670 Students Enter IIT, Begin Orientation Week

Six hundred and seventy students including 470 new freshmen began orientation work on Sunday, with the President's reception at Crown Hall. At the reception the students had their first chance to look at their campus and meet Dr. John T. Retta, President of Illinois Tech, and to take a look at their colleges.

Delta Zeta and AEPi Win Scholarship Honors

Alpha Epsilon Pi won top honors among the fraternities last semester with a grade point average of 2.925. Second was Phi Kappa Sigma, 2.5440; third, Tau Epsilon Phi, 2.4625; fifth, Delta Tau Delta, 2.454; sixth, Phi Kappa Psi, 2.441; seventh, Theta Xi, 2.3936; eighth, Delta Chi, 2.3801; ninth, Delta Lambda Phi, 2.3480; tenth, Triangle, 2.3357; and lastly, Sigma Phi Epsilon.

Spaeth Resigns Veep Post: To Accept Bank Presidency

Raymond J. Spaeth recently announced his resignation as vice-president and treasurer of Illinois Institute of Technology. Upon leaving his position at Illinois Tech on October 1, Spaeth will become president of the Beverly Bank.

President Retta Glastra Greets New and Returning Students

With the undertaking of each new endeavor, best wishes for success are always appropriate. I feel, therefore, that it is fitting at the beginning of the academic year to not only to welcome you in my official capacity as college president, but to extend to you my personal wish for success at Illinois Tech.

Some of you are on our campus for the first time while others returning students. You are all aware that the schedule marked at IIT is of the highest and only the greatest application of study can carry you through successfully. To meet our requirements, I would like to express to you my every encouragement.

I feel, however, that it is incumbent upon me to temper this encouragement with advice, for all the good wishes for your success will be of little value unless you attach them to your own strong desire for and a devotion to your studies. There is no substitute for hard work. If you are not convinced in your chosen field, the accumulation of knowledge in the most formative years of your career the future should certainly be one of your greatest concerns. Study hard and work hard and you will be able to meet the challenge.

As the new semester progresses and you become more familiar with your campus, new students will note that construction is going on in many areas. Returning students will note that new buildings have been created and the construction work that was begun last year is nearing completion. All this is in line with our desire to afford you with the very best in an educational plant. Within the next future, our planned expansion will provide you with the most extensive facilities to enable you to be even more enriched substantively, mentally, and culturally.

It is the dedicated aim of our American educational system to provide a wholesome and nourishing environment that will ensure a steady stream of useful citizens flowing from school into adulthood. It is this intention of IIT to utilize you in this process.

I hope that you will find the coming semester satisfying and profitable to you personally, and, again, welcome to the IIT community.

J. T. Retta, President

Assistant Dean Ackerly Announces Resignation

Robert S. Ackerly recently announced his resignation from the post of assistant dean of students, effective as of August 31.

Ackerly left his position to go to the University of Indiana in Bloomington, Indiana to work leading the degree of doctor of philosophy in the field of education. He will also serve as a counselor to graduate students, helping them with their programs of study and checking requirements for degrees.

Ackerly was at Illinois Tech for approximately two years. He received his bachelor's degree from the College of Wooster in Wooster, Ohio, and his master's degree from Colgate University in Hamilton, New York.

Construction of Illinois Tech's new fraternity quadrangle continues in the foreground. Outlined in the background are four fraternity houses already completed.
Leading With Your Left
Can Prove to Be Costly

United States Senator Allen J. Ellender (D., La.) recently made a statement so
soothing, so softly and politically uncalled for, and so downright sickening
that it made me want to sneeze. On or about August 24, the gentleman from
the South made reference to Trujillo's economic policies in the Dominican
Republic.

He said: "Trujillo's program has been positive; schools have been built
and the economic structure has been diversified. How he got it, I'm not here
to say, but it's good."

The italics are ours. The sentiments Ellender's. We wouldn't begin to worry
about such an outburst except that it reflects the growing avalanche of ultra-
leftism that appears to be overtaking the minds of many of our leaders.
The "philosophy of the stomach" has pervaded many thought processes to
the point where pure material gain can only be seen as a goal for any country's
governmental programs.

Doesn't the Senator know that Rafael Leonidas Trujillo has had the Dominic-
ican Republic under his oppressive thumb since 1930? Doesn't the Senator
know that the Government has permitted no freedom of press or speech or
opposition political parties except for a brief period in 1942, when it could be
openly allowed the Communists to function? Doesn't the Senator know that
the country's one political party, headed by Trujillo, publishes the "regi-
nations" of questionable officials? Doesn't the Senator know that no busi-
ness enterprise can function without Trujillo's official consent?

We're sure the Senator does know these things, and that he knows they are.
We happen to believe that purely physical progress such as Trujillo's in the Car-
ibbean, when it is gained at such a total expense of the freedom of the people,
and the progress is not just at all. It is the worst form of kleagory possible, admitted
discriminatory.

We happen to believe that government
that overly usurps every individual's freedom of choice is a govern-
ment that is totalitarian. As Dr. Paul F. Bokley has stated that ("The silent
economic assumptions of Liberalism..." the "The silent economic assumptions of
Liberalism..." is it not time to wake up and recognize that the eco-

nomics of the United States is now to Point A most speedily by the judicious use of
cartels and price fixing that up-precedes the traditional notion of con-
serative and classical liberals that we are not to begin dealing with capita-
and that Point A cannot possibly, in a free society, be presumed to be the
desired objective of tens of millions of individual human beings."

Technology News agrees; we stand diametrically opposed to the Liberal's
philosophy, for without freedom we are not free to think for ourselves to any project and become a nation of takers. And takers never have much to say in the running of their system.
Radio Station WIIT Receives Equipment

Through the efforts of station manager Harry Joseph, WIIT, Illinois Tech's radio station, received over $3,500 worth of equipment during the summer.

A complete control console valued at over $3,500 was donated by CBS. The console was transported free of charge by the New York Central Lines.

Senior Placement Aid to be Given

Students, who are now in their senior year, may attend a placement orientation Tuesday in Smith-Giaimo Hall sponsored by the placement office.

Early C. Kohleho, director of alumni relations and placement, will tell the students what to expect in a job interview, what to wear, and generally, how to behave.

Offer Scholarships For Graduate Work

Applications will be accepted until November 1, 1960 for graduate or post-doctoral research in 30 countries. General eligibility requirements for both categories of awards are: 1) US citizenship at time of application, 2) a bachelor's degree or its equivalent, 3) knowledge of the language of the host country sufficient to carry out the proposed study project and to communicate with the people of the country, and 4) good health.

Requests for applications must be postmarked before October 15, 1960. The Institute of International Education Chicago office is located at 116 S. Michigan Avenue, Chicago 5, Illinois.

Appoint Ault to Replace Capillo as Housing Mgr.

Harry L. Ault has been appointed manager of housing to succeed Anthony V. Capillo, who resigned on July 15. Ault's appointment became effective on August 1.

Ault attended the University of Chicago and DePaul University, receiving his bachelor degree from DePaul. He has taken graduate work at Northwestern University, and has had a wide range of business experience in advertising, sales promotion and public relations work, particularly with American-Marietta Company and Chrysler Division of Chrysler Corporation. Ault has resided in Bailey Hall since August 1.

Capillo left Illinois Tech to accept a position at Northwestern University similar to his former one. He held the position of manager of housing at Illinois Tech for approximately five years. He holds a bachelor's degree.

Panhellenic Council Holds Tea for Frosh

Illinois Tech's Panhellenic Council held its semi-annual rushe tea Saturday in McCormick Lounge. The purpose of the tea was to introduce incoming girls to the sororities at Illinois Tech.

Doris Beker, president of the Panhellenic Council introduced Miss Josephine Dawson. Miss Dawson, who is the counselor to women students, welcomed the girls to Illinois Tech. The officers of the sororities were also introduced. Three topics were discussed: academic, social, and social life in sororities.

The tea gave incoming girls a chance to meet upperclass women and to discuss rush work. Punch and cookies were served as refreshment.

Kezios Receives National Science Funds for Study

Illinois Institute of Technology has received a grant totaling $41,000 from the National Science Foundation to support basic research on the influence of vibrations on heat transfer.

The two-year program will be under the direction of Mr. Sante Kezios, professor of mechanical engineering and director of ITT's heat transfer laboratory. Assisting Mr. Kezios will be K. V. Prabha, investigator in mechanical engineering, and several graduate students.

Research will include heat transfer from vibrating cylinders and spheres to low turbulence air streams.

First Choice Chevy

Why shouldn't you be driving America's first-choice car right now? You couldn't do better by your family—or your family budget—than to pick out one of Chevy's 18 FRESH-MINTED MODELS, lend up the VACATION-SIZED TRUNK and take off on one of those springtime trips Chevy so dearly loves. Once you're whisking along the highway, cushioned by FULL COIL SPRINGS at all four wheels, you'll have your own smooth-running account of why Chevy's 80's best sellers are in full bloom at your dealer's!

Save—right now—during the Spring Fever Selling Spree at your local authorized Chevrolet dealer's.

It was sad...

when that great ship went down and the last thing to leave the sinking ship was a bottle of Coca-Cola. That's because all hands swam to the lifeboats, but the last thing to leave the ship was the big bottle of Coca-Cola. Man the lifeboats, have a Coca-Cola!

September 15, 1960

Kilpatrick As Chem Resigns Chairman

Dr. Martin Kilpatrick, professor of chemistry and chairman of that department at Illinois Tech since 1947, retired from the faculty on August 31. Immediately upon his retirement, Kilpatrick joined the staff at Argonne National Laboratory as senior chemist emeritus where he will pursue fundamental research.

ASME Meets Today, Tomorrow

The American Society of Mechanical Engineers will hold an Engineering Management Conference today and tomorrow at the Morrison Hotel, 79 W. Madison street. The meeting will begin at 8:00 a.m. and end at 12:00 a.m. The conference is designed to provide an opportunity for engineers to exchange ideas and information on current issues in engineering management.

Danforth Begins Tour And Lecture Series

Professor George E. Danforth, professor of architecture at Illinois Institute of Technology, began a series of European Architectural Seminars in London on September 1, 1960. He will tour through five countries and extend his stay in England for the World Conference of Architects in London on September 9, 1960. Danforth will present the seminar of the International Congress of Architects for Architecture in October in Brussels, Belgium. The seminar will cover the recent developments in architecture, urban design, and the use of new materials.

This seminar will be held in the International Congress of Architects in Brussels, Belgium. The seminar will cover the recent developments in architecture, urban design, and the use of new materials.

Rhodes Scholarship Deadline Set; Winners to Enter Oxford University

Students who are interested in applying for Rhodes Scholarships must have their applications in by November 2, 1960. To be eligible, a candidate must be an American citizen and have completed a minimum of two years of college. The scholarship is available for undergraduate studies at Oxford University and includes tuition, room, board, and a small stipend.

Y. Sickels Offers “Kernel of Advice” to Freshmen

This being the orientation issue, it seems that introductions are in order. Your name you already know (or look in your wallet) and you are hereby invited to say it out loud for our benefit. This column’s name is pronounced “Why Naughty,” which is attributed to “Y So Zero?” or to “Yo!” a slight Germanicism meant to express the broken half of a yo-yo. The “Why Naughty” aphorism has a special meaning that is hard to explain and a pun question you are hereon permitted to use to answer other questions.

Khrushchev Revealed

Early this year this column has considered such topics as “Khrushchev, Our Top Spy,” “Principles for Preparatory Distinction To 17 Grads

Seventeen students graduated with distinction on June 19, 1960 from the Illinois Institute of Technology. In order to receive the honor of graduating from the Illinois Institute of Technology, the student must have maintained a 3.5 grade point average. The honor graduates from Chicago were: George W. Berg, Jr., Elie; Robert F. Powers; Frank; James E. Conkey; ME; Kenneth L. Schuster; Chem; Kenneth W. Chug; EE; Eugene S. Sims; McK; Gerald L. Johnson, Atch; Anna M. Steiner, Phys; Jerry F. Kasich, CE; Gordon A. Wall, Phys; Kenneth J. Miller, Chem; Anne T. Youngblood, LLB.

School for IIT, and “The Day the Professors Smiled.” None of them, however, were related to the subject of this column. Those that do see print dwell briefly on issues of employment and student life. The purpose of this column is to include both scholars and graduate students. If, either of these fails to return this fall, you may apply for the position.

You may further submit suggestions on solutions to problems. You are not, however, a reasonable basis since there has been no comment on them yet. That brings upon an application to the principle. If there is indeed a subject you can use, you might try preserving it from print by suggesting it as a topic. If that does not work, you could put a note in the letter column or ask a pin on the Technology News staff, an uphill battle at best, but, with a form of fascination where usually no money changes hands.

If you are not on receiving valve for money, you may try saving time for this issue or giving up on the next one. Ads with lots of black, white, or most impressive, a real sport could create pins to save your effort on an easy issue as a matter for his initials on the back panel, or for his full name if he can’t be solvable.

Take Our Advice

Your friendly orientation advisor has now given you some recommended do’s and don’ts for Technology Center. Let us add a few kernels of advice from our storehouse of miscellaneous and based partially on the sad experience of our lamented predecessor.

1) Do not paint IIT buildings or paint any of blue or red with the exception of the upper portion of the building, the colors are not considered suitable.
2) Do not carry a backpack big enough to touch the ceiling. The colors are not considered distinctive.
3) Do not attempt to rectify the inverted white or blue with the exception of the upper portion of the building. The colors are not considered distinctive.
4) Do not attempt to rectify the inverted white or blue with the exception of the upper portion of the building. The colors are not considered distinctive.

Tech Takes Second In Tourney

The Tote Board
by George Boris and Jim Kirlin

Freshman Beware
Reading this column could become a habit-forming, despite the fact it contains no barbiturates, narcotics, bromides, or wonder drugs. Its only active ingredient are the words of two witty, intelligent, goodlooking, well versed, and informed sports writers. If after reading this you feel that we are not witty, intelligent, good looking, etc., please feel free to write. Our business address is 2317 East 33rd Street. We've got the coolest, quietest office available, and we only have to come up for air every twenty minutes. At this point we stop for a word from our sponsors.

Sports

The sports outlook on our campus is very good this fall. In all pressure polls our football team has been ranked in the top ten. Doctor George Trotter's most recent survey among big ten football coaches shows that nine out of ten prefer football. Unfortunately or fortunately, as the case may be, Tech does not have a football team.

Aside from football, Tech participates in all collegiate varsity sports. Cross country is the biggest sport in the fall. Look for more information on this and other sports coming up in subsequent issues of the paper. We guarantee nothing but you may look anyway.

Same Old Story

With work nearing completion on our new athletic field the future looks bright for track, cross country and baseball. However, the basketball team is still forced to play in one of our temporary permanent spots. It's time on campus. Although the team's record was only 7 and 14, we nevertheless had an outstanding player in the person of John Olin. Olin was nominated to Who's Who in College Basketball.

The Wrestling team, despite their lack of facilities, has a 6-2-1 record for the past season. At present the wrestling team is sole possessor of a small corner of the valley ball courts. A big part of their success consists of rolling and unravelling the minds that they practice on. Perhaps the team with the greatest handicap was the swimming team. Their on campus workouts consisted of navigating mud puddles on their way to classes. Otherwise they have to find transportation to the Valentine Boy's club on the south side of town.

As one of our many public services to the sports department on campus we have been asked to issue the following special bulletin....

WANTED
Rebecca Gonzalez
Alias: IIT Swimming Coach
For embalment of one 1960 swimming schedule. If you have any information as to his whereabouts contact Sonny Weissman or Technology News. This man is considered dangerous since he is armed with a swimming schedule.

Do not attempt to apprehend with force but contact the above sources immediately.

As our last 20 minutes of air runs out we find ourselves suddenly only to be mobbed by a cheering throng of admirers. While we don't know what we've done to deserve this wild ovation we feel that it warrants a repeat performance next year. If you too wish to join in on the spotlight please drop by the Technology News office and leave your name and telephone number. We urgently need sports writers. Just think, your name in print.

For My Next Trick

Lewis Wins Final 10-1
by George Boris

Tech's diamond squad went into the 1960 baseball tournament ranked third or fourth place. After the first game with Chicago Teacher's College a third or fourth was guaranteed. Lead by the hitting of Dick Byrne and "Casey" Hilvers and the pitching of Dave McGuire and Ed Fendel, the team scored 13 runs to beat CTC 13-2. The game became a romp for Tech when Hilvers hit a grand slam homer in the second inning.

McGuire hurled a two-hitter in the semifinals Tech won against University of Chicago, a team that had beaten us once before. Dave McGuire hurled a two-hitter against them to give us an 8-0 victory. The first inning of the game saw Tech take a 5-0 run lead when Hilvers hit another grand slam home run.

The next three innings saw only one run for Tech and only one for Chicago. Chicago tied the game in the big third inning. A series of hits by Maas and Keller scored four runs and a second grand slam homer by Hilvers gave us the third base for the third time in 10-0. Victory seemed sure.

Four Score
The eighth inning saw Tech run four more runs across the plate to boost the score to 18-0. As the ninth inning began, Tom and Mike Maciel were unanimously the heroes of the day.

In the championship game against Lewis College, a team Tech hadn't played in this season, the powers of the field were to be used up. The Lewis pitcher faced only two batters. On that the Mosie led the only run for Tech when he hit a home run in the second inning.

Error Hunt
The story of the game can be seen in the score column which was the only place Tech outscores Lewis. 8-0. With 45 men facing pitchers McGuire and Fendel, none of them hit anything longer than a double.

Thus the Tech team went down to defeats 10-1 but still finished in second place, higher than expected. Next season the team hopes to find that first place spot despite the loss of Bob Hilvers through graduation.

Honor I Plans 1960-61 Season
Last spring Honor I held the ground work for what it hopes will be the most successful year on the Illinois Tech Campus. Its annual awards banquet. Now officers were elected, with Mike Wayne president. During the course of the banquet 34 major letters were awarded for participation in all varsity sports. To round out the awards 10 minor letters were also awarded.

Their goals for the 1960-61 school year are to increase spectator attendance at the various sports events, and to have the biggest and best Homecoming game ever held on this campus. With their increased membership Wayne feels that these goals are attainable.

Smerps Down King's Men In Spring Softball Final
JF sports director, Ed Glassy has announced the results of the 1960 IM softball competition. The Smerps took the crown by handing the King's Men a 12-9 defeat in the final playoff. In reaching the playoffs the Smerps downed the IE Knut Olum, last year's winners, 18-8. The Kings Men are expected to be back in the mix for the second year in a row.
