McCurdy Sings in SU Tomorrow

Students to Attend Concert

Folk singer Ed McCurdy will appear in a concert at 7:45 p.m. on Saturday, March 19 in the Student Union auditorium. Tickets can be purchased for $1.50 at the Student Union candy counter, all fraternity houses and in dormitories.

All groups holding parties either before or after the concert who register with C. William Brown, Dean of Students, will receive complimentary tickets for their guests.

Appeared on TV

Ed has recorded "Sin Songs, Pro and Con" on the Elektra label, "Balsh Singers Choice" on Tradition, and "Robin Hood Balsh" on Riverside. He has been working on television since 1944, appearing on many of the Camera Three shows and also on "Studio One." Other past performances include The Gate of Horn in Chicago; the Newport and Monterey Festivals in Town Hall, New York, the Campus Club, New York, and various concerts at colleges throughout Ohio.

One of Many

The folk music concert is one of several concerts the Student Union board is sponsoring this semester, as they have done in the past few years.

A fine arts concert on April 24, featuring Roel Bjoerling, Swedish tenor, will be cosponsored by SUB and the Illinois Tech Women's Club. Proceeds are to be donated to the Arts Club.

Kali Winding, The Fine Arts Quartet, Bob Stowe and his Private Jazz Band, and folk singer Oscar Brand and Odetta have appeared at past SUB concerts.

Apollon Livingston, Morler to ITSA Bd.

ITSA board of control appointed Ed Morler and Corinne Lous Livingston to the positions of ITSA social chairman and secretary, respectively, at the board meeting on Wednesday evening. The positions were available due to the resignations of Randie Wurman and Sharon Stuart.

Other applicants for the position of social chairman were Clay Hayes, John Cote, and Melvin Skavenna. Marshall Taylor and Ron Smith also applied for the position of secretary.

The constitutional amendment committee proposed several amendments to the ITSA constitution. The amendments would give the president of the Student Union Board an appointed position on the ITSA board of control. In order to keep the number on the board from increasing, the Illinois Tech Women's Association president will not hold a voting position on the board. If these amendments are approved by the board of control, the students will vote on the amendments in the spring election.

The board moved to appoint the planning chairman to consider the feasibility of having a celebration on the twentieth anniversary of the founding of Illinois Tech. Alumni and faculty would be invited to participate in the event. This might include a semi-formal dinner which would possibly be held at the end of orientation week.

An amendment to the by-laws of the ITSA constitution concerning the Student Investigating Committee was passed. The amendment created five additional positions on SIC, three of which will be filled by representatives of the honorary scholastic fraternities.

The next ITSA board of control meeting will be held on March 30, at the home of Dick Gregory.

Publications Board Approves Budget; Considers Tech Directory Management

Burt Harris and Don Holm were appointed editor and business manager, respectively, of the 1965-66 Tech Center Directory at the ITSA Publications Board meeting Tuesday evening.

The budgets of Listeners magazine, WITI, campus radio station, and the Tech Center Directory were approved at this meeting and presented to the ITSA board of control Wednesday evening.

In addition, the WITI budget was $50 for membership in the Intercollegiate Broadcasting System. Illinois Tech has never previously been a member. It was also announced that Listeners magazine will again be sold, rather than distributed free.

Appointment to the position of WITI station manager will be made at the next meeting on March 27. Written applications must be presented to Don Holm, Livingston Publications board chairman, before the meeting.

Eden-Pick of business managers of the Integral, Illinois Tech's yearbook, and Listeners magazine will be appointed at the public boards meeting of April 12.

Final plans on the management of the Tech Center Directory have not yet been made.

DEBATE

Debaters Hold 'Re-Run' Debate For Methods

To illustrate correct debate procedure, the Illinois Tech Debate Society presented a detailed debate on the Illinois Con-
Conservative Outlook Stems From History, Individualism

by Larry Smith

"A Conservative is a man with two perfectly good legs who, however, has never learned to walk." — Franklin D. Roosevelt

The formation of a political club, the Students for Democratic Action (see editorial under cartoon) has done much to further the Illinois Tech student along on his road to "political awakening." It must be emphasized, though, that the group, while calling itself independent, still in the same breath asserts a dedication to liberal policies.

Since no counter-group has yet manifested itself, I think it might be well to state the policies that such a group might want to take up for their basic orientation.

We feel that the concepts and ideas embodied in conservative doctrines, when applied to the problems of United States domestic and foreign policy will provide the solutions most commensurate to the well-being of the American people and to the rest of the world.

There are two basic tenets to a conservative philosophy. The first is contained in the proposition that conservatism, to a greater extent than other viewpoints, embraces the accumulated, time-tested wisdom of men. Conservatism distrusts the proposal of any innovator which is derived merely from the wish to achieve an immediate good. Consequently, the conservative places upon the innovator who diverges from the traditional the burden of proving that what he proposes will result in lasting good.

In consequence, a conservative point of view is basically a historical point of view, and the conservative approach is a historical approach. He judges all acts by what they actually do and their ultimate consequences, by what they are to be said to do and supposed to achieve.

Secondly, the conservative insists on distinguishing between the State and government, between the State and the individual. The State, or government, will insist that the only real value in human experience is the individual, and that without liberty, the individual can have no value but is a mere statistic in a collectivity.

Individual liberty alone provides the needed environment for the exercise of human will, and accordingly is the indispensable condition for the ultimate human value of goodness.

We then suggest there are two elements which are fundamental to the conservative point of view: a respect for the wisdom given by the past experience of mankind so that we may be able to hold fast to that which is good as we make attempts at progress which is better, and a devotion to individual liberty as the indispensable condition of all ultimate human values.

Of course these are not the only guiding criteria for a conservative outlook. Limitations of space forced me to give only a sketch, "glittering generality." Look at the foundations of conservative thought and you will find it full pages. Our viewpoint is not invincible to attack from the liberals nor is theirs invincible to attack from our side. I sincerely believe, though, that our arguments will prevail long after theirs are in a time capsule.

Is Chapin Hall Falling to Left Or Right Side?

It has been noted that Chapin Hall has been rather deceitful lately. Loose plaster, peeling paint, and crumbling floors are in evidence throughout the building. Wind has been heard whistling through some of the less frequented rooms.

There seems to be some opinion that the left wing is crumbling to the left while the right wing is sinking to the right. This condition may eventually result in an unfortunate cleavage through the center of the building. Other observers feel that the left wing is crumbling toward the left and the right wing is sinking toward the left. It is hoped that the latter situation is actually the case because this will provide a more stable condition than the former case.

Chessman Constitutes But A Trivial Pawn in Own Case

Caryl Whittier Chessman is again awaiting his execution amidst heated and, we must admit, some close-thinking arguments for and against his case. Technology News seeks to organize debate on the issue, at the same time formulating arguments of its own.

To our way of thinking, a debate for or against capital punishment is a legitimate, worthwhile conflict of ideas. However, determination of Chessman's worthiness or unworthiness of pardon by merit of the extra-criminal aspects of his personal life is an esoteric form of begging the question.

The American judicial system requires that a jury decide, on the basis of evidence presented at the trial, and only at the trial or trial proceedings, that the defendant is "guilty beyond a reasonable doubt". Under such a system, bias or prejudice could not have influenced the jury in the latest case.

Our analysis of the case indicates that this system was in near-perfect operation during the trial. The lone exception falls not under the general trial, but under laws for post-trial conduct in Ca, which forbid Governor Brown from issuing a pardon or commutation of sentence to second offenders over the veto of the state supreme court.

Many who stoutly defend such a system of strict requirements for convictions, expect that, on the other hand, extra-trial ideas, such as that Chessman is a "jail-bird" (in their opinion) brilliant man who should influence the case. Proof of such an obvious double standard by these "intellectuals" leads to their efforts an air of hypocrisies.

To these latter people, Chessman is a modern-day Rasputin and his crimes of passion, one of which has committed a 17-year-old girl to a sanitarium, are to be compared with the Dostoevsky hero's "gratuitous crime". Even if our social order (expose the ostentatious term) condoned the gratuitous crime, Chessman would fail the entrance examination.

Another contention is that Chessman's 11-year residency in "death row" constitutes "cruel and unusual punishment". Again, study of Common Law reveals a pertinent analogy, namely, that of a minor who signs a contract, gaining an advantage, then refutes the contract on the basis of his minority, thereby gaining another advantage. This is the "sword or shield" doctrine (Eiggen vs. Rawlins, 267 NYS 14-1933 or Rice vs. Butler, 160 NY 578). Under it, an infant cannot have the benefit of contract on one side without returning the equivalent on the other.

In short, a privilege invoked under law cannot be construed as an injustice in subsequent legal proceedings, and certainly not as "cruel or unusual punishment".

Governor Brown's accession to the pressure of Uruguay's students leads us to admonish: govern US citizens under US standards of government and under US "tempos et mores". If Chessman claims rights under a Uruguay's society, an obvious solution results deportation and consequent deprivation of citizenship.

Once again, we wish to reaffirm our approval of debate pro and con capital punishment. However, this appears to be the only truly debatable issue in the case.

Pledge Tech News Support To Tech Political Groups

Students for Democratic Action, the first political club on Illinois Tech's campus, has held its organizational meeting last week. SDA claims no party affiliation, but its purpose is to promote discussions on pertinent political issues, and support candidates for office, regardless of any party connections.

Being the first political organization formed at Illinois Tech, the group may well find the legality of its existence being challenged by members of the administration. However, Technology News may not agree with all of the ideals or the liberal policies being formulated by the organization, but we do believe in the right of the group to exist, and we will defend this right under attack from any group.

It is time that the administration begins to realize that this is a political world, and many everyday conversations are concerned with political beliefs. This is not a world, we hope, in which people do not really care what their country does.

To deny the right of SDA to exist, to invite prominent public speakers to speak before their meetings, and to discuss important national and local political issues, would be merely an attempt to keep students discussing as a group issues with which every conscientious American should be concerned. This would be a denial of the students' right to think freely; we hope that no denial will be forthcoming.
Letters to the Editor

Chem Storekeeper Explains Combination Charge Issue

Sir,

I am writing in response to the letter in your editorial of March 11, titled "Chem Lab Cloudy." I must say that your article was quite enlightening. I am a chemistry student at the University of Chicago, and I can relate to the frustration that you described.

But my main point is that the term “clout” is not a synonym for financial support. It is used to describe the power and influence that a certain group wields. In the case of the chem lab, the student council is the group that wields the clout, not the students themselves.

Sincerely,

[Signature]

SPS to Meet, Feature Talk: Interlingua

Dr. Forrest F. Cleveland will speak on "Interlingua: Servant of Science" at the meeting of Sigma Pi Sigma at 2 p.m. this afternoon in 118 SH.

Cleveland, an associate professor in the Illinois Tech Physics department, has for eight years published articles in Interlingua in a physics journal entitled "Spectroscopy Molecular Interlingua is the least common denominator of European languages and can be read practically at sight by most scientists.

Student Info Service Gives Unusual Jobs

The American Student Information Service is looking for 300 American college students to fill summer jobs as helicopters on the French Riviera, construction engineers in French Equatorial Africa, jazz musicians, guanamaker in Spain, water ski instructor in Switzerland and private secretary in Germany.

ASIS has arranged a special student "summer package," costing $379, for members of the organization. ASIS headquarters is located at 1000 56th St., Frankfurt Main, Germany.

Applications Available For Deferment Test

The Selective Service System has announced that applications for the April 28, 1960 administration of the College Qualification Test are now available at local boards throughout the country. Eligible students who intend to defer military service should apply at once to the nearest Selective Service local board for an application and bulletin of information.

The student should fill out his application and mail it immediately to the Selective Service Examining Section, Educational Testing Service, P.O. Box 596, Princeton, New Jersey. Applications for the April 28 test must be postmarked no later than May 14, 1960.

The results will be reported to the student's local board for use in considering his deferment as a student.

Illinois Bell Panel Discusses Public Utility Issue Thursday

Illinois Bell Telephone Company's three-man panel will discuss "The position of public utilities in the business world of today" at the meeting of the Society for the Advancement of Management to be held at 12:15 p.m. next Thursday in 102 UC. Coffee will be served at all meetings.

Members of SAM toured the Republic Steel Company yesterday. The organization had also extended invitations to American Association of Industrial Engineers and the American Society of Civil Engineers.

Applications for membership in SAM will be accepted by Jim Coates, president of the society, at V-1, 3-3088, no later than May 15. The date is set by the national organization.

AIEE to Feature Air Defense Talk At Next Meeting

Major Robert L. Mayhew, 45th Artillery Brigade (Air Defense), will speak before the AIEE at their meeting next Tuesday. His subject is Air Defense which will include the radar and missile system used in this area. A short film on missiles will be shown.

Miss Nathaniel From Pakistan Visits Campus

Miss Vimal Nathaniel of Pakistan will be the guest of the Univesity of Chicago Foundation at their meeting at 8 p.m. Wednesday. Miss Nathaniel, of Lahore, Pakistan, has been in the United States on a six months' observation scholarship in the field of educational administration. The Commission on Ecumenical Mission and Relations of the United Presbyterian Church in the United States sponsors this scholarship.

Salem's new cigarette paper discovery "air softens" every puff!

- menthol fresh
- rich tobacco taste
- modern filter, too

NOW MORE THAN EVER

Salem refreshes your taste
SFPE Engages Grad to Speak

Silas B. C. Kemper will speak at the Society for Fire Protection Engineers meeting to be held on Thursday, March 31. The meeting will take place in room 1014 of the City Hall at 12:30 p.m.

"Recent Advances in the Field of Gyropump Fire Protection" will be the subject of his address.

Kemper is an associate member of the SFPE.

Dorms Plan Coffee Hour, Organize Ham Radio Club

The North Wing Pavilion's Coffee Hour will be held at 10 a.m. Wednesday, in the dorm cafeteria. Captain D. M. K. H. R., Capt. C. D. V. A., Capt. B. C. N. and Capt. R. L. N. will preside over an interesting and lively discussion. The forum is open to consider all matters of interest.

Coffee hours in the past have been considered successes with discussions running well after midnight for those who wish to stay. Anyone who expressed his interest in the radio club is reminded that the new club is in B-259. In a recent poll, enough active interest was shown in such an undertaking to deem the venture worthwhile.

Dean Brown and Melvin T. Tracht have heartily agreed to Dr. Pemberton's and the students' recommendations for this semester's guest meal ticket.

The Institute will permit the use of a student guest meal ticket for any accompanied guest of a resident contract holder, except another resident contract holder.

Look beyond the obvious...

as you consider your first professional job...

At Melpar, we believe that all young engineers and scientists should develop the habit of looking beyond the obvious.

First, what is the obvious? It's obvious that you're in demand. You don't have to worry about getting your material out first. And you don't have to worry about being selected for professional growth. Since you are in demand, you can expect to get the things you want from any number of potential employers.

But if you look beyond the obvious, you'll realize that your selection is simply a means to an end—"what satisfaction"! Out of your career, you'll be going to want pride—pride in your personal, individual contributions.

At Melpar, we are now working on 120 advanced defense and space exploration projects. We are interested only in young men who realize that pride is a reward that lasts much beyond the obvious. Because Melpar is a proud Company. We are proud of our imaginative approach to the solution of electronic problems; we're proud of our uninterrupted growth and controlled expansion; we're proud of the communities that surround our laboratories and plants in Northern Virginia and Boston, and we're proud of our reputation in research, design, and production of electronic products destined for universal application.

If you want an opportunity to be proud of your contribution and your Company, you're interested in hearing from you. Tell us about yourself. Either ask your college Placement Director to arrange a personal interview with the Melpar representative who will be visiting your College, or write to your Professional Employment Supervisor. Tell him if you would like to hear from one of your college's graduates who is now a proud employee at Melpar.
Tech News Explains Gunsaulus' Acquisition of Armour Million

by Marc Lieberman

Soon after Armour Mission opened, a new pastor was installed—Frank W. Gunsaulus. 31 years old, he was installed at Ohio Wesleyan University where he was ordained at the unbelievable age of 19. In his undergraduate days, he acquired a theological reputation as an orator and decided to devote himself to the Christian ministry.

Enchanted Audience
Nature had obviously destined Gunsaulus to be a great preacher, for he was a tall, well proportioned man with wavy black hair, smiling dark eyes, and a remarkable gift for extemporaneous expression. In his appearance he never relied on a manuscript.

Amidst Mission's Dilemmas
Very early in his career at Plymouth Church, he became very interested in the work of Armour Mission and would attend the meetings of the Sunday School as often as his crowded schedule would permit. He became more and more fascinated by the educational and social work the mission was doing.

Dr. Gunsaulus began to evolve in his mind a plan for a full time school to offer industrial and vocational training for both boys and girls.

Interests: Armour
At the next meeting, the doctor gave us what was to be quite an unusual sermon. It was titled "What I Would Do If I Had a Million"

Placement Schedule

Monday, March 21
1. Strong-Beckman Co.
   Rochester, N.Y.

7. Euclid RR Co.
   Cleveland, Ohio
8. Euclid RR Co.
   Cleveland, Ohio

Engineers and what they do at Pratt & Whitney Aircraft...

The field has never been broader
The challenge has never been greater

Engineers at Pratt & Whitney Aircraft today are concerned with the development of all forms of flight propulsion systems—air breathing, rocket, nuclear, and other advanced types for propulsion in space. Many of these systems are entirely new in concept that their design and development and allied research programs, require technical personnel not previously associated with the development of aircraft engines. Where the company was once primarily interested in graduates with degrees in mechanical and aeronautical engineering, it now also requires men with degrees in electrical, chemical, and nuclear engineering, and physics, chemistry, and metallurgy.

Included in a wide range of engineering activities open to technically trained graduates at all levels are these four basic fields:

ANALYTICAL ENGINEERING: Men engaged in this activity are concerned with fundamental investigations in the fields of science or engineering related to the conception of new products. They carry out detailed analyses of advanced flight and space systems and interpret results in terms of practical design applications. They provide basic information which is essential to determining the types of systems that have development potential.

DESIGN ENGINEERING: The prime requisite here is an active interest in the application of aerodynamics, thermodynamics, stress analysis, and principles of machinery design to the creation of new flight propulsion systems. Men engaged in this activity at PW&CA establish the specific performance and structural requirements of the new product and design it as a complete working mechanism.

EXPERIMENTAL ENGINEERING: Here men supervise and coordinate fabrication, assembly and laboratory testing of experimental apparatus, system components, and development engines. They devise test rigs and laboratory setups, specify instrumentation and direct execution of the actual test programs. Responsibility in this phase of the development program also includes analysis of test data, reporting of results and recommendations for future effort.

MATERIALS ENGINEERING: Men active in this field at PW&CA investigate metals, alloys and other materials under various environmental conditions to determine their usefulness as applied to advanced flight propulsion systems. They devise material testing methods and design special test equipment. They are also responsible for the determination of new fabrication techniques and causes of failures or manufacturing difficulties.

World's foremost designer and builder of aircraft engines

Man on the Street

'Street' Reporter Gets Wild Answers to Queries

In the past your man on the street reporter has delved into the opinions of the students-at-large. This week I am delving into Tech News for the edification of Tech News readers. Unfortunately the people here have such a track mind set that they are unable to even consider the question.

I Don't Know, Marty — What Do You Want to Do?

Slightly expensive:

Erroll Garner, the man who can't read music and is currently the nation's favorite jazz pianist, will be presented in concert at the Opera House, tomorrow night. Tickets are from $2 to $5, time is 8:30, address is 20 N. Wacker, PT 4-0750. The same place will have Victor Borge, the comic pianist, Saturday, the 26, and Voltaire Tho Bikl Sunday, the 27th. Borge's tickets are scarce and Bikl's are going fast. Tickets are also going for the Russian song and dance, Don Cossack Chorus and Dancers who will be at Orchestra Hall March 27. We understand they are superb. The address is 216 S. Michigan, HA 7-3562.

Moderate:

This weekend's best bet is the Ed Murrow folk concert at the Union tomorrow night. Details on MARTY, page 7.

Did You Know?

King Charles of Portugal was assassinated February 1, 1902.

"Toerola" is the state motto of California.

The Colorado River is 2,500 miles long.

The postal receipts of Philadelphia in 1844 were $35,509,581.

The Suez Dam in Sudan has a capacity of 140,000 million (of water).

The average consumption of coal for steam boilers is twelve pounds per hour for each square foot of grate surface. (Does not apply to oil burners).

Students Note Mag Deadline

Contributions are still being accepted for the spring issue of Scanning Magazine, Illinois Tech's student-faculty literary publication. The final copy deadline has been set for April 15, with distribution of the magazine slated for the second week in May.

Nat'l Park Service Offers Civil Engineering Program

Students in the fields of landscape architecture and civil engineering are eligible to participate in the student assistant program of the National Park Service this summer. Undergraduate students employed during their summer vacation may gain practical experience in these fields. Application forms are available from Earl K. Kohn, placement officer, Kibbick's office in 355 MC. Application must be returned by March 31, 1960.

Swinger. After electing new house officers, their governing body looks like this: Tom Vigil, president; Bill Jensen, vice-president; Bill Kapps, treasurer; Richard and Huntington, secretary; Tom Parren, senior marshal; Bob Olson, junior marshal; Mike Larent, guard; Dan Thomas, examiner; and Tony Kantor, guide.

On the lighter side, Barry Kaps, Alpha Epsilon Pi, was recently engaged to Adrienne Friedmann. Larry Bollet, Phi Kappa Sigma, and Lorna McDaniell, Bob Hillman, Phi Kappa Sigma, are also engaged.

The Sig Ep's also got into the act this week by pleading Cassie Swonger. After electing new house officers, their governing body looks like this: Tom Vigil, president; Bill Jensen, vice-president; Bill Kapps, treasurer; Richard and Huntington, secretary; Tom Parren, senior marshal; Bob Olson, junior marshal; Mike Larent, guard; Dan Thomas, examiner; and Tony Kantor, guide.

The Phil Kaps, Alpha Epsilon Pi, were recently engaged to Adrienne Friedmann. Larry Bollet, Phi Kappa Sigma, and Lorna McDaniell, Bob Hillman, Phi Kappa Sigma, are also engaged.

Bowing Tourney Slated For April
The 1960 National Collegiate Match Games Championship will be held this year in April. The games are to be held in conjunction with the YMCA Convention in New York City. The regional champion will compete in the national title for the national title of 1960 National Collegiate Match Games Bowling Championship.

Computers, Careers and You... after you join Western Electric
Interested in computers, computer technology and applications? Then you should investigate Western Electric. The telephone cross-bar switch is just one example of leading computer technology at work.

At its new engineering research center and at most of its 50 manufacturing locations, Western is developing more and more on computer systems in its work as a manufacturing firm for the Bell Telephone System. It has another major field—Defense Communications and Missile systems—the use of computers and computer technology is widespread. A young man who has a class in electrical engineering and who wants to quickly put his knowledge to work will find opportunities with Western Electric fascinating.

When you join Western Electric, every step in your career is planned. You will have opportunities to move up, and your own growth, too. We estimate that engineers will land 9,000 supervisory jobs open to them in the next ten years. There will be corresponding opportunities for career building within research and engineering. Progress is as rapid as your own individual efforts permit. And Western Electric maintains both full-time and part-time graduate engineering traineeships and tioned chief engineers in the electrical and mechanical fields.

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as for those in the scientific fields. If you are a student in the electrical engineering field, you may wish to apply for a summer engineering position now with Western Electric. Application forms are available at your campus engineering office.

Western Electric is an equal opportunity employer.

Greeks Attend Folk Concert Tomorrow

One of the most exciting events of the year for Phi Delta Theta is the annual Folk Concert. The concert features local and national performers, and is always a highlight of the social calendar.

Young Americans attending the concert can expect to hear a variety of music, ranging from traditional folk songs to contemporary hits. The performers are talented and diverse, and are sure to keep the audience entertained.

The Phi Delta Theta Fraternity is known for its strong sense of community and its commitment to service. This event is just one of the many ways in which the fraternity is able to bring people together and enjoy each other's company.

The Folk Concert is an excellent opportunity for young Americans to relax, have fun, and meet new people. Whether you're a Phi Delta Theta member or just a music lover, this is an event you won't want to miss!

Midshipman Rifle Club
In League Competition

The Midshipman's Riff Club is a group of students sponsored by the members of the HU Riff Club unit. Competing in the Midshipman's Riff League of Chicago, they have finished in second and first place, respectively, the last two years. Currently holding down third place with a 5-3 record, the team hopes to improve their position before the end of the season.

Besides their regular league competition, the squad has had matches with NROTC units from the University of Illinois, Northwestern, Marquette and the University of Wisconsin. Next year the team will join either Riff Club Units in the Chicago area to form the Chicagoland Riff Riff League.

The Secretary of the Navy matches will take place at the end of this month. This competition is participated in by 32 NROTC Units from colleges across the nation. Last year the Tech Unit placed seventh, an impressive achievement in view of the caliber of competition which they encountered.

Seventeen R. W. Bechtel, USMC, coaches the team. Major W. E. Cook, USMC, is the Officer in Charge.
Weissman Recreates; IF Returns

Games Resume Without Incident

With the withdrawal of Sonny Weatherby, the Alpha Sigma basketball team started their season by downsing Theta Xi 51-43. Jerry McNeill and Nick Madlins had the boards under control for the Sigs as they led most of the way. With the lead opened up to 8 points and about two minutes to go, Anderson and Abrusci put the game on ice for the Sigs with their semi-stall. High point man for the game was Nick Madlins who finished with 10.

The Sig Eps also started out their season in style as they trounced DLX 68-11. Ron Holtzworth led the winners with 19 as DLX didn't score a point in the first half. The Sig Eps met a worse fate Tuesday, however, as they were downed by the Delta 36-29. Dick Brandt contributed 18 of the winners' points while Mike Weidt slugged sight for the Sig Eps.

In a game that slightly resembled basketball at times, AEPI downed Triangle 60-29. The game was marked by numerous fouls, and many were called by the refs. Norm Berger and Paul Pinkel contributed 9 each for the winners while Bob Gencalo counted 10 for Triangle.

The Tote Board

Ready

If you are one of the more dedicated Tote Board fans, you have probably noticed that there is a new picture present. The reason for the new picture is that I have changed my outlook on the situation here at Tech. Since there is a change in outlook involved, the natural thing to do is to change the picture. The major reason for the change is that the institution has become of some new and exciting facts. These facts are so new and exciting, they have led to a whole new editorial policy. The change is from passive resistance against the administration to active resistance (not too active) against the same body.

Aim

The question in point is, "Should the Illinois Institute of Technology deny the right of the students, faculty, and staff to a swimming pool?" I am not alone in my endeavors to strive for the betterment of our plight. George Buchanan, EEE, has given me invaluable assistance.

Through a survey just completed by the sports staff of this newspaper, it has been uncovered that Illinois Tech is the only college or university in the Chicago area without the use of a pool. It should also be noted that IIT charges one of the highest tuition rates in the Big Ten area.

Fire

We shall endeavor, in the following week's Tote Board, to point out specific examples to the administration of the athletic facilities available at other institutions of higher learning. We shall also make some interesting engineer-type calculations concerning the type and size of the pool that we, the students, staff, and faculty, deserve.

Stay tuned for the next adventure of "The Great Swimming Pool Fight." Will this article sufficiently arouse the administrator so that they will fill the MC basement? What size pool is the administration holding back from the students? Will this reporter be around next week?

Keglers Defeat Valparaiso For Season's Second Victory

The Illinois Tech bowling team downed Valparaiso University by a score of 4245 to 3919. The second game was not as close, but Tech swept four games to Valparaiso's one. This was Tech's second loss in three matches.

Loyola University at Loyola next Sunday. The meet will be held in...
