Bowl Team's 'High Caliber' Cited by Coach Marston

"If it were not against University rules, I would be willing to bet that our team will last more than a year," thus Ralph Goddick, Assistant Dean of Students, expressed his confidence in ITM’s forthcoming appearance on the College Bowl. Goddick continued, "We have many students of fantastic personal backgrounds who utilize every opportunity to contribute. This is showing up in the applications we have received."

Coach of the team Donald Marston, Instructor in English, also expressed optimism. "The high caliber of students we have interviewed is really stunning. Some people were woeful; we worry it’s business. We have students proficient in literature, art, music, sports, and the social sciences."

"The committee is extremely encouraged by interview dates. I see no reason why we should not win," but Marston cautioned, "A lot depends on luck and the opposition."

Plans for the appearance are proceeding quite well. The interviewing of applicants is under way, and practices for these and last week will start this week. This will continue for another three weeks at which time the final team will be selected.

Marston added, "It is still not too late for anyone who thinks he is potentially College Bowl material to apply."

M.E. Department Recently Tests Missile Engine Model

The first test run of a liquid fuel missile engine designed and built by staff and students of the mechanical and aerospace engineering department over the past three years took place recently. The rocket project was partially supported by funds from the National Science Foundation undergraduate research grants, issued by the Rome and Mass Corporation of Hamilton, Alabama. The ITM rocket engine is a tube model, but differs in that it can be run continuously and can yield test data on thrust, combustion characteristics, effects of nozzle design, and other important parameters of missile engine performance. John Blair, ITM associate professor of aerospace engineering and advisor on the project, pointed out that before the modifications, it was not possible to ignite a rocket engine continuously due to the extreme temperatures and supercooled gas flows which existed throughout the unit.

The operators must wear foam rubber clothes and goggles to protect their eyes, according to Blair. "In full performance the engine runs at levels at which human beings would be killed."

IRC Is Reinstated by Board

By Dave Rylander

The PUB Board problem was overshadowed at the special ITSA Board of Control meeting last Wednesday by the more dramatic question of the expulsion of the International Relations Club as a dependent organization of ITSA.

The IRC was automatically expelled at a previous meeting following several issues of the club newsletter. The expulsion was held by the PUB Board to be "inappropriate," but was overturned by the ITSA Board.

"We are in the process of redefining ourselves, as every growing organization must do," said IRC advisor, Dr. Charles Mosley. "We must continue to adjust and we must continue to grow."

The four other members are the ITSA president and treasurer, a faculty advisor, and a advisor of the PUB Board.

Ford and UB Sponsor a 'Whing Ding' Simons and Mann, Main Attractions

Nina Simone, described by the New York Times as "a performer who is blessed with both talent and a strong sense of showmanship," will star in a "A Folk and Jazz Whing Ding" next Thursday at 7:30 p.m. at the University Union. Sponsoring the event is Nina Simone and the Afro-Cuban quintet, Reni Ellin, and the concert for $1.25 from 1 to 2 p.m. at the HUB. Regular tickets for $1.00 may be purchased for $1.25 at the HUB newsletter.

Nina Simone is regarded by many as the successor of Ella Fitzgerald. She won the admiration and the respect of almost all jazz cognoscenti with her "soulfulness" and her sobbing, yet resonant voice.

Herbie Mann has over 25 record albums to his credit, and is, as one of the busiest jazz artists, has played in radio, television, and music magazines. Reni Ellin's music has been played in the United States, Africa, and South America, and in 1960 he was chosen by the State Department to tour the Dark Continent as part of our International Cultural Exchange Program.

The Whing Ding will be held in the HUB for the "Whing Ding."

Applications are now available for the chairmanship of ITSA standing committees from Donald Hendry, Music and Business. The following chairmen are open to all students at any department, Student Investigating Committee, Advisory Committee on Student Activities, Public Relations Committee. Applications are due by April 30.
Students Feel Food Service On Campus Is Very Unsatisfactory

It has long been felt that the food services provided in the HUB are not the least bit satisfactory. Both the food and the service provided have been under notice since the opening of the HUB in October, 1961. We feel, therefore, that our comment has been long overdue.

We would not complain if there was any correlation between the prices paid and the quality of food and service received. However, we, as do most students, feel that the Bogg and the HUB cafeterias charge too much and give too little.

We have been appalled by the state of the food set before us each day for our consumption. Many times a student is faced with choosing either stale, recooked, and rewarmed food, or no eating. Of course he has the choice of walking across Michigan Avenue for a bite to eat.

We would advise all students not to watch the help while eating. They are likely to see such things as: tables being wiped with the same cloth as in traps, without any attempt to wash out the soiled food; food being smeared on the table tops; garbage piles set on counters, and the help sweeping chairs back into place.

While getting his food, one student saw, and subsequently reported, the cook drop a cutting knife on the floor and refuse to wash it without washing it. One student has complained of the over-attention the student receiving dirty silverware to the counter.

These things the student has learned to accept with a small shrug. After all, he has become used to it. However, it is not the regular student who concerns us now, but the high school students here on Saturdays and the men from industry whose impression of IIT must fall from such sights.

Is Length of Easter Vacation A Function of Travel Distance?

Like most tried-and-true Techwaks, the editors of Technology News have been happily contemplating our upcoming super-long, super-wonderful Easter vacation. Our happy Institute administration has seen fit to reward us hard working students.

However, today is one day as we gazed languidly upon the calendar hanging in our office, greedily enumerating those magnificently few days, our inhibitions were shattered by the sudden realization that classes resume on the thirteenth of March, the day following Easter Sunday.

"Barka!" exclaimed we collectively, "Horror of Horrors!"

Do you realize that students who live hundreds of miles off campus (there are a few of these, you know) will not be able to spend Easter Sunday by the hearth of their Home Sweet Home.

The poor off-campus student who travels from his home to our great campus covers hundreds of miles and many hours of time will force him to have his ear and home early so that he will be able to make his Monday classes; those poor beings will not be able to enjoy Easter Sunday with their mother and father.

Imagine, these poor students who should be blissfully happy with their nine-day Easter vacation will not be able to spend Easter Sunday at home. Oh, the irony of it brings tears to our eyes.

On bended knees we approach our generous administration and beg for our poor souls. Extend the Easter recess one day so that our poor pathetic off-campus students may enjoy the high point of their vacations in the bosom of their Home Sweet Home.

Letters to the Editor

Dear Students of IIT,

I can never begin to express my true gratitude to you for the great honor which you bestowed upon me last Friday evening, February 21, 1964. On this unforgettable night you chose me to be the Queen of the Infant Bull, a privilege that I shall forever remember as one of the most wonderful moments of my life. All I can now do is again extend my deepest appreciation to you for giving me this high estate. Thank you very much.

Sincerely yours,

Kay Phillips

Dear Dave,

We have often contemplated being able to walk in classes in the morning without the rude awakening rumbling of the "jolly trolley," being able to gaze across campus without seeing the usual framework of buildings, feeling Bogg East and West, and being able to frolic in the grassy expanse between Wabash and State.

No longer may we contemplate, the announcement by the Chicago Transit Authority concerning the renovation planned for the Thirty-Fifth Street "El" Station has shattered our dreams.

We have but one hope, a realization by the administration that if such improvements are made to the "El", it will never be demolished and will not only hinder the developing and the Tech, but also that of the much spoken of Research Park. Please, Institutional Planning Committee, we beseech you, do all in your power to convince the GTA and the city of Chicago that improving the "El" hinders not only the development of IIT but the "great" South Side of Chicago.

William Christelman
YMCA Sponsors Ecuador Work Camp

The Young Men's Christian Association of Metropolitan Chicago is organizing a South American work camp which will center in the Ecuadoran capital city of Quito. Fifteen college students from the Chicago area will be chosen to participate on the basis of academic achievement, interest in South America, ability to work in small groups under difficult conditions, and good physical health. The students will leave Chicago on July 5, for a three-day orientation in Washington, D.C. The camp will begin July 10, and will continue until Aug. 1, when the group will tour Colombia and Peru.

Together with a like number of Ecuadorians, the Americans will spend four weeks renovating the newly acquired YMCA headquarters building of the national YMCA of Ecuador.

The cost for each student will be $750 which will include all expenses except spending money.

According to James Aull, Chicago YMCA director, "We hope that the American students who qualify will be able to better understand the culture of South American people."

Any student interested in participating can get more information from James Aull, room 606, 19 South La Salle Street, or by calling 336-6787, extension 64.

UNION BOARD WILL HOST THE ACU CONFERENCE

IU's Union Board is going to host the 1964 Association of College Unions region eight conference. Region eight consists of Illinois, Wisconsin, and Michigan. According to UB President, Ronald D. Detry, representatives from an estimated 14 to 18 colleges will attend the conference.

The Union Board Executive Committee has created four new committees for the purpose of managing the ACU conference. These four committees are: ACU promotion committee, ACU arrangements, ACU entertainment, and ACU program. The committee will be under the direction of the UB vice-president, Carmen Difiglio.

The ACU promotion committee will be responsible for the promotion of the ACU region eight conference to the schools of the region. According to Difiglio, "The success of the conference depends on our ability to convince many schools to participate in this convention which have not participated in ACU regional events in the past."

ENGINEERING SENIORS!

Your Future Is Unlimited in LOS ANGELES

- CIVIL
- SANITARY

Building and operating one of the largest electric and water systems in the world require the challenging work of planning, designing, and managing, all under the supervision of your engineering school.

Arrange with the Placement Office, to visit with our engineering representatives, who will be on campus.

DEPARTMENT OF WATER AND POWER

CITY OF LOS ANGELES

ONLY FORD-BUILT CARS MEET THE CHALLENGE WITH TOTAL PERFORMANCE!

Something wonderful's happened to Ford Motor Company cars. Under the freshest styling seen in years, there's a new kind of durability and vigor that more than meets the demands of today's and tomorrow's high-speed, tumultuous driving conditions.

What's the secret? Quality engineering for total performance. Quality engineering so outstanding that Ford Motor Company received the NASCAR achievement Award for engineering excellence which "superbly combines the prime essentials of great automobiles—performance, reliability, durability, comfort and safety."

Total performance makes a world of difference. Bodies and frames are solid and quiet even on the roughest roads. The ride's so smooth, so easy-rolled, it seems to straighten the curves and shorten the miles. And nothing matches the spirited, sparkling stamina of advanced Ford-built V-8's and thrifty Sixes. Total performance is yours to enjoy in all our 1964 cars—from the elegant Fords to the matchless Lincoln Continental.
Women’s Fraternities Lead Men
by Tom Nation
Delta Zeta has the highest scholarship average for Women’s Fraternity at Bucknell University. I always thought there was only one kind of fraternity but Bucknell seems to be two.

There are Men’s Fraternities and there are Women’s Fraternities. According to a list published in the Bucknellian, Delta Zeta had the highest women’s fraternity average of 3.06. The all fraternity men’s average was 2.98. All fraternity men’s average was 2.38. The statistics show the lowest women’s fraternity average above the highest men’s fraternity average of 2.62.

THE SLOW RUSH
Illustrated below is the membership pin of a brand new national fraternity called Sigma Phi Nothing. To join Sigma Phi Nothing get this inductive membership pin absolutely free; simply take a pair of scissors, cut out the illustration, and paste it on your chest.

Let me hasten to state that I do not recommend your joining Sigma Phi Nothing. Only the one pin I have in this column is Matthew Cappelletti, an actor for Bally’s and a good friend. Photo is of the Oscar for his role in the movie "The Godfather: Part II." You can buy a copy of this pin for $10 at the magazine store.

I am frankly hard put to think of any reason why you should join Sigma Phi Nothing. Some people, of course, are joined by friends. If you are not, I must warn you that there are at least two better organizations for you to join—the Coca-Cola Company, for example, or the Society for the Prevention of Water Troughs in Front of Grammar Schools.

THE SLOW RUSH
Illustrated below is the membership pin of a brand new national fraternity called Sigma Phi Nothing. To join Sigma Phi Nothing get this inductive membership pin absolutely free; simply take a pair of scissors, cut out the illustration, and paste it on your chest.

But if you sign up joining Sigma Phi Nothing, let me give you a warning. First off, it is the only fraternity which allows members to wear a pin. Second, there are no pledging periods; craft and minor initiates immediately get yours. Perhaps "initiates" is not an accurate word. I mean you can’t do nothing, no campaigning, no meetings, no pledge, no songs, no parties, no... you get the idea.

The only thing Sigma Phi Nothing has in common with other fraternities is their fraternity. In fact, two hypnotists were selected to attend a meeting of the national board of directors (some of whom attended). The first hymn goes:

\[ \text{Sigma Phi Nothing,} \]
\[ \text{Sharing thr.} \]
\[ \text{Burn our number.} \]
\[ \text{If you are.} \]

The second hymn, rather more poetic in content, is to be sung to the tune of "In the Still, Still of the Night":

\[ \text{A man’s a man,} \]
\[ \text{A man is a man,} \]
\[ \text{If you have a man then...} \]

Pleading the next meeting of the national board of directors (which will be held) members are instructed to sing either hymn. Or, let that matter, please.

Perhaps you are wondering why there should be such a fraternity as Sigma Phi Nothing. I can give you an answer—answer with which you cannot possibly disagree—Sigma Phi Nothing is well-paid.

Are you suffering from mental health? Is logic detering your thinking? Is ambition overreaching on your native skull? Is your independent mind estimating by degrees the size of facts? In short, has education caught up with you?

If so, congratulations. But spring is upon us and the sun to rise. You can always look back with especial longing to the days when it was a posture of convenience. If—just for a moment—you want to remember those care less vegetables, that wasted, empty, confused, then join Sigma Phi Nothing and renew your correspondence with ourself. We provide nothing and, by George, we deliver it too.

On Campus

Cut it out and dust it on your chest.

Student Forum

Student Forum To Be Held in HUB, Mar. 19
A student forum will be held in the HUB ballroom at 12:15 pm on Thursday, March 19. The forum will be an informal meeting of recognized authorities in the fields of research and development, sales and design.

The purpose of the session will be to answer questions which students of engineering business, and those sciences may have, relative to their chosen fields.

HUB Sponsors School Tourney; Trophies Given
The HUB recreation room, in cooperation with the Union Bulletin, is sponsoring an All School Bowling Tournament beginning the week of April 1.

This tournament, which will be open to all HTU students (including part-time, evening, and graduate students) will continue for a period of several weeks and will be open to teams of four members.

The winning team will be awarded an engraved plaque bearing their names and their achievements. They will also have the opportunity to compete with the winners of the ITILR, faculty, and staff tournaments. The recreation room will award valuable prizes to the Tech Center champs.

Application blanks for teams, and for individuals who would like to play on a team will be available in the recreation room.

Singing goes better with Coke
And Coca-Cola—with that special zing but never too sweet—refreshes best.

We the masters of Harborside Cigarette promise smoking enjoyment, and we think you'll think we deliver it—in all fifty states of this Union. Harborside Country is where you are.
Chess Team Is 3rd In Recent Purdue Tournament

ITTF's chess team captured third place in the Association of College Union tournaments held at Purdue on the weekend of Feb. 21. The team's 131.5 point score was only 1 point below that of the first place team.

After the second round the team had a nearly perfect score of 7 times points out of 8. They held the lead until the last round when they were edged out by the University of Southern Illinois.

Highest individual score on the team was held by Gabriel Zuchot, whose 4 points was the third highest in the tournament. Also on the team were Bill Zemski, 315 points, Ralph Loomis and Nick Kebel, 3 points each.

Also representing ITTF in the tournaments were Dennis Mosch, three cushion billiards, and Jerry Furr, pocket billiards.

More Initiates and Parties Announced

by Jerry Schudin

To those houses whose initiates were not listed last week, this reporter humbly apologizes (and blames it all on the paint-up crew).

ITTF's new brothers are Vincent Bakalutz, Bill Gavenitis, Bill Lindquist, Greg Lutz, John Smale, Dan Scher, Jim Scherber, Edward Sandrusky, Bob Shamie, Phil Wasman, Andrew Wierzbicki, and Mike Zirckl.

Tri angles' initiates are Dan Barrat, Richard Boll, Dennis Dam, Frank Doughtery, Dave Evers, Charlie Hunt, Bruce Kolby, Tony Knox, Richard Markward, George Merson, Richard Pope, Ken Schroeder, Edward Smith, James Stiez, and Robert Stoll. Sig Eps are proud to announce the initiation of Don Pasyik, Jim Fox, Mike Hegel, Ray Lewallen, Wayne Meece, Lloyd Poulos, Bob Pische, Jim Sharpe, and Ken Stack.

THE BELL TELEPHONE COMPANIES

SALUTE: JIM HEYER

When he joined the Wisconsin Telephone Company in August of 1962, Jim Heyer (B.S.E.E., 1960) immediately learned to design television transmission circuits.

No "make-work" assignment, Jim's job calls for him to develop circuits for use throughout Wisconsin. He also goes into the field to check the effectiveness of his designs once they're in operation.

There are many decisions to make, and many to defend. But Jim enjoys the challenge and has the ability to meet it. No wonder raises come much smoother than expected.

Jim Heyer, like many young engineers, is impatient to make things happen for his company and himself. There are less places where such zestfulness is more welcomed or rewarded than in the fast-growing telephone business.
