Bob Scobey Highlights Tomorrow's Jazz Show

Bob Scobey and his "Fricco Jazz Band" will play at the Student Union Auditorium tomorrow, Saturday, November 11, at 3 p.m. This Jazz Concert is the first of the SUB-sponsored events this semester.

All tickets cost 50¢ and phone, in a reservation to VI 2-9074.

Alpha Phi Omega will be selling assorted Bob Scobey albums Saturday night at the Student Union. These albums which retail for $5.00 are being sold for $4.50. Also, two

SUB Will Install Hi-Fi in the Student Union

Plans for the installation of a high-fidelity music system in the Student Union Auditorium were announced last week by Jim Commins, president of the Student Union Board. The system, to be under the activities of a SUB co-sponsored committee headed by Bob Scobey, will be in operation within the next few weeks. A $230 appropriation will be available to the system. Plans are being finalized with an equal amount offered by the Student Union.

Details regarding equipment, cost and design, programs, and availability for usage will be worked out by Fricco Jazz Band. The organization will also make recommendations to the Student Union regarding the proposed music room in the new Student Union, and also on the type of facilities desired.

Two faculty members, Dick Banister of the Institute of Design and David Ober of the Department of Mechanics, have expressed an interest in working with the group.

ITCA Gains Free Emergency Service

ITCA members can receive free emergency automotive service after November 1, announced president Sherwin Paskin. Included in these benefits are tire changes, towing service, and battery booster change. These services are available to members within one mile of the intersection of 31st Street and 3rd Avenue. All members need do is call the campus operator, Sherwin Paskin, and give his name and location. A member can use the service any number of times during the year. The week and the check-up tour which was planned for last Monday was pushed back to next Wednesday.

Roepke Seeks Committeemen

Several social activity committees will be appointed by the Student Union Board of Control at meeting on October 18.

According to ITSA president Roepke, the purpose of the committee is to formulate plans for an Illinois Tech social activity book, to serve the student who is interested in serving on the committee or seeking further information about the committee should contact Roepke.

Listening Seeks Literary Talent

The first meeting of the committee will be held on October 18.

New Pieces Attract Students To Brass Collection Showing

All Tech students are invited to the first showing of the 500 piece collection at the Bell Telephone Company on October 16, from 2 to 5:30 p.m. and from 7 to 9 p.m. The display, in the corridors adjacent to the south lobby of the Bell building, is being handled in conjunction with the Bell Telephone Company.

This addition marks the completion of the collection of 500 pieces that has been planned for over two years.

In scope this exhibit is meant to be the "Bell Collection."
Letters to the Editor

Group Blasts SAAB Selection

Dear Editor:

What has become of SAAB? There is a group called the Student Admissions Advisory Board (SAAB) operating on campus whose theoretical function is to do the best possible job of orienting and counseling new students and assisting them in getting oriented.

This group is not operating in the best man ner to fulfill its basic purpose since it has been denied the means to perform its intended function properly. If the group members are to be provided with a schedule of orientation week activities, they will have the opportunity to help the new students get into the right frame of mind. During registration week, the SAAB students have said nothing about helping the students to get into the right frame of mind.

Senior year is the worst possible time to be doing this. The seniors have been told that they will not be able to study during registration week because they have to be available to help the freshmen. Since the seniors are not available to help the freshmen, it is the students on the SAAB who will be helping the freshmen.

SAAB seniors have said nothing about anything they are doing.

Another example of improper functioning occurs when a student is appointed to be on a select committee which is to advise the student body. The senior class is supposed to be the王者 in this, but instead the students on the SAAB are doing all the work.

The senior class is supposed to be the王者 in this, but instead the students on the SAAB are doing all the work.

Defends Greeks

Miss Jean Mueller

In last week's edition of the Technology News, I expressed my views on the subject of the Greek system. I feel that the Greeks are misunderstood and that their reputation is unfairly tarnished.

The Greeks are a close-knit group of students who are held in high regard by their peers. They are known for their high academic standards and their contributions to the campus community.

I believe that the Greeks provide a valuable opportunity for students to develop leadership skills and to engage in meaningful social activities. They also contribute to the social fabric of the campus and provide a sense of community.

It is important to recognize the positive aspects of the Greek system and to support their efforts to maintain high standards and to promote a positive image. I urge everyone to support the Greeks and to work together to create a more inclusive and welcoming environment for all students.
Letters to the Editor

TN Errs on French Freedom

Dear Editor:

As someone who has been living in France for the past year, I would like to say that your last editorial on the French situation showed a clear lack of information on the subject. The view was expressed that France is not a dictatorship. But De Gaulle has not said this.

Another point of this democracy is that the people can actually accomplish something. Newspapers can publish as they wish, but if a statement strongly against the views of the government is printed, all copies of it are seized and destroyed.

Police brutality is the order of the day. A mass police demonstration occurred on the date of a strike, when thousands of French police showed up at the top of their rifles, "Kill the Jews." These are the people who protect the rights of citizens.

The French National Radio and Television are not a national committee and are not the personal propaganda mouthpiece of Minister of Information Jacques Soustelle, a former member of the French government.

This list of the writer's points is not the usual comment on French society but an attempt to answer the questions raised in the editorial.

What is really shocking is the misrepresentation and twisting of the facts to imply that it was only the Communists who led the opposition to the new Constitution and De Gaulle. This is not true. And the better educated, believing in liberalism and the rights of man, such as former President Pierre Mendès-France, are against the wave of reaction sweeping their country but no avail.

Let us hope that the cloud which has descended on France will shortly lift and that the Technology News will not again sink to the level of the Chicago Tribune.

New Dorm AIDS Change

Dear Editor:

To the last month the administration has announced the planned building of a new dormitory and a new student union, both to be completed in the next two years. Not that this was unexpected, as the students have been asking, and the administration promising, a new student union for years. The need of a new dormitory is evidenced by the overcrowding of the student population.

A new dormitory across two hundred more campus residents—students, staff who live on Tech, not just academically, but for their whole mode of living. Tech will have to be provided for the international, social and in general, extra-curricular activities of these people. Whereas previously student complaints have been—"not enough participation," now it may become—"not enough opportunity to participate." Admittedly that is not new and the reason, but in two years we will also have a new student union which will provide a greater incentive for extra-curricular activities.

Should we think of this now and consider it in decisions, or should.

Joe Douglas

Sig Ep Roast Draws 300; Profits Go for New House

About 300 people attended Sigma Phi Epsilon fraternity's 20th annual Open Roast last Saturday night.

Since 1977 plans to move all fraternity off fraternity row onto a new location within a very few years, the Sig Eps are putting the proceeds from the Open Roast into their building fund.

This annual event was held at the Kappa Kibb located at 230 Executive Avenue, Willow Springs, Illinois.

The cost of this event was $21.25 per person. This price included admission, dancing, and food. All drinks were served over the bar.

This year's guest performer was the strains of Pete Gussini's orchestra.

The difficult job of planning an affair of this magnitude was handled by Bill Rapp, Sig Ep Open Roast chairman.

Hospitality Center

Orients Foreigners

In order to aid newly-arrived foreign students, the Hospitality Center of greater Chicago will present "Know Chicago Day" on Saturday, October 16.

The program starts at 3:30 p.m., on Saturday in the Hospitality Center at 116 S. Michigan Avenue. Participants will take a tour of the downtown area and see the sights.

A fee of $1.25 is charged for this program.

They Said it Couldn't Be Done – But Today's L&M Gives You...

Puff by puff Less tars & More taste

Don't settle for one without the other!

Change to L&M and get 'em both! Such an improved filter and more taste! Better taste than in any other cigarette. Yes, today's L&M combines these two essentials of modern smoking enjoyment—less tars and more taste—in one great cigarette.

Light into that Live Modern flavor!
Tech Announces New Faculty Shifts

There are many new faces heading classrooms here at Tech due to the recent appointments of new faculty members. In addition, promotions have come to many of the veteran faculty members, to fill the vacancies left by departing colleagues. Dr. Alva Fredin is now an E.E. lecturer, after serving as a research engineer at IBM. Among the new faculty at ITT is Joseph Kruta from Beverly Shoes, Illinois. This former Illinois Tech student will teach City and Regional Planning.

Another new instructor in City and Regional Planning and also on the Telecommunications team is Paul Thomas from Northbrook, Illinois. Coming to ITT from the University of Wisconsin is Dac Gupta from Indiana. He is a graduate assistant in E.E.

Dr. Sidney W. Gerschick has been added to the full-time teaching staff as assistant professor in CE. Dr. Gerschick received his Ph.D. from Cornell in February. James S. Herbst and Mila Foreman have been added to the CE department as half-time graduate assistants.

A new associate professor in chemistry, Dr. Fassett Ramirez comes to ITT from Colorado University where he held a similar position.

Franklin Farnberg, Ph.D., a former associate professor at the University of Chicago, is now an associate professor in mechanics at Illinois Tech.

New assistant professor in physics, Dr. Isadore Hunter, comes to ITT from the Illinois Institute University. He received his Ph.D. from the State University of New York.

A graduate of the University of Illinois, Luzelle P. Wasmann, is a new instructor at the Institute of Design. Owner of his own design firm, he has designed products for several retail corporations.

A former instructor at ITT, where he received his Ph.D. in 1936, is Eximinius S. Smith. He is a new assistant professor in mechanical engineering. John Rodger, M.S., is a new instructor in mechanics. Before coming to Illinois Tech, he was an instructor at Stevens Institute of Technology.

Another new instructor in mechanical engineering is J. R. Panjaitan, M.S. He is a research assistant at Brown University.

John W. Emerson joins the art education division of the Institute of Design. He comes from Chicago Teachers College, where he was chairman of the art department.

New visiting associate professor of mathematics is Dr. Louis A. Kerber. He received his Ph.D. degree from the University of Chicago.

Jack C. Brown, instructor in technical drawing, is a former graduate assistant at ITT. He graduated from the University of Alabama.

Dr. Alfred L. Comstock, formerly a research chemist at Carnegie Institute of Technology, is a new chemistry instructor at Illinois Tech.

Robert R. Rogers is a new instructor in business and economics. He received his master's degree in business administration from ITT.

Walter Faustino, a former IIT instructor, one of the faculty (See "Faculty Shifts", page 6).

Tire Company Offers Awards Up to $1,000

The General Tire and Rubber Company of Akron, Ohio has announced a contest open to Tech students with prices ranging in value from $200 to $1,000.

Twenty scholarship awards will be given to participants who best answer the question, "What Can Be Done to Achieve Greater Highway Safety?"

Participants should write a 300 words or less of what they think should be done. Contributions may contain any ideas that will help cut down highway or city traffic accidents. Entries will be judged on originality and punctuality.

Any student attending an accredited college in the U.S. can enter children of employees of General Tire & Rubber, as dealers or agencies, are eligible.

Entries must be postmarked no later than December 1, 1958. They should be addressed to College Scholarship Office, General Tire & Rubber Company, Akron, Ohio. No one will be disclosed a winner without approval of his school faculty.

Tech Christian Group Shows 'River of Life'

"The Red River of Life," a film concerning the circulation of blood, will be presented by the Illinois Valley Christian Fellowship on Thursday, October 16, at 9:00, in the Cunningham building. According to Richard Waller, organization president.

Dr. Peck Rates Ch. Eng. Grad Research Superior

Faculty members of Illinois Tech apparently have many diversified recreational pastimes and are not, as students seem to think, absorbed in a world of their own revolving about a particular subject. Dr. Ralph E. Peck, chemical engineering, is an avid fisherman. His summer camp site is at a summer house in Minnesota near places noted for good fishing.

"Originally from a farm in Canada, he particularly likes camping on the Northern states. Dr. Peck has traveled extensively through Central America and Mexico with his wife and three children and is one time worked for the Interna..."
Bennett Does Badly In Auntie Mame Role
by Larry Smith

Effective comedy for the legitimate stage is hard to write. Jerome Lawrence and Robert E. Lee, co-authors of "Auntie Mame," have found this out. They have been trying their best to put together an all too incredible story. It isn't that they bit off more than they could chew; they just didn't chew enough.

Constance Bennett plays Mame Darnel, better known to her nephew (of whom she is newly appointed legal guardian as Auntie Mame). Patricia, the nephew, is put under Mame's protection care soon after his father's death. For the play's two acts, our我们也 reboot and Mather together ever since 1939.

Mina Bennett is hardly enviable. Additionally, a character as eccentric and wild as Auntie Mame is difficult to portray. However, Constance Bennett's talent and the character's eccentric style of speech improve her likability. She is added to the ensemble by some very adept supporting pieces. Dorothy Stone, playing the most sensible one you ever saw, was very effective. In one of the better scenes in the last act she was the ultimated clue to the plot of a stage atmosphere reflected especially in pinch lines and mannerisms.

The evening was for a total box office take of $18,000. The play was aided by some very adept supporting pieces. Dorothy Stone, playing the most sensible one you ever saw, was very effective. In one of the better scenes in the last act she was the ultimated clue to the plot of a stage atmosphere reflected especially in pinch lines and mannerisms.

Battaglini Sees Need For IIT Open House
by Tom Prudden

"College Day is a necessity," says Bob Battaglini, Engineering Representative. "It's a good idea for people to come and visit the campus and see what it's like."

"People don't know what it's like to cause College Day may become another 'Technocamp.'

Bob is an eighth semester EE who comments from Chicago's far north side. He was elected Vice President of his Freshmen Class and was chairman of SAA last year. He is presently chairman of AYCE in addition to being Engineering Representative.

Other Campuses Boost Classes Via Television
by John Coleman

"Well, it's about time for Math lab. Somebody turn on the television set."

This may soon become a standard procedure on many campuses throughout the country.

Many colleges and universities are now offering credit for television courses shown in many parts of the nation. This year Eastern Illinois offered credit for a Physics course shown on a local network. A final in the course was given by the school and any student completing the course received three semester hours credit.

From Florida comes information that New York U. has a more advanced system of television courses. Four courses are offered including Math, Classical Civilization, Government, and English.

The lectures are shown between 8:00 and 8:30 a.m. and carry three semester hours' work.

Pools of the Greeks
Greeks Plan Open Houses after Concert
by Johnny Eubanks

Due to Bob Scoby's Frisco Jazz Band's playing this weekend all the Greeks are inactive except for the ones that plan to hold small parties after the concert.

The fraternity which plan to hold open houses are Tri-Upsilon, Alpha Xi Delta, Nu Delta, and Phi Kappa Sigma. The Delta and their drum will also enjoy a Frisco light dinner before the Jazz union.

Fullbright Deadline Set for Oct. 17

Fullbright Scholarship applications are now available at the Dean of Student's office. Eligibility requirements are U.S. citizenship, a Bachelor's Degree at a reputable university, language ability sufficient to carry on the proposed study, and good health. There are not more than 1000 scholarships available.

These students interested in completing the required application forms from Dean Burn. These forms are to be submitted to the Dean of Students office by 5 p.m. on October 17.
A Moment of Reflection

Techawk Must Strive To Improve Old Ideas

Technological advancement is often accompanied by a desire for change and improvement. However, the rewards of these advancements are not always immediate or obvious. It is important to remember that change is a process, and it may take time for the benefits to be realized.

There is a lot of talk these days about the silent generation and the organization man. The idea seems to be that young people, especially college men, are just a bunch of conformists with no individuality, no desire to change things, no spirit of reform or revolt. But I don't think that means that our young men are red blooded in their veins.

As a matter of fact we are engaged in a cold and dead war to preserve our way of life, and all the processes of our system, and upsetting it. But whether we believe it or not, young people isn't stupid. By organization men and no young people can be a complete conformist. He is not against old ways and ideas and feel content that he can improve on them.

I hope your youthful restlessness and discontent will go to dynamic things like business and social policies change or civic affairs. I think that reformers matter, too, not only, and some rebuilding. I hope that you will work against the idea of a spirit of personalism, but a spirit that is common, with a spirit that nothing is said

It just happens that you are going to college at a fortunate time, a time when the present crop of students can once again be used seriously. This was when it was generally assumed that reform would bring more good, but a few things have happened in the last century, and, not all, simple ideas. One was the first nuclear chain reaction under the West Winds of Stagg Field. From that moment on everyone has known that the tremendous discovery can be both constructive and destructive, and that some higher controlling spirit is necessary.

The formulation of a controlling spirit is a matter of philosophy. The man educated in science may gain a great contribution to society. But if he knows little about the ultimate origin and duration of things, of men, especially, their meaning, essence, and final purpose, he is an incomplete man. It's somewhat terrifying to know such power over nature, to know so much about our environment, to know that a man has now left for his own meaning.

FOURING from Marie Antoinette's ten battle is Shady A. Teller, donor of the 1950 pierre brass collection.

Teller, owner of the automobile, and his collection represent the start of buying a car such year since that date.

As observor at the United Nations Education, Scientific, and Cultural Organization (UNESCO), the Tellers have explained their collections on various radio and television programs in the United States, Italy, and Mexico. Also, Mr. Teller has lectured on this subject in France and Spain.

Features of the collection are a Persian bronze plate pierced to resemble lace work, several Indian miniature books, Marie Antoinette's tea kettle, and a mortar and pestle — one of which is said to be an ancient Egyptian artifact which appears in a painting by Van Gogh. Next to the estate are more precious items, such as a pair of brass knuckles.

WASHINGTON, D.C.,October 10, 1952

British Government Offers Three Grad Scholarships

Three 1959 Marshall scholarships to British universities are being offered to graduate students in Midwest colleges and universities by the British Government.

The awards are made to students of either sex, who must be citizens of the United States. The candidate must be under 25 years of age on October 1, 1959, the date on which the award shall be taken up but under certain circumstances candidates up to the age of 25 will be considered.

The scholarships are tenable at any university in the United Kingdom, and are made for two years in the first instance but may be extended for a third year.

Applications for awards to be taken up in 1959 must be in the hands of the appropriate regional committee on October 31, 1959. Successful candidates will be notified of their appointment in March, 1959.

Prospective candidates should write to the British Consulate General, 720 N. Michigan Ave., Chicago 11, Illinois, for information, rules and application forms.

INTERNATIONALS

Meet Oct. 15

International Club members will meet on Wednesday, October 15, at 5:15 p.m. in the Executive Conference Room of the SDU for the purpose of planning the semester's program.

President Gary Blackman encourages all interested American and foreign, to attend. A special guest will be announced.

The only authentic Brasso... THE ONLY AUTHENTIC BRASSO...
Sports Hero
Koke, Scholarship Winner, Sees Good Wrestling Team
by Skip McCuemack
Our Sports Hero for this week is brought to you through the courtesy of the Techvek wrestling and track teams. He is Herb Koke, a seventh semester EE major, from Des Moines, Iowa.

Herb, a graduate of Des Moines Technical High school, is attending IT on two scholarships, one from the NRDC program and one from the Solar Aircraft company. He is a member of the Millenium’s Club, the AIEEE, and is currently president of Kappa Epsilon, the honorary EE fraternity.

Last winter, with Herb wrestling in the 147 pound class, Coach Tony Barbaro’s team compiled a record of 7 wins, one loss, and one tie, a very commendable showing for a school that does not place a great deal of emphasis on sports. As regards this year’s outlook, Herb had this to say, “We lost a few guys through graduation and low grades, but we should come back just as strong as we were last year.”

Herb, who had wrestlng experience in high school, will, along with a number of other returning wrestlers, make up the nucleus for this year’s great and growing team. They start training in the first part of November.

Barbaro, Named As C. C. Coach, Plans 6 Meets
Today Barbaro has been named as the new wrestling coach by Athletic Director Sonny Weisman, Barbaro, who coaches football at Mills Tech High School, is also the present wrestling and track coach here at Illinois Tech.

The team is planning on competition in six cross-country meets this season, beginning today with the DePaul meet. One of these meets will be the big meet in which all of the league schools will compete.

The search for a new wrestling coach is still under way. According to Weisman, the school still has considerable time left to make its selection before the wrestling season begins. One of the big problems in the selection of a coach is his ability to fit Tech’s swimming practice into his existing schedule.

It is expected that Weisman will make the announcement of his selection of a wrestling coach sometime in the near future.

Air Force Ties Iowa; Army, Navy Both Win
Good weather prevailed across the country last Saturday as collegiate teams once again paired off in many exciting contests.

In the Southwest the previously unbeaten Notre Dame defeated a good but not great team by a score of 14 to 6. Highly ranked TCU managed to beat a new Arizona eleven 13-7.

Here in the Midwest, Michigan and Michigan State provided some unexpected thrills. The Wolverines and Spartans tied at 12 all as Dean Lostock sparked the Michigan State morale by returning a Michigan punt for 50 yards and a touchdown.

Elsewhere throughout the country the Illini once again proved a disappointment as they fell victim to Duke. The elder military academies, Army and Navy, both triumphed while their young cousin, the Air Force Academy, surprised the nation by tying a favored Iowa team.

The Sooners of Oklahoma had a difficult time with Oregon; however, they triumphed 4-0 to keep their rating among the top teams.

Thinklish

ENGLISH: man who smokes two different brands of cigarettes

THINKLISH TRANSLATION: Obviously, this poor fellow hasn’t heard about Luckies? Why? Elementary. Any man who smokes the genuine Luckies wouldn’t touch another brand with a ten-foot cigarette holder. With Luckies, you get the finest taste of fine tobacco. Why settle for less? (The man in question is a Cigamatt. Don’t let this happen to you!)

SPEAK THINKLISH: Put in a good word and MAKE $200!

Here’s the easiest way yet to make money. Just put two words together to form a new one. Example: drool-saliva=STINKWASH. (English teacher shellfish with bad manners.) We’ll pay you $5 each for the hundreds of Thinklish words that you can think up— and we’ll forward many of our college ads and your Thinklish words (with translations) to Lucky Strike, 1090 Avenue of the Americas, New York, N. Y. Envelope your name, address, college or university, and class.

The Tote Board

Zorro Takes Action

As the sun sinks slowly in the West we can see the outline of two figures mounted on horseback, racing slowly into the dusk. The one is a big man on a white stallion and the other is his faithful Indian companion, Yes, he is Kemo Sabe and Tonto. But why the tears in Kemo Sabe's eyes, you ask? It is a sad tale, a tale of woe. For the first time in history Kemo Sabe failed to get his man and Zorro forced him to turn in his mask.

With the simultaneous retirement of two sports editors it became increasingly evident that a new, unassuming, yet sporty type fellow should be selected to fill their lapses. This put me out of the running (deadline only two hours away) when I strode innocently into the Tech News office.

"I just stopped in to see if I could use the typewriter..."

"Do you know anything about sports?"

"Well, I watched the first couple of innings of a baseball game once. But I just stopped in to see if I could use the..."

New Sports Editor?

Several pairs of eyes sparked simultaneously and the editors went into a conference. My hand was quickly measured to see if it would fit into the small picture at the top of the page. With a little squeezing and rearranging it was fixed in. I was handed a pencil and pointed toward the gym.

My first official duty was to inform Athletic Director Sonny Weisman of the sad news of my appointment. The ensuing interview went quite smoothly except for occasional interruptions by Coach Stanger, who sat idly by mumbling something about "gym tests and health lectures or else you can stop in to see the new Dean." After several poorly executed attempts at the "jumping jack" I was allowed to continue on my job.

Tote That Ball

The next stop was at Sonny's Acres where IM football games were in progress. It was rather disheartening to watch the referees in action during these games. During the second half of one of the games both teams ran a combined total of only about twelve plays.

The remainder of the half was spent in arguments and referees conferences. At one time a very unusual call of pass interference on an offensive man was called, while other more obvious and timely fouls were simply overlooked. More than once a whistle was blown and play was halted only to find out that the whole thing was a mistake and there really wasn't a foul after all.

Big Men in Whistle Dept.

While it is true that the referees of these games are only students and that they are bound to make some questionable calls, it seems only logical that they should have some idea of the IM touchball rules. This is not a necessary qualification for officiating these games, however. The only qualification necessary is that you be able to blow a whistle and be big enough to back up your calls.

One of the reasons for setting up the Intramural program is to give all of the students that desire to, an opportunity to participate in some sport. As long as the officials fail to have a basic understanding of the rules of the game, however, the students cannot get any enjoyment out of their participation. This being the case it seems only logical that referees be a little better versed in the touchball rules and not have to rely so much on the fact that they are officials and their decisions cannot be protested.

Navy Rallies For Late TD

The Amperes, quartered by Al Gilk, battled last year's champion, the Navy "A" team, in a scoreless tie in football play this week. The Navy "A" team was expected to repeat last year's championship performance.

The Amperes' touchdown was set up as pass interference was called on Navy's Bill Beahm, moving the ball to the Navy's two yard line. On the next play, with five minutes remaining in the first half, Gilk fired a pass to center Dick Wagner for the tally.

Herk Koke, playing extremely well on defense, blocked a punt, which resulted in the Amperes' fourth down and 14. On the twenty-yard line Amperes fumbled the punt, which was recovered by the Navy. The ball was then driven to the Amperes' one yard line. Several attempts were made to score, but the Navy failed. On the third down and 14, the Amperes fumbled the kickoff, which was recovered by the Navy at the Amperes' one yard line. The ball was then driven to the Amperes' 14 yard line. On the next play, with five minutes remaining in the first half, Gilk fired a pass to center Dick Wagner for the tally.

Daedalians, Phi Kaps, and Pi Kaps Remain Unbeaten

Pi Kappa Phi, Daedalians, and Pi Kappa Sigma remained the only undefeated teams after Monday's action in IM touchball competition.

The Daedalians overpowered Delta Lambda Xi 20 to 0 and for their second straight victory. Ray Richards, the Daedalian quarterback, scored both touchdowns. He was intercepted a Delta Lambda Xi pass and ran 50 yards for the Daedalians' first tally. Richards then fumbled and Daedalians scored on 50 and 15 yard passing plays.

Pi Kappa Phi downed the Alpha Sigma Phi to take over the lead in League I. This was a breaching defense which resulted in several players being ejected from the game.

Cage Practice Set to Start On October 21

In other IM action the AEK team stopped the IEs, 5-2, with the IEs scoring the entire half. This was the first time that the two teams scored in the second half of the year. The game was called because the IEs did not return for the third period.

The Cage practice will be held at 7:00 PM on October 21 in the Cage.
