NEW INTEGRAL business manager Jerry Rosicky, new directory editor Jim Combes and new directory business manager Ed Hodges left to right discuss policies after recent appointment by Publication Board.

Combes, Hodges, Rosicky Win Publications Posts

The Publications Board appointed Jim Combes editor of the Technology News, beginning fall quarter. Combes, a sixth semester III, is president of the Junior Class and a member of the Student Union Board. Active in campus religious activities, Combes also is chief editor of the Newsnu, Ed Hodges, III, 4, was appointed assistant editor of the Newsnu. Hodges also is a member of ITSA’s Advisory Board. At the same meeting, Jerry Rosicky, a fourth semester III, was appointed business manager of the Newsnu.

Retaliata Urges Parents To Visit on Saturday, May 2

Illinois Tech Parents’ Day has been set for May 2 from 1:30 to 5 p.m. President Retaliata has sent letters to parents of all students urging them to attend.

Committee Head, Dr. Lewis Discuss Honor System Before ITSA Board

Ed Lackaff, in committee reports at Wednesday night’s ITSA meeting, reported that his honor system committee discussed the possibility of a student government. Lackaff said a student government can be conducted by any engineering school.

Turn ITSA Election Forms In By April 30

Petitions for candidates for ITSA and class officers must be obtained from the Dean of Student’s Office by April 15. They must be returned before 5 p.m. on April 30.

Pre-Registration Ends Wednesday

Candidates and pre-registration continues until Wednesday, April 19. Undergraduates should send their resumes and a list of courses to be offered in the fall semester 1980. Resumes should be assigned advisors.

APROTC endnote presents Lynn Johnson with Elgin watchworthy symbolic of her victory in the Military Ball Queen contest. Lynn, the date of Althea Curtis and Wayne Dominguez, is flanked by Dean of Students Dottie and WIND disc Jockey Billy Hamilton.
Why Isn’t Fence Moved Back Now?

It is said that playing in a ball park that has trick dimensions is an advantage for the home team because the opposing team may become more confused. Sonny’s Acres, the current home of the Tech baseball team, does not have trick dimensions; it has no ridges on the field.

In particular, it is the closeness of the left field fence that bothers most interested parties. The distance down the foul line is 165 feet. Is it wise to build a fence that is 165 feet away? If this new fence is to be built, it is necessary to change the dimensions of the playing field. This would be a very expensive project. A new fence would have to be built and the old one would have to be removed.

The building of the new fence would be considerably more expensive than the building of the old one. The building of the new fence would have to be done by a professional company. The building of the old fence was done on a small scale by the equipment company.

The building of the new fence would be more expensive than the building of the old one. The building of the new fence would have to be done by a professional company. The building of the old fence was done on a small scale by the equipment company.

The building of the new fence would be more expensive than the building of the old one. The building of the new fence would have to be done by a professional company. The building of the old fence was done on a small scale by the equipment company.

Tech Tuition Increase Lends Weight to ITSA Money Claim

Mixed with the guns of the student body which has just been informed of another tuition increase are the more despairing walls of the ITSA treasury. The school is quite aware that prices of labor and materials are increasing. Our student government is subject to many of the same price increases, and it continues to subsist on an income now inadequate.

Tuition has now increased by increments of $20 to $30 per semester for three separate occasions. ITSA has not increased the size of its yearly income since before the first tuition raise. Obviously, costs have grown sufficiently to warrant nearly a 20 percent boost in tuition costs. It would seem only fair at this point to halt the ITSA income by a similar factor, i.e., one dollar.

Governmental activities at Tech cost more now than they did only three years ago, as evidenced by the fact that ITSA does not now hold a sufficient surplus to cover expenses not included in its annual budget. Further, ITSA has cut back operations considered essential in past years due to lack of funds. This condition exists at a time when ITSA would like to expand its services to the student body.

A last ditch measure to cover the proposed and already existing expenses of ITSA prevails in the yet unanswered question of activity books.

Easier than this, of course, is the straightforward manner of allocating to ITSA the required funds under the present system. It would save the troubles of an activities book committee and even the complications of printing the book.

Facts Prove TN Queries About ITCA Are Justified

by Bob Zoeller

"Foul!" cry the officers of ITCA after being questioned on the financial status of the organization. "Lies, all lies," is their only answer to the statement that the organization is not recognized. "See Dean Ackerly. He'll tell you we are recognized.

Members of Technology News have trudged three times over to the dean of students office to check on whether the group is recognized. As of our deadline, Tuesday, they were not, although they are in the process of gaining said recognition.

Their February financial report shows that the organization funds are all present and accounted for, although past and present officers have rather poor memories when questioned about details and statistics. These are apparently innocent mistakes.

In answer to the charge that intimations were made against a past treasurer, it should be pointed out that the members of the Technology News discussed "the possibility of a change of past treasurer" was made to show that an effort had been made to contact the former officer-holder, not to imply he was suspect as a former officer.

The results of the editorial have been twofold thus far. First, the organization has made a concentration on bringing up its recognition form difficulties. Second, members of ITCA were admitted free of charge to the recent jazz concert instead of having to pay the originally advertised 35 cents.

Turning from the issue of ITCA, Technology News begins with this issue a series of "First Principles." These articles will be a series of classroom and laboratory instruction. They are intended to be a positive, constructive analysis of what classes SHOULD BE (and in some instances perhaps are).

Baseball Team Captains Ask for Field Extension

There is a baseball diamond at JIT which lacks but one thing to make it a complete and usable home field for the TechVax baseball team. This one thing is the extension of the left field fence beyond the infield.

Last year this was a building preventing any expansion of the baseball diamond. As a result of the poor showing of the team last summer, but since then no progress has been made to remedy the situation.

Why, after going to the trouble of tearing down the building, is the school going to forget the ground of red clay and dirt, and planting grass? Surely the expense of this project can't be that great to prevent the school from taking action. What then is the reason for this lack of progress on the school's part when at the same time they appear to be rebuilding the center court?

It is a poor showing when the TechVax varsity baseball team has had to travel to their home ground for years when the remedy to this situation has been at their door.

Letters to Editor

Answers Critics

Dear Rob,

I refer you to last week's paper that a few people disagree with me. There doesn't appear to be much support in that letter or in the past few days. However, I would like to mention him on a few points.

The foreign student's loyalty to his country did not make him sick. I just wish you were an American citizen. What made me sick was the fact that you said the exact opposite at JIT. For a political science major, he doesn't seem quite sure concerning the form of government. Since when is a surreptitious organization considered in the same category as a political affiliation? After reading that statement, I was wondering just how sure you are of the standards of the political science department.

As for Mr. Rob, I am an American and Jefferson must have turned over in his respective grave if his name were being linked with elements which wish to overthrow the country we work hard to build.

Let's just examine the prevailing views of the student at JIT.

To wear a bosie is a necessity. To imitate the grown men and attend activities is invalid! Glorifying your loyalty to your government is in keeping to your dignity, your integrity, and it also character assassination.

Raymond J. McNamara

Analyze Issue

Dear Mr. Zoeller,

I do not use my pen name calling or blame the student, but rather I merely wish to express my appreciation for the excellent coverage of local events, sports, ITVA, cultural activities, and the student body and for the many helpful letters to the editor. In your last issue, everyone in TechVax was interested in the results of the MOPPIE Gauss which apparently had much more re

Robert Telfer

Defends ITVA

Dear Mr. Zoeller,

No news has reached me with regard to the movement called ITVA. It is not only that the article completely lacks in fact and objectivity, but it is also not true to the facts of the organization.

Mr. Woods and all other members of TechVax have been in its infancy for several years. The movement is that which makes it available to large numbers of people should be pleasantly surprised.

I must agree with this (Rob) in all but one or two minor and perhaps insignificant respects... I believe that he could have used phrasing which probably have had less unfortunate connotations than "diplomatic" and "considered thinking"... the logic of his conclusion concerning Mr. McNamara escapes me.

I believe that anyone can purchase a copy of the USA, Clarification for a few paltry years. From that historical documentary, one finds at the essence of free speech, it is only to allow someone to speak, my mind none who disagree with these opinions may be... I am therefore somewhat astonished to find that at least two of our students have the unhappy arrogance to publicly deny the facts, to make such an assertion. With my deepest respect, I would request that I write a more reasonable conclusion regarding his major department.

Robert Telfer

Rebukes Critics

Dear Rob,

In the April 5 issue of Technology News a young lady suggests that Mr. McNamara is "start trying to appreciate the different viewpoints of an entire world." What viewpoints would the most suggest as worthy of appreciation?

May I suggest that we forget about "different viewpoints of an entire world"? This young lady talks about that there are few of the viewpoints that the assumptions of the eventual enrollment of our country, and concentrate only on views that will aid our country in the war against the Soviet Empire.

Bob Hamilton

Defends ITVA

Dear Mr. Zoeller,

The News has reached me with regard to the movement called ITVA. It is not only that the article completely lacks in fact and objectivity, but it is also not true to the facts of the organization.

Mr. Woods and all other members of TechVax have been in its infancy for several years. The movement is that which makes it available to large numbers of people should be pleasantly surprised.

I must agree with this (Rob) in all but one or two minor and perhaps insignificant respects... I believe that he could have used phrasing which probably have had less unfortunate connotations than "diplomatic" and "considered thinking"... the logic of his conclusion concerning Mr. McNamara escapes me.

From that historical documentary, one finds at the essence of free speech, it is only to allow someone to speak, my mind none who disagree with these opinions may be... I am therefore somewhat astonished to find that at least two of our students have the unhappy arrogance to publicly deny the facts, to make such an assertion. With my deepest respect, I would request that I write a more reasonable conclusion regarding his major department.

Robert Telfer

defends group

Dear Mr. Zoeller,

I refer to the slip in spelling in printing Mr. Robert Woods' ITVA article in your last issue.

In this article, a brief allusion concerning the ITVA's activities and membership was made. Mr. Woods' "factions" were "bitter splinter groups" of people who held ITVA office as much as two years ago. If Mr. Woods had the right to check the ITVA books which were offered to him by Mr. Rob McRae, then I believe there would be no question in his mind as to the veracity of the funds and membership.

Another fact to contrast with Mr. Woods is that ITVA is a relatively recognized group. It is true that we were recognized last, but ITVA was entirely free of faults in a matter that can be ascribed to by Dean Ackley.

I forgot to mention that Mr. Woods had my own initials which I had not forgotten before the deadline of this last issue. The fact that the article was published is an example of good supervision on the part of Mr. Woods. Therefore, Mr. Zoeller, for the sake of the future of TechVax News I ask you to accept your responsibility in presenting opinions to the student body.

Myrna Wehby

Explains Issue

Dear Mr. Zoeller,

The News has reached me with regard to the movement called ITVA. It is not only that the article completely lacks in fact and objectivity, but it is also not true to the facts of the organization. Mr. Woods' "factions" were "bitter splinter groups" of people who held ITVA office as much as two years ago. If Mr. Woods had the right to check the ITVA books which were offered to him by Mr. Rob McRae, then I believe there would be no question in his mind as to the veracity of the funds and membership.

ITVA was finally reconciled, with five other organizations by ITVA Wednesday night.

Edgar Latchford

Wants More for His Money

Dear Mr. Zoeller,

In reference to the announcement of President Rattanshi with respect to the increase in tuition (Tech News, April 7), I would like to ask the following questions:

1) Why didn't President Rattanshi publish information on the ratio of the people holding school sponsored scholarships to the total enrollment for the schools dignit?

2) Why didn't the President publish a list of the number of students per staff member at the various departments of the university (e.g., EE Dept.)

3) Why didn't the President publish a list of laboratory quality for each school mentioned as deter-

4) Why didn't the President publish a list of Professors' salaries paid at the various institutions?

I suggest these facts should be brought to the students by the President in his annual report to the student body. Perhaps then the present $300 a year tuition will appear to be a bargain.

Jacobo Farber
Tech, CTS, Sun-Times Sponsor Career Conference for High School Students

ITT's Eleventh Annual Career Conference, sponsored by the Chicago Technical Society, the Chicago Sun-Times, and Illinois Tech, will be held Saturday, April 11. Some 2,000 local high school and junior college students are expected to attend.

At informal panel discussions, the students will hear prominent speakers from 26 different fields discuss the requirements and opportunities, advantages and disadvantages of more than 100 specific careers, ranging from music and art to industrial science and engineering.

Conference Provides Information
The purpose of the conference is to provide career information, not otherwise available, about the student's field of interest by bringing him into direct contact with talented and successful people in those fields.

The mayor of Chicago has proclaimed the week of April 11 as "Career Week in Chicago," designed to coincide with the conference. The proclamation states that the conference "is dedicated to giving high school students of the Chicago area information which will provide the basis for sound and adequate preparation and decisions regarding a choice of their life's work."

"Number One Speaker"
Dr. Kenneth McFarland, often called America's number one smokeless tobacco researcher, will address the general session of the conference at 8:30 Saturday morning. The session is to be the kickoff meeting which will start the series of discussions.

McFarland has gained national prominence as a school executive after more than 25 years of service and is often referred to as "the teacher who has made the whole continent into a personal classroom."

William R. Smith, engineering training director at International Harvester, will serve as general chairman. In charge of selecting and contacting the outstanding personalities who will appear on this year's panel is Robert Dalmann, at the American Society for Metals, who is serving as panel committee chairman. Mervyn L. Mooney, Illinois committee chairman, is responsible for contacting the Chicago area schools.

Q.E.D.

Yes, it's been demonstrated time and time again, that if you eat it right, it's got to be right! Add up that cold crisp taste, that lively lift and you really have a drink worth going after. So whenever the crowd has a multiple hit, make the high sign of good taste... pass around the Coca-Cola! (Gosh, that's impressive!)

Here's how you can put in a summer of fun and profit — and learn something, too!

If you have completed your third-year in Mechanical, Electrical, Civil or Industrial Engineering and are a U.S. citizen, you'll want to investigate our summer training program.

Our Plant (construction and maintenance) and Engineering Departments have a limited number of spots for college men in Chicago and elsewhere in Illinois.

It's a great chance to put classroom theory to practical application, and get a good lead on what a career in communications might hold for you. And, you're placed under no obligation after graduation.

Olympic' Events Begin Greek Week Activities

Greek Week will begin at Illinois Tech with the traditional card contest at the ITSA picnic May 1. These events, to be held through the cooperation of the ITSA Social Committee, will include egg throwing, beer can throwing, and a "more useless man on campus" contest.

Various events will continue during the following week, May 2. Besides the traditional card contests, quizzing, water fights, and other "athletic contests," formal discussions on fraternity policy and activities will also be held.

Appoint Freshman Social Committee

Four newly appointed members of the Freshman Social Committee are Dave Chitler, John Gooden, Ron Knoll and Jay Klonicki.

Student EE Group Elects 4 Officers

The annual elections of the American Institute of Electrical Engineers will be held at noon on Thursday, April 14, in the auditorium of Sigma Hall.

Officers to be elected are chairman, vice-chairman, secretary, and treasurer. Officers will serve for one year.

Candidates for office must have a position, satisfactory for all officers of the ITSA officer, signed by at least 10 members of AIEEE who are also members of the national organization.

Are you ready for the weekend activities? Here's what's happening:

- **Greek Week** kicks off with fun events at the ITSA picnic on May 1, including a card contest and a "more useless man on campus" contest.
- **ITSA Social Committee** plans various events throughout the week, including card contests, quizzing, water fights, and formal discussions on fraternity policy.
- **Student EE Group** is electing officers for the year on Thursday, April 14, with positions including chairman, vice-chairman, secretary, and treasurer.
- **Freshman Social Committee** has new members: Dave Chitler, John Gooden, Ron Knoll, and Jay Klonicki.

**CONNECTICUT OPERATIONS**

Unmatched Engineering Facilities for Developing Advanced Flight Propulsion Systems

Operations at Pratt & Whitney Aircraft are essential to the company's engineering and development organization. As such, an engineering atmosphere dominates the work being done, much of which directly involves laboratory experimentation.

In the past three decades, expansion at Pratt & Whitney Aircraft has been almost incredible. In recent years, greatest emphasis has been on extending engineering facilities to meet the needs of advanced research and development programs in flight propulsion.

Among the Connecticut P&W facilities are many that are unequalled in the industry. Today, Pratt & Whitney Aircraft is better prepared than ever to continue development of the world's best aircraft powerplants...to prove the propulsion future...to build and test greatly advanced propulsion systems for coming generations of flight vehicles — in whatever form they take.

![Image of Connecticut aircraft plant]

The Connecticut Aircraft Nuclear Engine Laboratory, operated by Pratt & Whitney Aircraft, is situated on a 5,000-acre site near Madison. The Laboratory was specially built for the development of nuclear flight propulsion systems.

In chambers like this at the Willipoo Turbine Engine Test Facility high-speed engines may be tested in environmental conditions of Mach 3 conditions, conditions that may never be simulated.

The Willipoo Turbine Engine Test Facility is the world's most extensive jet engine/developement laboratory. The facility is dedicated to testing full-scale experimental engines and components in environments simulating realistic flight conditions at extreme altitudes and speeds. The facility is currently undergoing expansion that will greatly increase its capacity for development testing of the most advanced types of flight propulsion systems.

In the new Paul Systems Laboratory engineers can minimize the effects of extreme environmental conditions on components of aero engines, conditions such as those encountered in advanced types of flight vehicles operating at high Mach numbers and high altitudes. Paul for these tests can be supplied at any temperature from -67°F to 450°F.

Hold Lecture At Carmen Site Tuesday

The third lecture in the series "Living Facts and the Jewish Response" will be given during the Chapman Coffee Hour at 9 p.m. Tuesday, April 14, in the Carmen Lounge. Professor Meredith Harris, M.I.L.H., L.H.D., Assistant Professor of Religion at Chicago Theological Seminary, will present "Jewish History Alive!"

On April 17, Professor Wilber Katz, Ph.D., from the University of Chicago, Law School, will give a lecture entitled "Engineers Have No Problem." The program may be attended by any Tech student.

Sunday, April 19, the Young Adult Fellowship of the Second Presbyterian Church presents the discussion "The Whole Church for the Whole World," talk by Eric Franklin, a student of Tech. Transportation to the Second Presbyterian Church at 2208 S. Wabash will be from the Commons Lounge at 7:15 p.m.

The Sunday Evening Fellowship will hold a meeting April 12, at 8 p.m. in 207 Cunningham Hall. Rev. Brynne Geohegan will continue the series "Religion and the Arts." All Tech students may attend.

Wednesday, April 15, the Newman Club will present "Catholics in the East," a program presented by Father John of St. James Parish. The Newman Club meets in the Commons Lounge at 5:15 p.m. on Wednesdays.

ROTTC Units Pick Dance Queen

Lynn Johnson, consisting of ting of long blond hair, blue eyes and various other appendages cleverly concealed on a 5 foot 1 inch frame, gave the APROTC a victory over their Navy counterparts in Military Ball Queen competition last Friday night at the Sheraton-Blackstone Hotel.

Lynn, a student of Army Forces Command WAYNE INGERSOLL, was selected queen by the student body of the University of Illinois. She was judged on looks, poise, charm and personality. She was the only member of Tech's Queen Committee who was there before the ball, but didn't know the results of the contest until they were announced at the dance.

The queen is a seventeen-year-old student at Beverly High School in Chicago. She is a student of the University of Illinois. She is a member of the Alpha Phi Sorority and the Women's College of Arts and Sciences. She is also a member of the University of Illinois Dance Team. She is a member of the University of Illinois Dance Team. She is also a member of the University of Illinois Dance Team.

THE GARRETT CORPORATION
AIResearch Divisions
will be on campus to interview
ENGINEERING STUDENTS

B.S. - M.S. - Ph.D. candidates

The Garrett Corporation is one of the most diverse research, engineering and manufacturing organizations in the aircraft, missile and technological fields.

From AIResearch laboratories have come top developments in aircraft and missile components and systems. Today 90% of the free world's aircraft use AIResearch equipment.

Garrett divisions and subsidiaries are creating a variety of products, including industrial turbomachinery and marine equipment, and are supplying sales and service to airframe companies, airlines and the military.

Project work is conducted by small groups in which individual effort is more quickly recognized and opportunities for learning and advancement are enhanced.

With company financial assistance, you can continue your education at fine neighboring universities.

TYPICAL PROJECT ACTIVITIES

Electronic air data computers, pressure ratio transducers, electrical systems and motors and generators.

Preliminary design from analytical and theoretical considerations for high-level technical work in aerodynamics, stress analysis, thermodynamics, heat transfer, gyroscopes, pneumatics, nuclear power and mathematics.

Auxiliary power units and control systems for various types of missiles.

Air and vapor cycle refrigeration turbines, hydraulic and mechanically driven pumps and compressors.

Jet engine, rotating machinery design and analysis involving combustion, turbine, gas dynamics, thermodynamics and aerodynamics.

Gas turbine auxiliary systems and power systems.

TYPICAL ORIENTATION PROGRAM

In addition to direct assignments, an eight-month orientation program is available to aid you in job selection. You participate in Garrett project and laboratory activities and work with engineers who are outstanding in their fields. Your orientation will include familiarization with sales and contract administration.

Kool Gents Easily Capture IM Volleyball Championship

The Kool Gents rolled to an easy victory and the IM Volleyball championship Tuesday as they defeated the Fowler Hall team in two straight games, 15-4 and 15-0. This victory ended the Kool Gents' undefeated streak through the single elimination tournament to win the title from the ten teams in the tourney. In no game during the tournament did any team score more than seven points against the Kool Gents.

Although it was the championship game, the pattern of victory was once again the same. It was the able serving of Carlis Misner and Bob Pavichski that rendered Fowler Hall almost helpless. Their serve would hit the ball up by the net and Misner and Pavichski would slam it over for the point.

Excellent substitute for the winners was given by Jack Newell and Dan McBride.

Honor 1 Awards Mueller Jacket At Banquet Sunday

Jean Muffler was voted a special award for her contribution to the varsity and intramural sports here at Tech at the Honor 1 Banquet Sunday afternoon. The Women of the Year will be given a white Hinda Mueller jacket with the Honor 1 emblem on it signifying her achievements.

Ellie Hasen, Head of Traveling Secretary, spoke after dinner on some very funny and moving personal experiences. Mr. Hasen was very well received by all present.

Tennis Team Loses To Northern 8-1

by Norm Berger

Tech's tennis team was trounced by Northern Teacher's College this Saturday, 8 to 1, on Tech's home court.

Bob Bachman scored Tech's only victory, defeating the number three man of Northern, Carmen Mest, 6-1, 6-4. Bachman teamed with captain Louis Andre in a double match but lost to a close contest to Robinson and Mast of Northern, 6-4, 6-4.

Both Ed Bower, playing number five, and Zorny Stulig, number two, took their respective opponents to a 5-5 set, but they too succumbed to Northern's power.

Coach Phil Pavia commented after the match, "They need a few more conference matches to whip them into shape."

We require a B.S. or an advanced degree in mathematics or the physical sciences. Experience in your university's computing facility is highly desirable.

High-speed digital computers and expanding computer systems require individuals with more than the usual amount of interest and ability in the fields of Applied Mathematics and related computer programming.

Our Computation and Data Reduction Center in San Diego is one of the largest and most advanced facilities in the nation. Three of the largest and most modern high-speed digital computers (IBM 707, 704, and UNIVAC 1103A) are utilized in the support of Ballistic Data Engineering for the Air Force Ballistic Missile Program and space flight studies.

Contact your placement officer for an appointment, or send your inquiries to Space Technology Laboratories, Inc. to the attention of Mr. Gerald Dickey.

Tech Faces North Park Tuesday

Navy, Air Force Win Opening IM Contests

As the first games of the IM softball tournament got under way Tuesday afternoon the results of the games were many and varied. The Freshman IV team forfeited to the Navy B squad in the first scheduled game of the tournament.

Tech Runners Open 6 Meet Schedule Sat.

Tech track team will open their season Saturday when they compete in a triangular meet with Carroll College and Elmhurst College on the Elmhurst track.

The team members have been working out with Coach Barbara on Monday, Wednesday, and Friday evenings so they have been practicing individually on other days of the week.

A few from the number of runners attending the practice sessions, and their performance during the season. Barbara expects a fairly successful season on the cinders.

Track Schedule
April 11 Carroll-Elmhurst 18
12-14 Carroll-Navy Meet 24
15-16 Waukesha Jr. College 34
20-21 Kaukauna Meet 2
24-25 Bishop Bays 9
25-26 Concordia-North Park 16
30-31 Navy Pier-North Park 23

The Tote Board

Marbles Yet? Not Yet

I am writing again and off we go again to another adventure in the Tech world of sports (of sorts). It appears as though Tech’s marble team will be forced, once again this year, to compete as a disadvantaged team with the other marbles teams around the neighborhood. Their half-completed home ring has proved unsatisfactory for entertaining their opponents.

According to Coach Parke, the season would be a complete success if the players had a home place to play on, "except for a few sore knuckles my team is in top condition, all we lack is a playing ring." Seemingly the home marble ring has remained in the half-completed stage for several years now.

Last year a monument (in the form of a bird bath) sat on the corner of the ring, obstructing proper play of the game. During the past off season, however, the monument was destroyed and now only the remains remain.

Formerly the administration contended that they were unable to complete the playing surface of the ring because the monument was obstructing their progress. Now that only the remains remain, the ring could be forthcoming with a minimum of effort, no excuses forthcoming.

Caught You Snuggling

It seems almost certain that the administration would complete the ring if they realized the importance of having a good full-sized home ring. Players soon learn such valuable traits as snuggling without being detected by the referee, etc. Besides this, it keeps the players happy, and what is more rewarding than to talk to a contented marble player?

Glancy Expecting Hitting To Shine

by Noem Burger

Tech opens its baseball season Tuesday against North Park College at North Park. A very young team will take the field, but Coach Glancy points out, a team which has experience. Six of the players played for Glancy last year and the other three have performed well in the practice sessions.

Speddy Outfield

The outfield has speed to burn with co-captain Richard Buhrmiller in center field, Fred Carter in left, and Jim Haney playing right. Bob Keller, last year’s leading hitter with a .365 average, moves from shortstop to third to make room for a new- comer, Maurice Andrus.

Adayas, with quick hands and a first- like throwing arm, promise to be a mainstay in the infield. Hard hitting, 210 lbs., Rob Hilyers will open at first and other Dick Hamilton or Larry Brooks will play second to round out the infield.

Mann to Start

The batting lineup for the starting game will be co-captain Herb Wolfe and right hander Paul Mass on the mound. Mass is big, 6’3”, and has a blazing fastball. Following him on April 16 against Aurora are either left handed Bill Pella or right handed Mike Wayne. Expect Mann to start.

Glancy expects his team to suffer just last season’s 8-7 record, and perhaps compile one of the best marks in the team’s history.

Tech Rifle Team Competes In Midway Rifle League

The NROTC Rifle Team at Illinois Tech is currently competing in the Midway Rifle League of Chicago. There are three other teams in the league: the University of Chicago, Southtown YMCA, and Waag Rod and Gun Club. The league has scheduled rifle matches throughout the year.

On Wednesday, March 18, the NROTC Rifle Team broke a standing team score record in the league. The team fired a 1419 out of a possible 1500. The five men contributing to the record breaking score were: George Berg, 291; Bob Meyers, 282; Ron Smith, 283; Tim Newkirk, 283; and Conrad Romani, 281. The course of fire in the match was 10 shots prone, 5 shots sitting, 5 shots kneeling, and 10 shots standing.

The Midway Rifle League has a tournament each year in the spring, and this year it is to be held at the University of Chicago. It is purely an individual tournament. Medals are being awarded in the best shooters in different categories.

In addition to the league competition, the rifle team has had a busy year with matches against other schools and also postal matches. Matches have been fired with NROTC rifles.

Golfers Topple Concordia College In First Match

Tech’s golf team started the season off on the right foot Sunday as they defeated the Concordia Teachers College team by the margins of 11-1 in the individual match play competition.

Jim McCarty, captain of the team, was successful in his second game, giving 4 at Concordia. Other members of the Tech team were: Don Neel, Dave Taylor, Ray Nelson, and Mike Kohn.

Sports Hero

Andres Sees Improved Tennis Performance

by Nell McCauley

This week’s sports hero is Lou Andres, the 6’3”, 180 pound captain of the Tech tennis team. Lou, who earned two varsity letters in tennis at Lindell High, was Tech’s top scorer last season. Although the team won only three matches while losing seven, Lou captured a record of 12 and 4. He finished fifth in the “B” division in Chicago, and second in the Chicago Intercollegiate tournament more than at the University of Chicago. Lou has also won a number of other tournaments, among them the CYO championship of 1977.

Besides being a member of the Tech tennis team, Lou played on the IM and APROCT basketball teams. He also played on the Drexel University soccer team and the IM All Stars. He is a member of the Drexel University fraternity and a captain lieutenant in the top flying program.

What does the eighth semester mean for the Tennis team this year? Lou, without a doubt, should be a leader of the team. He has a variety of skills and can fill any role that is necessary. Lou’s role will be of the utmost importance to the team this year.
