Listenings Mag. Brightens
ITSA Polling Next Week

The fall issue of Listenings magazine, 24 pages from cover to cover, will be distributed next week during the ITSA-elects. Votes may pick up copies of the magazine at the polls when they vote.

Issues of the magazine not distributed in this way will be placed at strategic locations on campus after elections on Thursday and Friday. The sixth issue of ITSA's literary magazine, will contain contributions from 14 persons in the field of poetry, the short story, and the essay. The cover and other art work in the book has been done by Ludwig Dressenhaus, whose past contributions have appeared in Technology News this semester.

Nominations will be distributed free once again this semester, 1,500 copies of the magazine have been printed.

Jim Dayton, editor, feels that the Deadlines Nears
For Scholarships

Application forms for second semester scholarships must be turned in to the Dean of Students office by Monday, December 15. Questionnaire forms are available in the Office of Financial Aid. Only those students who are full time undergraduate day students are eligible for the scholarships. Financial aid is also a major consideration in awarding the scholarships. Most of the applications are mailed on a yearly basis, those who received this form must re-apply for summer aid.

Fog Horn' Puzzles Students
In Siegel Hall False Alarm

Blank sheets covered close of Techcraft in Siegel hall Monday afternoon when a fog horn sounded. The entire student body was confused as to what the noise could indicate, one brighter than average student realized that it might be a fire drill.

Rottelita Names
Eight to SUPC

President John T. Rottelita has appointed eight students to the Student Union Planning Committee. The committee, one representing the students and the other faculty, are composed of four members of the Student Union Planning Committee Dr. Vince Pael. Other members of this committee, which works directly with the student committee are David Benner, Martin Eliott, and Bernard Weisman. Members of the student committee are Tom Harrington (Chairman), Jim Combs, Bob Shaver, and Tom Tipp.

Politics, Get Pics
From Pub Office

An election candidate who has submitted pictures to Tech News may still get them in the Tech News, if necessary. The deadline for the December 12 issue is November 15. No pictures will be returned by the staff in any other manner.

4 Tech Co-eds Contend
For Homecoming Honors

Highlighting Homecoming weekend will be the Homecoming Dance tonight at the Convention Center. The game will be preceded by the Lewis College vs. Tech Homecoming game.

Top feature at the dance will be the crowning of a Queen of Homecoming. Queens will be selected by popular vote. Four candidates are in the running: Thaddeus Dewey, Patsy L. Foster, Anne Hall and selected by the Administration, Homecoming Queen will be crowned by the Administration. The dance will be preceded by the Homecoming dance will be held at 12:00. The queen will be chosen at 8:00 and will be the Homecoming queen.

Tickets for the dance will be $1.50 for couples. Several running schools in the area have been

ITSA Reconsiders Beanies
Amends, Tables Former Move

The motion pertaining to the tables and then reinstated in action as part of the ITSA agenda was brought for consideration, amended and then sent to the Publications Board for this motion. The motion to the ITSA meeting Wednesday night. Currie Lou Livingston, Richard B. McGovern, and Bill Hardt were appointed to the ITSA committee by the ITSA meetings. The motion was passed, the first committee report.

In committee reports, Marshall Taylor, chairman of the Beanies Mechanics Committee, gave a positive of regulations governing homeless Beanies housing. The Board, however, did not accept the report as a statement that has been presented. The Board had previously instructed the president to recommend the president's position to start raising funds. At a previous meeting, the Beanies Mechanics Committee had been asked to consider alternative means of housing Beanies.

The Board's action on the report was not finalized and the Board will not vote on the motion until the Board has considered the possibility of allowing Beanies to live in the recommended location. The Board stated that, in face of student opinion, the Board had reconsidered the Board's position and that the Board was satisfied with the results of the meeting. The Board also stated that the Board was not opposed to the recommendation of the Beanies Mechanics Committee.

5 Piece Contemporary Jazz Combo

Burdean, Brown Highlight Concert

Contemporary Jazz for the discerning listener will be presented at the ITSA Jazz Concert in the Student Union on December 10th, 7:00 p.m. The concert will be moderated by a modern jazz music student from the University of Michigan. The group has been featured at previous ITSA productions. It includes the jazz artists playing piano, vocals, drums, bass, and other instruments. The group has performed on campus and in the Chicago area. The concert will be sponsored by the University of Illinois at Chicago.

New Poll Sites Open
For Mid-week Voting

Nine sites on the ITSA board of control will be in operation next Wednesday and Thursday as voters will be given an opportunity to choose from 50 candidates at two polling places.

Wednesday, polls in the MC building and the Commons building will open at 10:10 a.m. and close at 10:15 a.m. Tuesday, polls in the MC building and the Commons building will open at 10:10 a.m. to 10:15 a.m. The polls will be open under the direction of the election commission. The polls will be in the Commons Wednesday and the basement of Commons Thursday. The polls will be open for the election commission to count the ballots.

All students are eligible to vote for the office of ITSA Social Chairman where Diane L. McNeil and Don Nelson are running. For other offices, an independent candidate must be nominated by two members of the ITSA association. The elections are to be held on December 10th and 11th.

Also in the activity schedule are the offices of President, Vice President, secretary, and social chairman.
Dissatisfied? Then Vote!

To master the fine art of Etiquismanship, Mama says you've got to have more than a hook of rope, a victim and a repulsive act (optional). The spectrum of motivations that guide the Etiquism, true, includes a few hard-nosed interlocutors, but two in particular, on the other hand, carry a big load in the building of a Democracy.

Dissatisfaction is the useful energy to register a grip on the other. This is not to say the metabolism that can scrape together the 340 calories needed to numb a growing 'No' will play its hands in Augusta. It is the inexhaustible energy that is periodically unleashed on us when the threat of a freedom forlorn seems over the horizon—witness Block Registration and Beannies.

These of you addicted to surveys might get a good fix on finding out whether the class that had enough go-getting to lug some 50 pounds of dead weight upon a bell tower twice, had enough to vote in the last all-school election.

There's a point flooding to the top of all this. Vote. If you in particular there, Willy, would get your thinking-man's ballot next week, it might spare us all some grief next semester.

Don't misunderstand the dissatisfaction angle. The satisfied do well to insure their continued well-being by voting, too. The satisfied, though, run the risk of complacency, and the complacent tend to ignore the polls. Come on, work at it, surely you can find some trendy thing to be dissatisfied with. Then you can or indirectly probe your candidates' views so that next Wednesday or Thursday you'll be all set to sharpen that extra Ovation, rush to your nearest polling place, and get real picky and choosy over a hot bulletin.

Tech News Gives Views On ITSA Election Issues

As a prequisite to getting their campaign speeches printed in Technology News, the candidates in Wednesday's elections for ITSA board positions were required to answer seven questions (yes or no) put forth by the Technology News editorial board.

The first question asked was: Did the candidate read the ITSA constitution and by-laws? We did not expect any "no" answers to this, but asked it as a psychological measure with the hope that it would at least cause the candidates to read these rules.

In answer to the second question, we believe that a limited trial, such as a free spring dance, would at least prove or disprove the claims for increased support for such affairs as the bayou would bring.

We are definitely not opposed to giving the book an extended trial for one or two semesters. Such a $1,000-per-semester experiment is warranted by the reasons thus far stated for the book.

There is only one stand which Technology News could be expected to take on the question of whether the book should be compulsory or not. It is explicitly stated that the 16 student-elected representatives plus a faculty and an administration delegate have the right to make a levy for such a purpose on the student body.

At the time the questionnaire was made up WITT was operating on an allotment of $100. Since that time the station has had its budget increased to the full amount.

The last question on the questionnaire has to do with the recently passed beanie measure. The questionnaires were filled out before the measure was passed. As was stated in Technology News last week, we are opposed to the plan.

One column in the box of answers is left blank. This is for the voters to see, hear these questions themselves and compare their answers with those of the candidates.

Survey Indicates Beannies Unpopular With Frosh Class

To allow for a more factual evaluation of the feasibility of the beanie regulation, Technology News polled the present freshmen during their chemistry classes on Wednesday morning.

Two questions were asked: Are you in favor of the beanie regulation, or would you be willing to wear a beanie if other freshmen did? The present freshmen class, although not under the influences of the incoming class would be, is similar in age and composition, and is about the best sample group available for analysis.

Sixty-three freshmen replied that they were in favor of the regulation, while 179 indicated their opposition. Fifty-seven were willing to wear beanie if others did, while 187 stated that they would not.

It should be noted that not all of the people in favor of beanie felt willing to don them or hats, while many indicated that they would comply with the regulation, although not really in favor of it.

As I see IT

Beanie Opponents, Supporters Overlook Important Issues

by Jim Madonna

Even if everyone at Tech were "forced" to wear beannies, I would not quit school, or refuse to acknowledge Tech as my Alma Mater, or commit suicide. I sincerely doubt that anyone would. Certainly it is a bit beneath the beanie that determines the respect paid to the wearer, not the headgear itself.

Doubtless, this beanie issue has grown completely out of proportion. Somehow, the wave of revolution which seems to have taken hold of so many of my peers fails to impress me. For this reason I am somewhat perplexed by the logic of those who would rise up to fight the "beanie crisis," but who ignore issues that seem to me more important, e.g., campus safety, the lack of eating facilities for commuters, and the quality of instruction at Tech. Not one letter to the editor has been submitted this semester dealing with these situations.

Beanies are worn by about 100 commuting freshmen at De Paul and also by the freshman of Rensselaer Polytechnic Institute, Carnegie Institute of Technology, and Loyola, Cornell, Syracuse, and Brown universities. Naturally, this does not imply that Tech must do the same—rather, it points out to some of the opponents of the plan that the wearing of beanie would not create a unique college situation.

Unfortunately, "academic freedom" has been used as a catch phrase by opponents. I fail to see the way in which beannies are in any manner academic in nature. As Oxford students are required to wear caps and gowns, yet this more restrictive rule is not considered to demonstrate an absence of "academic freedom."

Surely the lack of freedom allowed the incoming freshman in deciding "to beanie or not to beanie" is no less than that allowed Tech students under the compulsory activity book plan. The activity book will cost the student about $85 during his years at Tech; his beanie will cost him about $30. If ITSA does not have the right to pass the beanie rule (and many claim that they do) the student has the right to "force" everyone to buy an activity book. There is an overabundance of enthusiasm for the beanie and the book, but few have come out in violent opposition to the latter.

Certain those opposed to the plan can have little insight into the actual mechanics of the situation, since this Beanie Committee met Monday for the first time. I do not feel that wearing beannies will nullify the freshmen in eternal love and friendship. Neither do I feel that it will cause the enrollment to drop to five freshmen. I do feel, however, that the plan has a right to be publicized so that the students may know the facts and judge only after these facts have been studied. The plan may seem difficult to enforce and unworkable, yet I feel that its supporters have every right to demand a trial of it.

About two years ago, fellow students were telling Frank Gold that he was crazy—that his plan would fail. As a result of his "innovation" the semiannual jazz concert emerged as one of the highlights of the Tech social scene and one of the more well-attended campus functions. It seems that to a great extent any plan is only as good as the people backing it and working toward its success.

IIT Students Need Adequate Coatracks

As the winter months close in, more students than ever are becoming disturbed by the frequent shortage of hanging facilities in a majority of the campus buildings.

A coat wet with snow makes an awkwardly sticking block to the body, which is often equally wet. Damp garments are unable to dry when piled on vacant chairs.

The appearance of a garment which is more than hung is by no means improved.

The problem is not trivial, but a solution may be found by the administration which would provide coatracks with the coaters which they want—and more
Readers Defend, Attack Beanie Plan
Taylor Clarifies Beanie Issue

Dear Jenn:

In order to clarify the confusion that has arisen on our campus regarding the beanie, the original concept of the SAAB plan must be presented:

1. Every freshman would be issued a beanie at the beginning of Orientation Week.
2. The beanie itself would be worn approximately six weeks, at which time a coin would be held in the beanie until the wearer had visited all colleges. If the freshman was not found, the beanie would have to wear him for another three weeks.
3. From the first, it was definitely stated that there would be no banned from this. This means that a beanie that has been banned, worn by anyone who doesn't want to wear it, will be removed. The idea behind the beanie was to have a beanie that he was a part of the student body, rather than a winner coming in to a fantasy. What would be the reaction to the winning of the beanie?

While this could not be a controlled experiment in a more than anyone expected it, and intended that the upperclassmen who were opposed to the beanie would permit a trial and would not insist on a mass beanie removal on the part of the freshman. This would be far better, if any number of the freshmen should remove their beanie and use their own, they replace the purpose it is designed to serve.

SAAB is not attempting to hand out beanie spires to a more than anyone expected it, and intended that the upperclassmen who were opposed to the beanie would permit a trial and would not insist on a mass beanie removal on the part of the freshman. This would be far better, if any number of the freshmen should remove their beanie and use their own, they replace the purpose it is designed to serve.

The SAAB Board is a group of people who are interested in the SAAB program, and who are interested in the SAAB program, and who are interested in the SAAB program.

Yours sincerely,

Zoe

Dear Jenn:

I was almost afraid to read the following in the last issue of Technology Review: "I am not sure how the beanie can be used as a beanie or how it can be used as a beanie."

I was horrified because I could not find out how the student representatives would ever pass a motion like this. I feel that a beanie merely degrades those who wear them, and that they can be used as a beanie. I am sure that if the student representatives would know how to use a beanie, it does not request beanie as a beanie uniform.

I feel that beanie is not a very poor way to increase school spirit. A better way to do so might be to make our students proud of this school, bandy, and others.

The only advantage that I can see which will result from the use of beanie will be an increase in the non-profit profits that one non-profit bookstores is not making.

There are a lot more things for ITS to worry about that stressing freshmen to wear beanie: for example, a first-class library.

Robert M. Hedges, former chancellor of the University of Chicago, once said: "A university is a community of scholars. It is not a laborer's paradise; it is not a club; it is not a club; it is not a political party; it is not an agency of propaganda. A university is a community of scholars."

I do not apply his words to IT and say: "IT is not a laborer's paradise, IT is not a club, IT is not a beanie wearing place, IT should be a community of scholars."
50 Candidates Enter Race

Arch-1D Rep
Herb Hacker
Hurl 7 GPA 3.87
American Institute of Architects, treasurer; Sculling Board of Directors; Alpha Sigma Phi, Scholarship Chairman and house manager.

I believe the right of each student to choose for himself and himself alone any activity of the school on the merits of that activity. I would work for and protect more positive relations between the students, the Administration and Faculty.

I would support any activity which would avoid the academic standards of the students, improve the academic environment and improve the academic program.

Although I realize that student interest in the non-academic activities of the school is a major concern, I will support any program of promoting school loyalty through class distinction and/or discrimination, extracurricular activity, or through use of publicly-funded "stunts." I specifically believe that school loyalty can only be strengthened through promotion of school pride—pride in its students, facilities, and administration, and even in athletic teams.

Specifically for the Architects and ID students I would actively work to demand any new program to be based on your support for the Architectural Journalists.

Tom Murphy
Arch 5 Phi Kappa Sigma twins team AIA; Building Club, commuter.

If elected, I plan to follow the following policies: First, to set up a more effective system of obtaining t-shirts of the Arch-ID students on all matters concerning the ITSA Control. Second, we should have more planning of extracurricular activities for the incoming students. Third, we need closer relations between Architecture and the Activities of Engineering. Fourth, I would like to have more reports to the students of the actions of the ITSA Board.

I believe that the Arch-ID Representative must have a broad knowledge of the policies and operating procedures of the ITSA Board in order to represent the students on the Board.

I should have a regular office so that he can be reached by all the students in the area. Lastly, he must be a firm advocate for student affairs and he must work to build his constituency to the best of his ability.

Engineering Rep
Phil Burst
Hurl 4 GPA 2.45

I am definitely against compulsory activity texts. I do not think that students who find it impossible to attend social functions because they have to work on weekends or for other reasons should be forced to pay for these events. I am not in favor of an activity book, it can only be made to offer something for every student. I am, however, willing to give the book an annual trial but I am against a free dance because I don't feel that it will be productive.

I do not believe that freshman housing is in keeping with the spirit of the school. At ITT a freshman can take in the music immediately in the bastions of the school. I do not feel that a freshman will aid in the integration of new students into ITT as the activities at ITT are not open to all.

I live on campus and am available for further discussion of my views and ideas with any interested student.

If you elect me as your Engineering Representative, I will do my utmost to promote the activities and whatever else may be needed. I hope that you will cast your vote for me.

Ronald Douglas
Math 8 GPA 3.88

I would increase school spirit. I believe that the ITT Tech engineers are truly represented. If you believe that just being a first year engineering school will hold Tech in high esteem, you are seriously mistaken. I am tired of hearing people say, "Where?" When I tell them that I go to ITT, I believe that they think of the school as another school with a show of enthusiasm from the student body will come to the ITT engineers to become as well known as those of any other school in the country.

Robert Woods
Physics 4 GPA 3.22

As an engineer for the ITT Tech engineers, my main goal is to see that the ITT Tech engineers are truly represented. In your belief that just being a first year engineering school will hold Tech in high esteem, you are seriously mistaken. I am tired of hearing people say, "Where?" When I tell them that I go to ITT, I believe that they think of the school as another school with a show of enthusiasm from the student body will come to the ITT engineers to become as well known as those of any other school in the country.

Eric Greenler
CHE 6 GPA 3.75

It takes all kinds of engineers to do Western Electric's job.

Chairman of Alpha Sigma Phi LF
Glee Club, Beta Omega Mu

One of the major issues that will be before the new Board of Control is the question of a compulsory activity book. A representative must be responsive to the demands of the students and on all issues and on this issue, I feel that the level of student interest in school social functions also indicates a lack of support of a compulsory activity book.

Can you be forced to attend things in which you are not interested? Perhaps the proper approach would be to attack the problem of interest in social functions. I believe that in the past the social calendar has been formulated without knowledge of student interests. Functions always have poor attendance, while others, such as the Jazz Concerts, are successful. If elected, I will do all that I can to provide a social program that will satisfy your interests. This is a compulsory activity book, is the answer.

Dick Gasiti
CME
Tulane

SAAR, Senior Counselor Chairman, Publications Board; Key Club, Atchins Committee, Treasurer; Tech High School, Vietnam, Veteran Counselor.

As a candidate for Engineering Representative I feel that there are several positive steps that can be taken to promote a feeling of belonging which is now lacking on this campus. A well-organized program of free hours with more activities to fill this time and a larger amount of study facilities for computer science students are planned.

Activities book, providing tickets to the dances and concerts which attendance is now charged, if made available to the students who wish to purchase it would be priced well below the total entrance fees charged for the activities and thus making it a real cost value possible. I feel that the activities book would also create a larger attendance at the dances and concerts.

Terry Lindquist
ME 3 GPA 3.25
Delta Tau Delta
Vice-president, Beta Sigma, Senior Counseling Publicity Chairman, Sigma Tau, Chairman of Student Affairs Education Committee, S.A.E., By Establishment, Delta U.S. Sports, Engineering 3-P Sports

Should Tech have an Activities Book? It has been used with great success at other colleges and universities by increasing attendance and interest in these activities.

The only way we can realize success or failure for such a book here at Tech is by giving it a trial run to see how it works in this trial period. Yet this is but one issue. The position of Engineering Representative entails much more. He is a member of the student government and in this capacity he has the privilege and responsibility of entering into discussions and voting on matters concerning the student body and, therefore, the engineering students.

He is to pass on to ITSA the feelings of the engineering students acquired from talks with his classmates. This is the job and if elected, it is my pledge.

Candidates Give Pros, Cons

Roger Peterson
ME 3 GPA 3.77
Pi Eta Phi
I am campaigning for Liberal Studies representative on the ITSA Board of Control. This position represents sixty-three Business and Economics majors, plus Political Science, Language, Literature & Philosophy, and Home Economics majors for approximately one hundred and fifty students.

At the present time I feel that the Liberal Studies students are not able to present their ideas to the Institute because there is a lack of communication between the students and the ITSA Board of Control. It is my goal to break this barrier and to provide better communication.

The activities I have been involved in will give me sufficient experience in helping you, the Liberal Studies major.

ME 3 GPA 3.77

Social committee of Triangle, Dance Band, Associate Announcer of the Blueberry, Interfraternity Council, Concert band, Assistant Speaker

Councilman
Illinois Tech is in the midst of a giant re-development. With slight obfuscation you can see the pains of growth that the Institute is experiencing. We are moving from the status of an Institute to that of a University. From this, I feel that the search committee must consider this.

The "Activities Book", now under consideration, is a good example of what this new University will be. This book is the spark we need to ignite a much better school spirit—although I do not feel that this should be compulsory.

In instituting a large "sales plan", we can still sell a considerable amount of books—and so doing, not create a feeling of compulsion in the few who would not be in favor of it. If we are going to give that a fair trial, it must be for a semester or two, not for just one season.

Dale McDaniels
FPK 3 GPA 3.13

In my opinion a well-balanced social program can do much to instill school pride in the student body—the single other factor. These efforts, of Social Council, should be planned in a manner which will yield the greatest interest in the greatest number of people. At the present time the more pressing questions facing ITSA are the student activities book and freshman bonanza. I would like to see the student activities book a trial on a limited basis, such as a free all-school dance, but unless the new market of the proposal is brought to light, I would not force such a book.

I do not feel that the upcoming freshman bonanza will be as beneficial as proposed. The planning of this bonanza will be done with the aid of the officers of the class and the ITSA committee. This will be done by means of a meeting of the entire class for the purpose of determining our views on potential activities.

I do sincerely hope that the new term will bring about the necessary changes to make the freshman class a respected president and promote spirit on campus.

Frank D’Alessandro
METE Independent Resident Bld Sports

Tech News Polls Politicians

1. Have you read the ITSA constitution, by-laws?
2. Are you in favor of the proposed activities book?
3. Are you willing to give the book a limited trial, say for a free dance next spring, for example?
4. Are you willing to give the book an extended trial, say for a semester or two?
5. Would you be in favor of a compulsory activity book?
6. Are you of the opinion that we are now on a limited budget of 100 dollars, pending investigation. Would you be in favor of appropriating the equivalent of previous appropriations?

Farr Wins Own Trophy; Ask Dorm Social Co-op
by Eugene Fishel

The recent defeat of Fowler Hall by Farr Hall, 39-20, in the intramural basketball tournament, marked the advent of a dormitory tradition. A trophy called the "D" Bucket was presented to the winners.

It shall rest in the winner's dorm after each sporting event between the two. Some of the boys in Farr Hall make the trophy. They hope that it will add some color to the dormitory community, a somewhat optimistic view.

Perhaps we should have a committee to help our dormitory officers. As it stands now, each dormitory acts completely independently. Because of this, many interesting and different events are not scheduled.

IRE's Feature Dols, Elections
Mr. John Dol of Warwick, Ind., will speak on issues and multiplicity at the next IRE meeting in the EEPROM auditorium on Tuesday, December 16, at 7:30.

In addition to Mr. Dol, there will be an election of officers. Re-elect the current ones or be refreshed with new leadership.

Tau Beta Pi Initiates 40
Illinois Tech's academic engineering honorary, Tau Beta Pi, is having an initiation banquet tonight. The banquet will take place at the La Scala Restaurant on the near north side.

Initiation ceremonies will induct the organization's active membership from 25 to 65. The featured speaker at the dinner will be Dr. D. Cashmore, national president of Tau Beta Pi.

Only seniors and juniors are eligible for initiation into Tau Beta Pi. Selections of members is based upon scholarship, interest in school affairs, and cultural activities.

Collier Millard is president of the Tau Beta Pi while Martin Graham holds the vice-president's spot. Other officers include Osa Debra, corresponding secretary and cataloger and Charles Brooks.

Skulls Elect Officers; Delt-Sig Party Looms
by Johnny Neubert

After this week's temperature drop most of the Techhawks are thinking about transferring to the University of Florida where the weather is right for short sleeve shirts.

Huntington is pleased to date Diana Carlon, Soc. Dem. Molly is pleased to date Sharon Vee and Ted Pontikes is pleased to date Cathy Flood. Congratulations to the new "Queen of Hearts," Diana Carlon.

Sigmas Keep busy planning for its annual Christmas party this Saturday. Monday, the pledgers are giving a Mother's Night.

Kappa Phi Delta is holding a Bake Sale on Saturday afternoon. By the way, 12's, what is your students' picture doing in Donna's room? Thursday, Delta Zeta will be host to their intermediate dinner. It will be attended by two men from each house.

Sigma Pi Sigma Schedules Dinner
Sigmas Sigma, Phi Upsilon honorary society, announces that they will be holding a meeting today at 3:00 p.m. in 203 Siegel Hall to plan their forthcoming dinner for seniors and members of thePhi Upsilon Honor Society.

Be a guest for a pleasure test...

THIS IS THE ONE FOR WAGONS! 1959 CHEVY

Chevrolet's five stunning new station wagons for '59 are shaped to the new American taste with fresh, fine Slimline design. They're beautifully practical — with roomier, quieter bodies by Fisher, an even smoother ride, new ease of handling!

Wagons were never more beautiful or useful. From low-set headlights to wing-shaped tailfins, these '59 Chevys are designed for easy looking anywhere on wheels. They're just about the handiest things on wheels, too — from their overhead-curving windshield to their longer, wider load platform. Besides additional cargo space, you also get added seating room (4 inches more front, over 2 inches back). And you'll find other practical innovations as new easy-control steers. Be a guest for a pleasure test!

Chevrolet now — see the wider selection of models at your local authorized Chevrolet dealer's!
Wayte Cites Necessity Of Better Ballhandling

Chem-Mets Top Bowling League

The Chem-Mets bowling team moved into first place in the Intramural Bowling League following last week's action. Their team has compiled a 15-3 record. They are followed by the Am猜ters with a 14-4 mark.

The Chem-Mets gained first place in the race for high series, or throw game total. Radio City rolled a 157 to surpass second place Ira Disellschaft and Ed Orten, both of whom have 566 totals. Freshmen Chemistry is still in the individual competition with a 523 series.

Marquette Edges Tech; Matmen Lose 27-12

The tech mat squad's record was evened out at one victory and one defeat following their 27-12 loss to Marquette University in Milwaukee last Saturday. Marquette was the only team to beat last year's Tech team, which compiled a 7-11 record.

Two bright spots in the Tech loss came in the 147 and 157 pound classes. Both wrestlers placed their men for two of the team's twelve points.

Dave McQuade scored a pin with only two minutes ten seconds of the match gone. Paul Stone turned the trick in four minutes fifteen seconds. Tech's other points were due to Chuck Krywania's 6-15 tie with Wright Junior College.

Wright Edges Sharks 42-39

Two Relays Clinch Victory

The Wright Junior College swimmers edged the Tech Sharks Tuesday by 42-39. The deciding factor was the relay events. Wright won both the 400 yard free style and 400 yard medley relay events. Both relays were closely contested until the finish of the race.

Tech led in individual competition, taking first place in six of the eight individual events. Paul Ppleasant took first place in both the 60 yard and 100 yard free style events. Grace Carr finished with individual honours in the 220 yard free style events. She also placed second in both the 440 yard free style and 500 yard breaststroke. Wright concluded the dual event with Tech's Herb Harker.

Other points scored for Tech included Andy Zender with third place finishes in the 60 yard and 100 yard free style races. Regie Burt finished a second place in the 220 yard breaststroke.

Bob Clingerman finished second in the 440 yard free style and 550 yard medley. Bob Burren won third in the 220 yard free style.

DZ's Top Sigs: 25-10 Victory

Fourth in Row

The tracks, dents and scuff marks found on Stanny's Arrow Box Sunday afternoon were evidence of the animal football battles between Delta Zeta Sorority and the L.Y. Champs. This year the champs were the Alpha Xi. Sigma, turned in both tough, adhesive tape and smears, battled the wearers with little fear to put up an interesting but futile defense of their title.

In the opening play of the game the DZ's quickly captured the lead. There seemed to be some confusion in the Alpha Xi lines due to the falling snow. Having once determined their direction they made several valiant efforts to break a strong DZ line. Among those holding the line were "Tiny Tender" Roberts and "Dynamo" Derrlach, who played the entire game.

Having scored their first touchdown, making the score to 13 to 0, the Alpha Xi got their first real taste of DZ fury. "Lightning Legs" McLaughlin for his 37 yard score. Some controversy arose when two balls were produced, but the adamant referee ruled the goal-post ball as the original.

Credit should also go to the DZ captain, "Jr. and "Jr. Moores, who now has led his team to victory for four years in succession. Other apparent results of the game were a dual of 25 to 10, DZ, with two DZ stars members heading both bruise and war torn marks on the right leg. It seems one correspondent defender had been starting in anticipation of the game.
Cagers Smash CTC 106-61

Kool Gents, Daedalians Gain AEPi BB Finals

The Kool Gents and the Daedalians both gained final playoff positions in the AEPi Basketball tournament. The championship was scheduled for yesterday.

One of the three independent teams to compete in the tournament, the Kool Gents advanced to the final round with a 56-48 victory over the Alpha Sig. The D’s gained their berth by virtue of a narrow 48-47 win over Navy.

Both of the games were closely contested. The Alpha Sig led 27-25 at the half of their battle with the Kool Gents. It was only in the closing minutes of play that the Kool Gents were able to pull away to claim victory. Tony Nakahara of the Kool Gents and Roy Anderson of the Alpha Sig were tied for scoring honors with 14 points each.

The Navy team fought back from a 23-19 half time deficit by thoroughly outpacing the Daedalians in the closing minutes of play. They tied the game at 47-47 with thirty seconds remaining. However, the D’s gained possession of the ball and drew a foul.

One free throw was good and the D’s gained only one and a half seconds remaining in the game. Navy didn’t have time to get away a shot before the buzzer sounded.

In the final quarterfinal game of the contest, the two teams were even.

The Kool Gents edged the Pi Kapp “A” team 74-64 in a last second basket by Tony Nakahara. Nakahara also led the scoring with 16 points.

The Alpha Sig, led by Peterstone’s 15 points downed the Pi Kappars 43-35. Roy Zein dropped 12 points for the D’s.

Despite an 18 point effort by Mike Hunter, Triangle fell victim to Navy 17-20. Navy used the game to shore up their defense, holding the Midd to only 17 points.

The Daedalians routed the Pep Pipers on the score of 49-14. After a slow 16-5 first half, Andrea and Rob scored to lead the pack, posting 17 and 16 points respectively.

Tech Varsity Mastering Five Badges around coach Ed Clancy during break in 106-61 rout of Chicago Teachers College Tuesday night. Cagers broke the century mark for the first time this season with only seconds remaining to play.

Desperation Shot Breaks 100 Mark With Second Left

by Mike Graham

The red and gray grid ironed it again with points to spare. Tech took on and defeated CTC on its home floor last Tuesday evening, and in doing so, passed the century mark.

With about a minute to go, the Techbacks had already tallied 99 points, but the question in everyone’s mind was: “Can they make 100?” It did not appear that they would, as CTC canned the ball for most of the final minute. However, with only seconds left, it was Techs off to a thunderous start. The ball was passed to Cowan, with five seconds left, Cowan was shading, “Shoot, shoot!” as he dribbled across the center line. Covers were set up; apparently the ball had hit the backboard, bounced on the rim, and fell through, putting Techs’ total into triple figure final score.

Techs over CTC, 106-61.

Tech was in command throughout the game as in the Navy Pier game a week ago. CTC was stymied, and gray took shots from the outside and made them to good measure. Techs had the edge on the boards, and Gallagher willed scoring, scoring 56 points among them. The team rebounded well as a whole, but it seemed to be faster against CTC than against the Pier it as showed through its chances for fast breaks to set up a rhythmic play.

CTC was not totally without glory Tuesday. Andy guard, Jack Neville hit 21 points for the green and white but failed to bolster the CTC offense and its hopes. Newbrough shot from the outside and was the scoring leader for the game when he hit the hardest one on CTC for Tech on a break.

38 Prop Teams Enter Tourney; Opens Dec. 19th

Thirty-eight teams have entered this year’s Intercollegiate Basketball Tournament. This is about the number of teams that was expected by tournament director Bernard Whelihan.

The tournament will be held on December 19, 20, 22, 24, 26, 27. The site will be the International Yacht Club, 17th and Halsted Streets.

The final game of the tournament will be announced by Whelihan at a December 13 luncheon. High school coaches and principals, administrative officers of the board of education, sports writers, and IIT administrators will attend.

This single elimination tournament is the largest prep competition in the Chicago area. Marshall High School was one year’s last winner and went on to win the city, public league and state titles.

Tickets for individual games may be purchased in advance at the IIT Box Office and will cost $3.00.
