ATTENTION CLASS OF 71

Members of last year’s graduating class are all receiving the following letter. This letter is being mailed to all former students of Armour Technology Institute.

The purpose of the letter is to invite the members of this class to a reunion at Armour Technology Institute. The reunion will be held on [date].

PICTURES BY WIRE ILLUSTRATED AT A.I.E.E. MEETING

The large image of a boy on a bicycle, taken by A. E. E. E. Meaking at the A.I.E.E. meeting held in [location], has been reproduced in our issue.

New Men Pledged to Tau Beta Pi

Eight new men were pledged to Tau Beta Pi, honorary engineering fraternity. Since the selection was based on their academic achievements, the new members will be initiated at a later date.

CIRCULAR CLASS HELD IN ROOM B

The Circular Class, usually held on Wednesdays, is planned for the current semester to provide students with opportunities to discuss and share ideas on various topics.

Circular Class Meeting

The Circular Class meeting was held on [date]. The meeting was attended by [number] students.

New Laboratory to Be Made Available

A new laboratory will be available for advanced science and engineering students at Armour Technology Institute.

Fire Protection House Address by Engineer

The numbers of the Fire Protection House Address by Engineer are: [address].

Students Invited to Acetone Conference

A conference on the topic of acetone was held at Armour Technology Institute.

Jewelry Committee Plans to Show Rings

The jewelry committee plans to show [type of jewelry]. The show will be held on [date].

Senior Jacksons Have Latest Improvements

The senior Jacksons have made improvements to their jewelry. The improvements will be showcased at the upcoming show.

Six Men Pledged to Pi Tau Sigma

Six new men were pledged to Pi Tau Sigma, a fraternity of engineering students. The new members will be initiated at a later date.

Senior Class Dance Planned by J. C. Casey

The senior class dance will be held on [date].

New Edition Was Tribute to Late Dean C. I. Palmer

Dean C. I. Palmer was honored with a tribute at the recent convocation. The tribute was held in his honor.

ON FACULTY SINCE 1922

Dean C. I. Palmer was on the faculty since 1922. He was a respected and beloved teacher at Armour Technology Institute.

Senior committee on Photography is Busy

The senior committee on photography is busy preparing for the upcoming photography competition.

Four Men Pledged by Phi Lambda Upsilon

Four new men were pledged by Phi Lambda Upsilon, a fraternity of engineering students.
The Slapstick
Clown to the "Slapstick," let the Slapstick fly by itself.

To a Freshman
Why do you want to wear one of those
Cocked on top of your head?
You know it looks like a lot of fun.
That act is thought as they wear it.
A freshman is bad enough.
He's too hard, honestly enough, look at "his" girl's hair.
Unnecessary teasing of the freshmen was
Toward me, making gentle and peaceful as he is.
So what is the difference? Who knows or cares.
-Jacques P.-

Thank you, Keppie, you're right as usual.
You're right in a complete analysis of what to blame.
And one even newer seven, Buddah Diller, has been out.
That one Mr. McLean has applied relate theory to McLean.
And is now trying to revitalize his radio group that
This only proper result of the devolution of the velocity
of an electron to place a point within the vacuum.
This kind works original (to say the least).
You are to be informed of the results if you are.

To the Bungo/O:
Would like to know what you plan to use for our -
Use then, you will be able to make a point in the
[Paragraph continued]

Rutles, Keppie, you're glad to get your opinion.
No one knows every year you are and we are glad you are.
We had somebody started the Bungo tomorrow;
Very strange idea, didn't it? As far as we can
I mean you are.

As to an additional comment: we believe the Bungo
Quarterly is inadequate, including but not substandard.

_TRANSLATOR, old man, you've got to—

At least very few of you are as we are by now.
You had to be somewhere, Breughel has had its application
It has been accepted or even the most famous international to

_Potter's_ starts with a clean slate.
He starts with the first page of the last issue, unfortunately.
It was to the best of our mind.
Somehow, it ends up with a good deal of information.
And then theть role up his sleeves.

Vested: Basketball Bachers
There has been considerable discussion at various
Times on the part of both the football team of
Armour. If the intensity of the interest shown is
Equal to the number of members of the team,
That would turn out for the—of the—

Anyone who has given thought to the matter should know that the
Game is in a large percentage of the times of the football game.
Yes, we can say that a high percentage of the times of the football game.
We can say that a high percentage of the times of the football game.

The Theatre

ONCE IN A LIFETIME

"This is the last week, according to present plans, of "Our American Cousin" at the Globe Theatre..."}

Singers and Strains

Rehearse Every Wed.

"Singers and Strains, Armour's orchestra, will rehearse every Wednesday at 3:30 p.m. at the armory.... At present the organization includes six singers, two trumpets, two trombones, two violins, two violas, a bass, a clarinet, a cornet, and an organ."}

Freshest and Flavor in a cigarette trace right back to natural moisture.

If you overheat or process tobacco so harshly as to dry out all natural moisture you drive out freshness and flavor too.

Cameo never parched or toasted! Just as fresh as the day it was manufactured.

R. J. Reynolds Tobacco Company's CAMEO TOBACCO

R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

Made FRESH - Kept FRESH

That's why the CAMEO Humidifier Pack proves such a blessing to CAMEO smokers - it brings them a fine cigarette fresh to start with, and fresh to smoke. If you don't realize what natural moisture means in genuine freshness and flavor, switch to CAMEO and see.

Try this mild, slow-burning, throat-friendly favorite for just one day - then leave it, if you can.

R. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N. C.
HEAT INSULATION SUBJECT OF TALK
GIVEN A. S. M. E.

Professor Fobbes Gives Descriptive Lecture

Last Friday, Professor Fobbes, of the A.S.M.E., talked on the subject of "Heat Insulation." He devoted his address in part to the description of various types of insulating materials which are available. He explained the difference between those materials used for the construction of walls and those used for the insulation of chimneys and the structural design of buildings.

There are three forms of insulation, which are: bat, blanket, and type. A bat is a roll of material which is wound around tubes and the like. A blanket is a piece of material which is used to cover pipes and the like. Type insulation is used in the construction of buildings.

Hair felt, a by-product of the packing industry, is a good insulating material, but it is very expensive. Other common insulating materials include rock wool, asbestos, and straw. Straw is often used as an insulating material in buildings and is sometimes referred to as "straw wool." This material is said to be more effective than the other two in reducing heat loss.

Another common type of insulation is rubber, which is used for pipes, and rock or mineral wool. All of these are placed in the space between the studs. The insulation is then covered with drywall or plaster.

The insulation is also used in the walls of buildings. The type insulation is generally placed in the walls, after which a sheet of plastic is formed to the surface. The insulation is then covered with drywall.

Thirty Attend Drama Club's First Meeting

(Continued from page 4) It is hoped that it will be the first of many such meetings, and that the club will grow in size and interest. The meeting was attended by thirty people, including the students and the teachers.

Ticket sales for the upcoming play will begin shortly, and it is expected that the play will be a success. Tickets will be available at the door, and the proceeds will go to the Drama Club.

Cigars New Sold In Smaller Packages

Dr. Scherrer to Talk About Masterpieces

Dr. Scherrer delivered an illustrated lecture on Paris to 11:30 (10:30 last Friday). This is one of a series of lectures on some of the principal cafes of Europe. Others on Les Halles, Rive Gauche, and other cafes of popular interest will follow.

Anyone not a member of the club in Great Loom is invited to attend these lectures. They are held practically every Friday at 11:00 in the Assembly Hall.

A lecture on Italian masterpieces will be given recently, and those who wish to attend will hear about masterpieces of painting of the Dutch, English, and French masters daily at 12:30. This lecture is also illustrated. Watch the News for announcements of coming lectures.

"It's toasted on Lucky Strike"

There's nothing like a microphone to show up the voice in its true colors. So insist on Lucky Strike—the cigarette that has made an end of boredom.

And you've certainly scored another hit with your new style Callophone wrapper that opens so easily.

Sally Cullen

Sally Cullen is always on the big hit. First, she learned to fly a plane, and sent her friend by cable from an island named by the Government.

But you've certainly scored another hit with your new style Callophone wrapper that opens so easily.

TUESDAY, NOVEMBER 15, 1931

Alphonse Joseph, a well-known authority on tobacco, has been serving in the U.S. Army for over twenty years.

His researches have been directed toward the problem of creating a cigarette that is not only pleasant to smoke, but also beneficial to the user's health.

Alphonse has been working closely with the military medical staff to develop a cigarette that can improve the health of soldiers while they are on active duty.

He has been working on this project for over a year, and has spent many hours in the laboratory perfecting his formula.

Alphonse's researches have been funded by the military, and he is currently employed by a tobacco company as a consultant.

Alphonse's work has been widely praised by other experts in the field, and he is considered to be one of the leading authorities on tobacco today.

The government has made it clear that they want a cigarette that is not only popular with soldiers, but also one that can improve their health.

Alphonse's researches have shown that the new cigarette can do both.

The new cigarette has been found to be less harmful to the lungs, and to contain fewer harmful substances than traditional cigarettes.

Alphonse has been working on this project for over a year, and he is currently employed by a tobacco company as a consultant.

Chemicals Visit Filtration Plant

In order to continue the inspection of works at the new plant for the junior chemists visited the filtration plant of the First-high Pressure Co., in the city of the town where they stayed. The plant was equipped with the latest in filtration technology, and the chemists had the opportunity to see firsthand how the water was treated to make it suitable for consumption.

The various problems connected with the treatment of water for the removal of suspended and dissolved substances were explained by Dr. John H. Barr, S., who was in charge of the treatment plant. Every step in the process of water treatment is being closely watched and studied. After these, the finished water is taken to the treatment plant at the city.

Miss Own Farms

This plant has a distinct advantage in that it is able to create its own power. A sample of waste water is filtered and treated for use in the plant's processes. The treated water is then used to power the plant's machinery.

Chemical Basketers

Battle for Trophy

The Junior Chemists' basketball team lost to the Senior Basketers in a close game, losing by a score of 51 to 50. The Senior team was able to hold on for the win, despite the junior team's efforts to come back in the final minutes.

Despite the loss, the junior team showed great spirit and determination. They were not about to give up easily, and their efforts were rewarded with an invitation to a tournament against other top teams in the region. The next game is scheduled for next month, and the team is looking forward to the challenge.

Inquiring Reporter

Question: How do you like the sample similar to duck on display in the shop?

Slight E. Schraefer, M. S., 23: I have eaten it once before, and it was not the duck I liked, but the soil, which was brown in color. I think it is a bit too light in view of the general range of prices.

E. W. Gardiner, E. M., 23: Although Armour's food looks under the market distribution, the idea of hiring them is fundamentally sound.

Alton J. Jaynes, M. S., 22: I have eaten it before, and it is a bit too light for my taste. It is in the best arrangement of dishes I have ever eaten.

R. W. York, M. E., 32: Considering they price, the pies are excellent.

F. A. Usony, M. E., 32: The design is different from anything I've seen recently except for the tones and color of the ingredients.

E. P. Williams, M. S., 32: I think the color is all right, but it is too heavy and it sits around here.

A. R. Bogen, M. D., 23: They are good, but I think they are a bit too sharp for me.

S. J. Sorensen, C. S., 22: Everything goes on the except the bread.

J. J. O'Connor, M. S., 32: I am very well pleased with the results as it appears on the sample. It is the best quick snack I have ever had around here.

A. J. Bogen, M. D., 23: It is too sharp and too hard for me. I think it is too sharp and too hard for me.

E. W. Eakin, M. S., 23: O. K. But except for the meat and the pie, we have the same.

Kingdom Circle

Used by Senior Civil

The Kingdom Circle is a group of students who have been invited to participate in the annual science fair. The group is made up of students who have excelled in their studies and have shown a great interest in the sciences.

Junior Chemicals

Rush the Library

Beau-beau days are near the corner for Miss Biste and her library attendants since the Junior Chemicals have started work at the library today.

Each book received comes up with something very nice for Miss Biste. They would resemble furtive for a while, but the novelty is soon lost.

Meanwhile, the library department is busy preparing for the annual science fair. The Junior Chemicals have been working hard to gather as many books and materials as possible, and the library is looking forward to showcasing their hard work.

KEEP KISSABLE

WITH OLD GOLDS

It's not only good manners to avoid offending others with your smoking. It's good sense. The best way to insure your own enjoyment.

For the same reason that OLD GOLDS do not irritate the breath, or disgorge the teeth - for that very reason OLD GOLDS are a friend smoker...easier on the throat and more delightful in taste.

Pure tobacco...that sums it up. Sun-cured tobacco...sweetened by nature herself. Tobacco so good it needs no added flavoring.

If you'll take a dare...and try natural-flavored OLD GOLDS for a day...we predict OLD GOLDS will win another life-long friend.

NOT A COUGH IN A CARLOAD

NO "ARTIFICIAL FLAVORS" TO TASTE THE BREATH OR BE KNOWN TO THE TEETH...NOT A COUGH IN A CARLOAD

Glee Club Rehearsals

These were introduced a new selection to the repertoire in the last meeting of the Glee Club. It is an all-new favorite called "Highway Lad's" which in the last column has the lead.
**GRIDIRON QUERIES**

By Professor J. S. A. Smartphone

Editor's Note: Professor J. S. A. Smartphone, star player, star coach, and leading football author, has received several questions on football which are of interest to footballers. Questions are entered in the December St. Louis News, which cannot be made to the column at the time of the game itself. However, Professor Smartphone will write about them in his next column.

Noh. 9—Sigma Epsilon Tau, Delta Delta, and Eta Chi. Several readers have discussed the matter of the name on the playing field. The name of the school will be posted on the field, and it will not be changed.

**FOUR AND FIVE FOR ARMENIAN BASKETBALL TEAM**

The Armenian Basketball Team, which has been invited to attend the basketball tournament in Los Angeles, has been informed by Coach N. C. Koff that they will be able to participate in the tournament. The team will be selected from the Armenian students at the school.

**TECH SHORTS**

60th Anniversary

With this issue we celebrate the 60th anniversary of the TECH SHORTS. The Tech News is also happy to present a special page to the alumni association. Next month, in the school magazine, we will feature the Tech News, which has been in circulation for 60 years.

The fundamentals of the game are the same: the cooperation of all team members for the success of the team. The game is played by twelve players, and the object is to score points by making baskets. The game is played on a rectangular court, and the players are divided into two teams. The game is played by throwing the ball into the basket, and the team with the most points wins.

**LIT OFF THE BOWLING BALL**

I liked Chesterfield right from the start.

I don't like a tobacco that is not pure. And then I've heard that the blending is very important. I want that to be done just right.

Then the paper. I don't like paper because you can't read very well when it's burning. I want that to be pure too.

Another thing. I want to smoke when I want to smoke. There's nothing better about smoking too much. So I want my cigarettes to be mild.

But the main thing, of course, is TASTE. I don't know about you, but I like those that have a very pleasant flavor.

Chesterfield seems to satisfy in every one of these ways. That's why I'd rather have a Chesterfield.
