Computer Experts Here For Research Workshop

ITT and IIT Research Institute are jointly sponsoring the Computer Research Workshop on Tuesday and Wednesday of next week. Four of the nation's leading experts on computer techniques and applications in medical research will speak to a group of fifty doctors independent hospital in Chicago. Each seminar will eventually lead to the creation of the IIT/ Health Research Center.

This Health Research Center would be concerned with coordinating related health research across the disciplines within IIT, as well as sponsoring the joint research of IIT and other academic and medical institutions.

Jam Session For Tonight Held In Bog

Starting off the jam sessions at the Bog this week were two groups of IIT and Vandercook students, who played, Friday, Sept. 29, and Friday, Oct. 6.

They will also have another session this Friday, the jam session of seven men, led by Charlie Hill, who affix these performances.

Lasting from 8 to 10 pm, the first two sessions consisted of a large variety of standards in jazz tunes. The Bog was packed for both performances. This Friday, the third session will be held from 8 pm to midnight and may include folk singers as well as jazz.

Clarks Hill, manager of the Bog, stated, "We will continue these jam sessions whenever we can fit them into our schedule together. Everyone is invited to come."

For the weekends following tonight's jam session a general program has been planned for the rest of the semester by Paul Scherrer, the new chairman of the Union Social Committee. Starting Visions, Sunday, Oct. 18, he plans to have something every Friday and Saturday.

Hours and the slot parties are to be held Fridays while jazz will be presented Saturday nights. Scherrer hopes that this variation will meet the tastes of the IIT campus.

PUB Board Gives Counsel

UBTI Tenders Debate; AynRandDiscussed

Marlin stated, "My analysis of Miss Rand's philosophy will persist the basic attitudes of Man toward his own worth and destiny. It will be an objective attempt to analyze the nature of values and motivations, in terms of her philosophy which states that rationality and utilitarianism are the tools by which Man perceives reality and makes reality the expression of his own basic purposes."

The general discussion will relate her philosophy to the practice of architecture.

Ayn Rand, author of "The Fountainhead" and "Atlas Shrugged," is one of the most controversial women today due to her beliefs and philosophies on society, morality, and economics.

The following Monday evening, WIIT, will present an open discussion concerning the preceding show. This will be a show devoted to open expression or disagreement with Marlin's views.

John Hatcher, student manager of WIIT stated that "everyone wishing to participate in this show is invited to contact WIIT any day of the week between 9:00 and 8:00 for further details.

Who's Who

Applications for Who's Who Among Students in American Universities and Colleges are now being accepted in the dean's office.

Applications must be submitted to the dean before 3 pm, Monday, Oct. 21.
WIIT's Requested FM Is Challenge to Students

John Haines, Station Manager of radio station WIIT, recently requested funds for adding FM facilities to WIIT's present AM equipment. He has estimated that the total installation cost, spread over a number of years, could approach $37,000.

The station's present FM license is to expire in early 1964. The work of organizing the station will itself provide interested students with an opportunity to try their talents in practical electronic work.

However, the real value of the station will become apparent after it is built. From what we understand, the FM station's progress would encompass the whole of the Chicago area.

The resulting varied programming of WIIT-FM would provide an opportunity to students with any one of a wide range of interest areas to participate.

For example, the station would have reporters doing original research and analysis on Chicago area news stories, and on stories concerning IIT, HTTRI and University of Chicago projects.

In addition, WIIT-FM would have people reviewing plays run in Chicago theaters. The station's network would probably program background stories on amateur and professional dramatic groups from Chicago. They also intend to produce plays over the air.

They plan to sponsor discussions on political and economic issues which would be carried over the air. In addition, they have tentatively planned for music appreciation programs on which faculty members would explore the merits and values of various musical works.

Also, the disc jockey programs presently run over WIIT-AM will be given more professional polish, and the program hosts will have a greater and better selection of music.

In conclusion, we feel that this station would provide the approximately 150 participating students with interesting and valuable experience. We feel that WIIT-FM would cover the whole Chicago area, and not just one part of it. In addition, the professional experience the students gain will help the student for future work in business, giving him the opportunity to work on a well-run and exciting enterprise.

ITSA Should Inform Students Help Reduce Apathy, Ignorance

The editorial which appeared in this space last week has been the cause of much controversy on campus. Many people offended by the use of names, others called it everything from funny to offensive. However everyone agrees that it "shook things up!"

A social calendar will be published in Technology News next week. The Union Board has stated that it is not taking over the Homecoming or the Intra-Ball. A proposal is before the board to investigate Pub board. A plan is being made to keep noise to a minimum for the coming week, and last first in last week's editorial is the fact that the people in responsible position on this campus are responsible to the students in name only.

Students vaguely feel that something is wrong, and this merely contributes to their feeling of hopelessness, because without knowledge of the functions and goals of ITSA and its various committees, they can do nothing.

All meetings of ITSA Board of Control, except those of the appointive nature, are open. Yet, understandably, few have time or willingness to attend. We feel that all representatives should make themselves available to the people they represent for suggestions, complaints, and questions.

ITSA consists of such as Public Relations and the Student Investigating Committee also bear the responsibility of the student government. We urge the student government to take a leadership in the student government.

If ITSA were to keep student informed of the activities of the various groups, perhaps some of the well-publicized student apathy would disappear. An apathetic student would never again.
Letters to the Editor

Coach Cites Editors’ Error

Mr. Editor:
The exhibits in the HUB are in no agreement whatsoever with our beautiful, well-lit, and artfully designed campus.

Not only are the paintings shown bad in composition, color, and craftsmanship, but specifically in the art projects, they make the students feel like they have no confidence in their work.

—Anthony von Hoboken

Mr. Editor:
In reference to an editorial appearing on page 2 of your October issue, regarding “Who folded.” I would like to say, “You did.” In case you did not bother to research your information in an accurate manner, I should like you to note that we are at home Dec. 3, 6, 10, and 14.

Also, the purpose of a Homecoming is to welcome the team home but to welcome back former students. Ed Yates asked me to arrange a home date for Dec. 6 and, in our scheduling last spring, we were able to do so.

Ed Glancy (who didn’t)

Homecoming Planned For December 6, 7

ITT’s Homecoming for 1963 will be Friday and Saturday, Dec. 6 and 7. Homecoming events will begin with Friday night’s dance, held at the basketball game in the gym, and will be climaxed with the dance in the HUB Saturday night, according to Homecoming co-chairman, Merry King and Ed Yates.

The Homecoming queen will be crowned at half-time of the CTC-IIT basketball game and will reign over events of both days. The theme for Homecoming has not been definitely decided, said Mrs. King, but it will be either outer space, having each section of the HUB decorated as a different planet, or Japan, featuring a Japanese opera.

An initial meeting to appoint Homecoming chairman will be held at noon next Tuesday in the HUB Mezzanine.

Retaliatia Will Speak Visitor’s Day: Oct. 19

On Saturday, October 19, IIT will welcome several hundred visitors to its annual Visitors’ Day program. Registration will take place in the HUB beginning at 12:30 pm. Dr. John T. Retaliatia, President of IIT, will deliver his address, “New Directions for Higher Education in Our Technological Age,” at 1:30 pm, in the auditorium.

Their parents will meet informally with the dean of the Colleges of Engineering and Liberal Arts and faculty members of the various academic departments. The IIT Parents Association will host this part of the program.

Information Available
Each department will have an information center in the HUB as well as the Office of the Dean of Students, the dean of students, the director of career planning, the faculty of the various departments, and the various IIT president’s staff and faculty.

All buildings on campus will be open, including the John. C. Calhoun building, the residence halls, the fraternity, and the sorority.

IIT will also open to the public the nation’s first nuclear reactor for industrial research and in $2.5 million computer center.

The activities of the day will conclude at 5 pm.

STAND TALL! with the leader in Worldwide Communications
Bell System Companies will interview on campus October 16

Would you like to work with a company that starts you in a responsible position where you move up in your job? Promotes from within? Gives you a present, as well as a future?

Then the Bell Telephone System may offer just the opportunity you’re looking for.

You’ll learn the exciting field of communications, with advancement dependent on your ability. You’ll have the opportunity to work with people, and you’ll be working with one of the largest and fastest growing, most vital industries in the world.

In your work, you’ll be associated with the companies that have developed the Telstar satellite, the transistor, and the optical fiber—perhaps the greatest single communications development since the telegraph.

If you are in the upper half of your class—with either a technical or a non-technical degree—Bell System interviews are very much interested in talking to you. Simply make an appointment at your placement office.

Bell System Interviews:

THERE WILL BE AN EAGLE ON THE MOON

Our world-recognized trademark—the P&W eagle—has been identified with progress in flight population for almost four decades, spanning the evolution of power from yesterday's reciprocating engines to today's rockets. Tomorrow will find that same Pratt & Whitney Aircraft eagle carrying men and equipment to the moon and to even more distant reaches of outer space.

Engineering achievement of this magnitude is directly traceable to our conviction that basic and applied research is essential to healthy progress. Today's engineers at Pratt & Whitney Aircraft accept no limiting criteria. They are moving ahead in many directions to advance our programs in energy conversion for every environment.

Our progress on current programs is exciting, for it anticipates the challenges of tomorrow. We are working, for example, in such areas as advanced gas turbines...rocket engines...fuel cells...nuclear power—all opening up new avenues of exploration in every field of aerospace, marine and industrial power application.
THE SAFE WAY
to stay alert without harmful stimulants

NoDoz keeps you mentally alert with the same safe, refreshers found in coffee and tea. Yet NoDoz is faster, handier, more reliable. Also, never habit-forming. Next time you feel drowsy while driving, working or studying, do as millions do... perk up with safe, effective NoDoz tablets. Another fine product of Grove Laboratories.

INITIATIVE:
If you had the time—you could do the computations which the biggest data processing systems do. But they do them at electronic speed and without tiring. It calls for constant initiative to make them work better for us. You needn't know everything about them to start with. IBM has an education program for continued training. Ask your placement officer for our brochures—and for an appointment when the IBM representative is interviewing on campus. IBM is an Equal Opportunity Employer. If you cannot attend the interview, write Manager of College Relations, IBM Corp., 590 Madison Avenue, New York 22, N.Y.

Does a man really take unfair advantage of women when he uses Memen Skin Bracer?
All depends on why he uses it. A man simply thinks Menen Skin Bracer is the best after-shave lotion around. Because it looks rather than burns. Because it helps heal shaving nicks and scrubs. Because it helps prevent infections. Sounds can blow them if Bracer's clean, long-lasting aroma just happens to affect them so remarkably.

Of course, many men may use Memen Skin Bracer because of this effect. How intelligent!
Harriers Edged 28-31 By Elmhurst; Love Winner

Elmhurst dealt Tech their second loss of the season as they edged Tech 28-31 in a triangular meet held at the ITT home court on Oct. 5. The third college was later determined.

John Love, Tech team captain, won the race, finishing the third mile in 16:15. However, Elmhurst took the next two places, then Tech's Steve Hoop finished and Elmhurst took the following two places. Harold Edwards and Rich Paul, both from ITT, were the next two to finish. Jay Burns won the fifth man for ITT, coming in eleventh, but an Elmhurst runner captured the next place and the race.

This was, of course, a close contest between the two teams. "The team has shown a great deal of improvement over last week, and I think that they will continue to improve as the season goes on," said coach Harry Aul.

"John Love ran a swell race; he's doing a fine job this year.

"This team has done better than I thought it would. We are enjoying good performances from some of the new members," Aul added.

John Love running well, the new members and some of last year's team who have also been doing well, we have the nucleus of a good team," he went on. "I'm hoping we can defeat Elmhurst on our home court tomorrow, although they have the advantage as they are accustomed to the hilly course where we are not," Aul concluded.

Bowling Team

The 1963-64 Illinois Tech varsity bowling team is now being formed. There is an organizational meeting at noon Tuesday in the gym. All students interested in leisure bowling are urged to attend.

There is plenty of opportunity for qualified bowlers since there are only two leaguemen, captain Jack Carlson and Don Bouda, returning from last year's squad. The team needs six to ten members to compete so this leaves quite a few vacancies to be filled.

Middies Win; Commuters Archs. Thrive

Once again, both Navy ROTC football teams won their IMC matches. The Navy B team scored six points which Dave James ran back, opening kickoff for a touchdown, and then held the North Wing B team scoreless to win 6-0, in its game of Tuesday. The Navy A team won their match with the archrivals rather handily, 14-0. Quarterback Jerry Parro threw a 50-yard touchdown pass to Bill Butler, and also passed 20 yards to Hixson for another touchdown.

John Vomocik added two more points when he caught Ken Larson in the end zone for a safety. In the IM action, the commuters pushed across a touchdown in the final period to defeat the North Wing B team 6-0, and the archrivals dumped the South Wing 7-0 as Ken Larson passed for the touchdown and the point after.

 Greeks Have Party Time Make Freak Off Campus

There are nine fraternal and two sorority councils at Tech. This campus is vitally interested in the activities of its Greeks. If there is anything newsworthy happening at your house, e.g., pranks, parties, even that "new" joke now making the rounds, contact either Tech News, 112 HUB, or Jerry Schullmier at the AEPF house.

Way-out parties seem to be the order of the week for the Quad. Phi Kaps are taking to the woods for a Forest Orgy at White Eagle forest preserve. Remember what Smokey says about those fires, fellows?

Also heads off-campus are the Big Eps, who are planning a party at the point for next Friday, complete with hot dogs, beer, and... Good weather to you, boys.

Phi Kaps are hosting a Beatnik Party this Saturday, dedicated to the proposition that all men have the inalienable right to just sit around and look sleepy.

The Equinox Phi is proud to announce the initiation of the following men: Steve Becker, Howard Penn, Richard Grob, Richard Wachter, and Kenneth Whitcomb.

Latest additions to the AEPF membership are two seniors named Richard and Liz, two inaguroly, and a bewhiskered parakeat named Rodney, who's being trained to answer the phone.

Big Eps are fed up with the UB Concert series—literally! A dinner party is now scheduled before every UB Concert. Anything to keep them off Rush Street.

And no, Vic! I didn't forget about the seminar; they're just not talking!
