Fire, Food, Signs, Band Highlight Dec. 2 Pep Rally

The biggest pep rally in IIT history has been scheduled for Tuesday, December 2 on Ogden Bog.

A southern orientation of the landscaping for Ogden Bog (which would double as an outdoor stage) was preferred because of the addition of light and warmth available during the spring and fall months.

Clearance Commission Buys Junkyard

Kaplan's Junkyard has been purchased by the Chicago Land Clearance Commission. Title to the property was obtained last week, after months of dealings on the part of the commission.

Dean Sets December 15 Scholarship Deadline

Dean of Students C. W. Brown announced that a limited number of scholarships are available for full-time students during the second semester of 1958-59.

ITSA Nominees' Petitions Are Due by December 2

Campus politicians will swing into action Monday as candidates for offices in the mid-year election begin picking up petitions for candidacy and Tech News questionnaires in the Dean of Students office.

ITSA Nominees’ Petitions Are Due by December 2

Campus politicians will swing into action Monday as candidates for offices in the mid-year election begin picking up petitions for candidacy and Tech News questionnaires in the Dean of Students office.

At stake in this semester's election, which will probably be held during the last week of December, are nine seats on the board of directors as well as the freshman class auxiliary offices. Petitions and Tech News questionnaires must be turned in before 5 p.m. on December 2, the last day of student offices. The questionnaires must be filled out by those wishing to run in Tech News.

As a result of the passage of two amendments to the ITSA constitution last spring, the election this semester will be somewhat altered from previous mid-year pollings. Two more members of the board will be chosen, due to the division of the office of Independent Student Executive, according to the new constitution.

Other ITSA offices at stake are Social Chairman of ITSA, Engineering Representative, three are elected, and Arch and three are elected. The other three offices in the board are not elective.

Institute Receives Loan Of $1,200,000 For Union

Approval has been given to the request for a $1,200,000 federal loan for construction of the Student Union on Campus.

Under the college loan program of the Housing and Finance Agency, the loan will pay for the entire cost of the building. Illinois Tech will provide the remaining amount needed from already accumulated funds.

Scheduled for completion in the fall of 1968, the fully air-conditioned building will provide additional classrooms, a cafeteria, a gymnasium, a theater, and a student union and lounge.
ACP Convention Suggests Ideas, Solutions to Editors

by Jean Museler

Every Fall, the Associated Collegiate Press Convention becomes one of the highlights of the publications scene. ACP is established for the maintenance of high journalistic standards on college publications, and as one of its functions it functions in co-operation with others such as the "All American," "First Class," "Second Class," etc.

Tech News Errs;
IPC Yet Undecided On Confab Idea

In reference to an editor in the November 1 issue of Technology News entitled "Conference Proposal Wins in IFC," we have been informed that IPC does not pass an amendment to give activity points to fraternities for members who win varsity letters.

At the meeting in question, an informal proposal was brought forth for discussion. At the meeting Wednesday night of this week this proposal was put in the form of a motion. Being an amendment to the IFC bylaws, it would await the next meeting when it will be voted upon.

This is too early yet to tell what the results of the voting will be. For the reasons stated in the earlier editorial, Technology News hopes the vote will be affirmative.

We hope the error in the November 7 editorial did not unduly inconvenience anyone.

Letters to the Editor

AIE Blasts Mies' Dismissal

Dear Miss Museler:

At this late date the Student Union is still an insignificant thing, consisting of vague and contradictory factions; each faction pushing its own particular idea that will benefit it most.

Some of the talk about the proposed building recently has been the sole architect for the academic campus. It is probably not generally known why Mies is no longer the architect for the academic campus, but why that is so.

Miss Mies is a major player in the game of architecture and has contributed to the field throughout the world.

The committee presented the proposal for a free dance with the idea that it would serve as a test to see how many students would come to an IIT social event if admission were free. Even the most ardent advocate of the book as well as many who oppose the idea feel that a test of some kind should be arranged. If ITSA were to spend the $1200 to $1500 necessary for this dance the only alternative test would be an actual attendance of the dance book which would cost the students of IIT $28,000 for each year the tests were run.

The defeat of the free dance proposal followed by only two weeks the Board of Trustees's final report to the faculty of the finance committee for this semester's budget, which even a tentative budget had been approved during the spring as provided in the ITSA Constitution. It would seem that this semester's budget represents an interesting study in the present economic situation.

Unless the board begins to place more faith in its committee it can hope to get very far accomplished this year. We hope the Board will reconsider the idea of the dance at the first meeting.

AIEE Meeting Features Panel Of Industry IE's

On Tuesday, November 11, the Industrial Engineering Department held a student conference in the Commons basement. Top-flight professional industrial engineers from the Chicago area were present to talk with the people enrolled in the department.

The engineers talked to individual groups of seven or eight students for approximately two hours. Then, sitting as a panel, answered questions from the floor. The students were able to get an inside-track view on exactly what the profession is and what they should aim for in order to become respected members of the profession.

WEDNESDAY, DEC. 3

A UCRL staff member will be on campus to answer your questions about employment opportunities at the Laboratory.

Our scientists and engineers, with outstanding achievements in the field of nuclear research, are currently at work on diversified projects such as:

- Nuclear devices
- Basic particle physics
- Nuclear-powered rocket propulsion systems
- Controlled thermonuclear reactions (now unclassified)
- Engineering and scientific application of nuclear explosives to mining, excavations, and power

The finest facilities, and encouragement to exercise creative thinking and imagination, are offered qualified graduates interested in research careers.

Call your placement office for an appointment.

Diemer Protests

Dear Miss Mueller:

I wish to protest in strongest terms the action taken by the association and the person in charge of its arrangements. You have handled my double appearance in Tech News last week.

In the first place, you printed my letter exactly as I wrote it. Instead of editing it at your leisure, you simply typed it word for word. In the second place, you didn’t trouble to write me that you had referred to my letter to Tech News.

As far as I am aware, I have never written a letter to Tech News and, if I have, it was not about the matters in which you have referred to my letter as being disproved.

I wish to protest in strongest terms the action taken by the association and the person in charge of its arrangements. You have handled my double appearance in Tech News last week.

Dr. Paul L. Copeland, chairman of the department of physics, received a long telephone call from a student last night regarding his recent work on atomic physics. The student was so excited about the results of Dr. Copeland's recent work that he called Dr. Copeland to express his congratulations. The student had been working on a project related to atomic physics and was delighted to hear about Dr. Copeland's recent findings. Dr. Copeland was happy to discuss the student's work and provided some valuable insights. Dr. Copeland suggested that the student continue his research and hopefully make some more progress in the field. The student was grateful for Dr. Copeland's advice and promised to continue working on the project. Overall, the conversation was a great example of the collaborative spirit in the field of physics and the importance of mentorship in research.
'Onionhead' Fails Griffiths; 11th St. Offers "Crucible"  
by Larry Smith

An onion by any other name is still a stinker. "Onionhead," starring Andy Griffiths, has recently been hosted out of the State-Lake theater to make room for another picture, any picture at all, to guarantee Navy life during Arthur Miller's new play "The Crucible." This somewhat abstract murder deal with the Salem witch trials of early Massachusetts history fails to stir the audience. Harry Towery is starred at the 11th Street Theater.

This house is billed impressively as Chicago's first "off-loop" theatre, which looks like another attempt to glut Chicago instead of trying something original. Perhaps they have forgotten the name nationally known Danny Lane as Chicago's greatest sales aide. Currently playing is "The Lord and Parliament" starring Pat O'Brien. They just finished lilum Roth in "Come Back Little Sheila," a large understudy in: theatre. These seem to be pretty fair offerings for a "off-loop" theatre, even though they don't get very much recognition.

Pub Board Accepts Editor Applications  
Norm Lindley, chairman of the publications board, announced that he has received applications for the position of editor of Technology News from all five university student publications. The application forms are to be submitted to him before 8 p.m., Tuesday, December 7, at 3201 S. Michigan.

International Members Delegate New Officers  
Recently elected officers for the International Club are Matthew Vassar, President; Rolf Hinton, Vice-president; Bruno A. Bilota, secretary; and J. H. Henrikson, treasurer. Yogi Dreyfus, social chairman, and Hais Eymon, sports chairman, are the officials still held office during the coming year.

Campus Clippings  
Iowa Students Need College Book Store  
by Dave Best

"To have a book store or not to have a book store?" This is the quandary over which students at Iowa State Teachers College are now muddling. It seems that the college has no book store at present and most students have considerable trouble finding the necessary books.

College Eye recently threw its hat into the ring by exhibiting a banner syndicate regarding the situation. One observant teacher stated, "Our work has been hampered by the fact that some of our students find it impossible to obtain the needed textbooks."

The situation, according to the student government, must make for the final a bit difficult.

Glass Digest, reporting on security rights at the U of O, described the very unique role of one hopeful resolution. On a standing question, opposite "Is every personal attribute which will be beneficial to the economy," the city voted "T72." A recent front page headline interested.

They said it couldn't be done - but today's L&M gives you:

**Puff by puff**

**Less tars**

**& More taste**

Don't settle for one without the other!

Change to L&M and get 'em both. Such an improved filter and more taste! Better than in any other cigarette. Yes, today's L&M combines these two essentials of modern smoking enjoyment—less tars and more taste—in one great cigarette.
Misunderstanding Rules When Prejudice Occurs

Give a boy or a town a bad name, and it will last long past the original reason for it. Behind this lies the astonishment of those who remarked, on hearing of Jesus of Nazareth, "Can any good thing come out of Nazareth?" Their own answer obviously was "No." Even so, we who live in Chicago know how often blind, unreasoning prejudice is exercised about this city. True, evil and good are strangely and feverishly blended in any great city, and Chicago is no exception.

Prejudice is blind, brutal, and unwise. Like the Queen of Hearts in Alice in Wonderland, it absolutely shouts "Sentence first-- verdict afterwards!"

However, prejudice is not just the other man's vice. Unless we are very careful, we too can fall prey to its insidious infection. We meet a man of another race and dislike him. Why? Often because he looks or acts differently than we. It is a short step then from hate of him to hating his race.

Perhaps the worse form of prejudice is religious. In the name of God, we hate our brothers, whom He has made. Deep in man's heart is the root of his desire to believe himself God's chosen; history is the result of his such error.

How carefully we speak and act!

Final Day Nears For Greek Photos

R. H. Schmidt, Editor of the 1959 Iota Herald, has noted that the deadline for the fraternity section of the yearbook is rapidly approaching, with some organizations lacking fullest possible photographic representation.

Fraternity and Sorority Presidents are reminded that the photographs assistant, Mike Bybane, should be notified at least one week prior to the function at which a photographer's presence is desired. Mike Bybane may be reached at Vi 2-2527.

More adventures on the wing with Camels than any other cigarette today. It stands to reason: the best tobaccos make the best smoke. The Camel blend of costly tobaccos has never been equaled for rich flavor and easygoing mildness. Year in and year out, Camel leads every other cigarette in sales.

Don't feel around with false friends and fancy stuff....

Have a real cigarette—have a CAMEL

"Good grief, I dropped the Camels!"
Farr Plans Turkey Trot: Gunsaulus Gives Figures

by Eugene Finklin

Farr Hall has decided to hold a Thanksgiving Dance next Monday. The dance, to be called "Turkey Trot," will be a social event that will have a small affair with a large group of people in attendance. As usual, the music will be provided by records. It is stated that the dance will be held in the downtown area, and the admission fee will be by donation.

Some very interesting statistics have come to light from Gunsaulus Hall. In Gunsaulus hall, there are 59 graduate students, 20 freshmen, 24 students from Vandalia, and 24 from Illinois College of Optometry. Of the 59 graduate students, only eight are native American-born.

walk around the car that's all-round new...then be our guest for a pleasure test—

DRIVE A '59 CHEVY TODAY!

One look at this '59 Chevy tells you here's a car with a whole new flavor on driving. You see the transformation in its sweeping profile, the chiseled curves of the chime of its Magic-Mirror finish—a new, sporty look that draws away with waxing and polishing. Just looking up to those three words, "get to know," and you discover all that's fresh and fine you must relax in Chevrolet's boulevard body by Fisher (up to 4.5 inches more room in front, 2.8 inches in back), feel the homogenous padding of Chevy's new interior, experience the cushioned transverse seat of its new "Chair of Comfort" (choice of leather or vinyl), look at the "Cushion-Soft" foam-filled seats. Once you're out on the road you'll discover how roomier, better front seats, better padded seats that give over 50 more miles per gallon, new, more responsive suspension and a Hi-Thrust 6 that gets up to 20 percent more miles per gallon. And, of course, you find Safety Glass Glass all around in every Chevrolet. Stop by your dealer's today and see the new American-size Chevy.
AXE Dines Pledges, Sponsors Scholarship

Alpha Chi Sigma, the chemistry professional, announced the pledging of three men for the fall semester. The pledges, Jacob Lyttle, James Manlove and Edward Chbla, will begin pledge training the first of December and be formally initiated as members at the Wageny Restaurant on December 12.

The honorary also announced the establishment of the Alpha Chi Sigma scholarship. It is founded in 1956 and is to be used for awarding scholarships to deserving students in chemistry or allied fields.

Complete details are available from the Donn of Students. The ITT scholarship committee administers the award, the first of which will be presented next year.

ITCA Sponsors Three Modern Jazz Concerts

The Illini Tech Commuters Association will present a series of three modern jazz concerts the first three weeks in December. They are to be held from 12:15 to 1:30 in the Student Union. Ticketed for the first concert is Friday, December 5. Admission will be free to members of ITCA, and a $1.00 charge will be assessed on non-members.

The concerts will come in to and around Champaign! Ira Sullivan will probably be featured at one of the programs.

ITCA President Sheldon Pahn told that if these initial concerts were well received, they would very probably become a weekly affair at semester. Therefore it’s up to the jazz devotees on campus to impress these concerts in December if they wish to have them continued next semester.

Rho Epsilon ‘On The Air’ Provide Message Service

Rho Epsilon, the radio and electronics honorary, announced that it is now on the air for the first time in several years. Included in their memberships are three “famous”—Jack Stewart, Bill Rapoza, and pledge Dave Labian, and there is practically always one of the three on the air.

President Jack Stewart announced that RE will be glad to send a message for anyone, if at all possible. Three members should contact him any Tuesday from 12 to 2 p.m. or 3 to 6 p.m. in 300 Main, or they should contact Dave Labian from 11 to 11:30 a.m. to noon on Mondays, Wednesdays and Fridays in the same room.

The present transmitter is limited by its 100 watt output, but construction on a new transmitter is underway. The new transmitter will have an almost unlimited range with a 500 watt output.

Radio Honorary Pledges Fifteen

The initiation banquet for Rho Epsilon, the electronics and radio honorary, has been announced for December 18. At present, the following members are pledged: Craig Campbell, Dan Delman, Michael Donovan, Harold Duszy, Arnold Fazol, Ken Kuehler, David Libman, Tom McCaffrey, John O’Donnell, Joel Schmutz, Jerome Tenczynski, Ken Wolter, Michael Wintzen, Art Wirtz, and James Wingo.

ITSA And Its Activities Belong To All Techawks

The Illinois Tech Student Association is the controlling factor over student body and organizational affairs here at Tech, yet the average Techawk knows surprisingly little about this organization. The most important thing he fails to realize is that every student with an ITSA identification card is a member of this association.

The ITSA is governed by an eighteen-member Board of Control which consists of four member students and administration and faculty representatives. All card-carrying students can vote for the major members while students counseled with the various social organizations around the school (such as Independent, the Engineering division, etc.) help elect other members.

The main purpose of the ITSA is to glorify student activity and act as a communication link between the faculty, administration and student body.

These things are done through various committees, including a Special committee; a Student Relations committee; a Publications Board; a Student Union Board, which handles affairs in and around the SU; Building; a Student Administration Advisory Board, whose main function is the running of orientation week; an Election committee; a Finance committee; and an Advisory Committee on Student Activities, which handles recognition of student organizations and plans the all-school social calendar.

These committees are composed of a majority of student members. The committees afford the interested Techawk a means of becoming more active in campus affairs.

The committee meetings usually start at the start of the semester. Since there are such numerous vacancies throughout the year, any person wishing to be on a committee should write out an application and present it to the ITSA President.

He will then present it to the Board of Control, which will either approve his decision or interview the prospective member himself, depending on the committee being applied for.

Any further information concerning committee appointments may be obtained in room 208 SU during free hours.

Do You Think for Yourself?

*(SEE WHAT THIS TEST TELLS YOU ABOUT YOURSELF!*)

Would you turn down an unusual opportunity if it would alter a preconceived plan for the future?

Do you feel your education would be improved if books and notes were allowed at examinations?

Do you think that a public official should do what the voters want him to do, even though he personally may feel it is wrong?

Can you honestly say you enjoy a game or sport as much whether you win or lose?

Do you let other people tell you what filter cigarette is best for you, rather than making up your own mind?

The fact is, men and women who make up their own minds—who think for themselves—usually smoke Viceroy. Their reason.

Best in the world. They know only Viceroy has a thinking man’s filter and a smoking man’s taste.

"If you have answered "NO!" to all of the above questions—you are a man who thinks for himself!

ONLY VICEROY HAS A THINKING MAN’S FILTER . . . A SMOKING MAN’S TASTE!
Sports Hero

Tregay Hits 8-1 Mark, Seeks Undefeated Year

by Sally McCormack

Oak Park is the home of this week’s sports hero, Dave Tregay. Dave attended Oak Park High school, where he lettered in wrestling from his sophomore through his senior year. He was unable to compete during his freshman year because the school did not offer the sport. While at Oak Park, Dave also participated on the track squad.

At Tech, Dave is a third semester chemical engineer, a member of Alpha Sigma Phi fraternity, and a member of the wrestling team. He wrestled in the 167 pound division throughout last season and plans to do the same this year if he can lose a few pounds.

Dave compiled what turned out to be the top record of the wrestling team last season; eight victories and only one defeat. His only loss was to Marquette. This year he will be looking forward to revenge. He also has hopes for an undefeated season.

The team meets Marquette in their second meet of the season. As for his outlook for this year’s team, Dave said, “There are not too many veteran wrestlers returning from our squad that compiled a 7-1 record last year; but there are many freshmen who look pretty good. We seem to be lacking in the heavyweight division.”

Besides his participation on the varsity wrestling team, Dave takes an active part in the interfraternity and intramural sports competition at Tech.

Season Opens December 9th For Swimmers

With more and more athletes reporting for participation on the swim team, the prospects for an improved team this season are rapidly growing. At the present time there are approximately twenty men participating on the squad.

Brian Cookson, head addition to the Tech coaching staff, is putting the swimmers through a rigorous program in an effort to better last year’s 6-5 record. Tuesday, in practice, the squad members swam close to two miles while wearing gym shoes and work gloves.

The squad is headed by Steve Barry, Herb Hacker, Paul Kopp, and Medalus Reeds, all lettermen from last year. Kopp, Barry, and Reeds, co-captains of this year’s team, along with Hacker are graduating seniors.

On December 9 the Sharks will open their revised schedule against Wright Junior College. The meet will be at the Valentine Pool.

The addition of an IM bowling league to the Tech campus rounds out an almost complete program of sporting events that are available for active student participation.

IF Championship

Pitt Alpha Sigs, Sig Eps Saturday

Both the championship and the consolation games in the IF championship league were postponed from their regularly scheduled times.

The Alpha Sigs were scheduled to play the Sig Eps for the championship last Saturday; the game was postponed because of rain. Saturday, November 22 was set as the date for the game to be rescheduled.

Also postponed because of rain was the game between the Phi Kaps and the Pi Kaps for 3rd place in the league competition. This game, when permitted, was to be played yesterday.

The Alpha Sigs and the Sig Eps finished second in leagues I and II respectively during the regular season of play. In the semi-final games the Sig Eps topped the league I winner, the Pi Kaps, 6-0, while at the same time it took the Alpha Sigs two complete games to defeat the Phi Kaps, league II winner, 7-0.

ALIGNED CHEMICAL
NEW YORK, N.Y.

ALIGNED CHEMICAL, INC.

NEW YORK, N.Y.
Navy Wins 'Blue Jug' Bowl

Scrimmages Give Team Pre-Season Practice

With the opening game of the season only two weeks away, Coach Glancy is still uncertain of the fate of this year's squad.

Glancy has been scheduling scrimmages for the squad in an attempt to give them some experience before the season opens. These scrimmages have been played against teams which use the same types of offenses and defenses that the Navy will encounter during their regular season of play.

Last week the team scrimmaged against Wilson Junior College and tonight they will meet a semi-pro squad. The scrimmage team has a record of 0-8 this year, and Glancy expects, "That will be a good test of what we will be up against this season."

Glancy has been Ohio State University's defensive coordinator for the last six years and before that he was a graduate assistant at Wisconsin. He is back with a wealth of experience which will be beneficial to the team.

The Tote Board

The Voice of Experience

It seems only logical that, when year after year a last minute rush must be made to complete the IE Championship games before Thanksgiving vacation, sooner or later someone would learn from the experience, but such is not the case. Again this year the championship games were not scheduled to be played until bad weather and early darkness had already begun to set in.

The intramural department opened their season as early as possible, and they are in the dark as to the weather conditions which would allow the tournament to be completed.

Now Where Is That Ball

It seems that interfraternity games could be started early enough in the fall that all of the regularly scheduled games plus any necessary make up games could be played in the evenings before Chicago goes off daylight savings time for the year. If evening games are played following football games after 5 p.m., so that anything to try and play in.

Glancy Sets IM BB Entry Limit, Nov. 21

Entries are now being accepted for the IM Basketball tournament. The team name along with a complete roster should be turned in to the Intramural Director Ed Glancy by Nov. 21.

Departmental restrictions on the number of teams must be adhered to strictly, according to Glancy. The tournament will open sometime following the Thanksgiving holidays.
