Artistic Chemical Wins Distinction

The muchcoveted Scholastic-Chem-
ical Alumnae Award was won this year
by Mrs. H. M. Davis, a representative
of the Textile Institute of America, and
with her acceptance of the award she
came closer to gaining the highest honor
in the world of chemistry. The award,
which has been given annually since 1923,
is presented to the student who has made
the most outstanding contribution to
the chemistry of textiles.

Dr. H. M. Davis received her degree
in chemistry from the University of
Georgia and later studied at the Uni-
college of Food Science and Technology.

The telephone has a big place in the daily lives of most people today, but its place will be even bigger tomorrow.

In importance it has been fostered by the work of men in all places of the telephone business and little part has been taken by those engaged in selling.

They have helped to effect an increase of more than three and a half million Bell telephones in the last five years. In the same period their work has been justly recognized in making the public realize more completely the telephone’s usefulness.

Recently an increase from 49,000,000 calls per day to nearly 60,000,000 has been announced.

Men with a leaning toward sales promotion will always play an important part in Bell System growth.
