Activities planned for Technorama

Flag-Raising

By Bob Krinchuk

RAISING OF THE Flags by the Men and Women of the Technorama Staff on Tuesday at 11 a.m. will kick off Technorama. Fraternity units and APROTIC and NROTIC units will join the program.

Square Dance

Tuesday at 8:30 p.m. a square dance will be held in the gym. All Technorameans are invited.

Variety Show

A forty-minute variety show will open the evening on Friday and Saturday and continue for the entire week. The show will contain such novelty acts as the Black Flag, J. B. Hotel, and the Chicago Chorus Line.

Individual

Activities

Now on the program for this week is the family-student egg rolling contest to be held Wednesday at noon on Oglethorpe Field. Faculty members will be present to add to the fun.

Card Contest

In the MSU Lounge card players will have their day—bridge, 9:30 a.m., Tuesday; golf, 5 p.m., Thursday; and bridge, 1 p.m., Friday.

Organizational

Activities

Inner-Club activities will be held on Armour and Online. The inner-club activities are scheduled for Wednesday, Thursday and Friday.

Fraternity

Activities

After a two-day lay-off, boxers decorations are back. They will be held Monday, Tuesday and Wednesday evenings.

Unusual Athletics

The co-ed and the white co-ed girls square off in a volleyball game on the MSU Court on Wednesday and Thursday.

Road to Ruin

opens May 13

Rough Casting—"Road to Ruin" will be presented at 8:30 p.m. on May 13, in the MSU auditorium.

Activities

The Technorama staff are planning a variety of events for the final weekend of the semester. The theme of the Technorama week is "Road to Ruin."
Technorama’s success will depend upon your efforts and cooperation

What does Technorama mean to you—the students? This year’s activities have the promise of being the best yet, and yet without your effort, work, cooperation, and assistance, it is doomed to failure. The dismissal of classes is not for catching up on lab reports and homework, but to throw the doors of the campus open to the public so the various departments can exhibit their work. It is not a vacation in any sense of the word.

Open Letter

Frost challenge the soph class

OPEN LETTER TO THE SOPHOMORE CLASS—Since we don’t believe that your dignity class could ever come near to beating us, we, the FRESHMAN CLASS, challenge you to a push ball contest during Technorama. The losers will be required to meet the winning classes on the Tech Field the day after the contest—(1) to wear mismatched shoes and socks; (2) to wear one pants leg rolled up (for males); (3) to wear the opposite arm sleeve rolled up, and if you wear their shirt (or blouse, as the case may be) backwards. The odds are that we will probably win by forfeit anyway, but we’re putting the proposition up in order to find out if you’ve got the guts to play us. We bet that you don’t.

If you get out enough guys to make up half a team you’re lucky. In fact, if you manage, by some miracle, to make up a full team, you’ll never be able to score a point against us, not enough brains, and no brains. We’re putting this up to the so-called seniors of the Soph classes together, but we’re sure you know that they don’t believe that the Soph seniors are going to lose to their team lose. We suspect that you’ve got a yellow streak down your back, but our friends in the Freshman Class will try to prove it to the whole school. Will chokeds, what do you say?

...you gonna back down?

THE FRESHMAN CLASS

Letters to the Editor

Students ask action on old McCarthy—Benton case

Dear Editor:

In testimony before a Senate Elections subcommittee in 1951, W. D. Benton, then a democrat senator from Connecticut, accused Senator Joseph McCarthy of “calculated falsehoods and deceit,” “corruption and mendacity,” and “gross irresponsibility.” Mr. McCarthy’s presentation of a study of about 20 percent of the committee’s records, together with his knowledge of the case, led to the election of Benton, who was re-elected in 1952, and Mr. Benton served eight more years in the Senate.

The issue of the McCarthy—Benton case has come up regularly since the subcommittee’s report. The last time it was discussed was in 1966, when the Benton—McCarthy debate was renewed.

Mr. Benton made no attempt to find out if there were people who believed Benton or McCarthy. He simply refused to comment on the matter. He was right in his beliefs, but if he were guilty of the charge, let’s have it proven and proper steps be taken.

We believe Benton, and we want it proved or disproved in court.

If enough students would step forward and send it to their congressman or hometown newspapers, perhaps Mr. McCarthy and his attorneys may yet make a case that a lot of people did believe Mr. Benton and would keep the case.

If Mr. McCarthy is guilty of misconduct, let’s bring it into the open. Should he not be, that is also known. The one way to do this is for the trial to go on.

Pete Olsen

Joseph K. Loeb

as I see it

I was very happy to see Jack Cooper named Man of the Year. His contributions to H.T. have been outstanding and numerous, and at times very much a personal sacrifice.

By the way, a special award should go to Dean Dunkel and Cummings Hans. Mr. Cooper’s contributions to H.T. have been outstanding and numerous, at times very much a personal sacrifice.

I wish to escape from Carriage village to visit my brother in Los Angeles. They were having their annual meeting for student council officials. One remarkable difference from last year was that all the candidates did not have a long line of service on the student council.

Perhaps there were more unknown names on the ballot this year, but I think this made the voting easier. Many freshmen were welcomed at last night’s first meeting of Beat, the student council.

One particularly good idea was the proposal of a new student council meeting. The article did not do as good a job of explaining—the second meeting would be held on Monday and Friday’s classes would be held on Tuesday during the week of Technorama.

Slipstick

From the year

Prof.: “That’s five times this week that you failed to turn in your assignments. Do you have any comment?”

Student: “Yes, sir. Thank God it’s Friday!”

Newton’s third law: the door on the porch light the greater the scandal power.

Analysis: the creature known as woman as seen through the eyes of the chemist. Symbol: W. Accepts atom weight = 120. Physical properties: boils at nothing and freezes at 800°F. Males when properly treated, very bitter if not well treated. Chemical properties—poses great affinity for gold, silver, platinum and precious stones. Effect not clear on reaction to left alone, able to absorb great amount of food matter. Green when placed headless, better looking specimen. Uses—highly ornamental, useful as a tool in solving chemical equations and as a means of distribution of wealth.

It is probably the best most effective income-tax agent known. Caution: highly explosive, unexhausted.

Technotory News

Technology News enters Heap as Ugly Man contest opens

by Dan Glassop

The HEAP, notorious writer of "Slipstick," will be the Technology News entrant in Alpha Phi Omega's "Ugly Man on Campus" contest which opens today. Over 20 candidates have been pre-screened by all the social fraternities, many campus clubs, and departments, and the administration.

Although few people know the HEAP's "Dr. Jekyll" side, all readers of Technology News are familiar with some of his thinking through "Slipstick" (which is censored by his superiors, however).

APO has had some trouble getting the photos of the Ugly Men, but the voting will start today, in the SU lobby. Each penny counts as one vote. Contributions made to the voting will be added to the Campus Charity Chest.

The HEAP

An Ugly Man key will be awarded to the winning individual with the sponsoring or a group raising the most money receiving an Ugly Man trophy.

Jean Staken chosen Queen

Jean Staken was selected on Friday by her fellow students to represent Illinois Tech in the nationwide "College Queen of America" contest.

The "Queen for a Day" radio program is sponsoring the contest. Two photos of one candidate from each college campus will be submitted. Jack Bailey, owner of "Queen for a Day," will select five finalists from the entrants.

The winner of the contest will receive a flight to Hollywood and $3,000 in prize money. She will also have a chance to appear on Monday's "Queen for a Day" program where the studio audience will choose one of the five as the "College Queen of America."

The winner will be announced at the show, May 21, 1954.

Technorama Open House

Sports department exhibits

Technorama Open House departmental exhibits will be on display from 10 to 2 p.m., on Friday and Saturday, May 7 and 8, in the various buildings around the campus.

Self-employed psychological tests such as the Wiggle Rock, Mirror Drawing, and the given to visitors.

The chemistry department is bringing back, by popular demand, the "Magic Stones" demonstrating to the visitors the wonder of chemistry. There will also be a new attraction called "Home That Ooks," in which the visitors will participate by slamming

When You Join

The "Men Who Measure"

When you leave school as an engineer, and land the job of the "men who measure," you'll need the most accurate and delicate measuring tapes. Let's Give the Men a Chance are the most expensive ones because they are expanded to the finest and protected by multiple layers of metal that could put the fine steel in the line. This all-metal tape is stronger, sturdier, and stays true to the ground. The men who measure the job are expected to receive a new tape as a gift. When you leave school, you'll need this tape for measuring the job.

To the graduate who is going to the field of engineering, this tape is sure to be a great gift. When you leave school, you'll need this tape for measuring the job.

For Mildness and Flavor

Camels agree with more people than any other cigarette!
Movie to be shown in SU

Alex Greenwill star in "The Man in the White Suit" to be presented on Wednesday, May 28, at 11 a.m., 4 p.m., and 7 p.m. in the Student Union auditorium by the Programming Committee of the Student Union Board. This event is scheduled due to the postponement of the Rough Riders' performance.

"Harvey" will be presented at the previously scheduled time on Wednesday, May 28, at 11 a.m., 4 p.m., and 7 p.m. in the Student Union auditorium.

This committee has previously presented "Psychological" and the student film, "Better Days.

International Club Plans Picnic

The International Club will hold a picnic May 16 on the farm of Pete Olsen's parents. All members planning to attend should contact Eugene Metz, social chairman, or one of the other officers. They will be able to give further information. The club is extending an invitation to all foreign students at IIT.

IT'S ALL A MATTER OF TASTE

As you sit at the table with college kids, your eyes and fingers tell you:

So round, so firm, so fully packed-

That's Lucky Strike-

The brand that really tops the campus parade.

When you come right down to it, you smoke for one simple reason: contentment. And smoking enjoyment is all a matter of taste. Yes, taste is what counts in a cigarette. And Luckies taste better.

Two facts explain why Luckies taste better. First, L / R / M / F / T - Lucky Strike means fine tobacco...light, mild, good-smoking tobacco. Second, Luckies are actually made better to taste better, always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste. Be Happy-Go Lucky. Get a pack or a carton of better-tasting Luckies today.

The cigarette that really tops the campus parade is Lucky Strike. Enjoy the taste because it's better made!

Colin D. Nye, Boston University

Lucky Strike Cigarettes

CLEANER, FRESHER, SMOOTHER!

New textbook by faculty

"Modern Labor Economics," a new textbook for introductory courses in labor economics and labor relations by Dr. Pearse Davis and Dr. Gerald J. Martin, has been published by the Ronald Press company, New York City. Dr. Davis is professor of economics and chairman of the business and economics department, and Dr. Martin is associate professor of economics at Illinois Institute of Technology.

"Modern Labor Economics" is a transparent and logical study of the working conditions and payment relations of the workers.

"AFTER BALL" (Continued from page 1)

of its kind in the midwest.

"AFTER BALL" (Continued from page 1)

"Do you eat L / R / M / F / T after the dance?" on the South side at 910 S. Western ave. Evergreen Park is the "Martins," a quiet spot with moderate prices. The "Chainsaw" at North Dundee road and Riverdale highway serves, to cars, to get to, and is near the "Culver's," a real pleasant place to dance. On the west side, at 5324 S. Cermak road you will find the "Pelican," a particularly轴承en Bohemian food. The building is located in a 14th Century European castle.

Spreading from fast foods, bars to the "House of Hope", 101 E. Walton street, or "The Red Cat", 75 S. Wabash avenue for authentic Cajun preparations, the "Connors" are at 340 S. Milwaukee avenue at 14th street, in the "Maiden's" of a bar, a very pleasant place to dance. There's a real "Black Forest" atmosphere, too.

As far as you are concerned, one of the best is the "Glass Hat" in the Loop. The relatively reasonable prices (plus federal tax) you can get food and the chance to dance to the music of a fine orchestra (Wayne Martini) is a snappy setting. However, if you want to order, it has to be here before one a.m.

In the end, all too much time between leaving the dance and getting into the car at the various ending places in town starts to seem a bit too late.

To those who have not seen their favorite dance meet, we appreciate both for the usual and the new ones.

700 alumni will be present at reunion dinner on May 7

Illinois Tech's annual Alumni Reunion dinner, to be held in the gymnasium at 6:30 p.m. on Friday, May 7, will feature General Charles L. Bolte, Vice-Chief of the Army and an IIT alumnus, who will speak on "The Role of the United States Army Today." President Retallick will also give an address.

About 600 and 700 alumni and guests will hear General Bolte give a review of the history of global operations at any of the present time. He will discuss missions now assigned to the Army.

Cecilia Barbour, an alumna of Lewis Institute, will receive the Alumni Association's Distinguished Service Award for outstanding achievement as a consulting engineer. A. J. L. Curtis, an alumnus of Lewis and long-time treasurer of IIT will receive the Alumni Association Service Award for long and outstanding service to IIT. He has also been on the Special Gifts Fund committee since 1949.

Election of officers for their coming term will also be one of the order of business. R. W. Rehefelder, a graduate, 1919, and presently Vice-President of

COLLEGE SMOKERS PREFER LUCKIES

A comprehensive survey based on 2,500 student interviews and supervised by college professors shows that smokers in colleges from coast to coast prefer Luckies in all other brands. So, if you are a college student, you'll find Luckies better made!
Liberal arts colleges and Tech confer on combined education

Illinois Tech will be host May 7 to more than 40 representatives of the 19 liberal arts colleges participating in a combined educational program with Tech.

The program, called the "Illinois Tech-ILAC," will enable a student to receive two degrees in five years of study. The student will receive a bachelor of arts or science degree from the liberal arts college and an engineering degree from Illinois Tech.

Students to be cited at Honors assembly

An honors assembly will be held at 8 p.m. on Tuesday, May 13 in the Student Union. All students, their parents, and faculty members are invited to attend this assembly which is conducted under the sponsorship of the Inter-Department Honors Council.

Opening the assembly will be an introduction by Dr. E.H. Deter, president of the IAC. Following the reading of the names of the honors students will be announced by the president of the Honors Council.

Dean Cunningham will present awards to outstanding scholars, one from the engineering school and one from the liberal arts school. These awards are to be chosen by Dr. E.H. Deter and Dr. J. A. Clark, respectively.

The chemical engineering department will present a model of the University of Illinois and the methods of its operation at a single-semester technical seminar. The model will be shown by an experienced technician in the machine shop. It is expected to take about ten minutes to show all the different parts of the model.

Other departments that are competing in the Techmania Open House exhibit are planning to put together the exhibits that will be shown to the visitors.
Fraternity Row
By Jim Anderson

Thea XI Triangle fraternity fielded an effective squad and acquired second spot in an inter-chapter basketball tournament held last weekend. The highlight of the tournament came as they defeated their rivals, Northwestern Chapter.

The Big 30.II. Triangle captured first spot in all but one of the events, their outstanding performer being Jack Kellie, who scored 20 points in the 40 yard dash, and converted two field goals. Bob Kline captured the 40 yard free style in 6.9, 0.0 sec. John Sanders and Bob Bohnke finished first and second in the 140 yard free style, beating opponents by only one second.

John Bowsberg of Triangle, the only outside to place first, claimed the honor of his performance in the 40 yard free style. The team point scores are as follows:

FPE's top Physics ten: Spooked edge Big Baazoons
By Gene Knox

The powerful FPE. squad maintained its winning ways last Friday as it made chandeliers of the Physics ten, 37-0. In two contests, the FPE's have amassed a fabulous total of 57 runs while permitting only 3 to their opponents.

In Wednesday's tilt, the Spooked racked up their second straight win as they bettered the Big Baazons, 8-4. Elsewhere, the Demons had difficulties with the Co-Co, but managed to eke out a 3-2 victory, while the Chem Majors were nipped by an ever nimble 7-5 over a weak N.O.R.I. squad, 9-5.

The Archites lured the M.E. in their battle as they smashed out four runs in the last inning to overcome the M.E.'s 4-1 lead, and win the bell game 5-4. The winning run was a thrill, occurring with one out in the last inning with archit. Ed Goldmark on third. The next batter hit an easy one to the third baseman holding the runner and throwing to first as soon as the ball left the infield. A blind slide, however, averted the fumble, with a smart slide to score the winning tally. In the games played last Friday, the Soph Chem Esgs scored their second consecutive victory as they crushed the Co-Co, 21-8. The AFROTC "A" avenged their loss earlier this season, 2-1, but fell to the Chem Majors, 2-1, to make the AFROTC "A" meet the Charm Majors on Oct. 27.

Meanwhile, the AFROTC "A" couldn't match the efforts of its better half as the 16 Deans, having already kicked the ball around with their opponents, struggled to register two straight.

Last Monday's scheduled games was all business due to the "damp" conditions of the playing field (see pictures).

Seven teams in the I.M. league continue to beat on beaten records. The F.P.E.'s, Spooked, Soph Chem Esgs, Archites, and Chem Majors remain without a loss.

Today's contests find the Chem Majors

Hank's Harpings
by Hank Curcio

The I.P.'s softball schedule is due to open this Sunday with eleven doubleheaders for the coveted first place trophy, which at present is in the hands of the Alpha Sigma. Competition promises to be tough, so watch the scramble. The I.P.'s lineup is shaping up quite rapidly, although hampered by the lake which has formed on the North end of the field. Year after year, the same conditions prevail on the day before the first game of the season. In 1951, Technology News ran a picture of the field after a storm. Another picture was taken this past week. The similarities between the photos are amazing. It would appear that absolutely no work has been done on the field in two years.

Actually, very little is ever done. I've seen a mower in the gym which was directed to Buildings and Grounds, indicating that the field should be raked and filled in during the early part of the semester. Buildings and Grounds has just about completely ignored the information that absolutely no dirt has been added to the shallow part of the infield, and very little raking has been done.

But I suppose they have more important duties, such as planting shrubs in the center of the croquet courts.

The Tech News came through with a victory in their third outing, quite an accomplishment for a squad which has been in practice for only four months. The season started with the Tech News leading off their season with a victory over their rivals for the first portion of the season. I expected it to be a long haul for the team this year, but their improvement has been so rapid there's no telling what will happen during the remainder of the season. Explanation by Glancy as catcher Dick Grable singled across the first run of the season for Tech in the Chicago game: "Thank God! The fans are here!"

Make your own "proving ground" test

You can easily tell the difference between engines when you drive and the difference is all in Chevrolet's favor! That's because Chevrolet's great engines deliver full power even when you don't.

Carroll hands Tech netman second loss

Tech's tennis squad collected their second loss of the season last Thursday at the hands of the Carroll college netmen, 6-1. Captain Paul Festu and Owen Krueger were the only Techs to bring home a victory in their singles match. While Krueger and Bill Kayser teamed up to give Tech's third and final point of the day in the doubles.

Chevrolet is out ahead in powerful performance

The Chrysler and Ford cars are the answer to your problems, and they're the answer because they're out ahead in power, performance and economy. You can tell the difference between engines. You can tell the difference between cars just by the way they drive.

...and we know this is what you'll find

Chevrolet is out ahead in economy

Chevrolet is out ahead in powerful performance

Chevrolet is out ahead in economy

Your test car's ready now... We'll be glad to have you examine the smooth, quiet performance of this new Chevrolet with any other car in its class. Come in and put it through any kind of "proving ground" test you care to, and judge it to your own satisfaction. Your test car's ready now and we hope you are, too.

Summer conference to be at Lake Geneva
By Ed Schwartz

ITSA's annual student government summer conference will be held this year at George Williams College summer camp at Lake Geneva on June 12, 13 and 14.
The Conference brings together all ITSA officers of the country, the Dean of Students, the Assistant Dean of Students, the Generals, and representatives from other student groups.

The three days will be packed with events for seniors to get acquainted with one another and to enjoy the lake's beauty.

Panel discussions and workshops are planned to be held on various topics, including leadership and teamwork.

The Conference will also provide a great opportunity for attendees to network and build connections with other student leaders from across the country.
