SUB Presents
'The Gunfighter'
As Next Movie

On Thursday, November 6, at 8 p.m., at the Done Auditorium, SUB will present 'The Gunfighter,' the fourth in a series of free movies. This week's presentation is the 20th Century Fox film.

The movie tells of a man's attempt to forget his past reputation as a gunslinger and starrs Gregory Peck, Jean Parker, and Helen Wouk.

ITSA Sends Phil Bock To TV News Program

Phil Bock was appointed by ITSA, Wednesday, to represent Illinois Tech on the ABC television program "College News Conference." Bock, a seventh semester electrical engineering student on an ROTC scholarship, is currently senior class president.

"College News Conference" is seen on Chicago's WBBM-TV, Channel 7, on Saturdays at noon.

Leaving school on a Friday night, Phil will arrive in Washington for the weekend of November 16. He will participate with students from other colleges in the questioning of Lieutenant General Tasker, Head of Army Research and Development. Expenses are to be paid, half by the Public Relations Department and half by ITSA.

Other appointments announced were Kenneth Jacobs to chair the activities committee of SUB, and Mike Wayne, treasurer and Ron Ferris, social chairman, of the Class of 1960.

President Kepsta announced two openings on the SU Faculty Committee. The function of this committee, now that plans for the new SU have been drawn, is to give consideration to final details. Interested students are requested to submit written application to Cliff Kepsta, 202 K. M. by 9 p.m., Tuesday, November 11.

Further action Wednesday night saw a tentative budget, presented by Treasurer Larry Weiss, being dis- cussed and then turned to the Finance Committee for recommendation. Wisn stated that organizations which have not yet submitted a budget must do so before the meeting of the finance committee on Thursday, Nov. 6.

603 Techhawks Choose
Queen's Court for I-Ball

Margaret Mary Credon, Charlene Gross, Lauri Radcliffe, Glen Stone, and Carol Temple are the freshly-induced students who will vie for the honor of reigning the I-Ball Queen.

The Crew Cats and the music of Chuck Foster will be presented at this year's ITSA sponsored semi-formal dance to be held at the Crystal Ballroom of the Edgewater Beach Hotel from 8:30 to 12:30 p.m. this Saturday night.

Typical of Tech campus discrimination, and fine tune are the five enchanting finalists who are the winners of the all-school election held Monday and Tuesday of this week. This election narrowed down the original field of ten entrants and saw a record 624 votes cast, far above last year's showing at the polls.

The election committee, headed by Dick Wond, handled the election and publicity program which resulted in the trend-setting record vote.

Final selection of the Queens will be made by a board consisting of Mr. Harman, present Chicago City Police, representative from Patrick Stevens and Dean Brown. Each of the finalists will be interviewed by this board on Saturday evening, and during the dance announcement, until p.m. and ceremony one will crown Queen of the Ball. She and her court will reign for the evening.

Ring Salesman Delivers Goods,
Takes Orders

Mr. Jim Parker, class ring salesman, will be in the Student Union lobby on Thursday and Friday. November 6 and 7, from 11 a.m. to 1 p.m.

Orders received will be ready then and may be picked up upon presentation of the sales receipt.

Tech '58-'59 Directory Has Two New Features

This year's Illinois Tech directory will be published late next week. The index will be available at the SU newsstand and the Commonwealth for 25c. a copy.

The proofs of the directory have been corrected and sent back to the publishers. A few copies will be ready next Tuesday and will be presented to the Publications board.

Two directory features are new for this year. First, the telephone numbers in the ART/Faculty-Administration section will be in the left of the name and address, enabling a user to count on number without shifting his glance several inches. Second, there will be a new section in the back of both the student and the ART section.

Ron Hamilton thanks all persons who helped compile the directory, especially Mr. Peterson, head of ART, Mr. Hertzel, head of the faculty, and all the faculty members. The students are indebted to Mr. Peterson, head of ART, and all the faculty members. The students are indebted to Mr. Peterson, head of ART, and all the faculty members.
Letters to the Editor

Blasts Laxity of ROTC

After spending four years in the service and close to four years here, there has been one question in the back of my mind that has remained unanswered. Why are ROTC officers such poor specimens of officer material? As I watched the flag being lowered by a wornout tomcat, I swear I saw a partial answer.

Are the cadets not taught to render military courtesy? This is one item I believe one cannot learn properly if one does not learn to render it. Why do the weathermen always render the flag when two ROTC cadets on the campus. Raymond J. McMahon

Physics 7

Borscht Bowl Flops

We wish to make it known to all those on campus who are curious as to the fate of the Borscht Bowl football game that it will not be played this year. We think that this statement deserves an explanation. The Borscht Bowl game was intended to be played as a charity game, with all proceeds to go to the Adas S. McKinley Foundation, supporting charity right here on campus. The game was to become an annual affair with the proceeds increasing each year.

At the height of all the aforementioned planning, one of the two Tech fraternities suddenly decided that “Our men don’t feel they have the time to play in this game.” Good will be hung up. Good will be hung up. We feel that we can do is to notify all interested that the poster printed on last weeks sports page was a mistake. We also wish to make it known that it was not so who declined this charity affair.

Yours truly;
D. P. Dea. B. B. Chapter, TEP

University of Chicago fraternity were to join in the series on our campus, and the whole affair began to go down in a whirl which would bring much credit and public good will to IIT and its fraternities.

The delay and apparent inaccuracy of the board and its subordinate committees is perhaps only a reaction to sixty week quizzes. However, at the present time, the number of actively functioning committees hovers around three or four.

IIT Student Poll Watchers Gain Valuable Knowledge

Meeting today in the Chemistry building auditorium at 4 p.m. are about 90 students who will act as poll watchers this Tuesday.

Acting for the non partisan Joint Civic Committee on Elections and with credentials supplied by the Board of Election Commissioners, the poll watchers will oversee the balloting in their home districts or in the precincts surrounding IIT. The meeting today has been arranged to instruct the students in the election procedures and also to point out a few of the more popular methods of falsifying election results.

The students are all volunteers and do not receive any monetary compensation for their work. However, they do get the opportunity to view at first hand the operation of the election machinery.

Impetus for the sudden interest in elections among IIT students is R. C. O., G. O. chairman of the PS department, organizing genius has been the subject of comment on these pages previously.

Because of the narrowness of their education, most engineering students are exposed to precious little information about politics and the workings of a governmental system. We feel that any activity which can broaden the political experience of IIT's students should certainly be encouraged, as long as it is

Wreckers Visit Delta House; TX Guys Appreciate Donna

by Johnny Tabor

The main word from campus activity over this week is the pledge uprising. The natives seem to have become a bit restless in the past few days.

Monday night the Delta house was invaded by a "special wrecking crew" of the Chicago and Illinois Commission. The group, armed with wooden spoons and various devices, tore apart the roof, a door, and a ceiling in one of the rooms. The Phi Psi and ASPI pledges also seem to be on the rampage with the doubtful of active and house, the burning of beds and other valuables.

All the Theta Xi's word from Donna to know that they appreciate her.

Alumni Board Announces 15 New Appointments

At a meeting of the board of directors of the alumni association recently by Arnold B. Reffett, president of the board, 15 new members were announced.

The Alumni Board is the second largest in the state, according to Tom Bush, one of the new members.

Of the 15 men named to the board, five were reappointed, while the other ten were named for the first time.

On Thursday the board met to plan for the coming year.

The Alpha chapter also has their share of love with Fred Goodell named to Northwestern's head, Mrs. Goodell.

Another of the members of the Delta house is named to the board of directors by John W. Rice, president of the board.

The board also named John W. Rice, president of the board, and William T. Hinkle, vice-president of the board.

The board also named John W. Rice, president of the board, and John W. Rice, president of the board.

On Thursday the board met to plan for the coming year.

Pi Delts Inaugurate 4 At Recent Banquet

The Illinois Tech chapter of Pi Delta Epsilon, national journalism honorary, initiated four new members at a banquet October 23. Inducted at the ceremony held at Granite's Restaurant were Jean Hohl, re-elected president, R. K. Schneider, selected vice-president, and Karen Laskin, selected to serve as treasurer. Ed Dresslin and Bob Zander were selected secretary and chaplain historian, respectively.

Following the induction, an election of officers was held in which

Students Must Claim Books

All books left in the APO book exchange must be claimed by December 1, 1958, or they will become the property of APO. Books may be picked up at the office during free hours.

Prokofiev Work Stars Stern As Violin Soloist

by Karl Weilman

This afternoon's concert of the Chicago Symphony Orchestra features the noted violin virtuoso, Isaac Stern, in a performance of Prokofiev's Violin Concerto No. 2 in G Minor.

The concert was written during the winter and summer of 1935 and was premiered on December 5 of that year. It was one of Prokofiev's first compositions since his return to the Soviet Union after a prolonged absence.

The work drew immediate comparisons with Prokofiev's earlier concertos. The spirit of wit, humor, and grotesquerie that characterized the first concerto was replaced by "lyricism, warmth, melody, and simple emotionalism" in the G Minor.

It appeared to many that Prokofiev's return to the Soviet music world resulted in a decided character change. His works were no longer biting and satirical, but became lyrical and nearly romantic. Both Prokofiev and his future, however, seemed to have a place in the musical world.

Prokofiev's opera, "The Silken Ladder," has passed into the realm of oblivion, but the overture remains as a gay, sparkling concert opener. "Rosaliet," wrote 30 years ago to the age of 37 years. Though he lived to be over twice that age, he never wrote another opera. His last work in the genre was "The Fiddler of the Quidditch." His overtures to the concert have been performed by the London Symphony Orchestra in existence.

Rosaliet was one of prokofiev's "odd-balls." He had a superstitious nature that has been very rare. This of course resulted in him being a decided fear of Friday the 13th. Ironically, he died on November 13, 1937.

The program will be concluded with "Richard Strauss's" Alpine Symphony, in which "A Hero's Life." Composed in 1890, this was performed in its world premiere in 1899 and its American premiere a year later in Chicago.

(See Symphony, Page 7)

Reingold Finds Math Is More Inviting Field Now

by Donald Driscoll

Every day the math department receives many phone calls from people requesting information. Dr. H. Reingold, director of the department, stated that he had received one inquiry on the number of engineers who called and requested the value of pi. The engineer said that the book from which he obtained the value of pi was old, and he wanted to know if the value had changed in recent years.

Although the book does not specialize in giving out information, he states that he has received such requests, and has approximately 4,000 students enrolled in math courses.

The number of entering math majors has increased during the past year from four to 15 in the fall of 1957 to 18 in the fall of 1958. Dr. Reingold attributes this to the increased emphasis on the sciences and technological programs.

He also believes the math program is now more inviting to students.

Hans Reingold

math, Tech, since the establishment of the department has been revised. Twenty percent or full-time graduate students are present working towards advanced degrees in math.

All applicants in a degree in math do not necessarily have to teach after graduation. Twenty years ago, 95% of the graduates taught. Nowadays, 65% are employed in private industry, 25% by the U.S. government, and only 2% by educational institutions.

The new high-speed computers have created additional demand for mathematicians. The number of people entering computer work has doubled each year for the last ten years.

Dr. Reingold, originally from Poland, did his undergraduate work at Technion. (See "Reingold," Page 5)

SENIORS AND GRADUATE STUDENTS IN ENGINEERING, PHYSICS AND MATHEMATICS

The Douglas Aircraft Company

INVITES YOU TO
ON CAMPUS INTERVIEWS
NOVEMBER 10th

Find out about the interesting positions, assistance in furthering your education and outstanding promotion opportunities with the world's leading manufacturer of aircraft and missiles. Get facts on living conditions, research facilities and opportunities to advance professionally at Douglas facilities located in California, Florida, Oklahoma, North Carolina and New Mexico. Reserve your career decision until you have talked with the Douglas representative. It may be the most important interview of your life.

SEE YOUR DIRECTOR, ALUMNI RELATIONS, FOR YOUR INTERVIEW APPOINTMENT.

Armour Research Foundation To Acquire Computer Next Year
THE GARRETT CORPORATION
AiResearch Divisions
will be on campus to interview
ENGINEERING STUDENTS
B.S. - M.S. - Ph.D. candidates

The Garrett Corporation is one of the most
diverse research, engineering and manu-
factoring organizations in the aircraft,
missile and technological fields.

From AiResearch laboratories have
come pioneer developments in aircraft and
missile components and systems. Today
90% of the free world's aircraft use
AiResearch equipment.

Garrett divisions and subsidiaries are creating
a variety of products, including
industrial turbocarriers and marine equipment,
and are supplying sales and service to
airframe companies, airlines and
the military.

Project work is conducted by small
groups in which individual effort is more
quickly recognized and opportunities for
learning and advancement are enhanced.

With company financial assistance, you
can continue your education at fine neigh-
borng universities.

- TYPICAL PROJECT ACTIVITIES -

Electronic air data computers, pressure ratio trans-
derive instruments, electrical systems and motors and
engines.

Preliminary design from analytical and theoretical
considerations for high level technical work in
aerodynamics, stress analysis, thermodynamics, heat
transfer, cryogenics, pneumatics, nuclear power and
mathematics.

Auxiliary power units and control systems for
various types of missiles.

Air and vapor cycle refrigeration turbines,
hydraulic and mechanically driven pressurization
components.

Jet engine and rotating machinery design and
analysis involving combustion, turbomachinery, gas
dynamics, thermodynamics and aerodynamics.

Gas turbine auxiliary pneumatic and electric
power units.

- ORIENTATION PROGRAM -

In addition to direct assignments, an eight-
month orientation program is available to
aid you in job selection. You participate in
Garrett project and laboratory activities
and work with engineers who are outstanding
in their fields. Your orientation will
include familiarization with sales and con-
tract administration.

- JOB OPPORTUNITIES -
Top men go to Texaco

Symphony
(Continued from Page 4)
Bruckner declared the opening symphony piece his "Don Quixote," with the exception that the "knight" in his new work, represented an ideal, and a person. The ideal was that of "great and unceasing beauty."
Announcements have long prepared splendid programs for the work although Bruckner himself stated, "There is no need of a program. It is enough to know that there is a hero fighting his enemies." Some have suggested that the composition is autocratic, pointing out the quotations from earlier works which are incorporated into the piece. All this is mere gossamer, however. Bruckner has been known to refer to the afternoon concert ticket price for students has been raised to $1. The tickets, if available, will go on sale at the Wednesday dress preceding the Friday concert. The $1 price is still a substantial saving over the regular ticket cost.
Fowler Men Arrange 'Medieval Ages' Dance

Last Friday night, Fair Hall gave what was considered a very successful dance. The basement was crowded with many Tehawks and an excess of girls, a pleasant surprise to the planners who anticipated a shortage. Jigging pumpkins and rotating colored spotlight set the mood. A life-size miniature figure of a Jack-O-Lantern was placed at the entrance, and the decoration was taken care of the dance floor.

Last week three Fair Hall was caught by a fall in one of the dormitories. The matter was referred to the dean, but the Fair Council, acting under its own authority, held a special session. After much debate, a recommendation was drafted and sent to the disciplinary board. The board considered it a "minor matter and justified recommendation" and that it would not hinder the applicants disciplinary probation for a period of one year.

Fowler Hall has also been active in the social scene recently. A pizza party was given at Chester's on the northeast side, early in the month. Joe Schaefer, social chairman, stated that Cox was attending the dance. The Fowler boys have scheduled a social event, "Dance in the Dark Ages," for next Friday evening. The dance will feature a medieval theme, with stereo records providing the music.

Home Ec Club Offers Program On Quick Dishes

The Home Ec Club will offer a program "Quick Dishes to Glorify the Daily Meal" at the Home Ec Department on Thursday, November 6, at 7:30 p.m. Helen Kaye of Serena and Geeta Co. will present a lecture "Entertaining with your Waring Blender."

The Home Economics club is composed largely of Mrs. Burns.

Wilson's 'Shrew' Scores Hit Despite Bad Manners

by Larry Smith

Hampered by poor seating and unusually impolite audiences, the Wilson Jr. College Drama Guild still putts a good show. Last weekend they presented a very creditable version of Shakespeare's 'The Taming of the Shrew.'

The principal involved in this story, Petruchio, is played by John Samuel, who appeared in many Guild productions. Moscow has never seen a humorous character of Petrushka. Bounding through this part for 4½ hours is no easy task. He made it look easy.

The Shaw is director of the Guild and represents our community through Europe this spring. This will be an independent tour. The role of Katherina, played by Mrs. Burns, is the kind of role that is not often undertaken. The Guild has gained national recognition through its use of all races in plays. The Guild of Connecticut, Mago, and Magandai join in an international program to help the theater group become the person who can play all the roles and play them very well on the stage and off the stage.

The Guild's director, Mrs. Adrienne Ritter, deserves a pat on the back for the fine work her group has done with the Guild. In December, she and her group will put on "Othello" or "Sweeney Todd," by Arthur Miller.

This seems to me to be a very large order for a non-professional group. Casting for more lead, with fewer than, should be a real hit with the students. However, with the talent, the actors want to have something new, I feel they'll come up with another winner.

Elementary...

my dear Watson! From the happy look on your face, I am certain you are enjoying the novel. I deduce that you are fascinated. No mystery about why Cole is the world's favorite comic strip. It's true! Yes, my favorite comic is always a Coca-Cola!

3 Letter Winner in Golf, Kaiser Sees Strong Team

Fore! Here comes Rich Kaiser, strolling nonchalantly down the fairway with a golf cart in one hand and a score card in the other.

He's a 5' 8", 150 pound civil engineering major from Glencoe, Ill. While attending St. George High School he earned seven varsity letters, three in swimming and one in golf.

Here at Tech, he has lettered his first three years in golf and is looking forward to another enjoyable season on the fairways. Both had this to say about the outlook for Coach Ray Falkson's team for the approaching year: "Chances for a successful season look better because there are a couple of freshmen who will help us out quite a lot. The city tournament is what we look forward to this year and the year I think that we can take it."

Rich is an NCF scholarship winner, an active brother of Phi Kappa Sigma fraternity, a member of the Modelayman Club, and a member of Beta Omega Nu. Last year Kaiser served as business manager of Littigines magazine.

Release Plans
For Nov. 4th
IF Swim Meet

The Intercollegiate swimming meet has been scheduled for November 4th at the Valentine Stays Club pool. The definite starting time of the meet has not been decided upon, but it will be announced in the near future.

Two men from each fraternity will be allowed to participate in each event, except the relays. Each man will be limited to participating in three events, but no more than two individual events.

This year's meet will consist of the same events as the meet last year, including five individual and two relay contests. The events are scheduled as follows:

- 110 yd. medley relay (5)
- 100 yd. free style (2)
- 40 yd. back stroke (2)
- 40 yd. breast stroke (2)
- 200 yd. free relay (2)
- 166 yd. free style relay (4)

Numbers in parentheses indicate the number of places awarded in each event.

Unpredictable' Teams
Defeat Prophet Again

by Mike Graham

Last Saturday brought more than a college to the collegiate set. At South Bend, Notre Dame made a foamy of football's defensive aspect as the Irish lost to Purdue's Boilermakers, 22-22, and fell out of the top ten rankings. Iowa by a score of 26-26 in ten man the number one orbit in the U.P. ratings. Ohio State and Wisconsin fell into a deadlock at 7 all to further confuse experts' choices of which is the better team.

Texas, which beat Oklahoma a few weeks ago, was stopped by Rice 7-7 while Army, a high ranked team, had to be satisfied with tying Pittsburgh 14-14. And there was a joyful homecoming day down at Chapman-Villine as the Illini emerged victorious from their trip with Michigan State, 16-0.

The football season has really turned out to be an unpredictable one. It seems as though neither team has a top ranked team, or there is no one team good enough to outlast the others through its schedule regardless. As of now, many of the top ten ranked teams have stumbled on their records in the form of either a loss or a tie. But Ohio and Iowa are two good examples as it is the Army-Texas game that is the most interesting. But in the games, as they are supposed to to go, and on the way in. Believe me, the football agin 1958 just don't believe in what the crystal ball says!

IM Bowling Match Begins
November 6th

The newly organized IM Bowling League will begin its first tournament on November 6th, with six teams vying for winning into the championship. All matches will be held in the Coliseum basement during the free hours on Tuesdays and Thursdays.

There will be no entry fee for the tournament. The only requirement is that the bowlers will be the 8.5 lb set or three hand sets. Bowling shoes will not be included in this fee but may be rented for a small additional cost. Prizes will be awarded by the IM department for the top teams in length competition.

Teams entered in the tournament at the present time include the following:

- Duke
- Georgia Tech
- MIT
- Notre Dame
- North Western
- Purdue
