Huge Campus Rally Tomorrow
Will Feature Bonfire on Bog

Hailing its way into the thoughts of Technians on campus at 5 p.m. tomorrow, will be the gigantic bonfire attracting students to the all-school pep rally on Ogden Bog.

Planned by the Public Relations committee of ITSA, the rally will focus attention on the basketball team and the game which will pit the Technian five against the Navy Pier quintet, at 8 p.m. tomorrow.

Among the innovations scheduled are the distribution of free food, and a sign contest at which trophies will be presented for the most original signs and the largest signs. Controversial by Bob Woods, the contest will be judged by Assistant Dean of Student Robert Abney, III, Instructor Ray Pearson, and Assistant Dean of Engineering Robert Bushmiller.

Today is the final day for submission of entry blanks for the contest. Bob Woods at 3325 S. Michigan or by means of the Tech News mail slot.

The name plates of the dormitory groups may enter blankets.

Brought to Technians through the courtesy of Records Division. William Tech Athletic Director, the food will be prepared and observed by the cheerleaders and music of the Technian BON has planned this event specifically for a slightly lighter time.

After the ceremony on the bog, a student vs. administration faculty basketball game will be staged at the gym. According to Jim Dayton, student in charge of this event, the game will help the Technian five better appreciate the more professional one to follow.

The purpose of this type of rally is to allow the remaining Technians to remain at school for the basketball game, and still get his nutrition at requirements for the day. The rally is under the direction of Jason

Candidates Must Submit Petitions By Tomorrow

Before 5 p.m. tomorrow all petitions for candidacy for the office of state in the mid-year election must be submitted to the Dean of Students office. Each petition requires the signatures of twenty-five members of the candidate's constituency.

Officers of state in which the election will be held by the last week of December are:
1. Register Representative
2. Resident Representative
3. Social Chairman
4. Engineering Representative
5. Arts and Representatives
6. Liberal Studies Representative
7. Freshman Representative

Freshmen officers who will be elected include: president, vice-president, soc. chair, secretary, and treasurer.

Tech News questionnaires must be filled out by the last week of December. Junior candidates and 100 birds for freshmen auxiliary office applicant.

The questionnaires show that candidates' views on matters such as campus dancing and drinking of beer, policy, the activities of the ITSA Board of Control before his campaign began, and their involvement in Tech News. Questions are limited to 150 words for ITSA candidates, and 100 words for freshmen auxiliary office applicant.

Submit Election Pics Tomorrow

Pics of any election campaign for the ITSA board may be submitted to the Tech News by 7 p.m. tomorrow. Finally, in the notice on the Technology News information sheet, students may submit their own photos. If they have any pictures they wish, they may take pictures by photographing Editor Ed Drey at a charge of $1.00 per person, or $2.00 per picture, and $1.00 for prints during 2 p.m. and 4 to 4:30 p.m.

Two Week Deadline Set For Aid Applications

Second semester scholarship application forms will be available in the Dean of Students office until December 15, for the deadline for applications.

Current scholarship holders who received award letters in the summer of 1958 will not be required to re-apply unless there is an alteration which would affect their continuation on the scholarship.

To be eligible for consideration, a student must be full time under graduate student and must have a GPA of 3.00 or above. Scholarship application must also be the deadline for the continuation of the scholarship.
TN Queries Candidates

Candidates for the upcoming ITSA elections were required to answer the following questions before receiving publication in the Technology News:
1. Have you read the ITSA constitution and by-laws?
2. Are you in favor of the proposed activities book?
3. Are you willing to give the book a limited trial, say a semester or two?
4. Are you willing to give the book an extended trial, say for a semester or two?
5. Are you in favor of a compulsory activity book?
6. As you do not know, WIT is now on a limited budget of 100 dollars, pending investigation. Would you vote yes or no for appropriating WIT the equivalent of previous appropriations?
7. Are you in favor of compelling freshmen to wear beanies?

TN Urges Revision Of ITSA Campaigns

Student attention is once again focused on the semi-annual ITSA elections. Under the average tech knows the candidates personally, hence it is difficult for him to evaluate their qualifications and cast his ballot wisely. Surely the meager space allotted to the candidates in Tech News is not sufficient to allow them to display their attributes and platform. After all, it is not enough.

Admittedly, interest in the election is on the increase. Issues, rather than personalities, are now being discussed. To enable this larger number of voters to be really informed of the qualifications and policies of the candidates, we recommend the following innovations in the present election system.

To facilitate appraisal of qualifications, a written examination should be administered to each candidate for ITSA office. The exam could consist of three parts: to test (1) the candidate's knowledge of parliamentary procedure, the information he must express himself as ITSA meetings if he is to be heard; (2) the candidate's knowledge of the ITSA constitution and by-laws; (3) the candidate's familiarity with the precedents set up by previous boards of control, with the records and suggestions kept in the folder of students who have formerly held the office to which he aspires, and with the duties which specifically will have to be performed if elected to office.

The exam could be composed primarily of essay-type questions, and its results made known beforehand. The same test could be used each year. All that the candidate would have to do is prepare himself for the exam and come to the exam and study those materials with which he must be familiar to do his job efficiently.

Exam scores could be published in Tech News with the names of the candidates with the highest scores, and each student could then evaluate the candidate by the voter.

A committee of ITSA could administer the exams, possibly holding a special meeting with the candidates to answer any questions they might have. This committee might be composed of the relating board members, whose status the newly-elected members would hold, and who are most familiar with the offices in question.

A second innovation we would recommend is the staging of a political rally, during which each candidate for ITSA elections is given a platform to make a three-to-five minute speech. This would allow him to communicate about himself to much more people as he can in his Tech News article.

Letters to the Editor

Representatives Are Not

Dear Jane,

This paper cannot inform me as to the way we elect representatives from our yearly convention. It has always been my contention that it was done by a majority of the group representing the registrants.

But what is the purpose of this? Do any of our representatives make an effort to determine the opinions of their constituents? By whom do the board members come to be decided?

I would like to write a letter to the editor next week stating that anyone feels so strongly on any issue that he should contact his representative.

But this is rather difficult to do on this campus, and I hope to say to whom I believe that we need an organization that represents the student body.

Marshall Taylor

Denounces Dance

Dear Miss McMillen,

I am an advisor on November 21 that a free dance be held to set the problem of whether or not activities books would be successful at Tech. I think the fact that I can't convince the idea of a free dance I cannot see how it would be a valid test. The only

as I see it

Campus Crime Peril Merits Investigation

by Joan McMillen

Enough comment has been raised on all sides by the article in the November 14 issue regarding the increase of crime committed on campus to warrant further investigation of the subject.

During the last two weeks, three incidents, a strangeman robbery and a car theft, have occurred.

Because of the occurrences of the last month, the administration has requested and obtained three city police men to patrol the Tech campus between 4 p.m. and midnight, the hours during which most of the crimes have occurred.

Unfortunately, the administration has urged increased campus police efficiency as the only means of dealing with the problem. While most would agree that there is room for improvement of the police, this is by no means the only requisite for a crime-free campus. The size of the force should be increased, at least until the remaining action in the area ceases, the salaries of campus policemen should be raised to a level commensurate with the resources of other private institutions and a five day work week should replace the six day one now in effect.

Since all the money on campus with the exception of 33rd and State will eventually be removed, the city is not installing any street lighting facilities on them. It is the responsibility of the director of the residence hall to provide adequate lighting for the campus. Spotlights will not do the job of a workable street lighting system. These lights should be installed and fixed as soon as possible.

Careful examination of the 33rd Street "A" entrance shows that approximately 800 people use it daily. Although any Tech center affiliate can secure a police escort in a bus stop or this entrance, if he or she does not feel that a patrolman should be stationed here at all times, his presence would not only aid in apprehending criminals after the crimes have occurred, but would likely scare would-be thieves or attackers away. Two of the crimes this month have been committed on the "A" platform.

Administration officials must realize that regardless of the extent to which they wish to increase the campus police force is "cleaned up," it is necessary to have a second set of eyes on the campus. The administration must do this with the alumni area on two sides and two delinquent-beating housing projects on the others. The campus needs adequate protection for the safety of its people and their possessions.

Attacks Directory

Dear Miss McMillen,

When the thieves came out this week I was struck by the number of cases, including the misreading of the editor's name on the frontispiece. This publication shows no evidence of any proofreading whatsoever.

Most glaring of all, I have not found the names of any graduate students in either the student or the board of directors. This is an injustice, an offense against the entire body of students, and a warning to the administration that they are not taking the situation seriously.

So why not report on the more or less private functions afterward, and in the meantime, save the space normally allotted to all-school organizational announcements?

Vitro Babus

TN Miscalculates

Dear Miss McMillen,

In the November 7 issue of Tech News, I was struck by the fact that this group that submits details of a meeting, at which there may be a "speaker or something" finds themselves making a miscalculation that has something to do with the school. I agree, but that doesn't mean that the meeting will have a speaker or something. This is something definite! For the student body.

Protestors already have been warned of the whole student body, and the average Tech will not come out on the wrong side, even on such "news" that are directed toward other organizational announcements that are more of a general nature. We are on campus in general for all of the student body where non-members, too, will have to do the same, and it is only fair that they have a chance to say something, and that they have a chance to say something about the school.

So why not report on the more or less private functions afterward, and in the meantime, save the space normally allotted to all-school organizational announcements?

Very truly yours,

Vitro Babus
TD Contest Offers 100 Awards, Two Scholarships

More than 100 awards and two scholarships will be presented to winners in the 12th annual technical drawing competition sponsored by Illinois Institute of Technology. The contest is open to all high school students in Chicago and suburban areas, John T. Drysdale, competition director, said.

Scholarships for one-year study at Illinois Tech will be awarded to the two students who turn in the best entries in advanced mechanical drafting.

The competition is held in cooperation with Warren E. Kuehn, supervisor of drafting for the Chicago public schools.

Tech Schedules HS Cage Games During Holidays

Illinois Tech’s 12th annual Prep Basketball Tournament will be held Dec. 19 through 27, according to Athletic Director Bernard “Jerry” Wolman.

The cage tourney—largest prep competition in the nation—will be staged at the International Amphitheater, 2200 S. Halsted St.

More than 150 high school quintets are expected to participate in the single-elimination tournament. Wolman said. Invitations and entry blanks have been mailed to Chicago public high schools eligible for the playoffs.

Deadline for entries is December 1, at which time drawings will be made.

Last year Marshall won an unprecedented fourth tourney title, de-throning Class Tech B’s Leon and went on to capture the city title, the public league title and the state championship.

BE Hosts 150 Delegates At Arbitration Workshop

The Illinois Tech Business and Economics Department, with the American Arbitration Association and National Academy of Arbitrators as co-sponsors, will host over 150 representatives from labor and management at an Arbitration Workshop Conference held at Technology Center Thursday, November 29, and Friday, November 30.

In a joint workshop held Thursday afternoon, the topic "How to Lose an Arbitration Case" was discussed. According to chairman Dr. Pino Wanga, the conference was highly successful.

ARO Presents ‘Beyond Chem’

"Beyond Chemistry," the third in a five-lecture series, will be discussed by Dr. Kurt E. Wood, professor of Chemistry, tomorrow at 5:15 p.m. in the Mickey Auditorium.

The Association of Religious Organizations is sponsoring this “Beyond Science” series. Recently elected officers of the group include: Dr. William Johnson, president; Barbara Vellner, secretary, and Doc Brown, treasurer.

Farr Hall Dance Scores Hit; 'Alarming Clocks' Wake Girls
by Eugene Flahin
Farr Hall's "Turkey Trot" was a great success. Instead of the expected thirty couples, more than fifty Techans and their dates attended. Decorations were not elaborate—only a few balloons hung from the ceiling. The refreshments were cakes and chocolate-chip cookies. Now that a mid-week dance has proved so successful, there may be more in the offing.

Many of the foreign students in Gummula Hall have an opportunity to enjoy the American Institution of Thanksgiving. A large number were the guests of the town of Park, Illinois for four days. They were individually assigned to families. Many Techans invited their foreign instructors home for the holidays.

Political fever has swept Farr Hall. Frank D'Alessandro is running for freshman president and Eugene Flahin for veep.

Gheman Hall is planning a pizza party for the coming month. It will be a drag affair and the charge will be $1.50.

Farr Hall won the trophy for collecting the most toys at the "Toy Drive." This is the third year in a row that they have won the trophy.

It is a little known fact that boys are allowed in Carman Hall—to the lounge, that is, on alternating Friday and Saturday nights. The time limit is 1:45 a.m.

The girls in Carman Hall are upset over their new "alarm clock"—the power-shovels being used on the new dorm. The racket caused by the shovels helped the girls wake up in plenty of time for class.

He's been on his way up from the day he started work

James C. Bishop got his B.S. in Electrical Engineering from the University of Illinois on June 23, 1953. On July 1, he went to work as a lineman in the Illinois Bell Telephone Company maintenance program. On July 2, he was "shoveling" up telephone poles.

And he's been "climbing" ever since. A planned rotational training program interrupted by a stint in the Army, took Jim through virtually every phase of plant operations.

He was promoted to Station Installation Foreman in July, 1957. Then came more training at company expense in human relations and other supervisory subjects—at Knox College.

Since early 1958, Jim has been Central Office Foreman in the Kedzie District of Chicago, which embraces about 51,000 telephone stations. He has 10 men reporting to him.

"I was hired as a candidate for management," he says. "I know, I'll get the training and opportunity to keep moving ahead. How far I go is up to me. I can't ask for more than that."

Find out about career opportunities for you in the Bell Telephone Company. Talk with the Bell interviewer when he visits your campus. And, meanwhile, read the Bell Telephone booklet on file in your Placement Office.

Bell Telephone Companies
IIT Receives Grants From NSF, Texas Co.

Two grants have been awarded IIT, according to Dr. John T. Rettaliata, president: $41,500 from the National Science Foundation and $1500 from the Texas Company.

The Science Foundation grant will sponsor a project under the direction of Dr. William B. Bennett of the physics department. The project is concerned with the structure of the atomic nucleus. Awarded without stipulation as to its use, the Texas Company’s grant is given as a part of its industrial education program, which provides direct financial assistance to many privately-endowed schools.

PI Group Names Incoming Officers

Officers named to head the Property Insurance Club for the semester are: Henry Soucek, president; Gerald Horley, vice-president; Thomas Harless, secretary; Michael Murphy, treasurer; and Charles Sabo, social chairman.

27 SIE’s Hold Banquet Thurs. For Initiation

Twenty-seven members of Sigma Iota Epsilon, management honorary, honored new members at an initiation banquet at the “Wagon” on Thursday, November 20.

Dr. Mondolfo Contrasts U.S. & European Schools

Born in Italy, Dr. L. Mondolfo, director of the department of metallurgical engineering, was educated at the Polytechnic Institute of Milan, where he received his doctorate in mechanics and industrial engineering. The universities of Europe differ from those of the U.S. in that they offer only a degree equivalent to a doctorate.

A diploma from a European high school is similar to a Bachelor of Arts degree in this country. Dr. Mondolfo stated that the U.S. schools are five years slower to subject matter offerings than schools of other countries.

There should be a reduction in the number of degrees awarded, or the requirements for obtaining a degree should be more rigid, according to Dr. Mondolfo. Many people are not of professional caliber but do serve a purpose in industry.

Among his favorite recreational pastimes are mountain climbing, especially in the Canadian Rockies, and photography. Many of the beautiful color photographs he has taken adorn the walls of his office in the Met. Chem. building. The eldest of his two daughters is a junior at Drake University.

Do You Think for Yourself? (These Questions Will Tell You!)

1. Do you find going "off the beaten track" on a trip (A) interesting and constructive, or (B) merely inconvenient?

2. In a heated discussion would you rather (A) be the "moderator," or (B) jump to a side using any argument to win?

3. Before making a complex decision, is your first move (A) to marshal the facts, or (B) to seek the advice of a supposed friend?

4. Do you (A) try to figure out ahead what each day will bring, or (B) face problems as they come along?

5. When writing a letter applying for a job, would you try to make it (A) original and self-sustaining, or (B) factual and concise?

6. If you were getting furniture for a room, would you look first for (A) something comfortable, or (B) something colorful and unusual?

7. Would you prefer a job (A) in an old established firm offering security, or (B) a small company which could expand rapidly?

8. Would you rather be known as a person who (A) works well with others, or (B) accepts responsibility on his own?

9. When you step up to a cigarette counter, are you (A) confused by all the conflicting filter claims you’ve seen, or (B) sure of what you want because you’ve thought things through?

You will notice that men and women who think for themselves usually choose VICEROY. Why? Because they’ve thought it through—they know what they want in a filter cigarette. And VICEROY gives it to them: a thinking man’s filter and a smoking man’s taste.

"If you have checked (A) on 3 out of the first 4 questions, and (B) on 4 out of the last 5…you think for yourself!"

ONLY VICEROY HAS A THINKING MAN’S FILTER...A SMOKING MAN’S TASTE!
Cagers Open Season Tomorrow

Phi Kapps Take 3rd in Touchball, Blank Pi Kaps

Who's DisMay

Muck to everyone's dismay, this week there is no sporty type picture on this sports page. But even more to everyone's dismay, is the fact that instead of a sporty type picture, we have a story (?) type Tote Board. About the only consolation I can offer is that the sports type board is better suited with each issue. Perhaps it will soon become extinct.

Tomorrow the basketball team opens their big "if" season. If the team can score more points than each of its opponents in every game this year, I predict that they will have a highly successful season. With the variety of the season, there will be several other interesting events—namely a sign contest, pep rally, and a bonfire. The bonfire will be highlighted by the presence of a few faculty members and the Student Union.

Which Teams Top?

No Slide Rule Bowl game again this year, despite the fact that many players expressed an interest in one. Last Tuesday, the only feasible day that the game could be played, did not meet with the approval of the majority of the Navy A football team, winners of the IM championship. As a result of this refusal to play, the Navy team will remain the only unbeaten team in either IF or IM competition, without a true test of which team is really top. After Thanksgiving, the team Alpha Sigma Tau, who are the current holders of the championship, played the way the Alpha Sig's rolled to the IF championship, perhaps it is a good thing that the Navy team decided not to play.

Sigs Win IF Crown: Crush Sig Eps, 25-2

The Alpha Sigs proved to be too fast to handle as they rolled up a decisive 25-2 victory over the Sig Eps in the recent IF championship game.

The Alpha Sigs received the opening kickoff, and from their first play the game was never a contest. On the second play from scrimmage quarterback Maurice Anderson passed to John Matthews in a play covering 80 yards for the first Alpha Sig touchdown. The extra point attempt was no good.

Upon recovering the kickoff the Sig Eps were able to move the ball well for short gains, but all of their long yardage attempts were broken up by the Sig defense. They moved the ball past the fifty yard line, where they were forced to punt.

On their first play the Sigs covered the entire seventy yards to their opponents goal for a second TD. Anderson passed a short pass to Glenn Thompson, who intercepted the ball from blocking back Ron LeCount, who ran the ball for the score. Tom Tokan blocked the extra point attempt and kicked the half over (13-0).

In the second half history repeated itself. The Big Sigs were able to move the ball nearly one yard past the fifty yard line and a first down, but they lacked that extra yard. The Sigs took the ball on the fifty and employed the Anderson-to-Thompson-LeCount play, which the Big Sigs never saw. For another touchdown and an 18-0 margin.

Shortly later the Sigs scored again on an interception pass which was literally popped out of the hands of Sig quarterback Tom Stosiek. The Big Sigs only gained two more points late in the game when they trapped Andy Smiley in the end zone for a safety. Neither team threatened seriously in the closing minutes and the game ended with the final score Alpha Sig's 25, Sig Eps 2.

Squad Faces Navy Pier; Could Be 'Long Winter'

Last week the team traveled to Maryland for its final exhibition before the season open. Glancy expected to be able to make better predictions following this game. The next game for the Techs will be a key one in the season. The Techs will face Navy Pier on December 2 in the STAC championships.

Glancy commented that the team had made much progress in the last week of practice, and is beginning to look quite difficult.

"It is a good thing that we are not opening up the season against Navy Pier," said Glancy. "We should be able to handle their club, and perhaps give our players some confidence."

The Techs will meet Navy Pier on December 2 in the STAC championships. The game will be preceded by a pep rally, and the tournament will be preceded by a pep rally, and the tournament will be preceded by a pep rally. The winner of the game will advance to the next round of the STAC basketball tournament. June 16, 1958.

AEPi Tourney

If you're out on a limb about smoking your cigarette, remember this: more people smoke Camel than any other brand today. The cost of Camel blend has never been equalled for rich flavor and everyday mildness. The best tobacco makes the best smoke.

Escape from fades and non-service... Have a real cigarette—have a CAMEL.
