Voters to Choose ITSA Officers

Cast Ballots Thursday and Friday

Elections to determine representation on the Illinois Tech Student Association Board of Control will be held Thursday and Friday. Eight positions will be decided for the next year.

A new feature of this election is the choice of an assistant treasurer who will automatically become the present treasurer when his term of office is completed. Treasurer for the ITSA will not be elected under the procedure which was instituted.

Schedule Test

At noon on the ITSA elections may take the ITSA board members test on December 6 at 12:30 in 11C. Students may read the test in the dean of students office before it is administered. Campaign publicity may be posted any time after midnight Sunday.

by a referendum vote held two weeks ago.

Three engineering representatives, one electrical student, one computer science student, and one non-social science student, will be chosen by the student body.

1961 Ford Galaxie to Go To Tehawk at Pep Rally

Illinois Tech's first home game of the basketball season will be highlighted by the presentation of a new 1961 Ford Galaxie model to some lucky Techhawk during half-time ceremonies.

This drawing will be the highest point of Illinois Tech's annual pep rally on Tuesday, December 6.

To be eligible, Tech students should enter receipts obtained on Monday, December 5, or Tuesday, December 6, from either the SU cafeteria or the Commons bookstore. Write your name and address on the back of the receipt and deposit it in the box provided for them in the SU lobby. A person may enter as many times as he wants, but must be present to win.

The rally will start at 5:15 p.m. with the showing of three Walt Disney film shorts in the Chemistry auditorium.

The annual faculty-student basketball game will be held after the showing of the film. The faculty team will consist of Bill Halton, captain; Bob “Give 'em Hell” Estin; G. J. Ballinger; B. M. “I’ness” Bushiker; Nelson R. Godfrey; Curtis Connie Goforth; Keller Krupp; Fireball McKeon; and Carl May. The referees will be two coeds: Jan Bales and Martha Kappes.

At 6:45, the pep rally will be held on the field south of the residence halls. A bonfire, built by the freshmen, will be the backdrop as the basketball team is introduced. Refreshments will be served.

The Illinois Tech versus Chicago Teachers College game will begin at 8 p.m., with the drawing at halftime.

Pick Lynn Sorci Queen Of 1960 Integral Ball

Lynn Sorci, a student at the University of Chicago, was crowned 1960 Integral Ball Queen on Saturday, November 19, in the Grand Ballroom of the Palmer House. She was escorted to the 1-Ball by Dave Hollinger of Delta Tau Delta.

Sorci, a representative from Patrick V. T. V., is a representative from the Chicago Daily News. She is the daughter of Mr. and Mrs. J. V. T. V. She is a member of the Chi Psi Fraternity and the University of Chicago Literary Society.

Josh White to Entertain Tech in Union Saturday

Josh White, folk-singer of the American Negro tradition for more than 30 years, will sing in the Student Union Saturday evening.

White, who played the guitar and sang the songs of the blues and spirituals, has toured Europe several times and has cut many records.

Two of his recent records include “Josh at Midnight” and “Chain Gang Songs.” Several of his songs that depict life of the American Negro are “One Meatball” and “Strawberry Wine.” These are the colors of the Negro.
Call Christian Poor Selection For Otherwise Excellent I-Ball

Integral Ball, model 1960, was a well-planned, excellently Managed event. Then why bother to write an editorial about it? Because the band was enough of a disappointment to construct anything good we might be able to say about the dance as a whole.

We feel that Bobby Christian might have been an excellent choice for a high school prom; however, the type of music which was heard at the I-Ball is not what could be considered typically appealing to a college group. Comments on the music ranged from "indescribable" in some quarters to "unbearable" in others. The choice of the band was unfortunate, but was not entirely at the discretion of the social chairman and/or his committee. Larry Eager was originally contracted for the ball, but dropped by his New York agent—we presume that he was waiting for something better before confronting—necessary revenue generation. This points up a maneuver which may be used by an agent to protect himself, to a certain extent, while putting his client on "the spot."

Let's hope this latter lesson is not lost on whoever serves as social chairman from the morsels of the forthcoming TSEA elections.

Galbraith's 'Liberal Hour' Strikes Discordant Note

by Larry

Harvard Economist John Kenneth Galbraith proposes, in his latest book, The Liberal Hour, to halt inflation by some very special if not all-satisfying means. Risking over-simplification, we state his position as follows.

Galbraith accepts as the proposition that high employment is necessary for a healthy and growing economy. During periods of relatively low employment, the "concentrated industries" (steel, machinery, automobiles, pulp and paper, rubber, tobacco, beverages) are sufficiently monopolistic to raise prices at will. This contributes to general inflation.

Monetary and fiscal policy, he continues, are ineffective weapons against this seemingly infinite chain of price-wage-price effects because these policies can, at the very best, restrain only the general demand throughout the country. Construction of general or specific demand will cause unemployment and cutback in the concentrated industries. This is inconsistent with the targeted goal of full employment.

Solving the problem without breaking up "large corporations and unions would involve..." Galbraith maintains, in procedures to keep wage and price-setting industries from being inflationary. This would most efficiently be done by intervention from the purview of price policies of the industries in question.

He talks of "restraints" and "self-regulation" instead of out-and-out controls. Never does he seek to curtail the growth of one, or two, or thirty, or more, but to point the way when the federal government begins to control not only the concentrated industries, but the state-consolidated ones as well. Once the principle of permanent price control begins to take hold nothing short of a freeze is averted.

Perhaps monetary and, fiscal policies will have to be used selectively, or some arrangement may have to be worked out, but price controls are definitely not within the rules of the game.

As I See It

Overlook Real Advantage Of Revising Electoral College

by Dale

It is rather interesting to speculate on the outcome of the present Presidential election had the Mondale-Cordt system of selecting electors been enacted before the balloting. Under this plan, which will be proposed at the thirty-seventh national congres of each Congressional district would have one electoral vote, the state at large would have two electoral votes, a system which in effect would be the same as the present method of electing representatives to Congress. With such an electoral plan enacted, Nixon would have received 257 electoral votes compared to 250 for Kennedy.

A point which hasn't received too much emphasis is that a similar bill was introduced in the Senate a few years before the recent election and defeated. As if detracting the effect that it might have, Kennedy was one of its main opponents to the proposal, stating, "When there is no need for change then there is need for no change."

Advantages of the plan have been pretty well hashed over in the newspaper articles discussing it, needless to say, most of the discussion has been by pro-NewDemocrats. Primarily the cited advantages is that the election would closer stimulate the election of a candidate that is the popular choice of the people. On the basis of popular vote I would have to say the present system was adequate. Here is where I feel the real advantage lies. Under the Mondale-Cordt proposal, eight of the presently unpledged electors would have gone to Kennedy, thus greatly reducing the Southern states' bargaining power if the unlikely event of neither candidate receiving a majority of votes should occur. I don't believe that such a majority of the population would yield such a great influence as they could in determining our national policy.
Have a real cigarette—have a CAMEL

The best tobacco makes the best smoke!

Firemen Douse Blaze
After Explosion Scare

Ten pumpers, three hook-and-ladders and two of Chicago's three streetcars unite to respond to a 2-11 alarm fire in the recently vacated Chemical Research Building of the Armour Research Foundation at the corner of Thirty-third and State streets on November 22.

The fire was reported to have started in a batch of old chemicals that were being collected for disposal. The fire spread through the rafters in the building destroying the equivalent of two rooms. Firemen did not immediately close the fire with water fearing that there might be dangerously active chemicals present. However, after receiving assurances from the employees who were collecting the chemicals that none were about, they extinguished the blaze in half an hour.

There were seven people in the building at the time of the fire but all escaped safely. The Chemical Research Department had just completed moving to its new quarters on the corner of Thirty-fifth and Dearborn streets. Illinois Tech's fire protection engineers aided by carrying hoses and breaking windows.

Appoint Phillips Techno-Economy Director at ARF

George Philips, research director since February at the Armour Research Foundation, has been promoted to assistant director of technical-economics. Philips received his masters from M.I.T. before he joined ARF as an analyst in 1955. He is now working for his Ph.D. at Illinois Tech where he serves as a part-time teacher in the industrial engineering department.
Design Institute Plans Creasman Art Showing
A special showing of Gordon Martin's collection of the works of Ralph Creasman, Chicago designer and illustrator, will be held for three weeks starting December 12, in the type shop, room 106, Cywes Hall, and will be open to the general public.

ITSA Gives Who's Who Keys Away
Seniors nominated to "Who's Who among students in American Universities and Colleges" will be contacted personally next week by the finance committee of ITSA, about ordering the Who's Who keys.

Each nominee is requested to have the key order blank filled out and pay the $1.50 on the keys. ITSA has agreed to buy the $10 keys for each nominee.

The thirty nominees from Illinois Tech were chosen by the Who's Who committee of ITSA.

Harmonic shakedown for cars
The "vehicle shaker," pictured above, helps General Motors engineers investigate harmonic vibration, roll, and dynamic ride properties of an instrument car. Through electronics, researchers are able to measure accurately the resonant frequencies of a car's major components, and actually plot elastic deflection curves and phase relationships to improve car structure.

To the young mind willing to tackle the problems of modern technology, General Motors offers unlimited opportunity in a vast number of scientific and engineering fields—automotive research, production engineering, and manufacturing, electronics and astronautics, to name a few.

GM's many and varied divisions throughout the country present employment opportunities to thousands. Talents is recognized and rewarded, and your own ability is the only restriction on your rate of progress. In addition, GM's experience and diversification create a favorable climate for your growth.

GM also offers financial aid for postgraduate and undergraduate studies. For more information see your college Placement Officer, or write to General Motors Scholarship Personnel Staff, Detroit 3, Michigan.

Appoint 3 New Members To ITSA Publications Board
Don Heinemann, CHE 3, William Coleman, LLB 5, and James Dale, Eng-Soc 3, were appointed the three new members of publications board for next semester, by the ITSA board of control Wednesday to serve for three semesters on this standing committee. This Board has jurisdiction over Tech News, Listeners.

Fraternities to Compete In Pageant December 10
Nine of Illinois Tech's fraternities will compete for the annual skull trophy as part of the Inter-Fraternity Pageant on December 10 in the Student Union Auditorium at 8 p.m.

Each fraternity is given ten minutes to perform its skit. The judges grade each skit on qualities such as originality and effectiveness.

Two of the judges are Professor Danforth of the architecture department and LLP Instructor Norman Walker.

The Panhellenic Council will present a non-competitive skit and the scholarship trophy for the previous year will be awarded.

A group of non-student Tech Center personnel will possibly also present a one act comedy.

All set to play Santa Claus?

What you need is a red mug, white beard, fat pillow, and a pack full of Esterbrook Clisette Pen and Postel Sets. You can be anyone's favorite Santa if you give the smoothest-looking, smoothest-writing Christmas gift this side of the North Pole. Your choice of holiday colors and 32 changeable pen points, too.
Sickels Revives Contest, Offers Cash Prize

This week we attempt to divert your holiday-bound attention once more to the 17th annual Bunch of Blanks Contest. It may seem an egotistical act by the newspaper staff that we solicit our gentle readers at such length for their opinions of our weekly outpourings. This is manifestly not so, since their sincere opinions are manifestly not sought. No more so, at least. We suspect the first batch of answers constituted the sincerity bit. This suspicion arose through a process of elimination; i.e., mostly they weren't long on humor, knowledge, or patriotism. Not that we object to sincere contributions, though we do feel that the authors could more profitably send them to the Readers Digest or Ladies Home Journal where they are a stock in trade.

The thing is that, by the nature of the replies in the second batch, we felt that even the sincerity was running low. What remains next, perhaps, is motherhood, which is not relatively appropriate a subject for a paper or student body. So why try again?

Offer Prize

Technology News will award a $5 first prize to the entry received before December 15, which is judged by the editorial board to be the most original and humorous.

In one casual gathering following the last effort, one of the eight students present pledged himself to a reply if we would mount another contest trial. This was, I am happy to say, in, by estimation, for the eighth part of all your other casual gatherings.

To serve as a guide to one approach that we'd like to see more of, another staff member prepared some sample replies, written in a different language, to illustrate:

Have You Ever Attended A Free Christian Science Lecture?

"CHRISTIAN SCIENCE: THE SCIENCE OF THE TEACHINGS OF CHRIST JESUS" is the title of a lecture to be given by FLORENCE MIDDAGH, C. S. B.

of Los Angeles, California

Friday Evening, December 9, 1940 at 8 o'clock, in Orchestra Hall, 216 S. Michigan Avenue, Chicago.

Sponsored by Seventeenth Church of Christ, Scientist, Chicago

The speaker is a member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

STUDENTS ARE CORDIALLY INVITED TO VISIT OUR SUNDAY SCHOOL WHICH CONVENES AT 11 O'CLOCK SUNDAY MORNING IN ORCHESTRA HALL.

WE WELCOME YOU

Elementary...

Y. Tech News is a bunch of.

Y. I hadn't appreciated Tech News until.

Y. Tech News appeals to.

Y. When will Tech News.

Y. Tech News could use some.

Y. I find Tech News generally satisfactory, considering the limitations under which it operates.

Gas Technology, b) Sam Shakespeare, P. B., c) Thomas Bower (act your English instructor), L.L.P.

Now on that with one we took a. Then we don't expect you to take, signing false signatures. If you think your replies may merit publication—and what writer doesn't—it would probably behoove you to sign your own name rather than that of your worst enemy, real or idealized.

Some thought is being given to prizes. One suggestion was that of offering a free round trip to anywhere in Chicago that is served by CTA, but the idea Ameriyen National against cruel and unusual punishment for more exercising of the right to free speech and the suggestion subsequently asked that his name be withheld. Other prizes considered include fame and fortune through a published picture and/or cash money. Prior entries have been saved and will still be considered, as these authors satisfied with their previous entries—is quite the custom above—may rest content.

Perhaps the ultimate reason you should fill out your entry blanks, elsewhere in this tower, and stuff them in the Tech News office door slot, 2nd floor of SU, is a matter of tradition. As we know, traditions are few at Illinois Tech. Do you want historians to note that the bunch of blanks contest reached its 16th year because of you? Traditions die hard, but you're helping.
Candidates to Vie for ITSA Positions

The ITSA board of central control is organizing for the students; however, in the past when someone was elected to the office, he usually forgot that he had a responsibility to those students whom he represents. This will not be the case with me. I will devote all my efforts to those students whom I will represent.

Jim Macdonald

I feel that since this is a new office it would be best to have someone with the experience necessary to work out the difficulties that will arise. A completely inexperienced person will just be a burden, which is exactly the situation this office is designated to alleviate. I feel the necessary experience as I have served for five semesters on the business staff of Tech News and three more of which holding the position of Business Manager of Tech News, the office that is closest to ITSA treasurer.

Engineering Rep.

Dan Buckman

As one of the Engineering Representatives I feel that my main concern would be to do my best to help the ITSA Board and the student, the engineering student in particular. For example, I would suggest that the activities of campus organizations on central bulletin boards to interest students who are at present, don't have a good idea of what this organization does.

William Miller

Met E 3

I feel that there is a definite lack of communication between the students and the ITSA. Students are not aware of what ITSA can do for them. Also, there is an adequate number of representatives between students and their representatives.

If I am elected, I will initiate a practice of informing the student council of the actions of ITSA, and the issues before the board by means of a periodical newsletter.

Bill Jensen

As an engineering student at Tech, I am interested in the welfare of the student body. I feel that I can best serve the student body by being on the ITSA board and working closely with the student council.

Arch-ID Rep.

Sont Austin

Arch. 5

I feel that the ITSA board of central control should be reorganized; that the ITSA students be made to contribute to the board; that the ITSA board of central control should have the final say in matters that concern the students. I feel that the ITSA board of central control should be more democratic and that the students be given a voice in matters that concern their welfare.

In School Election Thursday and Friday

Don Wanke
DE 5
GPA 2.4
Rep. of the Liberal Studies Department. Has been negatively suggested. If you elect me, I intend to use the hallways, in the main building, to notify students of pertinent issues before the board.

Ind. Dorm Rep.
Ed Kuske
CA 5
GPA 2.6
S.A. freshman class vp, and member of Student Activities, IIT track team, Dorm Council.

Commuter Rep.
No Candidate

President, 1964
Ron Essay
FH 1
Freshman of IIT, allow me to introduce myself. My name is Ron Essay and I am candidate for the office of freshman class president. This year I have been a member of the IITSA Elections Commission. This position has given me an inside view of the problems at IIT.

Bob Hamlett
I am probably better known on campus as "Whitkoff" or "Kamz". We as freshmen need to become better acquainted with each other by a series of freshmen events, such as a "kickoff" party for second semester, all-school dance and a picnic. I will try to represent the freshmen class as fairly and as competently as possible if I am elected.

Mike Jackowski
EE 1
The freshman class as present, is not really recognized as an organized group. Unity is lacking. What we need is someone who will bring the freshmen together, and act as spokesman for our class. I intend to attend to these problems with a program of meetings, social events, and other activities. Until now, freshmen have not been heard. We have a voice; let's use it! Activities: Tech News; I.T.; Glee Club.

Vice-Pres. 1964
Michael Dunn

Having served as president of my pledge class and having been an active member of the Pledge Interfraternity Council, I believe I'd have attained enough experience in student government at IIT to qualify me for the office of vice-president of the freshman class. If I am elected I will continue to use my experience in student government to work for the good of the freshmen class.

Fred Welh
My name is Fred Welh, I am running for freshman class vice-president. The vice-president must be a person who is willing to devote considerable time and energy to his job. I believe I am the man for the office. I have had experience in other organizations with this type of job and I know that I can handle the job. I will make up your promise, and keep your promise only, to you. If elected, I will work hard for your best interest.

Treasurer, 1964
Edward Botkowski
Ken Haufl
Our freshmen class wants to elect a treasurer. If you want a man who will try to use your money to benefit each one of you, sorority girl, dorm student, freshman or commuter, I believe that I can very well represent you. As an ex-high school treasurer and current treasurer of my fraternity pledge class, I believe I have the required skill. Elect me, Ken Haufl, as freshman treasurer, and watch my efforts transform your funds into your desires.

Secretary, 1964
Carol Gross
May I introduce myself, I am presently serving on the Freshman Board, one of the few segments of school government that accomplished more than was expected of it. I hope to continue in class government as secretary of our class. My experience should be useful in a group of relatively inexperienced officers.

Sandy James
June Soc. Chmn.
Joni Duplessis
Duke Coleman

Placement Schedule

Monday
1. North American, Bellingham
2. J. L. Cooper, Dallas
3. W. H. Gage, Chicago

Tuesday
1. South Central, Memphis
2. J. E. M., Chicago
3. Central, Houston

Wednesday
1. General, Chicago
2. Southern, New York
3. W. H. Gage, Chicago

Thursday
1. Western, Denver
2. W. H. Gage, Chicago
3. Southern, New York

"Our number one aim is to have in all management jobs the most able, intelligent, positive and imaginative man we can possibly find."

C. E.s Down Double Uglies 6-0 In I-M Championship Game

On Tuesday, November 17, the C. E.s defeated the Double Uglies to take the I-M touch football championship. The C. E.s, who finished the regular season in second place in their league, won by the close margin of 7-0. The lone tally was set when the C. E.s intercepted and ran back to the 15 yard line. An end run put the ball on the 5 yard line and, on two plays, passed to Olsen along with a successful conversion made the score 7-0.

In the second half the Double Uglies threatened to score on a pass intercepted by Sciosci on his own goal line. He then preceded to run the ball back to midfield. The Double Uglies worked the ball down to the 15 yard line where they lost possession on downs as a Sciosci to Weissbrot pass was broken up in the end zone.

Competition was slowed down considerably by poor weather and a muddy field. The Double Uglies were characterized by fine defensive plays of both teams; they completed only three passes each. Fine punting and rugged line play kept the score low.

Pigskin Contest

A pigskin contest for the year was won by William F. Dix who guessed all the games correctly. Ron Smith of 312 S. Michigan was second with his only miss being the Illinois-Northwestern game. He predicted a tie and, of course, Northwestern won.

Pigskin Contest

Draws To Close

Pigskin Prophet's last contest for the year was won by William F. Dix who guessed all the games correctly. Ron Smith of 312 S. Michigan was second with his only miss being the Illinois-Northwestern game. He predicted a tie and, of course, Northwestern won.

Tech Wrestlers Tie Wheaton in First Meet of Season

Illinois Tech's wrestling team opened the 1960-61 season by managing to tie with a strong Wheaton College team. The meet was decided against the Engineers.

In the last bout Tom Stone and Jim Whitmore of Wheaton went in the match. The Engineers won by a 1-0 score. Both teams are expected to win the next meet.
