tests for evidence in case the cases were questioned. Many somewhat similar tests last semester, needless to say, the instructor lived up to his predictions.

Instructors such as the above are in coarse well known by the students and avoided at all costs. The reason is not plagiarism or registration. Students gladly stand in line to pay five dollars for a course program and a different instructor. Unfortunately, however, some of these instructors are placed in the strategic position of being the only instructor teaching a basic course. Then the student has no alternative but to go through this section without the chances of survival about 50-50.

Can this be right? Apparently very little by the Editor. On one of the instructor rating sheets which are filled out by the students each semester, three of us, after debating it situation, somewhat against our better judgment, finally wrote under remarks: "Try treating students as if they were human."

At the next class meeting in the instructor's classroom upon the rating sheets, said, "Upon reading the rating sheet the first thing I did was to glance at the remarks. Many of them said such things as 'try treating the students as if they are human.' I realized that these students were blaming me and promptly discarded the sheets."

Perhaps we were wrong, but our remarks were not made without consideration and an attempt at objectiveness. Certainly such remarks do not display the greatest of tact, but we were not in the wrong way of expressing our feeling and we hoped that our apprehensions would be taken in the spirit in which they were given.
Prendergast to speak at Nov. meeting, ASM

C. T. Prendergast, assistant superintendent of manufacturing engineering at the Western Electric Co., will be the speaker at the November meeting of the American Society for Metals. Prendergast, a graduate of MIT, was chief of the engineering personnel department at Western Electric for two years prior to his present position. He is the immediate past chairman of the Chicago chapter of ASM. He will speak about "What Industry Expects of the Young Engineer." The meeting, open to all students, will be held on Thursday, Nov. 20 at 12:10 p.m. in 112 MC.

The ITF chapter of ASM is the newest professional society on campus. Its purpose is to interest students in the field of metals. Membership is not, however, limited to those in the metallurgy department.

Members of the ITF chapter are automatically members of the Chicago chapter, enabling them to attend its monthly dinner and lecture series. The society publishes a semi-annual magazine, containing the latest developments in the metallurgical field.

The National Metal Congress and Exhibition held this year in Philadelphia in October, is sponsored by the ASM. This is the largest gathering of metallurgical engineers in the world.

Each spring photographs and biographies of graduating student members appear in "Metals Review." This service enables industry to select future employees.

Officers of the ITF chapter are: James Larson, president; Clive Wilson, vice-president; Richard Snyder, treasurer.

Red Cross to give Int'l day luncheon

An International day luncheon will be given by the College Activities division of the Chicago chapter of the American Red Cross at 11:30 a.m. on Dec. 6 at the Chicago chapter headquarters.

The luncheon is being given to bring together both foreign and American students interested in meeting with one another in a more to further world friendship on a small scale.

Anyone interested in attending the dinner, for which there will be a one dollar charge, may obtain further information and reservations cards at the office of the Dean of Students in RU.

Clef Carriers banquet to be November 19

Not that six-foot maroon and gray monstrosity being carried around campus these days is not a bit of a creation of an Institute of Design student, even though it may look like it. Actually it's a treble clef carried by students of Pi Nu Epsilon, honorary music fraternity.

This semester's cheif widders are: Nancy Anderson, Clarice Linn, Vera O'Connell, Paul Reiner, and Barbara Geoghan.

As is the custom, Pi Nu Ep will hold a pledge banquet. This year's glitter will be held on Nov. 15 at the Electric club in the Cleve Opera building. All the members of the fraternity, at that time, will attend a performance of the New York City Opera company.

Pi Nu Ep is located here at ITT in 1916. It came into existence because all other existing music honoraries could not accept engineering students, who are required to work outside of school when and where they by the university.

The chapters of Pi Nu Ep at the University of Illinois and the Illinois Institute of Technology have combined efforts in organizing the banquets, both moving up in dates 15 years ago.

Pat Turner again wins Marie Blanke award

For the third consecutive semester Pat Turner has been awarded the Marie Blanke scholarship. In honor of the former Lewis Institute economics teacher, the scholarship provides $350 to a student.

The scholarship was established by the Chicago Alumni association of ITT.

To a raindrop, all umbrellas are the same

Yes, the nice part about umbrellas is their similarity. When the need is urgent, any one will do.

When it comes to telephone equipment, however, a general knowledge isn't enough. You must be able to explain exactly the same thing in the same way to each person who uses it. Only then can the system be made the same.

We're reminded of it sharply in times of disaster — from floods, blizzards, hurricanes.
IIT LSA'ers go to region conference

Last weekend, IIT was represented at a regional conference of the Lutheran Student Association from colleges in Wisconsin, Illinois, and Indiana. The conference was held at Carthage College in Carthage, Illinois.

The purpose of the conference was to elect new officers for the LSA and to deal with the problems and improvements of the organization. A total of 166 delegates attended the conference and were elected to the 100-person executive committee.

Bob Warner, Ralph Dietsch, and Norm Williamson attended from IIT. The conference was attended by 15 percent of the regional budget to the World Student Christian Federation, a non-denominational organization that seeks to build unity among students from all over the world and particularly in Eastern Europe and other countries behind the Iron Curtain.

Free movies to be shown next Tuesday

"Harlem of Michigan," another in the monthly series of free movies, will be shown next Tuesday in the Memorial Union. The starting time is 7:15 p.m.

Vince Mariscal, director of Twin Cities Student Union, announced that the Twin Cities Student Union and the University of Minnesota are cooperating in presenting this series. Originally the series was tentative and dependent on attendance at the first showing. Last month, when the first movie was shown, attendance was considered by the Twin Cities Student Union to be very encouraging. Therefore we're going to get more of them.

WCG dance December 5, features ties

By Gluyus Byrnes

A Mistletoe Tie contest will be one of the features at the annual Christmas dance of the Whitehall Club, 601 W. 11th Ave., on December 5.

Riders for the contest are:
1. All persons attending the dance must be students or staff members of IIT.
2. An organization may submit only one entry.
3. Ties must be either watch or neck-tie fashion.
4. Neck-ties must be at least 12 inches in length and may not exceed 36 inches in length. In width, they must be no more than 1 inch.
5. Deadline for entries is December 4.
6. All contestants must present the entries for their entry to be eligible.

Voting will be carried out in the lobby of the Memorial Union on Tuesday, December 1 to 5, from 12 and 3 to 5, it will be open to all and only one vote per person. Voting will close at 10 p.m. on Wednesday, December 5. The winner will be announced during the dance on December 5.

Slide Rule Bowl next Thurs. FPEs vs. Alpha Sigma Phi

Next Thursday, the annual Slide Rule Bowl sponsored by Yesteryear News, will be held to match the winners of the 14th league against the 15th champions. Alpha Sigma Phi will carry the banner of the fraternity over, while the Fire Proteus will represent the Interfraternity league.

Yesterday the final whistle blew to end the final game of this year's Interfraternity league. This was the game in which the FPEs defeated the Mixers by the score of 21-7. This was strictly a repeat of an earlier game this year when the FPEs overpowered the Mixers, 20-12. Yesterday's final whistle blew late Tuesday, the FPEs and the Mixers both won their semifinal games with the Fire Proteus facing the Cubbies and the Alleys meeting the highly touted AEPi "B" team, 54-18.

So far this season, the FPEs have compiled an impressive victory record with the help of some of the most prominent players, among these memorable players the most outstanding was the head coach, against the American "B" in which the FPEs tallied 27 points to the Air Force 6. After this, the NNTOC, and Freshman Arnie followed the example set by the Air Force and were eliminated 24-0 and 24-0.

You look around the Alpha Sig's are all set to meet the IM challenge. During the year they set the pace for freshman Bob, Joe Land, Bill Kramer and Mac Curran made the ME's feel at it the air won't be full of FPE's rain.

The ME's only love runs. After the first half when FPEs Stratos ran a long pass from Ken Hudson for a TD and a short score from Hudson to Ron Metz made the ME's 2 points. From there on in, it was the FPE's who did all the scoring. Worn the ME's kicked off and ran for a gain of 20 yards and managed just three plays to tally a score. Ken Hudson again ran a 60 yard touchdown to Campell, for the score, a short hook to the line from Kramer to Kramer made it 7.

Shortly after, Kramer passed to Kramer for another TD and then Christine kicked on to the 50 yard pass for the PAT. The next seven games when Kramer scored a 1-yard TD run and two 6-yard TD passes for the FPE's closing the final score 21-7, with John all of the way.

In Nov. 51, the FPE's will meet the IM champions, Alpha Sigma Phi, in the fall season's slide rule bowl game. The winner of that game will dominate the season as the most important question will be, "Which team will win the Bowl?"

From Where I Sit

By Bob Abrams

CORRECTION DEPT.: Misquote made in column of Oct. 31, 1933. "Oye Verity" is more of a Biblical term than that of Shakespeare's favorite. I just couldn't believe that Shakespear thought that way. Apologies!

The basketball squad, after recovering from the intoxicating effects of the final ball, are scheduled to meet Concordia next Thursday at 7 p.m. If anyone doesn't have class Thursday afternoon, they can get into the game at the Concorde gym in River Forest, Illinois. The game is scheduled to start at 7:35.

A revision in the basketball schedule has been made. Our team will meet North Central on December 3 instead of December 20. This date was changed because it interfered with the running of the Tech Tourney which will start on the 10th of December.

FPE's trampe ME's in IM finals, new champs

The regular intramural football season is over at last, with only the a.m.u.i. technical field day carried on last Friday, November 6, sponsored slide rule bowl game remaining to be played.

As the smoke of battle cleared and the wounded were carried off the field yesterday, the FPE's proved that they can play as well as they played off our ME's to claim last year's IM championship. The passing of Ken Hudson, and the ready signals of Don Pales, Lynne Stratton and Bill Kramer gave the ME's offense a hard time, but Jim Kossman's efforts and the sudden run bands of Bob Zekos, Joe Lokar, Bill Kramer and Mac Curran made the ME's feel at it the air won't be full of FPE's rain.

The ME's only love runs. After the first half when FPEs Stratos ran a long pass from Ken Hudson for a TD and a short score from Hudson to Ron Metz made the ME's 2 points. From there on in, it was the FPE's who did all the scoring. Worn the ME's kicked off and ran for a gain of 20 yards and managed just three plays to tally a score. Ken Hudson again ran a 60 yard touchdown to Campell, for the score, a short hook to the line from Kramer to Kramer made it 7.

Shortly after, Kramer passed to Kramer for another TD and then Christine kicked on to the 50 yard pass for the PAT. The next seven games when Kramer scored a 1-yard TD run and two 6-yard TD passes for the FPE's closing the final score 21-7, with John all of the way.

Fraternity Row

BY DAVE BULFAN

The Veitch Bowling League will open at 7:30 p.m. on Dec. 7 and Dec. 14, of the Deardour & Jordan Rink in Chicago.

The season is the same as last year, and it is to be held at 223 E. Deardour. Both games will be played with the same rules and regulations of the bowling tournament which will run on the list below.

Suggestions (clean ones) will be welcomed as well.

Basketball will begin on the first Monday after the Thanksgiving holiday, minus the chief cause of the canceled sessions, the serious befuddled condition of the weather. The team has been, for the most part, a model of excellence, and the schools should be well pleased with the way they have played. The games will be played on Friday at 2 p.m.

The first round of the tournament will be run as a two league round robin. The second team will then engage in another elimination match, which will begin after the second league starts. The same teams will then engage in another elimination match, which will be played on the second league.

The final round will be played on the second league.

Hein, Prase, Duffe, Rahm

To find the list of students who are members of the fraternity, please see the list below:

- Hein
- Prase
- Duffe
- Rahm

Chuck Lind takes first; Moss & Ogawa place

Five contestants managed to come through with nine out of ten games for the weekend. The first place went to Chuck Lind, 56, in the 700 lb. class. The second place went to Bill Moss, 65, and the third place went to Bill Ogawa, 65, who also tied for first in the 700 lb. class.

The games for this week don't seem as if they will pass much of a problem, but then again, that's how they usually look. The next game will be on the 9th, when the asteroid of Oklahoma will probably be too heavy for the boys. Of course, the boys will only have a narrow margin, as the second game for Moss and Ogawa, who have played fairly well, was close enough to continue.

PT pilot TX 1st, Alpha Sig, 2nd, Delta Tau 3rd, and Alpha Phi 4th

Hein, Alexander, and Long were returning for TX 1st, while others were not too far behind. The Alpha Phi team was led by their captain, Tony, who had just finished the tournament.

Here are the instructions

1. Write your Lucky Strike joke in a plain piece of paper and enclose it with a Lucky Strike cigarette.
2. Send your joke on a plain piece of paper to "Lucky Strike," P.O. Box 71, New York, N.Y.
3. If your joke is selected, you will receive a Lucky Strike cigarette.

Tips to write jokes

- Keep your jokes short and to the point. A joke should not exceed two lines.
- Avoid using dirty jokes or anything that could be considered offensive.
- Be original and creative in your jokes.

Eve's the best way to get away from the problems of life. 

Here's your chance to make your own Lucky Strike joke.

Editorial: Don't let the swimming team drown

Once again luck of student interest has hindered the operation of a usually successful activity. This time, it is the swimming team that is finding it difficult to hold a representative squad.

Up until last February the swimming team was well manned and did very well in intercollegiate competition. Then graduation hit the team, with the majority of the top flight swimmers leaving before the season was truly begun.

Unfortunately adequate replacements have not been forthcoming. The team is in dire need of new talent. As a result, the swimming team may have to be disbanded.

It is still not too late to save the swimming team. With the help of the students, the team may be able to continue.

A responsible consulting organization has reported the results of a continuing study by a competent medical specialist and his staff on the effects of smoking Chesterfield cigarettes.

A group of people from various walks of life was organized to smoke only Chesterfield cigarettes. For six months this group of men and women smoked their normal amount of Chesterfield cigarettes — 10 to 40 a day.

45% of the group have smoked Chesterfield continued and by the end of the six-month period each smoker was given a thorough examination, including X-ray pictures, by the medical specialist and his assistants. The examination covered the sinuses as well as the nose, ears and throat.

The medical specialist, after a thorough examination of all participants, stated: "It is my opinion that the ears, nose, throat and accessory organs of all participating subjects examined by me were not adversely affected in the six-month period by smoking the cigarettes provided."

---

Public Relations writer to help student affairs

The appointment of Robert J. Flitgbin as an editorial assistant in the public relations department has been announced by Stewart S. Hoven, vice-president in charge of development and public relations.

Mr. Flitgbin is native of Chicago where he attended St. Pius high school and was named outstanding graduate of the class of 1940. After high school he attended the University of Illinois and received his B.S. degree in 1943.

For the past two years Flitgbin has been in the Army as an information specialist. He was stationed in Trieste and was re-elected and editor of an Army newspaper there. After discharge he returned to Chicago where he was raised.

Editorial assistant in the Public Relations department, Fillmore will be in charge of all public publicity for the school. The position will include the handling of all sports information in local and national papers, the reporting of basketball games to NCAA, and the publication of the Illinois Tech Transcript, the school’s yearbook, which is an annual periodical issued containing biographies of graduates, technical work, in addition to other features, such as, thumbnail sketches of outstanding players and coach, and reports of previous seasons.

Flitgbin will also be editor of Technology Center News, an internal newsletter published weekly for faculty and staff members, giving information on the latest happenings in the faculty world at IIT.
