Students Elect Reps; TN to Print Results

Elections were held on Wednesday and Thursday to fill nine positions on the ITSA Board of Control and choose the officers of the freshman class.

Approximately 400 students voting, the results of the ballots were not known until last night, too late for the issue of Technology News.

The news for this semester’s election appears to be lighter than last spring’s, but the trend seemed to indicate that the average February term would be exceeded. The nine representatives who are elected will be installed at the January 3 ITSA meeting.

Library media was distributed at the polls on both days, and the remaining copies will be placed in the 351 lobby today. Issues of the magazine are being distributed free of charge.

One interesting aspect of the election this semester, other than the small turnout, will be the Iowa vote. Dick Ward, ITSA Vice-President and ex-officio chairman of the Committee Sets Rules on Beanie's

ITSA’s Beanie Mechanics Committee, headed by Marshall Mertens, last week unanimously agreed upon a set of regulations regarding the sale of the beanie. These regulations are subject to approval by the ITSA and will be voted upon at their next meeting.

All members of the committee were in attendance. Following, they include: Don Russell, Don Hennessee, William H. Fullerton, Burt Corbin, Larry Weis, and Ray Zarnowskii.

An important point brought up in the discussion of the regulations, stated that “The Assistant Dean, Mr. O’Connor, has asked that any freshmen appearing before him and wearing a beanie must remove it in his presence, after realizing the program and its purpose, he may do it himself.”

According to the committee’s plan, freshmen will wear beanies.

Experiment Shows Time Limit Faults

Doan Tech’s system of time-limit examinations unduly penalizes the student. The answer appears to be a re-examining “yes,” according to an experiment conducted by William Diemer, instructor in the Department of Mechanical Engineering.

The quiz was neither more nor less difficult than quizzes usually given by Mr. Diemer. To insure this, he lifted locally a number of problems from previous exams of his students from previous semesters, changing only the numerical values. The idea was that a student would not appear to be an unusually capable student, but the average on the quiz was quite a bit lower than that of his usual exam in Strength of Materials.

The average time spent by the students taking the quiz was 150 minutes. The first student to leave spent 90 minutes, while the last student spent 180 minutes. Though these figures appear to be high, a number of students in the class said that they did not work as rapidly as they would have on a time-limit quiz.

Mr. Diemer expressed considerable astonishment as to the results of his experiment. He said: “The most important finding of this experiment is that the students themselves think that the system is better. In a sense, it actually encourages honesty, effort work.”

An interesting by-product of the experiment was that the average grade of the six students last to leave was 79.5%, while the average of the ten students who spaced an average amount of time was as high as 89.5%

Pub Board Picks Zoeller New Tech News Editor

Beth Zoeller, ME 5, was elected editor-in-chief of Technology News for the incoming semester in a meeting taken by the Publications Board Tuesday night.

Presently serving an associate editor's post, Zoeller has expressed a keen interest in the publication of Technology News. She is a Junior in Chemistry.

Zoeller was elected by the board and will be responsible for the editorial page. Zoeller was also in charge of the editorial page and was particularly interested in the publication of Technology News. She is a Junior in Chemistry.

The ITSA Board of Control, composed of four students, four faculty members, and the chairman of the ITSA, will work with the new editor in her endeavors.

Union Planners Consider Ultimate Content, Uses

Long range use of the new Student Union was discussed at the second meeting of the Combined Student Union Planning Committee, composed of four students, four faculty members, and chairman Raynoir Jones. The committee is responsible for planning the use of the Student Union.

This new approach to planning concluded with suggestions from various groups, including the Student Activities Committee, the Students’ Association, and the faculty. The proposals were presented to the committee and were discussed at a meeting held Tuesday.

Using a more long-term approach, the committee is attempting to determine what activities the new Student Union should include. The committee will also be responsible for planning the use of the Student Union.

SUB Presents Second Recital Of Folk Music

Folk music and Quaker Band will be featured at the second of the 1959-60 season on the campus. The Quaker Band will be in concert at the Union Building on Tuesday, January 5.

The price of admission will be $1.50; tickets will be sold at the door.

Homecoming Queen Louise Diemone receives flowers and jewelry, with the inscription, “To Louise Diemone, Homecoming Queen 1958.”

150 Attend IIT Homecoming Friday evening in the Commons.

Louise Diemone was named Homecoming Queen at the Homecoming Dance. Diemone was chosen from among four candidates.

Discipline will be maintained as usual and the party will be supervised by Miss Diemone and her attendants.

The dance, which followed the Lews College-Tech basketball game, was sponsored by the Homecoming Club and was well attended.
Editorship Demands Experience

by Jean Neville

Every semester, when the data for Tech News rolls around, complaints are voiced from those who seem to feel that the fact that only one applicant applies for the position is an indication of something basically wrong in the system for appointing publication heads.

Do the complainants take into consideration the experience and qualifications of the applicant? Usually not. Although many people vying for the position would introduce a smattering of competition and give the publications board a real decision to make, I have noted that when many candidates apply, they do so because there is no really qualified applicant, and each demands that he stands as good a chance as any other.

By contrast, if an applicant is home-schooler above the rest, the others will probably realize this, and not wish

Letters to the Editor

Dear Miss Neville,

You and Mr. Taylor seem to think that speaking is very prevalent on this campus and that something must be done to correct it. The only difference is in the steps to be taken. But it is unfair for the whole school to get worked up over issues such as houseware and study habits.

The sellers of the "school spirit" plans are overlooking the fact that what they are trying to sell, the protest already has. Most of the students come to Tech because they like what it is and are going to use it, and they don't want to change it for the worse. Simnna may not be sexy. The present argument every chance this size.

Robert Wolford, E.S.

Criticizes Commons

Editor, Tech News:

I sincerely believe that it would be far easier for the beloved administration to publish those on which the students may use the students' lounge in the Commons building instead of being forced to change the "try, try again, try" style of the sign.

It is extremely discouraging to consider the contributions of our faculty, our private affairs. In the event money is received for its use, are these funds appropriated for the benefit of the lounge?

We must also thank the administration for the removal of the chairs much loved by the "40 Wink Club". The mistaken, straight-backed lounge have been reserved in the spirit with which they were once, content.

Carl Poch, E.L.

SIC Backs Student Demands For Instructor Competence

A gripe box to be used to collect complaints, primarily about teachers and student government, submitted by students will be placed in the Student Union after Christmas.

The Student Investigative Committee, composed of the divisional representatives to the ITSA board, will be directed by the vice president of ITSA at chairman of the committee.

It will be the duty of the vice president to study the complaints. Those complaints concerning quality of instruction which are felt are sincere criticisms he will direct to the appropriate divisional representative.

As long as the action remains at the instructor level the identity of the student making the complaint will be secret. If the problem seems to be serious and the instructor fails to take corrective action, the matter will be taken to the department head and the name or names of the complaining students will be revealed. If a serious situation of this nature arises, there would probably be more than one student submitting a complaint.

Members of the ITSA board are handling the complaint process in order to keep the matter on personal basis as possible, while relieving the complaining student from the frequently

TN Celebrates Yule By Restating Policy

Every year, right after Thanksgiving, the Technology News editors become aware of the coming of Christmas. Every year these same editors look around them and say the "good will" they have spread throughout the fall semester.

We are often approached by students who accuse us of always falling in the worst side of student, faculty, and administration activity or back of activity. These students frequently cry that "why don't you print the good things that ITSA, Joe Clod, Professor Leftwing, etc. does?"

These questions can be answered in one of several ways. In many cases, the good any one person or group does in a week is greatly overshadowed by some malaise of this same group or some other in the same week.

In addition, there is the matter of what a student newspaper is supposed to do or do not. For example, many college newspapers print more ads than are printed for students. As a result the papers are little more than a publicity rag or alumni bulletin with practically no editorial comment.

Such is not the function of Technology News. Besides covering the issues on the news pages, we are committed on them on the editorial page when we felt it appropriate.

Such a policy does not necessarily win friends, but Technology News does not desire to win friends at the expense of compromising principles.

During the last semester, especially in recent weeks, people have accused Technology News of attacking personalities or of playing politics. As in the past semester we have made editorial comment on an issue unless our own conscience dictated it.

For several semesters now, Technology News editors have remained aloof from the political scene, at least as candidates. It has been the dictate of conscience, then, rather than political motivation, which has determined our editorial policy.

With tongue in cheek, therefore, Technology News would like to wish that all these people who write letters to the editor, members of ITSA, members of the faculty and administration, as well as each student—have an enjoyable holiday.
Rho Epsilon Stages Successful Banquet

Rho Epsilon, honorary EE fraternity on campus, reports that its initiation banquet last Saturday at Toffenetti's was a huge success. According to Don Nissen, Corresponding Secretary, the two guest speakers, Dr. Morris Adamson of IIT's Psychology Department and hypnotist Colonel Elliot, were largely responsible for the banquet's success.

Professor Adamson spoke on experimental psychology and entertained the guests with a humorous monologue.

Colonel Elliot, an elderly Army veteran of 40 years and holder of many medals and citations, spoke on the aspects of hypnosis and gave convincing demonstrations, especially in self-hypnosis. Col. Elliot, a very nervous gentleman, is quick to point out that no discovered hypnotism for educational purposes and not for entertainment.

Mr. Elliot is presently working for the Ph.D. in psychology.

President Jack Stewart mentioned that this was the largest group initiated since 1949.

Beanies

Continued from page 3

from the Monday of Orientation Week until Tuesday of the fourth week in the semester. At this time, the Admissions Committee on Freshman Activities will sponsor a contest between the freshman class and all others. If the freshmen win, they can permanently buy their beanies. If they lose, they will be required to wear them for another three weeks.

Students May Take Civil Service Exams

The United States Civil Service Commission has announced a new Student Trainee examination for use in selecting college students and high school graduates for work-study programs in various Federal agencies. The training programs in scientific, technical, agricultural, accounting, and statistical fields.

Some positions are located in Washington, D.C., and the nearby area only. Others will be filled throughout the country. Trainees will be paid at the rate of $1,250 to $1,750 a year during the periods in which they are employed.

Students must be enrolled in, or accepted for enrollment in, a curriculum in college leading to a Bachelor's degree in one of the fields included in this training program. A written test will be given.

Further information and application forms are available at many post offices throughout the country, and at the United States Civil Service Commission, Washington, D.C. Applications will be accepted until April 2, 1959.

Pub. Bd. Elects New Officers

Tom Harrington, E.E. 6, was elected chairman of the publications board for the coming semester.

Dick Griff is was selected as vice-chairman, Carol Lou Littigton as corresponding secretary, and Helen Brandst at recording secretary.

Elevator Difficulties Halt Mundelein Girls

At Mundelein College 16 girls were late for their morning classes when the elevator got stuck between floors. An SOS was sent to the adjoining elevator, and 15 minutes later a repairman arrived to inform the girls that they were stuck.

Thirty minutes passed with the girls expressing concern over how late they would finally be when the waiting and bearing announced that the elevator was back in operation. (Wonder if this incident will require the girls to have a key to be able to use the elevator in the future.)

Georgia Tech awarded a gleaming, brass trophy for first prize in its annual car parade. The winner of the Racebowl's Rock Parade had a wheel mounted on the back of his car to make it turn in circles. Furthermore, it was constructed in such a way that it tilted back and forth and, via a small machine, produced orange smoke.

The suggestion box in the library at Delphi College on Long Island brought many varied and interesting results. One person suggested that all books dealing with war, revolution, atheism, etc., and communism be banned, while another went so far as to say that all the books in the library should be burned.

Remarks ranged from complaints about the lack of quiet in the library to the desirability silence some found there, while one poor soul even complained about ants on the drinking fountain.

A is to beat—but without the s you miss the whole idea of

A is to smoke—but without flavor you miss the whole idea of smoking!

When it comes to flavor, IT'S WHAT'S UP FRONT THAT COUNTS

Up front in Winston is FILTER-BLEND that's why WINSTON TASTES GOOD like a cigarette should
Christmas Shows Merits Of ‘You’-centered Living

The Christian Feast of the Holy Nativity (Christmas) approaches once again. As Christians prepare for the event, there are some challenging and thought-provoking ideas to consider.

According to Christian belief, the Nativity was a fulfillment of God's plan to save all mankind. If it is true, then it is also an amazing idea. It is a rare event that describes how love, mercy, and forgiveness are expressed in the true meaning of the season.

By way of contrast to the Christian story, think of a daily routine. The chances are you will see stories of workers, managers, and others trying to keep the profits high, employees trying to take home more of the payroll, and so on, and so on. Is this the true meaning of the season?

It may not be the world we would like to have, but it is the one we have brought upon ourselves. Each of the above-named “issues” represents a reversal of the human need to “give.”

The rubber wants to “get” without giving. The murderer wants to “get” his own security, in one way or another. The drug addict wants to “get” away from or out of something. The partisan wants to “get.” Employers, employees, yes, and even the consumer—all want to “get.”

In their absence, the citizens of our world stem from a desire to “get” one’s desire without accepting the responsibility for them. In short, instead of living and working, we see people and living things in an “I-entitled” environment.

How different would our world be if we were to become “YOU-centered” and sought to give rather than get? Is it possible? Not at all! We just think so because we have never tried the other way.

Can anyone get an education without giving himself to a learning process? Can anyone get to be a dedicated student without giving himself to his work? Can anyone get an invaluable friendship without giving himself to his friend?

Giving oneself to persons or goals is prerequisite to a true getting of anything. Because we see this as true, Christians are able to believe in the self-giving of God.

Rev. William D. Faughnan, Chaplain to HTU

Yuletide Festivities

Cloud True Meaning

It’s rather generally known today that the public observance of Christmas is quite late in origin. Historians tell us that it was not until the fifth century that Rome began to observe a Christmas festival.

Indeed, the observance of Christmas is December 25 has no historical reason behind it at all. The date was probably picked to replace a popular mid-winter pagan festival characterized by an orgy of fanatics and self-abandonment. In time, however, these two observances became fused so that today, in the atomic age, we still encounter this pagan double legacy each December.

On one hand there still lives the bacteriological fear of self-satisfaction and, on the other, the remembrance of the faithful of God’s giving of himself in the form of a child—living and dying in misery—to free and redeem mankind.

The conflict between these two meanings of Christmas symbolizes a clash of values which we all face each day. What is the true purpose of our life as individuals and as a “You Christmas”?

SU Board Promotes Union Area Activities

What is the Student Union Board? Although many students hear and read about this committee quite often, few really know what this very important facet of I.T.S.A. is or what it does for them.

The purpose of this board is to promote and control the student activities held in and around the Student Union Building. This is accomplished by dividing the board into three areas: Activities, Programming, and Publicity.

Each of these three areas has a director and assistant director, and these six people, together with the President, Secretary-Treasurer, and two advisors, make up the 10 voting members of the SUB.

The Activities Committee handles the Student Union’s recreational facilities, the Lounge and Social Room, and schedules the building for its festive occasions.

The second committee, Programming, maintains and handles the scheduling of the SUB facilities, including the booth in the SUB lobby. The Publicity Committee is responsible for keeping the student body and staff informed of all activities within the Student Union. This includes posting a calendar of SUB social activities in the SUB, publishing a Student Union Handbook, and promoting to the student body the plans of the SUB for the next year.

All of the members of this board are appointed by the I.T.S.A. Board of Control, with the exception of the student directors, who are picked by the individual area heads.

Applicants for these positions need merely to be acquainted with their responsibilities and the methods that they will have to employ in their particular area to be qualified for appointment.

This makes the SUB one of the easiest ways a person interested in the I.T.S.A. can involve himself in the campus affairs.

Ever meet a Doubting Thomas?

A college senior once remarked to a Bell System interviewer: “A telephone career must be a mirage. I hear talk about fabulous training, fascinating work, grade A job security, and rapid advancement in management. Sounds a bit too easy. What’s the real story?”

The interviewer knew more talk wouldn’t sell a skeptic. So he showed him some “problems” of recent college graduates who had worked as telephone operators and had won early management promotions.

Our inquisitive friend has been with the Bell System 3 years now—and is currently supervising the work of 55 people.

We’ve converted a host of Doubting Thomases. Whether careful or not, you’ll learn a lot about rewarding telephone careers by talking with the Bell System interviewer when he visits your campus. Also read the Bell Telephone booklet on file in your Placement Office, or write for “Challenge and Opportunity” to:

Sigs, TX Hold Formals; Pi Kaps Elect Officers

by Johnny

Sigmata on the social calendar of the Alpha Sigmata is the "Black and White" formal to be held at the Shoreland Hotel. The mixer will be held on Saturday, May 4.

The theme of "Triangula Intestine," a formal party at the Delta Tau Delta, will be held on Saturday, May 4.

The Sigma Kappas held their Christmas party Monday evening in the Sigma Kappas' house. The party was attended by many members of the fraternity.

Jay Doblin Guides ID's, Okays Entrance Rules

by Donna

Jay Doblin, Director of the Institute of Design, considers the school of design as falling into a category somewhere between liberal arts and engineering. Therefore, this type of school can be associated with either a liberal arts or engineering school.

He thinks that the entrance requirements are sufficient because a better quality of students is obtained. Since there are many students of the Institute of Design, Tech's ID Department can draw students from a wide area.

There are approximately 125 full-time students and 375 to 375 part-time students. A Saturday Workshop attracts Chil-
John Olin, Soph President, Advocates Activity Books
by Tom Proctor

"I am in favor of anything that will reduce what we call apathy," commented John Olin, President of the Class of '61.

"An increased attendance at social events would definitely increase the school spirit," he continued. Competency Activity Books will make it easier for students to attend social and athletic events. The student will have a ticket which he purchased at a reduced price and, in all likelihood, he will use it.

The book will also serve as a social reminder to remain in touch with coming events." He thought that a few spring dance should not be a criteria for judging the feasibility of activity books.

"The use of buttons will obviously help get rid of apathy. Their use will increase recognition. Freshmen will be more closely bonded together because they are all placed in a similar environment, and there may be inter-class rivalry, such as a tug of war.

"The main objection to buttons seems to be that their use may not be as able to be enforced. This and other administrative details are in committee and will be presented to the board after they have been worked out."

When asked about the proposed Student Union, John said that the school needed a new gymnasium rather than a new Student Union.

Olin mentioned that more students would get more enjoyment from a new gym. It would be, he felt, better serve the recreational activities of students and would help publicize the school.

PPAC Offers Tech Students Marriage Tips

The Planned Parenthood Association of Chicago, in cooperation with the Catholic Federation of Greater Chicago and the Chicago Rabbinical Association, will offer two series of classes, "Education for Marriage." The classes, which will be held on Saturday afternoons during the months of January and February, will be on "Understanding Marriages," and "Preparation for Marriage." The classes will be held in the McLean Auditorium, at 7:30 p.m. on Saturday evenings and Sunday afternoons.

"Among the topics that will be covered are the legal aspects of marriage, the psychological aspects of marriage, the social aspects of marriage, and the religious aspects of marriage."

"The courses are designed to be of interest to both the present and future generations."

Photos Name Contest Winners

David Halin won the Stokowski photo contest with an entry entitled "Stokowski in India" according to Ray Van Horn, Stokowski president.

Other prize winners, according to Van Horn, are also present. "Photos of a Church" submitted by Ray Van Horn, and third place, "Portrait of a Baby" by Robert Almatah.

Ribbons will be awarded as prizes and photos will be displayed in the MC Lobby after Christmas.

Alums Receive Notice

Two one-time students of Illinois Tech have recently received recognition for their activities in the fields of their choice. Richard M. Hufnagel has been appointed manager of the Electronics Products Division of Kellogg Foods and Supply Co., Chicago, while Thomas B. Light has developed a new method of finding losses in the transmission of high-frequency signals.

Mr. Hufnagel, now a resident of a suburb of Oak Park, studied at IIT after receiving an EE degree from Penn College in Philadelphia. He was employed by Kellogg in 1923 as a project engineer and subsequently served as director of military electronics equipment, supervisor of the military projects section, and manager of the electronics engineering department.

Light's successful application for an EE degree was revealed at the annual convention of the IEEE Professional Group on Electronic Devices in Washington, D.C. His accomplishment resulted in the development of a novel method of managing a complex high-frequency system. He has a Master of Science degree, and since 1930 has been active in electronics research and has written numerous papers on the subject.

AC SPARK PLUG, THE ELECTRONICS DIVISION OF GENERAL MOTORS, has a new SPARK PLUG for all cars. This SPARK PLUG for all cars is designed to provide better performance and longer life. It is available in all cars and trucks, including all makes and models.

"The SPARK PLUG is designed to provide better performance and longer life. It is available in all cars and trucks, including all makes and models."

Now All You Have To Do Is Graduate...

Keep On Your Toes With NODUZ

Now that you're set for college, let's tackle the next step. NODUZ can help you. NODUZ is a new product that helps you keep your toe from being worn out. It's made from the best materials and is designed to fit all types of shoes. It's so comfortable, you'll never want to wear anything else.
Do You Think for Yourself? (Here's a Test That Will Tell You!)

1. If the salaries were equal, would you rather be a college professor than a movie star?

2. Would you rather borrow money from a bank or institution than from a friend?

3. Would you rather have tests or paper grades?

4. Do you think it's foolish to daydream?

5. Do you believe it unusual to eat at irregular hours, even though you're hungry?

6. If you actually saw a flying saucer land, would you run for your life?

7. Would you be inclined to follow the latest style of clothes regardless of how it looked on you?

8. Would you feel badly if you thought nobody at all knew where you were?

9. Are you confused by the damsel of conflicting claims as many filter cigarettes are making these days?

The fact is, thinking men and women don't let themselves get pushed and pulled by all these filter claims. They know what they want in a filter cigarette. And they know how only VICEROY gives it to them. A thinking man's filter, a smoking man's taste. Makes sense. Should you smoke VICEROY? If you think for yourself—chances are you already do!

Only VICEROY HAS A THINKING MAN'S FILTER... A SMOKING MAN'S TASTE!

The Man Who Thinks for Himself Knows —
North Park Topples Tech 67-61

Eagle-Eye Fleagle Strikes Again

Lead 38-35 at Half

Olin Scores 19 Pts.

Tech lost its third game of the season, dropping a 67-61 center to North Park College. The game was played on North Park court on Monday instead of Tuesday, in originally intended to be a make up of the teams' schedules.

The entire first half was a see-saw battle that saw the lead change hands six times. Tech led at one point during the half by the score of 29-24, the biggest margin that the Tewahawks commanded. North Park, however, fought back and led at the half by 38-35.

In the opening minutes of the second half, North Park led by the score of 4-42 advantage. This was the last time in the game that the Owls led. By the time, John Olin, North Park's captain, the North Park squad opened up a 61-49 advantage. In the waning minutes of the game, Tech began to close the gap, but could get no closer than 67-61 at the game's end.

Two moments proved extremely costly to the Tech squad during the game: they connected on only 21 of 55 field goals while shooting against an aggressive rebounding team, scoring almost at will.

Glory attributed the lack of rebounds to the fact that no for the second time this season the squad has played "easy" games. During these easy games, the team has not had to work to be competitive, scoring almost at will.

John Olin topped all scorers by dropping in 19 points; Mike Wayne scored 15. The Owls defeated St. Ambrose College earlier this season.

The Navy Pier Tops Wrestlers; Tech Drops Second Match

The Tech men squad dropped their second match of the season, losing to Navy Pier by the score of 26-7. The team now has a 1-2 season mark, having lost to Marquette previously.

Dave Tregay led the Tech wrestlers, placing his opponent for five of Tech's seven points. Phil Stowe, a freshman, remained undefeated thus far in the season by gaining a tie with his opponent of 6-6. Stowe won his first match by a score of 1-7, and his first pin by a score of 2-5.

Bad luck prevailed for Tech's Chuck Keyeza, a wrestler in the 130 pound division. Keyeza lost

The Tote Board

What Again

Another new look this week in Tote Board. Not so far as material is concerned this time, but rather in the form of a new and smaller heading for the article. It was commonly decided that said sports editor was becoming too cramped for space to express his dim views. Therefore the remedy comes in the form of a new heading. It is to be used only in emergency situations—like when I don't have anything to say (always), but need lots of room to say it.

Tech's basketball team, thanks to 101 points against Navy Pier, is averaging almost 78 points a game, while their opponents can manage only 73. Despite that, they have won but two of five games. In their victories Tech looked extremely impressive, winning by huge margins. But in the close games, i.e., those won by a few points, the squad seems to lack that extra initiative to go that little distance further—that extra push that wins.

Cheer!

This is where the support of the student body plays a very important factor. Nothing is more encouraging to a team that is struggling by a few points than hearing a cheer go up from the stands, urging them on. Conscious or unconsciously the players become instilled with the fighting spirit and the desire to win.
