Everyone Vote In ITSA's Elections Next Wed., Thurs.

Elections for ITSA offices will be held Wednesday and Thursday, Nov. 18 and 19. Voting booths will be set up in the HUB, residence halls, and the FI Palladium. The voting will last from 10 a.m. to 2 p.m. on both days and will be based on the usual preferential system. "Placing voting booths in the dorms and in the fraternity quadrangle is an attempt to increase voter participation, which is generally low," commented a very important member of the ITSA election committee.

Armin is ITT's Delegate to NIFC

Don Armin is, president of the Interfraternity Council and member of Phi Sigma Sigma, represented ITT at the 13th annual meeting of the National Intramural Council in New York City, Dec. 5-7.

Queen Jean Nelson, Court

Prestige Over Homecoming

Queen Jean Nelson, center, as she was crowned Friday, Her crown is left to right: Swisher, Bissel, Peters, Matheson, hope to see a larger vote turn out.

All offices except those of the Freshman class have a one-year term. Freshman offices are held for one semester.

Candidates for all offices to be elected are listed in this issue. All ITSA board of control position candidates have their pictures and statements of policy included. The presidential candidates submitted 500 word statements the other candidates submitted 200 word statements.

The selected candidate recommendations from the BPA Government Associations and the Illinois Tech Consumers Association are also included in this issue. These organizations use similar criteria to determine which candidates they recommend.

Says Mike Dunn, "BON, as in the past, based its recommendation on the candidates qualifications for office. This year, BON is not announcing its decisions to the students because sources claim they cannot reach a decision.

According to Mike Rickson, vice president of BPA, and Ray Beier, president of ITCA, both organizations simultaneously interview each individual candidate and then the two groups decide separately on the persons they will recommend. These two groups also look for competence, experience, and future plans of the candidates.

Homecoming this year has received nothing but compliments," commented Morry King, co-chairman of the weekend. "And I, personally, was very pleased with the turnout, decorations and cooperation I received."

Ed Varela, also Homecoming co-chairman, added, "it was only disappointed by the amount of alumni support shown, and by the lack of a dorm football team, causing the scheduled fraternity darm games to be canceled.

The weekend, which included the ITT-Chicago Teachers College basketball game as well as Saturday night's dance and color show, was attended by an estimated 1,000 people, including alumni, students, and guests.

The highlight of Friday night's activities was the crowning of Jean Nelson (Arch 1) in Homecoming queen.

Amidst drums and Chinese Jumps, Jean received the sash and a diamond homecoming crown, and was presented with flowers and a bracelet to commemorate the event. The basketball, barn dance, immediately followed the ceremony.

Saturday night's Homecoming Dance, took place in the orientally decorated cafeteria to the music of Woody Herman and his Orchestra. Side attractions of the dance included a parade of Karamazian and Kunzlin in the undies, a midnight overstocking the dance floor.
Gym Inadequacy Apparent
Players, Spectators Hurt
by Rich Healy, Sports Editor

I hate to kick a dead horse, but I will anyway. The homecoming game last Friday night certainly pointed out the inadequacy of IIT's gymnasium.

I would like to offer some explanations for this surprising statistic. Fact number one is that over 450 people were turned away from the gymnasium due to lack of space—not just lack of seating but lack of any space at all. Many of these people who were turned away will probably not come again. Thus, Tech sports which certainly can't afford to lose any supporter will lose fans. Also there is not telling what effect this will have on future homecomings.

Fact number two follows in the same vein. A scout for Lewis college, last Tuesday's opponent, had to stand through the entire homecoming game. When the Lewis administration heard this, they called Coach Glancy to find out if there was any way in encouraging their students to come to the game. Glancy's only reply was "Yes, if you come early enough." Here again potential interest is lost and Tech's athletic reputation gets dragged through the mud—not because of teams but because of facilities.

Fact number three applies directly to the game itself. Coach Glancy feels that a turning point in the game when Jack Wadell lost the ball on a walking violation with less than a minute to go. UTC took the ball down and scored to get a four point lead and put the game out of reach. The reason for Jack's violation was that he had run into a waiting UTC spectator who had. I believe, inadvertently stepped onto the court for lack of anywhere else to step to yell instructions to the players. This lack of space was a factor throughout the game because, when spectators are standing right up to the edge of the court, players can't help but stay away from them. This makes the small court even smaller.

I realize that there is not much that can be done about this situation now, but it's really too bad. Tech has a young exciting team which should attract a large, spirited following. It would be a shame if this popularity were to be thwarted by poor facilities.

Comment Necessary On Mericle's 'Angry' Letter

This week Technology News contains the result of a very unfortunate situation. On page three appears a letter from an ITSA presidential candidate, who made an unwarranted attack on the newspaper. Late Wednesday evening, the writer phoned the editors explaining that he wrote it in a fit of anger and requested that it not be printed. After a great deal of soul-searching we decided that it was our duty to print the letter and comment upon it. We felt that this letter shed additional light upon the candidate's desire for the post he is seeking. We have no right to keep this information from the students who ultimately must make the choice for the office of president.

Until that letter was received last Friday at 4 pm we had not intended to take any stand on any part of the election. We felt that the candidates, especially those for president were equally qualified and coming out in the paper for either would actually be a disservice to the student body.

However, the letter has forced us to change our policy. We must comment upon the letter and the man who wrote it.

Technology News was faced last Friday with a presidential candidate who in his anger over an almost minor point in a news story retaliated with a letter in which distorting the facts completely out of proportion. Apparently the candidate, in his anger, was able to convince himself that black (at least gray) was white and was able to distort the facts in his own mind to such an extent that they were unrecognizable.

This is why we comment. If this candidate were elected, what would happen if some day during the coming year the ITSA Board of Control was faced with a president again angered, who would again distort facts, and would again act in an unreasonable manner? Can ITSA afford to have such a president who is so unstable?

We wish to make ourselves clear. The decision is left to you. We still back no candidates. We have presented this letter and commentary which we are duty-bound to print. We sincerely wish, for both the candidate's and our own sakes, that the letter had never been received. Yet once received we cannot ignore it.

Chen to Cut Frosh Load
Curriculum Needs 'Minor'

Whatever happened to minor chemistry? During the advent of the new curriculum, students speculated that this less rigorous alternate for Chem-111 and -122 would be reinstated, yet it did not appear, and no mention made that it was even being considered.

We grant that chemistry is a valuable course, and the most likely place for it is the freshman year, but why must the majority of students be forced to take the major course when it was once deemed unnecessary for them?

The common freshman program which postpones the selection of a major until the sophomore year, is claimed by our sources as the only reason for the major chemistry course. It is alleged that if students were permitted to take minor chemistry, there would be fewer problems with deficiencies if they later designated a major requiring Chem-112 as a prerequisite for needed courses.

The common freshman program should not be preserved in this manner for the sake of only about a fifth of the students involved (viz. Chem, Chem Eng, EEPE, and Biology majors who are the only ones who are required to take any chemistry beyond the first year).

That difficulties with those who change majors may arise is a basically fallacious argument. First, there is only a small probability that this would involve a significant number of students, and second, the decision to change on the part of these students would probably be due to a good performance in minor chem. In such cases, the prerequisite of Chem-112 (which is fulfilled even with a grade of D) could be waived with a sufficiently high grade in minor chem.

This latter suggestion does not seem unreasonable, since the Institute permits students with two years of high school chemistry and a high grade on an advanced placement test in college chemistry to place out of Chem-111 and -122 (with or without credit) and go directly into a more advanced chemistry course. Certainly, any chemistry course offered by IIT would be at least equivalent to any offered by high school.

Why then should IIT force most engineering and physical science majors to take these courses, well known to be the toughest on campus, when something less difficult would be every bit as effective?

Letters to the Editor

Mr. Editor:

I feel that it is perhaps time someone said to you personally and in a formal manner concerning your unfeud oned criticism of the ITSA Board of Control. Your editorial earlier this fall in connection to this topic certainly left something to be desired in the way of research into the facts. However, you have already touched upon this in a formal manner about this "yellow journalism" with the hope that the editorials would stir these student leaders who were apathetic into action and those who were already doing a job might be made angry enough to do an even better job. I must apologize for the charges made by you in your first letter to the editor.

Mr. Editor:

I feel that it is perhaps time someone said to you personally and in a formal manner concerning your unfeud oned criticism of the ITSA Board of Control. Your editorial earlier this fall in connection to this topic certainly left something to be desired in the way of research into the facts. However, you have already touched upon this in a formal manner about this "yellow journalism" with the hope that the editorials would stir these student leaders who were apathetic into action and those who were already doing a job might be made angry enough to do an even better job. I must apologize for the charges made by you in your first letter to the editor.

PR Committee

Applications for the ITSA's 1964-1965 Public Relations Committee are now being accepted. Anyone interested should contact Mike Dunn, 3501 S. 16th St., 58976.

Free Delivery

On the surface, this is a statement of the situation that confronted the Monday night, it is not a true statement as to the circumstances and who is to blame. If you insist on placing the blame on one individual. Since your reports do not seem intended to look into the facts, I will, however, present them to you:

1) As you have noted in the above, I had formally resigned all duties to the commission before the constitution referendum was passed by the Board of Control.

2) In the past, referendum ballot have always, to any knowledge, been printed by the Ruby committee as they are familiar with the proper wording. As such, the position is Joe Cukadin's.

Arrangements were made with Joe Cukadin for the Ruby committee to prepare the referendum documents. However, there was a misunderstanding on his part.

Now that you are aware of the facts, I request and demand that the student body of Technology News appear in the next issue. Also, I request that Illinois Tech be made easily aware of this at your part by placing the formal letter of apology in a conspicuous place as that in which the offending notice appeared in the recent issue of the newspaper—front page Engineering Report.

We fear that Mr. Mericle has several facts wrong in his above letter to the editor. Most notable of these errors are:

1. Students who are apparently more interested in this news than Mr. Mericle. At least, they bothered to remember them more accurately.

2. In his first point, Mr. Mericle attempts to discover all responsibility for the referendum (not the entire election). The recording of the meeting at which he resigned, his resignation was noted by the Board after the referendum was passed.

At the time of his resignation, he stated that he would... work with the ITSA committee (ITSA committee chairman) and get things straightened around for the Homecoming and he (Joe) work to over complete before the next election (Dec. 18 and 19)." Furthermore, Mericle conducted the meeting of the election committee (after his official resignation as chairman of arrangements for the Dec. 2 and 3 election meetings. Joe Dunn was not present at this meeting, although later he did help count votes.

Mr. Editor,

I would like to take this opportunity to thank all the members of the Student government for their work. I would like to thank Frank Prazuck who designed the float and who did most of the work building it. I would also like to thank everyone who worked on the float, especially Mike Roy, John Crowley, and all the students who came on the float.

I thank Ed Yates for cooperating with us in the fine manner in which I believe all students wish to compliment Mr. Mericle and Mrs. Mericle for the fine job they did in organizing and supervising the weekend. —Michael Foley

Dr. Owens, E & PS Dean Supports Going to Class

by Edward Minnella

"ITT is fine the students—get the professor. In addition to the research faculty, importance to the students, and in the classroom. This assignment of ITT's purpose was made by Ralph Gardner Owens, Professor of Mechanical Engineering and Dean of the College of Engineering and the Physical Sciences. He went on to say, 'If we have a faculty that is bright and well trained, it is possible to attract good students. Good professors like to teach good students, and hence they come to schools with bright students—such as ITT.

"In order to receive even an assistant professorship at ITT, a person must hold a doctor's degree and present suitable references. He must have been an assistant professor at ITT; he must have been a good student. He must be able to attract good students, and hence they come to the school with bright students—such as ITT.

"The curriculum belongs solely to the faculty. At ITT the faculty sets the pace. They characterize it, they believe in it, they develop it, and now they are teaching it to the freshmen class. It is a total curriculum with two years of mathematics, physics, and calculus, all starting the first semester of the freshman year.'

"Dean Owens holds a bachelor's degree in electrical engineering from Ohio State University and a doctorate in physics from the University of Michigan at Ann Arbor. Before joining the faculty at ITT in 1946, he worked for Armour Research Foundation on thermodynamics projects, his specialty.

"In March, 1952, he succeeded President Rettallakin as Dean of the college Engineering division.

Feature Corduana, Russia's Hero Alex Nevsky

Films for this weekend are "They Came To Cordura" which will begin at 7:30 this evening in the HUB auditorium and "Alexander Nevsky" which will begin at 8 pm Sunday evening in the HUB auditorium.

"They Came To Cordura" is the story of the war in the frozen north and the Battle of the Icy Lake on the Icy Lake front. The battle of the Icy Lake was fought and Alexander Nevsky won a brilliant victory. From these historical events, Berlin Eisenstein fashioned this monumental film, widely recognized as one of the all-time classics.

THE SAFE WAY

to stay alert without
harfeful stimulants

NoDoz keeps you mentally alert with the same safe refresher found in coffee and tea. Yet NoDoz is faster, handier, more reliable. Absolutely no habit-forming. Next time monotonous makes you feel drowsy while driving, working, or studying, do as millions do . . . perk up with safe, effective NoDoz tablets. Another fine product of Grove Laboratories.

A DIFFERENT TYPE
OF FOLK

From out of the isolated Brazilian jungle comes Los Indios Tabajaras and their "Maria Elena." Now it's the title tune for a fascinating new album. A treasury of tribal folk songs like "Indios Inocentes" and "Heleno." Get this album and hear the most intriguing new sounds in music today—at your record shop.

He's finding it at Western Electric

Ohio University conferred a B.S.E.E. degree on C. T. Huck in 1956. Tom knew of Western Electric's history of manufacturing development. He realized, too, that our personnel development program was ready to meet tomorrow's demands.

After graduation, Tom immediately began to work on the development of electronic switching systems. Then, in 1958, Tom went to the Bell Telephone Laboratories on a temporary assignment to help in the advancement of the nation's military communications. At Bell Whipsy, New Jersey, John, Tom worked with the Western Electric development team on computer circuitry for the NSA guidance system. Tom then moved on to a new assignment at WES's Columbus, Ohio, Wawa, there, Tom is working on the development of testing circuitry for the memory phase of electronic switches.
I have been ITSA Independent Communique Representative and past President of ITCA. I am a trustworthy, loyal, helpful, friendly, courteous, kind, obedient, cheerful, thrifty, honest and reverent. I also want to save Pub Board. Now, rather than tell you what I have done, let me tell you what I will do if elected.

Every student has an interest in ITSA. Every student pays $10 for a semester as an activity fee, and this amount roughly $34,000 is managed by the ITSA Board of Control. You are paying for everything that happens on campus. You are paying over $5 a year for a yearbook, plus $5 if you want a copy. Nearly 70% of the total budget was spent on one-weekend, Homecoming. (When were you last into ITSA Board meeting?) Yet Union Board, which offers more to everyone, is allocated only 25% of the budget.

Possibly, this is what the students want. More likely, you are not aware of what is going on, and this is what must head my list of reforms. The activities of the Board of Control must be made known to everyone. The division represented by the five members of our council is not one that will benefit all students. Having essentially three semester experiences on the ITSA Board, of Control, I am fully aware of the fact that the Board is the governing body of the entire school and can definitely not be seen as a "tool" for the fraternities, for the dorms, or for the communists. The Board of Control is in a way a tool of the students to use through their elected representatives.

This philosophy of mine concerning the governing of Illinois Tech is borne out by my past record as your Engineering Representative and ITSA vice-president. On the present election commission which I believe, there is a representative from all three fraternities mentioned above. Board of Control can work well and serve a good cross section of the students. This is only one example of my efforts to try and represent all students in Tech in an equal and unbiased manner.

In regard to some of my qualifications, I served on the Fresh Board and represented that class on the Board of Control at several meetings. Although not providing direct experience in the functioning of the Board, this experience did give me a good elementary education in student activities.

For the past year I have served as your Engineering Representative on the Fresh Board. In this capacity I have the unique opportunity to learn thoroughly the operation of two major campus organizations as to how they might get the greatest benefit from one another. In the future, this cooperation should be planned at least six weeks in advance and committees assigned so that the Conference will be able to devote its time to the most important activities and vote on specific proposals.

The President of ITSA has the power to do a great deal of good. I want to be elected to do that. I want to do my best for all the students as well as the group called the "Electi
ty" by the arrangement. Secondly, preserve the status-quo as far as feasible; but when necessary, work for internal improvement and cooperation to further accomplish our goals.

Third, outline early and carry out an effective Spring Conference so that the entire student body will be more informed about the Tech students. Fourth, develop an extension arrangement for the Board of Control consisting of the Tech students. Finally, a new career development in the office of the Sophomore Class President, having elected the Sophomore Class President, in addition to this to that purpose, in addition to this to that experience, I have a great desire to serve the student body. The best candidates for ITSA Assistant Treasurer have to be capable, qualified and willing. Because of the above reasons I hope that you will support me to carry on this position.

Secretary

Bill Christensen
EE-5
Alpha Sigma Phi
Basic 2.20

If elected to the position of ITSA secretary, I assure you that I would set up and maintain well-equipped records and prompt communication within the ITSA Organization.

Although communication is important, I realize that the student body must be a great deal of attention. Because of the situation, the first and last years of the freshmen have to work with the freshmen who are elected and are interested in their freshmen's needs.

In this respect I believe I have been qualified. My qualifications include one year as president of the dormitory and one year as treasurer and a year's experience as editor-in-chief of my fraternity's chapter newsletter.

Lt. Ass. Treasurer

J. D. DeFranco
BE-5
Independent

Factors which I believe would help me are the office of ITSA's Assistant Treasurer: (1) I am a business and economics major; (2) I am an accounting major; (3) I am a member of the Board of Directors, and (4) I am a former president of the Illinois Tech Student Activities Association. As a past president, I have served on the Board of Directors and the election commission. I am fully aware of the importance of the position and the responsibilities that come with it.

Commune Rep.

Raymond Brole
BE-5
Independent

I am happy to do my best for all the students and the group called the "Electi
ty" by the arrangement. Secondly, preserve the status-quo as far as feasible; but when necessary, work for internal improvement and cooperation to further accomplish our goals.

Third, outline early and carry out an effective Spring Conference so that the entire student body will be more informed about the Tech students. Fourth, develop an extension arrangement for the Board of Control consisting of the Tech students. Finally, a new career development in the office of the Sophomore Class President, having elected the Sophomore Class President, in addition to this to that purpose, in addition to this to that experience, I have a great desire to serve the student body. The best candidates for ITSA Assistant Treasurer have to be capable, qualified and willing. Because of the above reasons I hope that you will support me to carry on this position.

Dormitory Rep.

John W. Holms
Arch-3
Basic 1.90

As a candidate for Dormitory Representative, I offer the following reasons why I believe I should be elected: experience, knowledge, and dedication.

I am an experienced dormitory Manager of WITX. In that capacity I have organized and implemented the operations of the station to produce more consistent programming. Part of this organization was a live broadcast of the Homecoming Queen coronation and the basketball game last Friday evening.

My knowledge of the ITSA operations stems from work on some of its committees. My work with the Board has been primarily of helping with the writing of bylaws. I must say, however, that the most important of these was the present Dorm Rep. To introduce a position which would be open to either dormitory representative to hold chairmanships on certain committees and to continue the work of the present ITSA Board of Control, promises to open up new opportunities for students who might consider the volunteered promise to be representative of all engineering students.

Serving as an Engineering Representative on the ITSA Board of Control and as chairman of the Advisory Committee on Student Activities for the last semester has helped me understand the functioning of our student government.

However, with this understanding in mind, I would gladly accept the responsibility of the position. I feel that it is fair to start planning now for the post-graduate years and the final decision is up to you.

Fresh Vice President

Frank Flechtner
EPS-1
Independent

Hope to see you soon.

T. R. Poulson
Fresh Secretary

Charles Vuk
Arch-1
T. R. Poulson

Asst. Social Chair

The Ins and Outs of ITSA

ITSA has been through a lot of changes this year. It is the largest student organization on campus, and it has a lot of power. I am running for president of ITSA this year, and I want to bring some new ideas to the organization.

The first goal of my campaign is to increase student involvement. I believe that ITSA should be more than just a club for technical students. It should be a resource for all students, regardless of their major.

Second, I want to increase the organization's budget. ITSA has a large budget, but it is not being used to its full potential. I want to use this money to fund more events and programs.

Finally, I want to increase the organization's visibility on campus. I believe that ITSA should be more visible to the student body, and I want to use social media and other marketing tools to accomplish this.

I hope that you will vote for me, Robert Downer, to be the next president of ITSA. I believe that I have the experience and the passion to lead ITSA to new heights.

Dove Waydore is running for the position of Freshman Social Chair. He is an engineering major and believes that ITSA should be more involved with the student body.

I believe that ITSA should be more involved with the student body. We need to do a better job of representing the needs and interests of the student body.

I am committed to increasing student involvement in ITSA. I will hold regular meetings and provide regular updates to the student body. I will also be open to feedback and suggestions from the students.

I am also committed to improving the organization's resources. I will work to increase the budget and make sure that we have the resources we need to do our job.

I believe that ITSA should be more transparent. I will be transparent about how we spend our budget and how we use our resources.

I hope that you will support me, Dove Waydore, in my campaign for Freshman Social Chair.

THE 100,000-MILE ENGINEERING TEST THAT SET OVER 100 NEW WORLD RECORDS

It began September 29 in Florida, when a team of four 1964 Corvettes, specially equipped and prepared for high-speed driving, set out to do the equivalent of four earth orbits at Daytona International Speedway—100,000 miles at speeds well over 100 miles an hour, round the clock for 40 days, through weather fair and foul.

They did it, all four of them, and they made history. They did it in the full glare of publicity. In semi-tropical heat, in teeth of torrential squalls that fringed two hurricanes. Including time out for refueling and maintenance, the lead car averaged over 108 miles an hour, topping over 100 national and world records.11

For all practical purposes this was an engineering trial—the most grueling test of staying power and durability ever demanded of a new car. Only near perfection could stand the punishment dished out to parts and components hour after hour, mile after mile. Brakes, engineers, transmissions, ignition systems—every single part a pawn in a grim game of truth or consequence, with total product quality the stakes. And they all came through hands down!

Now that it's over and in the record books, what does it mean? New proof of Ford-built stamina and durability! New evidence that Ford-built means better built! Yes—and more. It is a direct reflection of the confidence and creative know-how, the spirit and spark of Ford Motor Company's engineering, styling and manufacturing team—men who find rewarding adventure in technical breakthroughs.

More proof of the exciting things that happen at Ford Motor Company to bring brighter ideas and better-built cars to the American Road.

JOBS IN EUROPE

Unlimited travel grants and European jobs such as Lifeguarding, office, shipboard, airport, etc. (wages $600-1200 M.) are available to all college students through the American Student Information Service, 22 Ave. de la Liberté, Luxembourg, Oster Grand Duchy of Luxembourg. Send $1 for a complete prospectus, travel grant and job applications, and air-mail reply.
Tuition Payment Plan Considered At Clarkson

by John Mah

Occupying a space of beauty on North Michigan Avenue is the new Hotel Continental, with several exquisite situations, among which are the Cafe Lorraine and, on the sixteenth floor, the Chateau Continental.

The Chateau Continental and the adjoining cocktail lounge, the top floor becomes a twinkling view of the Old Water Tower and Michigan Avenue to the south, and the glitter of Walton Place to the west.

Enhancing the professionally good service, which seemed to have died out in the city is Franz Benner, who reads his master with a Balsanetti violin, giving the room an aura of elegance and distinction as he provides music for dining and dancing in the southwest corner.

Carrying off the evening, for which there is a cover, are the sounds of the songs by Victor Bernet, with Banet being just returned from three months in Paris to open here with the band, on Nov, 30, and will remain until Dec. 20. Previous to her singing at the Chateau, she had also toured South Korea, Japan, and Mexico, in addition to recording for Piccon Records.

Sometimes, when not playing for Mrs. Benner or the dances, Mr. Benner can be found doing requests, or just fiddling along with his musicians, between tables.

Built for a Queen

LOREM members placing the top on the Homemaking Test that eventually carried the queen to the crown steps of the SHR. This was, for them, a real "dream host."

NEW CHEVELLE!  BY CHEVROLET

The kind of go-everywhere you'd expect from one of Chevy's great highway performers. Come on down and drive it.

The kind of comfort you'd expect in a large interior. Come on down and sit in it.

Now—Chevy spirit in a new kind of car!

We built this one to do more than just stand around looking beautiful. Held its weight down in the 3,000-pound range. Then built four heavy engines—two four's and two V-8's—with output all the way up to 320 horses! And if that makes you think this is one frisky car, you've got the right idea.

You've also got a roomy car here. Yet its 118-inch wheelbase keeps it highly maneuverable in traffic and very easy to park.

With its full coil suspension, it's got a ride that reminds you of the jet-smooth kind the way it muffles noise and cushions bumps.

And the fine hand of Body by Fisher craftsmen shows up beneath this one's gorgeous good looks, too.

Sound good? There's more. Like the fact that Chevelle comes in three series with eleven models—convertibles, sport coupes, sedans, wagons, even Super Sport models with front bucket seats. Like the fact that (and see if your local Chevrolet people) of all the new Chevelles comes in an easy-to-take-price!

Like to hear more? The listening's wonderful! Come on down and drive it.

See five entirely different kinds of cars at your Chevrolet Showroom—CHEVROLET, CHEVELLE, CHEVELLE I, Covette & CORVETTE

Out With the Old, In With the New

Browsing among the multitude of magazines and papers on the HUB newspaper is a rewarding experience. Here both the quality of the news media and the breadth of coverage is surprising for news and professional magazines. (Many daily papers also look first for obituaries in the way news is reported. Are the facts distorted or rewritten merely to sell a story? Are certain aspects of a story played up to cut readers off or serve as lever points in political or other news events?)

For the moment let's not consider the important of choosing and reading a professional magazine. It is obvious that the regular reading of an appropriate professional magazine can give us needed insights into the area in which we will someday work.

It is true that we are yet very much in our formative years and the sources of news that we regularly depend on influence the way we think and act to a greater or lesser degree. For this reason a judicious choice of news sources is a healthy thing. A proper outlook on and an accurate understanding of world events is a habit to be fostered, very similar to the habit of hard study that brings professional competence.

Considering the various news media and the breadth of coverage is surprising for news and professional magazines. A daily paper is recommended.

Tech Falls in Homecoming; Loses to CTC 83-80
by Bob Hardy

Playing before an overflow homecoming crowd, the IIT Techawk basketball team won many new fans but lost a heart-breaking 83-80 game to Chicago Teachers.

The game had to be the first real test for the Techawks and they certainly rose to the occasion as they led through most of the game and long only because of poor foul shooting and a few bad breaks at the end.

CTC jumped off to a quick 6-1 lead and threatened to run away with the game as they had hot shooting hands. But Tech, behind the rebounding and shot-ting of Jerry Arndt and the alert playing of Jack Carrel, began to move and kept within 3 and 4 points for the first five minutes of play.

Tech gained the lead for the first time at 24:23 when Jay Kurtzman hit a twenty-foot jump shot with 10 minutes gone in the half.

From this point Tech and CTC, with their run-and-shoot until Carrel hit two quick baskets to give Tech their biggest lead of the first half at 35-31. The Techawks managed to protect this lead until the end of the first half. The first half ended with the score 45-42.

Tech started the second half with a rush as Carrel and Belovskiy hit for six points

A basket by Halberg gave CTC a 51-44 lead and several chances to tie as Jack Waleta missed a short jump shot and Belovsky had both his baskets in the last five minutes. At 6:10, Tech managed to tie the game with the score 51-51. Later, with only 2:10 left in the game, Halberg hit a basket to give Tech a 56-51 win. Tech had only two points in the last five minutes.

Jay Kurtzman again had a fine night as he scored 15 points and led the Tech. Arndt was leading the Tech with 12 in the second half. However, the loss of the big rebounder was quickly felt as the Tech dropped to a 79-75 loss with a minute to go.

2 Point Margin Hands IIT Swim Team Loss

The strongest IIT swimming team of any years bowed to Gustavus Williams college by the narrow margin of two points in the first Tech meet of the 1963-64 season. New members, G. Brahan, T. Burke, J. Doran, Mr. Jackowich, R. Johnson, S. Keller, J. Newwars, F. Oesi, and M. Radziwells along with veterans Rich Arndt, captain of the year's squad, M. Alshinger, B. Bosick, and J. Williams show promise.

Since George Williams is one of the strongest swimmers that Tech will face this year, Coach Erickson said that he can't see how the team could lose very many more since this first meet was so close.

Tech collected a total of 168 points for the first place, 66 for second, and 57 for third. Complete results follow prior to the meet. I. T. W., 185; E. J. T., 152; E. C. T., 145; and Tech, 168.

AEPi Tourney in Final Game

The AEPi tournament moved toward the championship game with the Deits and Phil Kaps winning their respective semifinal games. The Deits proved too much for the South Dorrin winning 66-54 and the Deits defeated AEPi 66-54.

The South Dorrin utilized the Phil Kaps to remain in the game trailing the game by only 20 points. The Phil Kaps proved just too strong and led the game in the second half and widened the lead.

Dave Smith of South Dorrin led all scorers with 20 points. Weaver leading the Phil Kaps attack with 17 points. Reimick, Heaven, and Stanfard all had double figures for the Kaps.

AEPi, riding high on their 54-54 victory over Texas, were not as fortunate against the Deits. The Deits overcame a six point AEPi lead in the middle of the first half to lead 52-50 at the half. The Deits went on to win 79-70. Deits were led by Miller and Michalak each contributed 18 points.

Have you met our man on campus yet?
Better see him soon, if you want to save money and see the world.

The Sheraton Campus Representative will give you free Sheraton Student (ID or Faculty Guest Card. With you can stay at any of 81 Sheraton Hotels round the world for up to 25% below the lowest rate you can get in single rooms! Save more even with 2 in a room. Group rates for clubs and teams. Whether you're in town for a world of things to see and do, Sheraton will make it easy. Ask your ID Card, contact the Sheraton Campus Representative:
