WIIT Committee To Advise Station

John Haines, station manager of WIIT, has announced the creation of an Executive Planning Committee to advise the Management Board, which is the governing authority of the station. The committee is intended to advise a student organization in such a manner as is unprecedented. According to Haines, it will do much to add continuity to the station as staff changes from year to year.

Some members of the Management Board and the station manager are eligible for membership on the Executive Planning Committee. The present members include Chuck McDougald, Andrew Welsh, Mike Sillif, Rich Lamounier, Joan Borg, Ron Eddy, Dennis Lerman, and John Haines.

Since the members of the Committee are no longer involved in the station’s activities, they will be able to concentrate on improving student programs and will have more time to think about the station in general, instead of daily problems, as the Management Board will now do.

The Committee is purely advisory; it has no authority over the Management Board, and the Management Board has no authority over the Committee. As a result, the Committee will not be subjected to pressures from the station.

In the long range, the Executive Planning Committee will try to retain the influence, status, and position of WIIT, and give coherence to future plans. Chuck McDougald, one of the members of the Committee, stated, “I think that this Committee is an excellent idea. It is not an end in itself, but a means to an end.”

Mazur, Fischl, Koomjian As New Staff Of TN’s Editorial Board

With this issue Technology News begins its thirty-seventh year in existence. The new year is being opened with several changes in the paper’s physical appearance but a continuation of last year’s staff. The major position on the paper is now occupied by Rich Greb, Chosen 6. Rich began working on the staff as a fresh man and climbed up through the ranks of the news staff to the top position on the paper. The new EIC is the third of the last four editors to have come from the news staff. In addition to Rich, the only returning member of last year’s editorial board is John Mazur, feature editor. John was responsible for most of the articles on the International Planning Committee Report which were printed last semester.

New to the Board this semester are Frank Fischl, Editorial Assistant, and Rich Gross, Editorial Assistant. Frank has been on the staff three semesters, beginning as a reporter in his first semester. The Assistant Editor is Frank’s brother, Dan. The Editorial Assistant is Rich’s brother, John. Rich is also the only returning member of last year’s editorial board.

Returning for the second half of his one year term of office, John Gross, continues as business manager of Technology News.

The remainder of the staff, with some exceptions and additions, is returning to continue in their positions from last semester.

Commenting on prospects for the semester, Greb stated, “Things look good. The young members of the staff have been developing well, and I look forward to benefiting greatly as they gain further experience. I am looking forward to a year of accomplishment.”

Kilpatrick Lecture Series on Chemistry

Given by Guest Speaker, Ronald Bell

Kinetic isotope effects and the halogenation of organic substances is the subject of IIT Chemistry department series of five lectures by Ronald P. Bell. The lectures, began last Tuesday and will continue through next Friday.

The series, the Kilpatrick Lecture Series, is named in honor of the chairman of the IIT department of chemistry from 1959 to 1966, a period of considerable growth in the department. Bell, designated the Kilpatrick Honorary Lecture for the series.

AFROTC Authorizes New 2 Year Program

The Air Force ROTC has started a new two-year program here at IIT. The program was authorized under the AFROTC Widening Act of 1964, announced Maj. Leonard S. Brown, IIT professor of aeroscience and aviation.

“An expansion of IIT's AFROTC program and a new two-year ROTC program makes AFROTC available to all eligible students at IIT and returns requested.”

All the recruiting is finished on Jan. 31. Letters were sent to all eligible students at IIT and returns requested.

Also considered in selection into the two-year program was the Air Force Officer Qualifying Test, results of the Air Force

New IFC Council Officers Elected; Markwart Appointed IFC President

Elections were held last week in the last IFC meeting. After reports were read and old business was taken care of, the council moved to elections.

Elected to the position of IFC President was James Warrington from Alpha Sigma Phi. The new Vice-president is Stephen Hadar of Chi Kappa Sigma and treasurer is Nathan Krich of Alpha Epsilon Phi. The secretary is Rich Markwart of Triangles.

After the elections the Greek of the semester nomination was considered. The nomination is usually made by the BON and passed by IFC. This semester’s nomination is for Carl of Phi Kappa Sigma.

In new business, a report was read stating that the new building was being taken by the school to install campus phones in the fraternity houses for service charge only. This would enable any person to call the fraternity houses from anywhere on campus without charge. Also incoming calls could be taken on these phones from off campus.

Also considered by the council was an amendment to the by-laws of the IFC constitution on the participation in IFC intramural sports of fraternity members on probation.

The problem is stated by the school that no person in a fraternity on probation should be allowed to participate in any extracurricular activity outside of their house. However, the IFC constitution does not have any consideration for this fact.

The problem arose when a judicial board meeting received a complaint of persons participating in an intramural meet. According to Warrington, IFC President, a clarification of this matter must be made in the constitution.

Warrington continued, “One of the greatest problems that arise with this by-law is the enforcement of it when it passes. A constant check would have to be made of GPA’s and minutes, which would be a strain on the officers.”
The Sad and Touching Tale of Sorrowful Samuel S. Sponge

We have just met the most sorrowful character in the whole wide world. His name is Sammy Sponge, and he is an industrious student at our fine school. He is also going to have a nervous breakdown because of certain problems he's encountered in the last week.

For example, just the other day, he was staring in our office, telling us about the problems he had registering for classes this semester. It seems that he didn't know whether or not he had registered (or was it pre-registered) for the right courses in December as he had to confirm his registration before he had received his final grades from last semester. The normally helpful Registrar's office couldn't help him because the grade slips had somehow gotten so mixed up that they had no idea where they were.

When he finally did get straightened out, he was informed by the Registrar that he already owed a horrendous sum of money to the school for the coming semester. Someone had neglected to give him a “little pink slip” at pre-registration.

Well, everything turned out all right until he tried to go to his first class and found the room number had been changed without notification to anyone (including the Registrar, evidently). He cried that night.

You may wonder why Sammy has told us about his problem. The main reason is that Sammy doesn't know which way to turn.

He certainly could try his advisor except he doesn't know him that well, and feels that he may get into trouble with the Administration if he does talk to him. His advisor is too burdened with administrative detail to really take time with him any of his friends.

Even his friends can't help him because they are too involved with their own problems or too disinterested and ignorant about the school workings to be of any good to anyone.

Letters to the Editor

Dear EIC,

We are a normal group of IIT students who do attend and appreciate the Union Board Concert Series presented at the HUB. We do, however, have a marked preference for folk singers and groups. A few of us have heard a little-known duo perform in a small coffee house in a small city; the singers are John and Judy Gilmore. We would be very grateful to all concerned if they could arrange to bring this act to IIT as part of next semester's concert series.

Folk Music Lovers
ONCE MORE UNTO THE BREACH

Today I begin another year of writing the columns in your campus newspaper.

I want to start this week by saying that I am very excited to be writing for the students of the University of Illinois, and I am looking forward to spending the year with all of you.

I am also very grateful to have been given this opportunity to write for you, and I hope that you will enjoy reading my columns.

Thank you for your support, and I look forward to hearing from you.

Mike Smith
Managing Editor

Amateur Collegiate Folk Singers in Chicago Folk Festival at IIT

From all over the Midwest, amateur collegiate folk singing groups will be converging at IIT for the Chicago Folk Festival. The Saturday, Feb. 20, event will feature some fine talent, including several groups from the Chicago area.

The festival will open at 2 p.m. in the HUB, and the final concert will begin at 8 p.m. in the HUB.

The entries include: Overland Four, Purdue; Popcorn 3, Northwestern; Mickey and Peggy, Mendelev; Alaska singing group, University of Chicago; Crossroads, Iowa State; De Paul, McDB; IIT; Kankakee Trio, IIT; and Bryant's Boys, IIT.

Although all the groups are amateur, some have performed at school events, and even on radio and television. The entries include: Overland Four, Purdue; Popcorn 3, Northwestern; Mickey and Peggy, Mendelev; Alaska singing group, University of Chicago; Crossroads, Iowa State; De Paul, McDB; IIT; Kankakee Trio, IIT; and Bryant's Boys, IIT.

Perstein Speaks For Fall Class

Commencement exercises for the fall graduating class at IIT took place on January 29, 1965, at 8:15 p.m. in the C. H. M. H. hammersmith auditorium, with 292 graduate and undergraduate students receiving degrees.

According to Mr. Fred Eckford, IIT registrar, 187 of the total received bachelor of science degrees, 44 received master of science degrees, and 21 received doctor of philosophy degrees.

The commencement address was delivered by Mr. Harris Perstein, chairman of the board of the Board of Trustees, and a member of the IIT board of trustees since 1955. In his speech, Mr. Perstein complimented the changes that have taken place in the world of science and technology since his graduation from IIT.

Demonstration Planned For Calcomp Plotter

The IIT Computation Center may add a plotter to its complement of equipment and has arranged for a demonstration of a Calcomp Plotter in the Data Preparation Area in the Commons for Friday, February 19.

The plotter pen moves parallel or perpendicular to the strip chart edge and can draw straight lines as well as curves. It is driven by instructions on a tape recorded by a computer and IBM 7040 plotter. The program is written in programming languages and will include a demonstration of the plotter in operation.

Any organization which desires to use the equipment is invited to contact the director of the Computation Center, Mr. Blomquist, at the Center.

The Technical Drawing Department

The Technical Drawing Department is interested in branching into the automatic plotting field. Research departments are interested in using it to plot results of various projects, B & E is interested in using it for plotting of Systems Analysis, manufacturing characterization, and efficiencies.

The machine can be used either on or off line with the 7040 Computer. However, we do not have the necessary equipment to use the machine on the Computation Center.

The Technical Drawing Department
IITR Establishes Clean Water Research Center

IITR is establishing a clean water research center for conservation and improvement of the nation's resources of clean water at IIT according to an announcement made by Dr. R. H. Schutz, Director of IITR.

"Called the IITR Water Research Center, the facility has the objective of coordinating IITR's sponsored research activities aimed at more efficient utilization and purification of water resources," Schutz continued.

Named as manager of the center was Dr. Jack Bregman, assistant professor of chemistry at IITR. He is a recognized authority on air and water pollution control.

"Activities of the Water Research Center will be supported by IITR's experts in chemistry, physics, fluid dynamics, geophysics, instrumentation, computer science, life sciences, mechanics, and management research," Dr. Bregman stated. "The center will include a literature and information processing system.

Ice Breaker Sponsored By Newman Club

"Ice Breaker '65" is the theme of the Newman Club's dance tonight. Music will be supplied by the Twisters, a dance band, with more than 200 girls from neighboring nursing schools present in the Hur Ballroom.

One of the publicists present by the club was the drugging of an "Iceberg" through the Hur at noon today. According to Jerry Dilley, dance chairman of the Newman Club, "We would like to see the support of the fellows in the school. In the past more than the number of girls that we stated were present and the girls will have transportation supplied by the club and attendance is insured.

Admission is $1.00 for fellows and $1.75 for girls. The dance will start at 9:00 p.m. and end at midnight. Other members of the committee include Ken Fishler and Wayne Haddock.

Graduation was only the beginning of Jim Brown's education

Because he joined Western Electric

Jim Brown, Northwestern University, '62, came to Western Electric because he had heard about the company's concern for the continued development of its engineers after college graduation.

Jim has his degree in industrial engineering and is continuing to learn and grow in professional status through Western Electric's Graduate Engineering Training Program. The objective of the educational philosophy of this program are in the best of college education, designed for both experienced and new engineers.

Like other Western Electric engineers, Jim started out in this Program with a six-week course to acquaint him with the traditional functions of the business. He then transferred to the classroom to Industry. Since then, Jim Brown has continued to take courses that will help him keep up with the newest engineering techniques and applications.

Western Electric Manufacturing and Supply Unit of the Bell System

This training, together with formal college engineering studies, has given Jim the ability to develop his talents to the fullest. His present responsibilities include the solution of engineering problems in the manufacture of communication lines of copper, a component used to improve the quality of voice transmission.

If you are the highest standards for yourself, only a challenge, and have the qualifications we're looking for, we want to talk to you. Opportunities exist for electrical, mechanical and industrial engineers, and for those in the financial, legal, arts, and business fields. For more information, get your copy of the Western Electric Career Opportunities booklet from your Manager or Personnel Officer. And be sure to arrange for an interview when the Western Electric recruiting team visits your campus.

CAREERS IN STEEL

Our representative will be on campus

FEBRUARY 25

to interview candidates for Bethlehem's 1965 Loop Course training program.

THE LOOP COURSE trains selected college graduates with management potential for careers with Bethlehem Steel. The Course begins in early July and consists of three phases: (1) five weeks of orientation at our headquarters in Bethlehem, Pa; (2) specialized training in the activity or field for which the Loop was selected; and (3) on-the-job training which prepares him for more important responsibilities.

OPPORTUNITIES are available for men interested in steel plant operations, sales, research, marketing, accounting, finance, and other activities.

DEGREES required are mechanical, metallurgical, electrical, chemical, industrial, civil, mining, and other engineering specialties; also chemistry, physics, mathematics, business administration, and liberal arts.

If you expect to be graduated before July, 1965, and would like to discuss your career interests with a Bethlehem representative, see your placement officer to arrange for an interview appointment—and be sure to pick up a copy of our booklet, 'Careers with Bethlehem Steel and the Loop Course.' Further information can be obtained by writing to our Manager of Personnel, Bethlehem, Pa.

BETHELHEIM STEEL

An Equal Opportunity Employer
Metropolitan Studies Center Presents Two Part Lecture Program In HUB

"Chicago's Public Education—its Successes, Failures, and Problems" is the theme of a two part lecture program to be presented by the IIT Metropolitan Studies Center in the HUB Ballroom February 17 and March 3 at 8 pm.

According to Dr. Edward Levine, acting director of the Center, the series was planned with a three-fold purpose. First, Levine states, "we wanted the public to more fully appreciate the problems which confront the Board of Education. We also felt a critical view of Chicago's public education merited expression.

"Secondly, we wanted to present a series of lectures which would be of interest to all Chicagoans, to help them better appreciate and understand the problems of the public schools. Finally, we hoped to stimulate a more active public interest in the Board of Education and to provide a forum for public discussion of education problems."

"In line with this plan, the Center contacted Warren Bacon, a member of the Board of Education, Fifth Ward Alderman Leon Deitsch, and a representative of the Board of Education's administration. Despers and Bacon accepted the invitations to speak, while the member of the administration declined the invitation.

Bacon will speak on the "Problems Facing the Board of Education" on February 17. On March 3, Deitsch's topic will be "What Kind of Education is Chicago Entitled to Have."

Levine commented, "These public lectures will provide students, faculty, and members of the public, who are concerned about the quality of public education, with informative and challenging views of the accomplishments, problems, and vital challenges that now confront Chicago's system of public education."

Scholarship To Be Presented

This year's Julia Bevbee Scholarship dinner will be held on February 17 at the Armour Faculty Club. Mrs. Alice A. Gargano, chairman of the IIT Faculty Women's Club scholarship committee.

"Finally, we wanted to serve a representative of the administration of the Board to discuss the day-to-day operations of its operations which are not thoroughly understood by the critics of the system and by the public."

"In line with this plan, the Center contacted Warren Bacon, a member of the Board of Education, Fifth Ward Alderman Leon Deitsch, and a representative of the Board of Education's administration. Despers and Bacon accepted the invitations to speak, while the member of the administration declined the invitation.

Bacon will speak on the "Problems Facing the Board of Education" on February 17. On March 3, Deitsch's topic will be "What Kind of Education is Chicago Entitled to Have."

Levine commented, "These public lectures will provide students, faculty, and members of the public, who are concerned about the quality of public education, with informative and challenging views of the accomplishments, problems, and vital challenges that now confront Chicago's system of public education."

Centre Stage Overhauled: Student Director To Organize Productions

Center Stage has undergone a reorganization of its governing body. Instead of the previous system, a governing body of student directors and a faculty advisor has been instituted. The three co-directors are Francine Bocconewski, David Galpin, and Jerry Kirkpatrick, with Mr. Harvey Lands as faculty advisor and director.

"Finally, we wanted to serve a representative of the administration of the Board to discuss the day-to-day operations of its operations which are not thoroughly understood by the critics of the system and by the public."

In line with this plan, the Center contacted Warren Bacon, a member of the Board of Education, Fifth Ward Alderman Leon Deitsch, and a representative of the Board of Education's administration. Despers and Bacon accepted the invitations to speak, while the member of the administration declined the invitation.

Bacon will speak on the "Problems Facing the Board of Education" on February 17. On March 3, Deitsch's topic will be "What Kind of Education is Chicago Entitled to Have."

Levine commented, "These public lectures will provide students, faculty, and members of the public, who are concerned about the quality of public education, with informative and challenging views of the accomplishments, problems, and vital challenges that now confront Chicago's system of public education."

Seekers at the Greeks

Valentine's Day Stimulates Rash of Quadrangle Parties

Semester break usually means a mass exodus of students, not only from campus to homes, but to fun and sun spots around the country. Sig Ep Mike Hedges, Bruce Mace, Larry Schroeder, Ken Shull, and Northern Illinois U conferees Dan Marks trekked through New York, Washington, D.C., and Miami, while Sig Ep Jim Sharp and Paul Wright Scholar Werner Colenso of Colorado, arrived in Aspen, Colo. Sig Lambda in Buffalo invited a number of IIT students to their Greek."
**IIT Offers Program in Math For HS Seniors**

IIT's dept. of math is offering a Saturday mathematics program for high school seniors attending public and private high schools in the Chicago area. The purpose of the program is to supplement the mathematical background of talented students interested in mathematics.

The program consists of lectures and discussions on topics of contemporary mathematics. Topics include number systems, groups, vector spaces, matrices, logical systems, and modern geometries. Students are also encouraged to do independent reading and to participate in science fairs.

Dr. Haim Reingold, chairman of the department of mathematics, is the originator and director of the program, and Dr. Arthur Fine, Assistant Professor of Mathematics, is his assistant.

Dr. Reingold stated, "This program is quite unique in that it is the first and only one of its kind in the entire country. A similar program is now being developed in New York."

---

**IIT Attacked At Night?**

I walk across campus. It is night. My realm is changed by darkness. I live here, I belong. Yet from the darkness come swirling shapes that are never seen by light. Swarms larger than the boards that crucify the campus grass by day. These are the night students.

Night students: that breed which works by day and enters IIT by night to pluck 7 or 9 or 12 credit hours of knowledge from the heavily hinged branches of the school.

Tech has a bustling existence, but that bubble rises from the day, from the full-time students who live for their life at school. These are the ones who plot the movies, the programs, the interactions that is the pulse of IIT. It is the call of Tech. They are the interlopers. Perhaps it is unreasonable, but I raise an intrusion. I mean them.

---

**Ford Motor Company is:**

**variety**

It's been written that "variety is the spice of life." But at many companies it's difficult to obtain a wide range of work experiences. A college graduate can join a company, get locked into one type of activity and stay there, and stay there, and stay there. That's not the way we do it at Ford Motor Company where we have many young men and women in several areas to develop their full capabilities. We believe that a thorough grounding in many phases of our business is one of the best ways to cultivate management talent. An example: Bob Anderson, our finance staff.

Since Bob came to us in July, 1981, he has been involved in five important areas of the Company. As a member of our finance staff, he has reviewed budget and cost programs of a division marketing area, another manufacturing work area, and subsidiaries engaged in automobile financing and insurance. In addition, Bob was selected to assist in the 1984 National Labor-Management Negotiations. His present assignment is on a staff budget analyst for produce engineering and styling. Because of experience like this, Bob will be able to channel his career toward the activity that interests him most.

As a large automobile concern, Ford Motor Company needs people who can handle a wide variety of assignments. Our college graduates come to us with all types of educational backgrounds. And many of them move into management positions unrelated to their degree. If a fast-moving career appeals to you, see our representative when he visits your campus.

**IIT Receives $10,000 Grant From Standard**

Ten thousand dollars was the amount of an unrestricted grant received early this year by IIT from the Standard Oil Foundation, an organization financially supported by the Standard Oil Company of Indiana.

T. G. Hanley, the representative of the foundation, who presented the $10,000 gift, said the grant was made to IIT as a leading educational institution noted for its general excellence, its contributions to national life, and the quality of its graduate education.

John E. Swerling, foundation president, commented on transmitting the grant, "We are placing no restrictions on the use of the funds granted as long as they are spent currently to improve education and not used for endowment purposes. They may be applied wholly, or in part, toward research, faculty salaries, libraries, training teachers, operating costs, building programs, or any other purpose desired."

---

**NASA Awards Research Grant For Rocket Plan**

The National Aeronautics and Space Administration has presented a $45,000 research grant to IIT. The grant, according to Dr. Max A. Elliot, vice-president for academic affairs, is for research on a gaseous-core nuclear rocket.

Caltech has first to the development of a nuclear rocket. The rocket will travel three to five times the speed of present rockets, according to Dr. Max A. Elliot, assistant professor of chemical engineering at IIT. Weinstein, one of the principal investigators in this project, co-authored the first paper on one of the gaseous-core nuclear rockets.

Weinstein further stated that two basic differences exist between gaseous-core nuclear rockets and the conventional chemical rockets in use today or prototypes of solid-core nuclear rockets now being developed. Gaseous-core rockets depend upon nuclear rather than chemical reactions to provide required energy, and the melting point of solid materials is not at the limit of propellant temperature. This suggests that the gaseous-core rockets can achieve speeds far greater than conventional rockets because the higher the melting point of the propellant, the faster the rocket travels.

Construction Complete On Campus Projects

Thirteen construction projects have recently been completed on the IIT campus, with two additional projects to be started in the near future.

Also completed is the second substation of the electrical distribution system, which is housed in the Economics-Mechanics building. It went into operation on January 29.

The Institute of Gas Technology has begun to move into its new building, which has an on-site generator to furnish its own electricity.

The new men's residence hall is coming along on schedule and should be ready for occupancy by June 1966.

The tunnel construction of the 22 story IITRI tower has fallen behind schedule, although the outer skeleton is almost completed. Accused for the completion of the two tunnels to be built under State street are to be started, according to Walter F. Pardue, superintendent of building and grounds. The two tunnels will

IBM
Techawks Upset Wisconsin’s Best,
But Are Routed in 7 of 10 Games

Since Tech News last went to press, the ITT varsity basketball team has played no less than 10 games, coming out on the short end of 7 of those encounters.

The first of these games is a 93-86 defeat over the University of Wisconsin at Madison. The Techawks lost the game 86-81, despite leading by as much as 12 points early in the first half.

The second game was a 102-74 loss to the University of Illinois at Urbana-Champaign. The Techawks were outscored by 28 points in the first half and never recovered.

The third game was a 111-88 loss to the University of Michigan at Ann Arbor. The Techawks were down by 20 points at halftime and could not come back.

The fourth game was a 127-99 loss to the University of Minnesota at Minneapolis. The Techawks were outscored by 28 points in the first half and could not come back.

The fifth game was a 149-102 loss to the University of Iowa at Iowa City. The Techawks were down by 57 points at halftime and could not come back.

The sixth game was a 163-115 loss to the University of Wisconsin-Madison at Madison. The Techawks were down by 128 points at halftime and could not come back.

The seventh game was a 185-150 loss to the University of Illinois-Urbana-Champaign at Urbana. The Techawks were down by 135 points at halftime and could not come back.

The eighth game was a 207-178 loss to the University of Michigan at Ann Arbor. The Techawks were down by 129 points at halftime and could not come back.

The ninth game was a 229-202 loss to the University of Minnesota at Minneapolis. The Techawks were down by 227 points at halftime and could not come back.

The tenth game was a 251-224 loss to the University of Iowa at Iowa City. The Techawks were down by 227 points at halftime and could not come back.

Techhawks Capture First Mat Victory

That’s right! It was ITT 36 and Wilson Junior College 20. After losing their opening four matches, Tech’s members redeemed themselves by shutting out the visiting Wilson College team 36-0.

Starting Tech on their way was 123-pound Ron Otski, winning his first match. Following him was Doug Steer, who recorded the first pin of the day.

Commuters on Top Following Double Win

In Intramural Basketball action, the Mat Eng team edged the South Dorm, 26-24. Les Luck and Clint Cline led the victors with nine points each. The South Dorm was only able to score 24 points.

The official match was followed by two exhibition matches between Bill Cook and John Bruschat, who both scored 10 points.
