“Flounders Frolic” tonite in SU auditorium

By Ruth Kemahl

Have you ever danced under water? This new and exciting experience will be yours if you come to “Flounders Frolic” tonight at 8 p.m. in the SU Auditorium. This event, which is being sponsored by Pi Delta Epsilon, Journalism, honorary at ITT, is free for all the boys and men, and twenty-five cents for unescorted women.

An under-water theme will be depicted, combining the splash of water, fish sounds, swimming, and dancing. The music, provided by the orchestra, will make this a night no one will forget. Those who can swim will be encouraged to participate as a part of the swimming section, and the others will be given a swimming cap and thrown into the water, where they will have as much fun as the others. The refreshments will include a variety of beverages, including water, pop, and fruit punch.

Flounders will be served, and the decorations will be eye-catching. The invitations will be distributed by the sponsors, and all who accept will be given a free ticket to the event. The proceeds from the event will be donated to the scholarship fund of the University.

The event is open to all students and friends of the university, and all are encouraged to attend. For more information, please contact the sponsors at the Student Union.

Dean Brown heads new appointments

William Brown, former counselor in the dean of men's office, has been appointed assistant dean of students at Illinois Institute of Technology. Previously, he had been working on his doctor of philosophy degree in guidance and student personnel.

Brown's appointment became effective September 1, according to Dean Deats. Brown, 31, of Chicago, will have additional duties in the area of student activities and will be in charge of all the residence halls.

Brown will be responsible for developing policies and procedures for the residence halls. He will also be in charge of the residence hall council, which is made up of student representatives from each hall.

The residence hall council meets monthly to discuss issues related to the halls, such as security, maintenance, and programming. Brown will be responsible for ensuring that the council is functioning effectively and that the issues of the students are being addressed.

Brown is a graduate of the University of Illinois at Urbana-Champaign, where he received his bachelor's degree in industrial recreation from Purdue University.

In addition to his duties at the university, Brown is also active in community service. He has volunteered at various organizations, including the Salvation Army and the Red Cross.

The appointment of Brown is expected to strengthen the university's efforts in providing a safe and supportive living environment for its students.
Student organizations provide opportunity to develop leadership

It's slipstick season again and time to tackle this obstacle between us and next summer's vacation—school. Technology News would like to pass on some advice which can make these next nine months less tedious, more interesting, and generally more worthwhile.

Techhawks like to feel that they are sharp enough to predict opportunities and to prepare for them. Almost every man on campus will quote that as a factor in his choice of a field of study.

Yet, there are a multitude of opportunities on campus which we never realize by most Techhawks. We are referring to campus activities.

An engineering education is tops for training a man in the logic of problem solving. But let's face it, the majority of a professional man's career is working with people, seeing that his ideas are carried out. Classroom will not give you this experience, but working in a campus organization will.

Also, keep in mind that employers count experience gained in activities when they hire you. They want men who have shown leadership, especially in professional organizations.

Or look at it this way: Tech charges on the average of $18 per hour, but there is no charge for what amounts to a course in dramatics learned by spending some time with the dramatics groups.

Then there is that most important, but least tangible of qualities gained from experience in activities, the creation of the "all-round man." This is universally respected for his ability to act with experience and confidence when it comes working with and leading his fellow man.

Our advice, then, is to recognize these opportunities available in campus activities and take advantage of them. Join one of the student organizations and see what we mean. D.T.S.

as I see IT

By Hank Carole

Greetings, hobbies! All prepared for the lovely year of learning? After a busing summer of wine, women, song, and Money, most of us loyal Techs are probably ready to get back into the long awaited routine of quizzes, homework and lab reports. Oh joy.

Once again, ITS's summer conference was a success, although that Gloupse character insisted on interupting it with hourly meetings. The relaxing weekend was held from June 12 to 14 at George Williams College, Lake Geneva, Wisconsin. Accommodations, food, and social events were found very satisfactory.

Ex-assistant Dean of Student Affairs, Bob Cunningham was given a long over-amorous male Techhawk by being flipped into the cool beer glass. Much like on the last day of the conference, Bob took the dunking in good humor (what else—he was outnumbered). Our new Assistant Dean, Mr. William Brown has a bit of catching up to do and is forwarding to next year's conference.

Quite a few changes have popped up around the campus since last June.

The new location of the school publications (second floor, S.U.) has been thoroughly enjoyable by the editors of Technology News and the (integral), mainly because they now possess their own private offices.

Construction of the two apartments on Michigan and Thirty-first is proceeding at a rapid rate and, with the new piece of campus between Michigan and Washburn on Thirty-second, adds to the development of Technology Center.

Not all the changes have had to do with new construction. There have also been several changes in the hierarchy. The welcome mat is out for Mr. William Brown, new Assistant Dean, who is Miss Josephine Dawson, recently appointed counselor to women students.

Slipstick

A long skirt is like prohibition—the joints are still there, but they're harder to find.

When women go wrong, men go wrong—after them.

"It's so simple," modestly excuses one E.E., "to hook up electric power circuits. It merely fastens leads on terminals and pulls the switch. If the motors run, we don't care. If it smokers, we sneak back and get another one.

He: "Drinking makes you beautiful."
She: "But I don't drink."
He: "But I do."

When the grocer's little girl came home after a holiday at her aunt's, she found that triplets had been held to the family.

"How silly of you, mummy," she said, "you should have done the ordering—you dad stuttered!"

Hostess: "I have a homework bachelor I'd like you girls to meet."
Athletic Girl: "What can he do?"
Chorus Girl: "How much money does he have?"
Co-ed: "Where is he?"

The newly married hostess at her first cocktail party was passing out cocktails and comments and doing her level best to make everyone feel at ease. She smiled sweetly at a middle-aged guest and said, "I won't offer you a cocktail, Mr. King, because you are president of the Temperance League."

"No," he corrected, "I'm the president of the Anti-Vice League."

She nodded absently and said, "Oh, yes, I knew there was something I shouldn't offer you."

A freshman engineer is a young man who knows why a strapless evening gown is held up, but doesn't yet know how.

She tenderly whispered, "Jim I was the first girl you ever kissed?"

The engineering reply was, "As a matter of tact, yes."

Then there's the one about the poor fellow who caught his buddy making love to his girl. There was a lapse of silence and then he said, "I don't mind your kissing but get your hand off my intermediate pin."

The skin you love to touch is usually covered up.

As usual, SAAF has done a fine job with its orientation program, for the incoming students. Meetings, parties, and luncheons are given in an attempt to introduce the new students to the school and to get them started in their college career.

The pagination of the paper has also been especially printed for the Technic neophytes. We hope you enjoy it, and we're looking forward to working with you and the campus and Illinois Tech.
Fraternity row begins rush week for new students

Another semester of formal rushing commenced last Wednesday at the Interfraternity Council's introduction of the incoming students to fraternity life with a movie, "Tea and Syrup." A speech by John Schommer explained the full meaning of fraternity and fraternity life here at Tech.

Coordinated by Frank Savetis.

Wednesday afternoon's program started off the week of rushing by Tech's fraternities.

Wednesday evening, the rushers were dinner guests at the various fraternity houses along the row. Dinner began at 6:30 p.m., and by 6:45 p.m., the rushers were all set to begin their rounds of the fraternity houses on campus.

Led by two guides from each fraternity, the separate groups of rushers were taken to each fraternity house in succession and allowed to meet the members and look over the houses. Each group was allowed 10 minutes per fraternity house and 5 minutes traveling time from one house to the other. At 10:15, the rushers were given free reign to go back and revisit the houses of their choice.

On Thursday a general mixer was scheduled for the row. This included cards, cookies, and a general hullabaloo.

Sunday afternoon will top off the formal rush week with the fraternities holding informal mixers for the parents of the rushers. At this time the parents may look over the school and all the beautiful buildings.

CCO holds eye clinic for freshmen

The Chicago College of Optometry, in conjunction with the administration of IIT, is conducting an eye clinic for entering freshmen students. The clinic, being held in the basement of the Commons, began yesterday and is ending today. CCO will submit a complete report of the screening to IIT when the project is completed and the results are known.

Ahern appointed to Defense Department

John J. Ahern, director of the department of fire protection and safety engineering at Illinois Institute of Technology, Chicago, has been appointed fire protection consultant to the department of defense.

One of the nation’s leading experts on fire and fire protection, Ahern, will serve as special consultant in the office of the assistant secretary of defense in charge of properties and installations.

Ahern is president of the Greater Chicago Safety Council and recently was appointed to the Civil Service Commission of Chicago.

He was a member of the mayor’s committee that investigated Chicago’s LaSalle hotel fire, an advisor to the consultants for revision of the Chicago City building code, and chairman of a special committee of the Fire Department, which investigated a Chicago streetcar-gasoline truck fire which took 24 lives in May, 1911. Ahern served as secretary of the President’s Conference on Fire Protection in 1947, and from 1942 to 1945, he was with the Ordinance Department of the Army as fire protection and safety engineer. While with the Ordinance department, he organized and directed a program of fire protection programs in employe and industrial safety.

A graduate of Illinois Tech, Ahern received his bachelor’s degree in 1935 and his master’s degree in 1937. Upon graduation, he began his career as a fire protection engineer for the Milkhouse Inspection Bureau. In 1940, he became a member of the staff of the Insurance Company of North America, Chicago.

He joined the Illinois Tech faculty in 1945 as a professor and director of the Institute’s department of fire protection and safety engineering.

Ahern is a consultant of several major insurance, industrial, utility companies and the Chicago Fire Department. He is a past president of the Society of Fire Protection Engineers.

He resides with his wife and two children at 4720 S. Ada street, Chicago.

Summer vacation finds relocation of organizations

Technology News, through the National Fire Protection Association, Alpha Phi Omega, Sigma Phi Epsilon, and Tau Rho Phi have all relocated during the summer vacation.

The publication staff may now be found on the west side of the Student Union auditorium, which was formerly the office of the Personnel Department.

The university library is located in the new building, with the main office of the Personnel Department on the second floor. The old office of the Personnel Department has been converted to a temporary office for the registrar.

TFA and Alpha Phi Omega, the two largest organizations on the campus, have moved to the new building. The TFA office is located on the second floor of the new building. The Alpha Phi Omega office is located on the first floor.

THE INCOMING FRESHMAN WATCH A PROGRAM PREPARED FOR THEM BY THE SAAB. THE PROGRAM FEATURED A SHORT FILM ENTITLED WHAT’S MY SUMMER JOB?

SAAB handles details of Introduction to Tech campus

Today marks the beginning of Orientation Week, the six days of introduction to the Tech campus conducted by the school and by SAAB, the Student Activities Advisory Board. SAAB is an effort by the students to help the freshmen become an integral part of the Tech community.

Students have been meeting with their counselors who take the students on a campus tour, help them through registration, and add them to the schedule.

This Orientation Week committee, headed by John Maddox, is divided into two groups, the Freshman Party and the Student Activities.

The Freshman Party, headed by the president of Freshman, was held Tuesday afternoon at 1:00pm in the Student Union. The presidents of the student organizations are the Student Activities advisor.

NEWS BRIEFS

By action of the City Council, the south curb of 3rd Street, between Michigan Avenue and the river, has been designated as a taxi stand. The curb may be used only by taxis.

The Student News, a weekly paper, will begin publication next week. The paper will be published on the second floor of the new building.

The Student News is now being written by students, and the paper is being edited by students.

Lake Geneva scene of ITSA summer conference

Twenty-seven student leaders journeyed to Lake Geneva, Wisconsin, after final examinations last June for the Annual ITSA Summer Conference at George Williams college camp. These students were the heads of the various student organizations and members active in those groups.

Various representatives of the faculty and administration were also present at the conference. C. R. Dieckow, dean of students; Mrs. Moriya, woman's counselor; Carl Green, professor of art; Mr. Temple, registrar; and Mr. R. B. Cunningham, former assistant dean of students were among these present.

The first session of the conference opened at 2:30 p.m. on Saturday, June 12. After Dean Dieckow had briefly discussed the purpose of student government at ITSA, Dean Cunningham described the history of ITSA and the other universities on the campus. The discussion continued until the time for lunch at Lake Geneva Junior Youth A.R.T. meeting, where Dean Dieckow was the speaker of the day.

In the afternoon the conference was divided into smaller groups for various presentations, public relations, student publications, and various other topics. The groups were tasked to submit their findings for review to the ITSA council.

The final session of the conference was held on Wednesday, June 12, with all members present. The conference was closed by ITSA president, who thanked the members for their hard work and dedication.

Your signature should be worth an ITSA card

As you finish the last section of registration you will be asked to sign your name in a large notebook, whereon card which will be mailed to you upon receipt.

Persons who don't sign their name on the list above will not be able to use the name for their respective cards. Those who sign their names can expect to receive their cards within a week or so. Those who sign their names after the list above will be mailed their cards as soon as they become available.

ITSA cards still available

Due to a misunderstanding as to the official closing date of the list above during yesterday's registration, a number of Tech students were unable to obtain ITSA cards.

Those cards necessary for voting at all election committees will be available, and will also serve as identification cards. In addition, all the cards necessary for voting at all election committees will be available the day before the election. If you have any questions about the election, you can contact the office of the Student Council, which will be open from 8:30 a.m. to 9:30 p.m. on election day.

Pigskin Prophets returns to stump Tech experts
By Pierre CEO

The days are shortening; there's a crisp bite to the air and along with the thought of returning to those inevitable books; the eyes of all the sports-minded here at Tech are turning to the gridirons around the country. Until football returns to IIT, we have the choice of any team in the country as our favorite.

The 1954 season brings no changes to collegiate rules. This means smoother operating teams with a greater variety of offenses, higher scores and, especially, more exciting football.

To the disappointment of many, restrictions were placed on the telecasting of the battles some time ago. This year, many are viewing for the first time Canadian football, a slightly different version of the American game. The rapid spread of interest in it should help lessen the prevailing tacking booths.

In order here to cover two of the game's 'big men' personalities who passed over the Chicagoland area:

In sophomore back, Art Wilson, moving southward, we had Leonard Black, end at Duke, a name to watch for All-American honors.

Worth to Baylor reveals a pair of potential in Bill Glass at center and Doyle Trayser playing quarterback. Cameron's undefeated at UCLA, Prime Valvano is the man to watch on the West coast.

Those along with the 'big men' should give U.S. one of its best years in the history of collegiate football.

Staying out in pro ball for a few moments and here personalizing a dozen top players, our championship team is the Kirk-Davis, Iowa Hawkeyes. They have the power they need in the air and along the ground. Helping them in their championship will be a starting newcomer, John Johnson, our choice for NFL rookie of the year.

Now it's your turn to pick your pick and complete some useful prides. The rules of this year's Pigskin Prophets will be slightly changed. One entry per person and the deadline at 9 p.m. the Friday before the games are the main restrictions. Those prizes will be awarded. The forecaster submitting the closest predictions will receive a bid to the Integral Ball with a courtroom of Coach's giving both the second and third place winners.

Anaconda, September 29th, brings the first set of contests. The future could shape up, with Notre Dame defeating Texas, Baylor is favored over Purdue while the Hoosiers are underdogs at Ohio State. Ohio-Michigan state game will mean a lot in the final Big Ten standings. Good luck-Tech fans at the Ball.

Techawk teams looking for aid from freshman athletes

By Dick Grelaw

Teams throughout Tech will be looking for new athletes to fill the vacancies created by the graduating class of 1954. Entering students who have participated in sports of any type are of interest in the various leagues this fall.

Varsity sports at J1T include basketball, swimming, wrestling, track, baseball, tennis and golf. Last year's basketball team was very successful, in order to maintain this successful status, it must have support. Joe Byerly, star at the team and one of the leading scorers among small colleges, has graduated; incidently, never played varsity basketball in high school. Co-captains Eulon and Bill Chrisholm urge any interested new students to come out for the team.

The swimming team lost two of its stalwarts when star diver Dick Reily graduated along with Scott Barkey. If you own, there is no place for you on Tech's team.

Now men are also needed on the wrestling team. Our team last year was not so strong handed; they had to forfeit several matches in various weight classes for lack of a competitor. If you can't make it this fall, try out for one of the spring sports. Last year, a good part of the baseball team was freshmen. If you're not afraid of work, go out for Varsity Sports.

Basketball is a popular sport and in interest and born in competition. Last year's football champ, the Delta, having lost Bob Zetkin, will be hard pressed. Early in October the gallery will rise up. Phi Kappa Sigma, champions from last year, are among favorites to win. The Phi Nu four have lost one star in Ed Reiley, Dick Scott returns to lead the team. The IP innus, along with the bowing competitors are held in the fall. If you're a member of one of the fractions, opportunities know.

IUI sports offer usual opportunities. Get together with your classmates and organize a team. Everyone has a chance to win, but participation is the main thing. If you do win, you'll play the IP champ in a grand playoff. A few of the sports awaiting you. There's touch football, basketball and volleyball. Take your pick.

Remember your sport, whatever your experience, get out and participate. Support your team.

Tentative basketball schedule for coming season released by Glancy

Basketball comes into the news this week with coach Ed Glancy's release of Tech's 1954 tentative basketball schedule. Games with the schedule as expected, Tech will also play during the December holiday.

The season opener with Tech basketball tournament on campus, should prove a real test for both. These closer they will be at Monmouth, meeting a reportedly strong five. The second game, Carroll, the Tech's 1953 team, will be a fine opponent, will be on the floor of DeLaSalle's gym on the eleventh of January.

The Glancy Coopers, well known in this territory for their tour of realms against Loyola last season, will make their appearances on the schedule and the following evening, the Maroons of the University of Chicago will be on the floor at Third Avenue and Devon.

The remainder of the schedule shows the Techawks in re-match against those same teams except for the second in which Tech will meet the Big Ten title, DePaul at the South Bend, led by the name of Dick Fitter, and will be a sight in the panning of Terry Brennan's 1954 eleven, Wortman and VanKampen was his 'go-ahead' signal. Hailakka, at the field by a leg injury last year, will again be a factor.

In the East, at Yale, a school seldom noted in the field, the Tech will be a heavy hill which should hit sports fans in many places. To celebrate his silver anniversary, Coach didn't have much of a power house at Columbia, but he will find some competition.
Grulow's Groans
by Dick Grulow

With the semester about to begin, the sports fans here at Tech are beginning to turn their eyes to things besides pencils and books. Once again crowds will gather around Ogle Field to witness the contests which the Intramural and Interfraternity football teams will stage. Last years Intra-mural champions the AFROTC will be out to hold their title. As things look they have a good chance to re-claim again. The Navy, as always, will probably give them a tough battle.

The Delta will have a hard time hanging on to their IP football championship. Most people will be rooting for the entry from the Sigs and the Phi Kappas. The Delta will feel the loss of the great Bob Zeke, who graduated in June.

All incoming students are invited to attend the first intramural tryouts which will be held on Wednesday the Twenty-second.

It is hoped that all the spring sports will begin seeing their members again this fall when the basketball, golf, swimming, wrestling, and tennis teams begin workouts. Tech's sailing club will be looking for new members once again this fall. This club captured the Illinois State Championship for dinghy racing two years ago. In this tournament they won against teams representing schools like Northwestern and the University of Chicago.

From here it looks as though our swimming team led by co-captains Pardo and Heim should have a good season.

The loss of center Joe Byerwalter will force basketball opponents to revolve their plays around the team. Bill Christensen and Ed Thulien, this season co-captains will lead the basketball team.

I'd like to see all you talented freshmen out for our fall sports. You don't have to be a star to play for Tech. All that's required is a will to win and enough interest to work hard.

Fraternity Row
By Gene Krep

Here it is, the time of year again when the Fraternity Row swings open its doors (and dorm doors too) to the face of the great coming students. It is the time of year when the Fraternity Row comes into its own. It is the time of year when the Frat guys take it easy, the time of year when the social activities of the Fraternity Row are in full swing. It is the time of year when the Fraternity Row is in its glory.

Athletes receive spring awards

The highest honor an athlete can receive is the letter award for extramural play in his sport. At the end of the Spring semester the Athletic Department of Athletics announced the following award winners:

Baseball: Joe Wright, first team; Bill Chappell, second team; Tom O'Brien, third team.

Basketball: Bill Chappell, first team; Joe Wright, second team; Tom O'Brien, third team.

Football: Joe Wright, first team; Bill Chappell, second team; Tom O'Brien, third team.

Volleyball: Bill Chappell, first team; Joe Wright, second team; Tom O'Brien, third team.

The members of the Fraternity Row are proud of their athletes and the awards they have received. They know that the athletes are proud of their Fraternity Row and the awards they have received. The Fraternity Row is proud of its athletes and the awards they have received.

Golf coach Bibb sets practice date

Golf Coach Bibb announced yesterday that he has scheduled a practice for Saturday, Sept. 23. On the following week there will be a meet with the University of Chicago.

All interested students are urged to contact either Coach Bibb or captain Ron Kammer.

Essay scholarship grant to offer
$1,000 in prizes to undergraduates

A fine opportunity for undergraduate students to win financial aid presents itself with the Thomas Ludberg Engineering Essay Contest. The contest is open to all students, and offers a $1,000 prize in recognition of outstanding achievement in engineering. The essay will be judged on the basis of originality, depth, and clarity of presentation of the writer's ideas. The winning essay will be published in a major engineering journal, and the author will receive a certificate and a cash prize. The deadline for submission is December 15, and the winner will be announced in January. For more information, contact the Engineering Department at your school.

RUSH WEEK
(Continued from page 3)

This week will be the final week of the Rush period for all members of Pi Kappa Phi. The brothers have been working hard to prepare for this final week, and are hoping to impress potential new members with their enthusiasm and dedication. The Rush period is an important part of the fraternity experience, and provides an opportunity for members to meet new people and form lasting friendships. So be sure to come out and support your brothers this week!
