Schmitz Appointed 1959 Integral Editor

The Publications Board appointed Bill Schmitz to the editorship of the 1959 Integral at the Tuesday night meeting. As Schmitz was the only applicant, the decision was easy.

No applications were received for the office of business manager. Tom Hartleberry, business manager of the 1958 Integral, spoke on the possibility of some temporary employment for the job of business manager, sales manager, and advertising manager. The board failed to adopt his idea.

Due to a failure of the board to appoint a business manager for the 1959 yearbook, the position is still open.

Schmitz is a fifth semester LLF student. At present he is news editor of Technology News, a weekly editor of the 1958 Integral, and associate editor of the Illinoisian magazine. Bill lives on the north side of Chicago and commutes to school. He announced Monday that several positions on the staff are still open to qualified persons.

ITSA Supports Hardt on I-Ball

At the April 16 meeting ITSA voted to support Professor J. W. Hardt, Social Chairman, with his plans for the Fall semester I-Ball and his bid for election to the I-Ball. He has been given the understanding that he could not formulate contracts without the consent of the board.

Bill Hardt proposed that the Grand Ballroom of the Palmer House would be the ideal location and that the musical event could be supplied by a big band or by a string group such as the Crewe Clubs. This group had been formed for the purpose of raising funds for the 1959 I-Ball. The budget was prepared by several students and it was hoped that the event would be successful.

The importance of the event to the student body was emphasized by the fact that several prominent alumni had already pledged to attend.

Hold Parents Day Tomorrow; Drill, Talks, Tours Featured

All parents, relatives, and friends of Illinois Institute of Technology students are invited to view the campus during the annual "Parents' Day tomorrow."

The "Parents' Day" program will be held on April 18, 1959, at 8:00 a.m. in the Student Union auditorium. The program will feature a variety of activities, including a tour of the campus, a meeting with college officials, and a luncheon at the Student Union restaurant.

ITSA Board Candidates May Obtain Petitions from Dean's Office Friday

Petitions for candidacy for student seeking to run for the ITSA Board of Governors will be available from the Dean of Students office next Friday.

The petition must be signed by the candidate and two witnesses. The petition must be filed with the Dean of Students office in the morning on the day of the election.

SAAB to Send Tech Publicity to High Schools

The Student Admission Advisory Board is in charge of the high school publicity program for the college. This program, which was previously held in connection with the Michigan State University, will be continued in the fall of 1959.

The students in the program will be divided into teams of two or more Tech students. The teams will then meet with the students in the high schools and tell them about Tech. It is hoped that at least 50 high schools will participate in the program.

The students who are interested in participating in the program should contact the Student Admission Office.

Student Picnic Staged May 2

ITSA's annual picnic will be held Friday, May 2, in La Barge Woods. The administration has agreed to help arrange如实 situations at least one day so that every section will be represented.

The picnic will be held in the evening, and a band will be provided by the Illinois Institute of Technology Band. The band will play from 7:00 p.m. to 9:00 p.m.

The cost of refreshments will be included in the price of admission. Tickets may be purchased from the Student Admission Office.

SAAB will provide refreshments for the occasion.
Bog Could Easily Become Beauty Spot

One of the more unforgettable sights of the Illinois Tech campus is Ogden bog. Even its name testifies to the opinion this, the geographical center of the ITA, Asian students and the Student Union are but a stone's throw from this unkempt area, and it is a lucky student who can attend a day's classes without being forced to take note of it.

What a real tragedy it is that, in an area which receives so much attention from not only students and Tech College personnel, but also from visitors to the Institute, is allowed to remain in its present condition.

A remedy for the situation is easily found. The baseball backstop, which has served no real purpose since the opening of Sonny's Acres, is being moved. Two cement walls could be laid, following the route of the heating pipes beneath the bog, since the growth of vegetation in these areas is already hampered by the excessive dryness. In this way a path would be provided for students proceeding from Alumni or MC to the Thirty-third and Federal corner, or from EM to Chemistry.

The remaining area could be covered with good top soil and grass could be planted. Low, single wire fences, similar to those surrounding other grassy areas on campus, could be used to keep people off the grass.

This plan has been cleared with Bernard Wissamer, ITT athletic director, and the planning and the athletic depart, at least, supporting the idea. The cost of the entire program would undoubtedly be small enough so that it all would be completed in a short time.

Whatever the cost, the Institute would gain more than that amount from the increased interest and the added water feature that would be added to the site in the near future.

Bar Students From Elevator

The closing of the last practicing of the students in the Main building has created a mild stir among those who have been "lockouted".

At first this appears as a move by the ruling class—administration and faculty, to further subjugate the poor, disinterested students. Considering all the facts, however, the students have only themselves to blame.

With each privilege comes a responsibility. In the case of the elevator the responsibility consisted of obeying one rule set down for its operation the capacity requirement.

There is another elevator made trips to the fifth floor overloaded, resulting in numerous breakdowns. The repairs required were costly and time-consuming, and the elevator was out of service frequently.

Another problem arose from the students who abused the privilege of using this elevator have only themselves to blame now that the privilege has been taken away.

Distributing Yearbook Free Will Increase School Spirit

With the date for distribution of the 1958 Integral set for May 25, the records show that 500 yearbooks have been purchased by members of the student body.

This is a drop of about 50 from the total sold last year.

It is easy to see that a college yearbook can do a tremendous amount of good in fostering school spirit and student interest. Although there are some who are not convinced, among them mother and father, I am still convinced of the value of this

The greatest talent on Technology News is good taste. We should close up the paper and put out an ITA letter to the University of Illinois "Shalt!"

Turning to more serious things, it seems the administration is going through with College Day. The logical approach to this point is to grin and bear it.

This is rather like Robinson Crusoe wading up the morning after the shipwreck and building his hut—there isn't much else one can do. They do promise, however, that students will not be required to participate.

For future publicity plans I would suggest that an attempt be made to give more notice to some of the already present student activities. An outstanding example would have been the recent Greek Week activities, the water fight, the inter-collegiate contest, and Pageant. I hope that Tech can get some publicity out of some of the remaining student activities such as the ITA Sing or the ITA picnic.

A large bit of valuable publicity could be gained from these more or less spontaneous bits of student enthusiasm. At least you wouldn't have to be embarrassed about it.

The decision to hold elections in two phases will result in confusion for switch polling facilities. Our campus students will have to provide two hot dog stands, two 15-cent hot dog stands, and polling facilities for dual polling.

The students who abused the privilege of using this elevator have only themselves to blame now that the privilege has been taken away. 

I-Ball Money Outstanding

After six months about $450 of the money due ITSA from the sale of an ad book for the Integral Ball has not been collected.

This is partially due to the fact that the promoter of the book failed to obtain written contracts in many instances. The book is now delivered.

Another factor in the tardiness of payment is the failure on the part of both the ad book promoter and the ITSA sales chairman to send out bills until after the fall semester had ended.

This was finally done after Technology News had made inquiries as to when the bills would be sent out.

As it now stands the 1957 Integral Ball, which was once again given a chance of breaking even, will cost the students of ITA $1250.
Bob Thompson, Fresh Pres.,
Asks New Accounting System

by Bob Schmitt

The freshman class president, Bob Thompson, took office on the FTA board of control this February. In addition to his position on the board, he is a member of Triangle fraternity, a member of the IF glee club, and was a pledge on the IF council. His permanent home is in Clear Lake, Iowa. "I think the board could use a better accounting system." This remark accompanied others by Bob concerning the financial handling of organizations on campus. For fear of criticizing the efficiency of the board, Thompson felt that "The people on the board are capable of handling more responsibility than they are given." Thompson also said, "I would...

Dean of MIT
Will Speak on Architecture

Class will be dismissed Wednesday at 12:15 p.m. for a special talk to be given in the SU Auditorium by Dean John Buchard, dean of the school of humanities at MIT. The subject of Dean Buchard's talk will be "The Engineer's Responsibility for Fine Architecture." Buchard has a degree in architectural engineering and is a member of the AIA and Chi Phi. He formerly was director of research and development and vice president of Illinois Industry, Inc., in 1938 he went to MIT and became director of libraries in 1944.

ARROW
Bi-Way Sport
open or closed

Either way, it's smart strategy. The Bi-Way's exclusive Araldite collar looks as good as it feels (has stays to keep it crisp and neat). Perfect, too, when worn with a tie. And the cool open-woven fabric is yours in a smart stripe or basket weave. Long or short sleeves. From $4.00. Clusters, Peabody & Co., Inc.

Crown Queens of IF, Military Ball

Two queens began their reign recently as top royalty for the IF and military balls. Miss Nancy Lee Willett was crowned queen of the IF ball, held on Saturday evening, March 28. Queens were crowned by 10 of the 11 fraternities along Fenske row and College Acre of Delta Tau Delta escorted the winner. Ralph Plageman and his orchestra played for the dance.

Queen of the Military ball was the 11th candidate upon Miss Nancy Thomas. April 11. Nancy, escorted by a Navy man, was opposed in her success but for the crown by two Navy entrants and three Air Force-honored nominees.

Air Force General Whitney, retired at the Military ball, conferred the winning candidate. Judges were Acting Dean Brown, Ronnie Walander, and Miss Anna Lee of the Petroleum Statistics Modeling school.

Count Basie, Pate, Featured
At Jazz Show

Chicago jazz fans will have the rare opportunity of hearing the famous Count Basie band and blues singer Joe Williams perform a complete concert at Orchestra Hall tonight, April 19.

The Basie band, which has won universally every jazz poll, whether taken among musicians, critics, or jazz fans, will be making its first Chicago concert appearance since 1956.

The Count's other concert work includes concerts at Carnegie Hall, the Newport Jazz Festival, the New York Jazz Festival, and in concert halls all over Europe.

Also appearing in tonight's concert will be Chicago jazz favorites Johnny Pate and Arnold Schuster, who will be making their concert hall debuts.

SENIOB CLASS
Plans Farewell For April 26

Senior Class
Plans Farewell For April 26

Dear Seniors:

After months of scheming and planning, your senior class officers have finally managed to come up with a Senior Farewell... On Saturday, April 26, the Senior and their dates will get together for a final meal, after school, at a bowling alley, for an evening at the movies of watching "The Man Who Shot Liberty Valance." The event will begin at 6 p.m. with dinner at the home of Ralph Plageman and his orchestra.

The evening will begin with a meal. Dinner will be followed by a farewell, where all the Senior Class officers will be honored and praised for their hard work. The evening will conclude with a dance, where all the Senior Class officers will be honored and praised for their hard work. The event will be held at the home of Ralph Plageman and his orchestra.

Ralph Plageman will provide the music for the evening, and the Senior Class officers will be honored for their hard work. The event will be held at the home of Ralph Plageman and his orchestra.

Concert Will Feature Dvorak Piano Concerto
by Karl Gottlieb

Rudolf Firkusny will appear as guest soloist in today's concert offering at Orchestra Hall in a performance of Dvorak's Piano Concerto in G minor. The work, composed in 1878 and premiered in 1879, is one of many compositions by Dvorak which are uniquely familiar, among others, being the reception they have received here.

The concert is as much by Rudolf Firkusny as it is by Dvorak, though the concerto himself is from an earlier period. Firkusny has not performed in Chicago since 1915, when he and his wife and their concert appearances were sponsored by the National Student YMCA-YWCA and their magazine, "The Student." The theme of the concert is "The student's life and education in America."

Frozen tickets will be available at the box office of The New York Times, Inc. at 120 West 42nd Street, New York, N.Y. The concert will open at 8:30 p.m. with Elgar's "Enigma Variations."

ITCA Tourney Play Continues

The second round of the ITCA championship tournament has been completed and the third round is under way. The deadline for this tournament is today, and these games must be played by the date of this deadline or both parties involved will forfeit.

The second round was played in the checkers division by W. Ballin, B. Ostrom, A. Rodunidad, J. Moni, E. Smith, D. Anderson, and H. Hall. The third round will be played in the checkers division by J. Lejapaj, K. Kirt, Z. Stadler, and J. Hall.

Tech Participates In Mock Conference

At the mock UN conference held March 28-30 in Madison, Wis., ITT was represented by 15 delegates. Every college that attended represented some country as a member of the UN in New York, and ITT represented Sudan and Tunisia. Along with representatives from the British, the French, and the Germans, the ITT representatives met and discussed some of the major issues facing the General Assembly.

The mock conference was held in the ITT's Hotel, Madison, and was attended by representatives from both the United States and Mexico. The conference was preceded by a series of lectures and discussions on the UN and its function.

Because engineering is a profession at GM—We give your imagination free rein

Commencement is just around the corner—and you've probably decided what specialty you wish to follow in your chosen branch of engineering—probably picked the company you'll join.

But if you haven't committed yourself and have received an offer from General Motors...you get one in the next few days or weeks or months—before you might be too old.

Engineering is a profession at GM, and the engineers who work on our hundreds of products—which involve the entire spectrum of the engineering art—are respected as professionals.

To a young engineer just joining us, this means the freedom to pursue paths of professional inquiry—following the lead of his imagination.

It means no opportunity to associate with some of the most respected and distinguished engineers in the country.

And it means playing a part in developing the products which will keep GM on its progressive path, products produced by 20 Division and 126 plants in 13 cities and 19 states.

GM has 22 Vice- Presidents—14 are engineers.

We have 22 Division General Managers—13 are engineers.

Professional recognition, opportunity, without limit, salaries and working conditions to please young engineers—these are what GM offers you.

Better think seriously of this when laying the foundation for your future.

GM products are available in three classes:

AIRCRAFT ENGINEERING MECHANICAL ENGINEERING ELECTRICAL ENGINEERING COMPUTER ENGINEERING MECHANICAL ENGINEERING AUTOMOTIVE ENGINEERING ENGINEERING MATHEMATICAL ENGINEERING PHYSICAL ENGINEERING

Specialized Libraries Serve Needs of Tech Students

by Bob Rabat

The AIE and JG maintain separate libraries which are available to IT and STEM students. These libraries are not, of course, comprehensive, but they are maintained for entirely different purposes, while they may not be as valuable as the libraries of other IT institutions.

The AIE library is located on the second floor of the IT library building. The material can be checked out by IT students on their regular IT library cards. While the collection is comparatively small, it contains material which may not be otherwise available to the student. In substantial amount of translation of foreign material may be of particular interest.

The library is focused on the second floor of the IT library building. The material can be checked out by IT students on their regular IT library cards. While the collection is comparatively small, it contains material which may not be otherwise available to the student. In substantial amount of translation of foreign material may be of particular interest.

Tech to Host Chicago H. S. Science Show

On April 26, 40 Chicago public school science students will participate in a meeting of the Illinois Academy of Science. The meeting will be held on the IT campus. The exhibits will be those dealing with astronomy, botany, chemistry, mathematics, physics, radio, and zoology. Approximately 100 of Chicago's leading businessmen, scientists, and engineers will participate in the judging of the exhibits.

The meeting is open to the public and admission is free. Those interested in attending are encouraged to contact the IT library for more information.

Countryman Presents First Lecture in Series

The first of a series of lectures on space travel was delivered by火箭的propulsion mechanisms, rocket engines, and their applications.

The lecture was given by rocket propulsion expert Dr. Frank E. Kopp, IT associate professor of physics. The lecture was titled "Rocket Propulsion: The History and Future of Space Travel." Dr. Kopp discussed the history of rocket propulsion, from the early pioneers to modern rocket systems.

The lecture was well-received by the audience, who were impressed by the depth and breadth of Dr. Kopp's knowledge on the subject. The lecture concluded with a Q&A session, during which Dr. Kopp answered questions from the audience about the future of space travel and the role of rocket propulsion in that future.

Promoted in Six Months

Promoted six months after his arrival, the new IBM engineer, Robert Schopp, now works as part of a small group centered on space science. This group is another M.S. and himself, an E.R. and a modeler. Schopp is an "idea man," and his efforts are devoted to basic development of the group's "brain storms" in projects in various sessions.

The results are put in model form. Then the group tries to "use the idea to advantage" in order to achieve something even better.

"I call this prototypical creativity," Schopp says. "You try to keep your work toward a practical end. I guess I have a feeling of time going into the dream. To me, this is more creative than effective, but effective is a more common result." Many opportunities for the M.S.

While creativity is certainly the engineer's strong suit, it is well-placed in the neat little design projects. There are many opportunities for work in other IBM departments. You may work on either analog or digital computers, on computer components memory cores or transistors, or for this design special lab and lab application

Promoted six months after his arrival, the new IBM engineer, Robert Schopp, now works as part of a small group centered on space science. This group is another M.S. and himself, an E.R. and a modeler. Schopp is an "idea man," and his efforts are devoted to basic development of the group's "brain storms" in projects in various sessions. The results are put in model form. Then the group tries to "use the idea to advantage" in order to achieve something even better.

"I call this prototypical creativity," Schopp says. "You try to keep your work toward a practical end. I guess I have a feeling of time going into the dream. To me, this is more creative than effective, but effective is a more common result." Many opportunities for the M.S.

What's it like to be with IBM?

"I was with everybody's a little concerned about his first assignment on a new job," Robert Schopp says. "I was in the middle of changing my E.R. and not being able to get into what I really wanted to do."

Bob Schopp joined IBM in 1964. He already knew something about the company and its electronic computer operations, having worked part-time during college at the IBM machine installation. "But I didn't know just how my M.S. degree from Kansas State worked," he says.

He started as a Machine Designer in Production Engineering, with cost reduction work as his primary responsibility. "I'm like most M.S.," Schopp says. "I'm a drifter, I'm not sure what I want to do."

The question is this: Is IBM the best company for a young man who wants to work in space, and has a desire to "get ahead" or "get out and have a good time?"

IBM... or... ISLAND RELAXATION

The problem is: Can you afford to have a job at IBM? If you can't afford to have a job at IBM, you may not be able to afford it.

The potential is there, all right. Why? I've seen over 600 new management positions created in the last two years at IBM. IBM offers a number of positions in various areas, from sales and marketing to research and development.

Why not ask your college placement director? "Dr. Kopp," he says. "Dr. Kopp will meet with you to review your curriculum. He's interested in hearing about how your degree will fit you for an IBM career. Just write to:

Dr. R. A. Waters
IBM, Dept. 928

**Sigs Win Pageant; Delts Lead in Points**

by Pete Potes

We wish to offer our heartiest congratulations to Alpha Sigma Phi for taking first place in the annual IF Pageant for the seventh straight year! The official title of the skit was "Rhapsody in Bluebecks," and featured a freshman who was Phi Kappa Psi's secret with a Charlie Brown presentation, and Delta Tau Delta, with "Sam and the Fabled Slide Ride."

A hand, a hand, my kingdom for a hand! One of the highlights of the pageant, that few knew about, was the loss of a hand by the Phi Kappas. The hand was made of a mannequin's false hand, and everyone knowing the whereabouts of this hand, which I might add, does a great service, no doubt it is up to contest Ernie Turkovich at Theta XI or myself.

Two productions which did not enter the competition were put on by the Panhellenic Council and Theta XI. Alpha Epsilon Pi has hosted the top of the scholarship standings for last semester. Also at the AEP house, Richard Kain is engaged to Betty Goldberg, a top of the hit and very best wishes to you both.

The Alpha Sigma have a Makers' Club party planned for April 19. Delta Tau Delta claimed the IF Ball tickets, which was quite a feat in the face of stiff competition. After the IF Ball, members of Lep- tis Guaranit are expected for the Panhellenic dance on April 19. The Delta held a firm grip on first place in activity points. Following them in activity points are the Sigs, Phi Kappa, Triangle, and Sig Ep.

**IGY Talks Set For April 21**

Sigan PI Sigma, the physics honor society, will present the second in a series of lectures dealing with problems under investigation during the International Geophysical Year. The first, on "Some of the Mysteries of the Planet Earth," was held in the auditorium of Stag Hall on April 4. The second, on "The Earth's Magnetic Field and Its History," will be presented on April 13.

The lecture will be given by Dr. Herbert Bliss, professor of cosmology in the University of Chicago. The lecture will be preceded by a dinner served at 6:30 p.m. in the executive conference room of the Student Union. For reservations in the dinner, write or call the office of the physics department. Reservations must be made by 6 p.m. Monday, April 21. The charge for the dinner is $2 per person. The lecture is free.

**Your professional advancement**

Choosing a company with which to spend your professional life is one of the most important decisions you have to make. Choose carefully, for your professional advancement and rewards depend to a large degree on the opportunities presented.

Be sure the company itself is growing on a solid foundation...having important work that has a permanent place in the economy and future. Be sure the company offers challenging work and opportunities in your chosen field...for you will be happiest and develop more quickly doing what you like. Be sure the company you choose is "engineering-minded"...and has demonstrated an active interest in the development of its engineers.

Before you decide, look around...ask...compare. You will find all these opportunities at Western Electric.

Western Electric offers a real opportunity. Some 55% of the college graduates in our upper levels of management have engineering degrees. And 7,000 management positions must be filled by newly graduated engineers in the next ten years. Many of these positions will be taken by Western Electric engineers.
Slipstick

"Kamohara, how come you never have any trouble about premonitions?"

"It's simple, I haven't been living here long enough."

EE: "Oh, yes, I have been."

EE: "Great, that's better than dancing."

.......

"I simply gotta divorce this woman; the disassociation of all the senses. She looks so beautiful in our room and the smell is so bad I can't stand it."

"That sounds bad," said the judge, "but couldn't you open a window?"

"What, and let all my pigeons out?"

.......

If Tente had his conscience taken out, it would be a minor operation.

Prof. (addressing medical students): "The muscle of the patient's leg has contracted until it is much shorter than the other. Therefore, he limps. Now what would you do under such circumstances?"

Student: "I'd limp, too."

If Tente were shot between the eyes, it would only be a flesh wound.

.......

We don't like women—they cheat and lie. They pray on us, make us all the same.

They take us, and we take them, and drive us to the sea.

So you, that isn't what I meant.

.......

She had a profile like Jimmy Durante, only all the way down.

.......

"I nominate my girl for Miss Soft Drink."

"Why her?"

"She'll go out with anybody from 7 up."

Editor: "Remember, it was Joseph Pulitzer, founder of the School of Journalism, who declared that accuracy is in a newspaper what virtue is in a woman."

Coed reporter: "That is not entirely accurate. A newspaper can print a revolution."

Air Conditioning—temperatures made to order—of-weather comfort. Get a demonstration.

NEWLY ORGANIZED AIP

Reveals Future Plans

One of Tech's more intellectually-minded organizations is the American Institute of Physics, founded last fall by Marshall Taylor.

The local group is a student chapter of the national American Institute of Physics, and all Tech students holding membership in the AIP also are associate members of the NAIP.

At present there are 27 Technicians on the dues-paying membership rolls. Membership is open to anyone desiring to join.

This coming September the AIP plans to expand their organization and its functions. The basic purpose of the AIP is to further create a better understanding of physics and to foster more interest in physics.

Included in the recent functions of this new and growing group have been tours of the Armour Research Foundation's reactor and a walk by Mr. Darwin Raffel, ABIJ, relevant to nuclear power systems. According to Taylor, the organization plans its programs to cover the major different issues within their group.

Future programs will accentuate the nuclear field, and cover the overall emphasis on the physics of space.

Due to local membership in the AIP and the NAIP, it has been difficult to keep the membership to 27. As a result, the group's membership has expanded to 27 members within the past two weeks. A regular lecture series has been initiated, and meetings generally follow every third Thursday meeting.

Officers of the American Institute of Physics include Marshall Taylor, president; Dave Peterson, secretary; Harvey Berk, recording secretary; and Jack Grossman, corresponding secretary.

Dramatech Begins Casting for Plays

At last night's meeting of Tech's student drama group, two plays were read and permanent casting for those on set play was begun. About 25 people attended this fourth weekly meeting.

Plans for the semester include the performance of one or two plays in an invitational showing. While this production will be essentially student directed, a professional director will probably be hired for the projected major production scheduled for fall of this year.

Mike Reinhart, student and president for this semester, said, "I hope that anyone who is interested in drama will be present at the next meeting." Meetings are held at 5 p.m. on Thursdays in the executive conference room in the Student Union.

I'll call you at the bell!

Grade Retractor gave extra braking on counter Bloody.

With hood sealed shut by the Automobile Club of Argentina, '58 Chevrolet station wagon was driven from Buenos Aires to Valparaiso, Chile, and back over the highest transcontinental road in the world! Traveler's miles high in the sky—up to ten days of rest or water was added, not was the mighty Turbo-Thrust V8 ever so hot! Here was an all-new test of Chevy's new engine, of the Turbo-Hydraulic transmission, Jimmie-Dean brakeman, Full-Cell suspension, and Side-Door steering—testamentary triumph of all the advances that have made Chevrolet great.

You'll get the best buy on the best stuff!

Other Colleges Victimized As Journalists Cut Capers
by Bob Stacked

What is news and what is confused news? Here is the occasion when it is difficult to tell what other schools are really doing.

You may think that last week's issue was old, but it is no exception, since it's hard to find anywhere.

One sure fact is that a number of other schools have released April Fool newspaper editions.

There are strange twists in naming paper for this special issue. One of the more curious switches, however, was missing this year. The Flat Hat of the College of William and Mary in Virginia had to cancel their Flat Hand more for lack of student participation.

A new person knows the place he might be hard put to distinguish the regular name Connecticut Lantern in New York from its special name, the Connecticut Sunflower.

That staff names are all over this issue is a shock to many of them are writing their last issues of the year. Such satisfaction that awaits them, only a change of some, since it is also the time that many new editors are installed, displacing the annual forms of worn-out journalists.

Maybe some of the students in Paris will be explained by an inn from MIT which caused John Power Dulles reminding: "When I was a student at the Sorbonne I used to read occasionally... I can't remember what was written... Students just like to read."

Could it be the right thing to do?

The Connecticut Daily Campus remains in their field which has been known for a certain light genius the emergence of a new personality in last year.

The light in itself should come no comment, but its easy to guess that it's not a coincidence. Sometimes people's minds. It sounds like an unimportant opinion to press a girl when she must you should know.

The Whirlwind, of Whirlwind College in Spokane, Washington, relates about a film version of the College, including "Dilwyn's Bus," which was shown there this week. However, their social calendar was slightly ruined and decided to hold a "Dilwyn's Bus," which would be a success for Star Advertising Company, for demonstrating a building often speaks of tragedy for newspapermen.

IM Softball League Opens 1958 Season

The intramural softball season opened Thursday, April 17, with four games being played on Sonny's Acres. The teams are divided into two leagues, with seven teams in each league.

At the end of the season the top teams from each league will play off for the championship.

LEAGUE I

Cincinnati Men's A

LEAGUE II

Cincinnati Women's A

Tennis Squad Suffers Third Straight Loss

The Illinois Tech tennis team lost their third match in a row Wednesday night in the University of Chicago, 9-0. This loss followed closely on the heels of their 6-3 loss to Concordia Tuesday night and a 9-0 rout at the hands of De Kalb Saturday.

Recent high spot of the week for the Bears was the victory by Lou Neuendorf and Bob Buchman against Concordia and a doubles victory by the same pair against the Cougars.

The players for Tech have been seeded as follows by Coach F. J. Ranke, Lou Neuendorf, Jim Ander, Bob Buchman, Phil Roehmert, and Ed Kuehne.

The 6-3 win over Concordia was the most of the season of the season of the season of the season.

Sports Hero

DeMaeyer Begins Second Season For IIT Track Team

This week's Sports Hero, one of Coach Tony Barbor's stalwarts on the track team, is six-foot-one-inch, 160-pound Bruce DeMaeyer.

Bruce, a fourth semester EE, is starting his second season on the track team. In addition to running the low and high hurdles, he plans to start high-jumping, too.

IF Track Meet Set for May 21

The intercity track meet, originally scheduled for Wednesday, May 7, has been rescheduled for Wednesday and Thursday, May 21 and 22.

The meet will be held at DePaul's Bell Stadium, and will consist of competition in the high jump, broad jump, and running events, with the exceptions of the mile run and the hurdles.

Work with the GAS industry...

the nation's fifth largest

The Gas industry — the fifth largest in the nation — has a total investment of over $18 billion. Last year, the industry saw a new all-time record in number of customers, volume of gas sold, and dollar revenue. In fact, Gas contributed 22% of the total energy needs of the national as compared with 11.5% in 1940. The Gas industry is a major force in the growth and development of this country.

There are many opportunities for you in the Gas industry. The industry needs engineers, and does not over-hire. You won't be regimented. There's always room for advancement. With utility companies and with manufacturers of Gas equipment, there's a future for you as an engineer. Call your nearest Gas Utility.

They'll be glad to talk with you about your opportunity in the Gas industry.

American Gas Association.
Tech Nine Opens Season

Golfers Rout Concordia; McCarthy Low with 72

The Illinois Tech golf team opened its 1958 season with a 17½–½ rout of Concordia Teachers College Monday.

Jim McCarthy was low man for the Tech team with an 11-hole score of 72. He was followed by

**Golf Schedule**

- Apr. 22 St. Petersburg (A)
- 25 St. Petersburg (B)
- 29 Las Vegas (A)
- May 3 (B)
- Chicago
- St. Joe
- Las Vegas
- 6 Concordia (A)
- 10 (A)
- 13 (B)
- 16 CCC (Host)
- 21 Concordia (B)

Danny Shink and John Parsons, who each had 74.

Other scores were: Tech team included an 84 by Don Nelson, an 87 by Dick Knepper, and a 91 by Dave Roberts.

All of the Tech team except Parsons scored 3 points for Tech. Parsons scored 2½ to complete the 17½–½ victory.

The golfers will be idle until Tuesday, April 22, when they meet St. Petersburg in a nine-hole match. The same match will pit them against Whittier on Friday in another road match.

The expected batting order, according to Coach Glenn:

- Clift
- Shortstop
- Pitcher
- Leftfield
- Rightfield
- Centerfield
- Designated hitter

Glencoe predicts a good season for Tech this year, at least by comparison with last year's squad which was six and one-nine. His biggest problem will be pitching, although he feels that he has a "Big Four." In Clift, Mike Walker, Fred Carson, and Jon Strentz, Glencoe may have to rely more on the pitching. Both runners will be ready to face Tech and their batting. The T-birds will not have a chance against the Bluejays.

**IF Softball League Begins Play Sunday**

The interfraternity softball league will start play this Sunday at Grant Park with four doubleheaders.

The following are scheduled for the first two Sundays, and on May 11 and 19, three out games and playoffs will be scheduled.

**Baseball Schedule**

- Apr. 19 Lewis (A)
- 22 CTC (A)
- 24 St. Joe (A)
- 28 Aurora (A)
- 9 Lewis (B)
- 13 U. of L. (B)
- 6 CTC (B)
- 12 Aurora (B)
- 16 Lewis (B)
- 20 Aurora (B)
- 22 Championship Tournament

The competition is divided into two, A and B, with the following schedule:
