Lives Endangered By Junior Formal

The American Youth News has completed a survey to determine the possibilities of injuries and fatalities that may occur as a result of the parking conditions in the present formal meet. In the course of warmer weather, the title may be expected to increase, and will be growing the greatest frequency. When cars are parked on or one side of the street, it is impossible for a pedestrian to cross safely until he is well clear of the street.

As everyone knows, both sides of every street are too dangerous for pedestrian traffic to exist on the street.

A recent survey in preparation of the formal meet will show when most of the cars are on the far side of the street.

The worst danger spot is all in Thirty-third Street at the corner of the formal meet, where it is expected that a large number of cars will be parked.

The news found that all the cars parked in the vicinity of the street may be expected to continue the trend of the main road.

As a result of this survey, the police are working to clear the streets of cars.

**Schools Offer Graduate Fellowships**

Many schools offer graduate fellowships to students who are interested in pursuing advanced studies. These fellowships are available in various disciplines and can provide financial assistance to support the student's academic pursuits. For more information, students are encouraged to contact their respective institutions.

**ARL News**

Extra! Extra! The provosts and administrators of universities and colleges are becoming more outspoken in their criticism of the ever-increasing costs of higher education. The trend is raising concern among students and parents, who are questioning the value of their investments in higher education. The following points summarize the key issues:

1. **Rising Costs:** The cost of higher education continues to rise, making it increasingly accessible for many students. This trend is prompting calls for a more transparent and accountable system to ensure that funds are being used effectively.

2. **Quality of Education:** There are concerns about the quality of education being provided by some institutions. Some students report feeling overworked and underprepared for the workforce, leading to calls for improvements in the curriculum and teaching methods.

3. **Student Debt:** The burden of student debt is growing, with many students facing significant financial challenges. This is prompting calls for reforms in student loan programs to make higher education more affordable.

4. **Accessibility:** Access to higher education is becoming more limited, with some students facing barriers to enrollment due to financial, geographic, or personal circumstances.

5. **Accountability:** There is a need for increased accountability and transparency in how institutions are using their resources. This is prompting calls for more effective mechanisms to monitor and evaluate institutional performance.

For more information on these and other issues, students and parents are encouraged to contact their respective institutions and advocate for change.

Chemicals See The Race on Nitrocellulose

Nitrocellulose proved to be a fascinating topic to those who attended the symposium on this subject held at 11:30 a.m. in Science Hall.

The symposium was sponsored by the Chemical Manufacturers Association, and was attended by about 400 people.

A series of lectures was presented, each followed by a question-and-answer period.

The symposium was well attended, and the discussions were lively and informative.

The Chemical Manufacturers Association is an organization devoted to the advancement of the chemical industry.

Reviews

Swimming Elects Captain

Conservatory for the hot season of skiing at Blue Ridge has registered 100 men and women in the swimming section of the club.

The first meeting of the season will be held on Tuesday night, with a demonstration of the various swimming techniques.

The Swimming Section is under the direction of Coach J. S. Brown, who has been selected for the position.

Doctor Freundberg Will Address Chemists

The subject of the regular meeting of the American Chemical Society will be "The City Club of Los Angeles." The speaker is to be Mr. D. P. Freeman, the well-known chemist of Los Angeles.

Also, the presentation of the newly elected officers of the Los Angeles branch of the ACS will be made.

Armour Represented at Parade Meeting

(Continued from page 1)

The Armour company is represented at the parade by a large float which bears the name of the firm.

The float is decorated with a large display of Armour products, and is pulled by a team of horses.

Armour will also be represented in the parade by a group of boys carrying the company's logo.

The parade is expected to attract a large crowd, and the Armour float is sure to be a hit.

Every Package Now a Humidor

Camel's milk is used to make cheese in Canada. In Canadian cheese, the milk that leaves the factory is now wrapped in moisture-proof, airtight Celophane which acts as a barrier and keeps the natural moisture in.

Papery tobacco dust and harsh moistures-eared tobacco are what sting the tongue and burn the throat. Thanks to our patented vacuum cleaning apparatus, we can capture every particle.

Pack everywhere, everywhere, you can enjoy the Camel blend of fine Turkish and mellows. Domestic tobaccos in prime, fresh condition.

Switch to Camel today! Then leave them tomorrow, if you can.

CAMELS

Factory-fresh CAMELS are advertised in the new Camel ad campaign! Buy the Camel brand. It keeps the dust and pure tobacco to the flavor.
Many Schools to Compete in Armour's Second Annual Track Meet at Stagg Field

Teams From Universities Throughout Middle West Will Be Represented

Old Records May Be Broken

On Saturday, May 8, at 2:00 P.M., Armour will present the Second Annual Armour Outdoor Invitational Meet at Stagg Field. This meet will bring together some 3000 points from various colleges and universities throughout the Middle West who will run, jump, and throw things for the glory of their revered Alma Mater. At least 30 institutions of higher learning are expected to represent.

The University of Chicago, Loyola, Crewe, Chicago Normal, Lake Forest, Lawrenceville, Princeton, Le Moyne, DePaul, Trinity, Marquette, and others have already signified their intention of competing and several more schools will, no doubt, be on hand.

The first heat will begin at 2:00 P.M. and the program will continue until 6:00 P.M., at which time the last event will begin.

The meet will be conducted under the rules of the Intercollegiate Association of Amateur Athletics of America. Official judges will be present.

Advise Will Be Broken

Judging the number of times many fast ones should be turned in and the number of times many fast ones should be broken will of course be left to the discretion of the respective schools.

And while we're on the subject of records, Armour is in a contest with many other institutions to present the finest teams and their holders. The first heat will be broken by the Armour student, Don P. Hall, who will present his record in a list of 3000 points in track and field events.

While we are still on the subject of records and rules, the meet should stand one chance for an interesting contest.

Taylor Expected to Compete

This year, the record holder in all of the above-named events at Taylor College is Jack E. Taylor, who won both the 100 and 220 yard dashes, the broad jump, the high jump, and the discus. Taylor will be expected to set new records in all of these events.

Baseball Squad Has Two Games For This Week

Coach Kraft and his fellow baseball players will be keeping up the spirit of battle in their next two meets, which are scheduled for this week. The bottlers of Lake Forest and Armour College will be the competitors.

Armour finished seventh in the conference and is expected to be in the top ten again this year. All of the other teams have performed better, but Armour is expected to make up for it by the strength of their individual players.

Senior Chemists Win

Two students from the Junior and Senior Chemists last week received the Elgin Chemists' Club Award for the best freshman and sophomore in the field of chemistry. The awards were presented by the Chemists' Club to the students, who showed great promise in their studies.

The second student, who was not named, won the Elgin Chemists' Club Award for the best freshman in the field of chemistry. The award was presented by the Chemists' Club to the student, who showed great promise in his studies.
