Registration changes now being considered

By Ron Wehbank

Further changes in the registration and scheduling procedure, which would widely affect every student, are being actively considered by the faculty. These changes are being considered at the request of the students and faculty for several years. If adopted, these changes are expected to reduce the student's work load, to improve the student's ability to balance his course work and work schedule, and to provide more timely course registration and scheduling. These proposals are currently being reviewed by the faculty and are expected to be presented to the students in a formal hearing in the upcoming weeks.

The proposals which are being considered are:

1. An unassigned class schedule.
2. A curriculum change in the student's major.
3. An expansion of the number of hours in which the student may register.
4. An increase in the number of times a course may be scheduled.
5. An improvement in the accuracy of the student's information.

The proposals are currently being reviewed by the faculty and are expected to be presented to the students in a formal hearing in the upcoming weeks.

Toys to be collected next weekend for poor children

By Jan Robers

The Toys to be Collected will be held next weekend at the intersection of Main Street and Mill Road. This is the second year that the Toys to be Collected has been held, and it is the largest toy drive in the town. The drive is currently being coordinated by the Volunteer Fire Department, and all proceeds will go to the local charities.

The drive is currently being coordinated by the Volunteer Fire Department, and all proceeds will go to local charities.
Student blames administrative policy for apathy in activities

Everybody complains about student apathy and its effect on activities. Nobody bothers to ask why we are so uninterested.

A big reason was shown last week. The hub of every activity on campus depends on the whim of one person sitting in the dean's office. Many IIT organizations attempt to organize a round of activities, but in such a way as to escape the notice of the administration, for bitter experience has shown that all that ever comes from there is "NO."

We have a carefully watered houseplant known as IITSF to preserve the illusion of student control, but time and time again it has been shown that when the chips are down Dean Dakins can and will shove everything aside and govern by absolute edict. Illinois Tech's motto may well be phrased "The student be damned."

There is no real putting in valuable effort and precious time and sweating over something that can be knocked over by a word. There is no glory in running for an office that makes you a rubber stamp for the dean's office. Nor well that the little boys bellowed that Dakins forced his will on the students, but that he didn't follow the usual channels. But he did.

Nobody has ever questioned his ability to have anything at all run smoothly the way he wants.

Consciously or unconsciously most Techies realize all this. Since their main aim is to get an engineering education they put up with it. That is, if you have any respect for their social life something completely separate from the school. In a city this size we don't have to stoop to death hoping the campus will give us something it cannot possibly provide. If we have any sense, we will leave student government to office holders instead of trying to fight city hall. We will, as most of us do now, board a streetcar at 9:00 and head for home, after rejecting all invitations to participate in "student" activities.

The Opposition

Commends Dean for his action upon 'Slipstick'

Dear Dean Dakins:

Your insistence that the so-called "Slipstick" column as the Technology News must be discontinued is commendable by all who have dealings with the Institute at large. My own feeling is that I am on record to that effect, that is long overdue.

Some of us had thought that this column (it is hard to find an adjective that it has been discontinued) was necessitated by the lack of a number of sources together with an impressive supply of material, and that it was wasted time and effort. How any normal person can think that a publication which is a part of the student body and a part of the school, can continue to exist among the infarties of student sentiment is amazing. In those of the Institute could possibly read a course book and get by. The result is that for the fun has always been meaningless.

Yours faithfully,

O. Griswold

Editor's note: Ms. Griswold, of the Griswold & Associates, management consulting firm, is also on the Board of Trustees of Illinois Institute of Technology.

As I see it

News will serve as the Cinderella for Mr. Dakins in accepting written contributions from all the students.

For any interested souls, the sixth week D and E club may not have been picked up at the departmental offices either today or Monday, according to the Registrar's office. It appears that the Integral Roll will not be a complete selection, as the usual number of candidates are not up to the standard set by the dean. In fact, I am told that the students have been investigating the activities with the hope that some may be picked up at the departmental offices.

Another selection was last Wednesday's Military Bowl game. The editors of The Illini were not only present with all the usual numbers but also prominent members of the faculty. It's good to have a school which takes an interest in student activities.

Speaking of the faculty, I see Sonny Welsman is attempting to organize a faculty baseball team which will make use of the facilities in the Commons.

Students will be standing twelve deep to watch their favorite instructor. Figure out the curvature of the bats necessary to fill the entire pocket-square.
Rettaliata cites shortage of specialists in city planning

Dr. John T. Rettaliata, in his address at the City Club of Chicago meeting, stated, "More trained specialists in city planning are needed if urban communities are to accommodate the projected increases predicted for the future." He noted that the population of the country is expected to reach at least 210 million by the end of the century. He also said there will be a need for "thousands more trained in city planning, construction, transportation, and other activities."

Dr. Rettaliata pointed out that Illinois Tech is one of the few schools in the country that is offering degrees in city planning, and one of seven schools that provides a course of study in city planning for undergraduate students. He described IIT's plans for broadening its planning curriculum into a department of city and regional planning offering degrees for undergraduate and graduate study. The new department, supplementing the urban planning study offered open in architecture, students, will be a part of a new division at the Division of Design. This unit will be created to coordinate its activities with those of the Institute's architecture department and the Institute of Design.

Dr. Rettaliata noted that the result should be a material enhancement of Chicago's position in those three fields. Among the advantages he cited were:

1. Chicago will become more of a focal point for the research and understanding of planning resources and urban systems.
2. Leadership in the "Chicago School" of architecture will be fortified and strengthened.
3. Organizations and firms active in planning will be provided a more valuable field of study and training personnel.
4. Chicago will gain a reputation as an area where people of creative ability are attracted and prosper.

The function of many architects and urbanists and from better health and more complete expected to stem from the Department's functions.

"Just to think of the Chicago School of tomorrow is a challenge to the arts, said he. "Our leadership in the various art areas and sciences which will determine our living conditions in the future depends greatly upon the productivity of the teaching and research programs of educational institutions.

"Such institutions are the source of supply of fundamentally trained people, scientific discovery, and the development of better production methods, materials, engineering, and techniques."

Kappa Phi Delta celebrates 50 yrs.

This year Kappa Phi Delta will celebrate its golden anniversary at its annual alumni meeting. The meeting will be held at the Pegasus Hotel, 100 E. Pearson St., from 10:30 a.m. to 12:30 p.m. on Saturday, November 20, when a luncheon will be served to the alumni.

In 1924, Kappa Phi Delta was founded at Lewis Institute, one of the founders of Illinois Institute of Technology. Until the time of its founding, there had been no social organization at Lewis Institute. One of the Kappa Phi's traditions is the annual Try-Harvey dance, which benefits the underprivileged neighborhood children. This year's dance will be held on November 20.

WINSTON

brings flavor back to filter smoking!

Winston Filter Cigarettes

finer filter!

finer flavor!

king-size, slow-burning!

The truly superior Winston filter doesn't "thin" the taste or flatten the flavor. New Winston's got real flavor—full, rich, tobacco flavor! Along with fine flavor, Winston brings you a finer filter. It's unique, it's different, it works so effectively!"
Air pollution problems are discussed at Chicago meeting

Arts & Sciences Foundation scientists highlighted the attack at the Midwestern Air Pollution Association conference on November 9 and 10 at the Sherman Hotel in Chicago. Air pollution in Chicago and other Mid-
western areas was discussed during the two days.

The purpose of the conference was to stimulate interest in combating air pollution, according to the NASPA chairman, Dr. H. A. Lundy, director of ARF.

Four major subdivisions of the program were discussed:
- general aspects of air pollution
- air pollution in other areas
- Chinese air pollution, and practical measures for reducing air pollution

The Chicago air pollution problem was discussed at 9 a.m. on November 9. Speakers for this session of the program were: Edward G. Foch, research chemist with ARF; S. E. White, a student of the program with ARF; E. W. H. McCracken, a senior scientist with ARF; and R. A. H. Reid, a research chemist with Chicago's department of air pollution control.

He's studying a GM Textbook

YES, ever since our first issue — June 1953 — the General Motors Engineering Journal has been welcomed by engineering faculties and students alike as an excellent contemporary source book.

And, we suggest, if you are not familiar with this vast array of GM publications that you check your college library.

But — this is a "circular advertisement" for the Journal.

We mention it here — because we think a glance through any issue will give you a pretty clear picture of the high muck-above and advanced viewpoints of GM engineers. And of the insights and improvements that we find in which to think and work as GM.

Certainly such material, such viewpoints — and such a climax — must be weighed among the assets of a General Motors career.

GM POSITIONS NOW AVAILABLE IN THESE FIELDS:
- Mechanical Engineering
- Automotive Engineering
- Electrical Engineering
- Industrial Engineering
- Chemical Engineering

Tech foreign students meet with faculty

A reception for new foreign students was held on Wednesday, November 3, in the conference room of the AUE at 4:30 p.m. This was the first affair of the kind at Tech.

The idea behind it was to introduce the new foreign students to the chairman and professors from their respective departments, thus giving them the opportunity to discuss their problems and future undertakings at Tech.

At 3 p.m. the reception was discontinued at the executive conference room and reconvened in the faculty grill as a regular seventy international club coffee hour.

New Directory goes to print November II

This year's Technology Center Directory will probably be available to Illinois Tech students by the week before or the week after Thanksgiving according to Joe Pizzuto, editor of the Directory. The Directory was received from the publishers on Thursday, November 11.

He further stated that only 1,000 copies will be ordered so it would be advisable for the students to get their copies as soon after publication as possible.

In the Directory this year, there will be several new features in the beginning of the book. Also, there will be increased advertising which will possibly cut the cost to the students from last year's 30 cents to 15 cents this year. Some difficulty was had by the Directory staff in obtaining necessary information from many students. At the beginning of the year, some students stayed in dorms and various fraternity houses. After the fraternities and sororities pledged, these students moved to the respective houses.

Who are INDUSTRY'S TOP YOUNG SCIENTISTS?

Ten men between the ages of 26 and 40 were featured in a recent national magazine article which portrays a young scientist in America today. These particular men are a sample of the most brilliant young scientific minds in industry.

It's interesting to note that three of the ten are with Bell Telephone Laboratories, three with General Electric and one each with four other companies.

The variety of opportunity in research and other phases of telephone work has always attracted an unusually high percentage of the nation's best young men.

Consult your Placement Officer about opportunities with Bell Laboratories... also with the Bell Telephone Companies, Western Electric and Sandia Corporation. Your Placement Officer will be glad to give you details.

BELL TELEPHONE SYSTEM

Three of the Ten Are at Bell Telephone Laboratories

Mahlon Dickson, Head of the Switching Systems Research Laboratory, and one of the ten young scientists described in the article, is shown in the middle.

Physical Design William S. Weil maintained the emphasis on the picture which appeared in the October issue of Electronics. He is shown at the right.

AFROTC "A"-Navy play to 12-12 tie in bowl game

By Donnie Dann

In the most exciting game, and played before the largest crowds of the year, the Navy scored late in the last half to knock the count, and then stop the Air Force team gaining their first victory of the season.

The formation of rowing team seen possible

Could rowing as a varsity sport ever come to Tech? This is a question which some students have been trying to find an answer for during the past week. Members of the administration and faculty, aware of the student interest in the sport, have raised the question of whether Tech could and might someday become a rowing power.

Dean Brown, Associate Dean of Students, says, "I think a rowing team would be possible if the facilities were available."

Facilities in the Chicago area are currently available to Tech students. The Lincoln Park Rowing Club, located on the Outer Drive, has all the apparatus necessary and will be more than willing to co-operate.

There is a great possibility of a crew at IIT. This possibility, however, rests entirely in the hands of the student body.

A technical university needs athletic activities to develop a well-rounded person. A "Mr. Millikan" individual is prized for his lack of drive and personality.

Athletes are brought into high school and college, mainly because they fill the gap in character and personality left by a purely academic education. Coach "Sunny" Weisman, chairman of our gymnastics education department, comments, "It is in favor of any athletic activity. For the 12-12 tie was won by Tech, which was led by the physical education department over the administrative recognition it as a varsity sport.

This one's on you

We mean the collar... and if you're a snappy sort of fella, you'll keep several Arrow spread-collars shirts on hand. Pick Arrow Fair, left (3.95). Pick any of the smooth styled shirts, but be sure you pick an Arrow. For immaculate tailoring, and the "smart look," Arrow's the shirt for you. Prices start at 2.95.

ARROW SHIRTS & TIES
UNDERWEAR • HANDKNEECHEFS • CASUAL WEAR

And now it's our treat!

We have a complete assortment of Arrow spread collars for every need. For instance, the Arrow Mid and Arrow Midway which are both dress and casual, and Adler, 4.95. Prices start at 2.95.

In the last game of the regular football season the Phi Kappa and Sig Rho played to a scoreless tie to finish with identical records of four wins and one loss each.

The game was determined by a flip of a coin which the Phi Kappas won.

The Alpha Sig held first place in league two with the Aeps in second place.

Cpton Dig will be the tail end of the Phi Kappas and the Sig Rho will play the Aeps in the first game of the regular season on next Saturday.

The Alpha Sig held first place in league one and the Sig Rho in second place on the last day of the regular season, the Tri Sigma was 3-2 in the Sig Rho equal to 1-2-0.

The biggest game of the week came Tuesday when last year's champion Delta Tau ran into the Sig Rho white team, who scored two touchdowns for the once beaten Delta Tau, winning 14-0.

The Tri Sigma, losing 3-0 with only minutes remaining, put in a determined drive and scored in the last minute by a run from the backfield.

The Delta Tau lost 4-0 with only minutes remaining, putting in a determined drive and scored in the last minute by a run from the backfield.

The Tri Sigma lost 4-0 with only minutes remaining, putting in a determined drive and scored in the last minute by a run from the backfield.

Sailing club places in Northwestern meet

Last Saturday the IIT sailing club participated in the sail-in for the Agnus Vautier Race to be held Thanksgiving Day. The preliminary races were held in the afternoons at the Chicago Yacht club.

Annapolis Bill Davidson and Chuck Slusser and crew;

Peter Andrews and John Burnham made up the 11's. team.

Davidson and Andrews raced the only two races, placing fourth both times.

On the first race for the first was Marquette, Wisconsin, followed by Washington, IIT and Chicago. In the second race the leaders were Wisconsin, Minnesota (streaks), Marquette, IIT and Chicago.

The total points for the regatta were: Marquette, 97; Wisconsin, 101; Minnesota, 106; Illinois Tech, 107; Wisconsin, 108; and Chicago, 109.

Boxing class open to all

Little known to anyone around Tech is the significant part boxing has played in the past and its status at present. Mr. Bernard Westman, director of athletics, was appointed to Assistant in 1928 and immediately became interested in boxing. He took upon himself the responsibility of training a boxing team.

In the past there have been several team leaders, from 1928-1946.

In 1946 boxing was dropped. Mr. Westman is now forming a boxing class for anyone interested. His office is to help any beginner and teach him the first steps. The boxing class meets Monday, Wednesday and Friday, in the gym from 5:00 to 6:00 p.m.

Resauli captures final I Ball bid

The final Integral Ball Bid will be awarded this season by "Dikinoma Philomelos." Our regular season ended with a 1-0 tie against the University of Michigan. Our final regular season game was against the University of Illinois.
