Pandemonium Rules on Quad
With Greek Week Festivities

A tug-o-war, water fight, dragon race, soap box derby and sprint, skateboard contest, and watermelon-eating contest were among the highlights of the annual Greek week, sponsored by the Interfraternity Council.

The week of April 13 consisted of a variety of interfraternity competitions in events normally not based on varsity or intramural schedules. The climax of the week was a dinner held in the Greek Week is being offered with the assistance of the Alpha Sigma Phi. The dinner was scheduled for 9 p.m. in the HUB and co-sponsored by Mundelien College and Wiley Nursing School.

The feature fund is the New Colony Six. They have made several trips to the city, including the second highest number of matlives. Alpha Epsilon Phi proved to be the gourmets in the strawberry, roast chicken, and salad. Wally Kemp, Ross, Jas. Kallen, of HJT, quarterback, Jeff Jones, and Craig Kemp, organist. The legends of HJT will provide fast music during the New Colony Six's show. The Tech Dance Band will provide slow tempo in the molasses.

Hellaballoo, New Colony Six, Hoot Highlighted in Spring Spectacular

Kenneth Keating To Lecture On Population, Human Rights

Kenneth Keating, former member of the House of Representatives and Senator from New York, will present a lecture next Friday, May 5, at 8 p.m. in the HUB.

Kenneth Keating, who served 12 years as the representative from New York's 40th Congressional District, will discuss The Population Crisis and Human Rights. This lecture represents one of the most important and timely topics presented to students, Keating is considered a specialist in human rights.

Kenneth Keating has worked extensively with judicial and immigration problems, and with the Cuban situation. Presently Mr. Keating is serving as Associate Judge of the State Court Appeal. He began his political career at the end of his military service as colonel in the Far East, by his election to the House of Representatives in 1946. He served six terms in the House and was a member of the House Space Committee. He is a member of the University faculty of the University of the District of Columbia. In 1953 Keating was elected to the Senate, where he served until 1964.

In August of 1961, Keating presented a parade of new speeches which have made him famous. In his speeches Keating supplied facts and figures of the massive Soviet buildup in Cuba. It was his reports when confirmed that resulted in the dramatic confrontation of the Cuban Missile Crisis.

Groundbreaking for Gym
To Be Held Parents' Day

The groundbreaking ceremony for the new gym will take place at 4 p.m., Sunday, April 24 at the intersection of Hearn Avenue and West 32nd Street. A 3,000-square-foot building will be dedicated.

Senior Class Pickens 7
For Farewell

John Brown, who has performed in Old Town, will be featured at Hoot and Jazz Show. Jazz will be provided by Bill Tonning and his group.

Free bowling and billiards will be available for couples in the recreation room. The Oriental Room will be another feature of the Spectacular.

Tenth Annual Parents' Day
Scheduled for This Sunday

Tenth Annual Parents' Day will be held on Sunday, April 16 at 2 p.m. in the HUB. It opens its doors to the oldest generation Sunday as it presents the tenth annual Parents' Day. A variety of events are planned to inform and entertain visitors.

Officials will be on the lookout for a special opportunity to answer questions about the school's services and the students. Faculties members will be available in various locations.

At 2:15 p.m., there will be a discussion of "What to Expect from your son or daughter's first year in college" in the Hermann Hall Auditorium. At 3:15 p.m., Dr. Martin A. Elliott, vice president for academic affairs, will speak on "Enrollment for a Technological Age." Also in the auditorium.

Registration will take place from 11:30 a.m. in the lobby of the HUB. Following registration, parents will be sent to the reception area at the HUB. A reception will be held from 2:15 p.m. to 3:30 p.m. in the HUB ballroom.
France Actually Benefits From NATO Withdrawal

In recent times Charles De Gaulle has received from Americans more criticism and derision than any other Western leader. However, viewed from a French-centered value system, his behavior has been, in the main, logical, consistent, and well justified. Certainly his withdrawal from NATO may not be in our best interests and is definitely not in the best interests of the organization. Consequently, De Gaulle is subjected to much emotional abuse.

But France as a nation will gain significantly from this move. The advantages are quite simple to enumerate. She will no longer have either a troop or material commitment to NATO. Yet, should an attack ever come on the ground, it must include Germany, a NATO member, and France would be forced into defensive action without being continually required to support it.

If France is somehow attacked separately, there can be no doubt that the U.S. must come to her aid no matter how strained relations have been in the past. We could not afford to let a Western nation of France's stature be intimidated and must help her defensively, just as it was necessary to aid India in her recent dispute with China.

Thus it seems that France loses very little deterrent force in withdrawing from the organization. Furthermore, she also gains in that her foreign policy is no longer so strongly tied to and subservient to U.S. policy.

As a non-member, France also eliminates the risk of being tied to a collective decision which is not in her best interest.

Such a position on the part of France or any nation is of course reprehensible to us because we are being successfully taught the advantage of and can do very little about it within our present policy objectives.

Unfortunately, other nations are not required to accept our moral judgments, and indeed, within the rules of the game, nations usually find it necessary and desirable to take advantage of their fellows.

IfC Is Finally Becoming Active; Lacking Direction, Organization

Unfortunately, the Interfraternity Council always seems to be open to a large amount of criticism from many sources. Taking a critical view of IFCS this year, one sees many inconsistencies.

For the entire semester the College has heard the echoes that IFCS is truly active and has come alive after lying dormant for a while. The Council is quick to point out that they brought back the IFC Song after a two year absence, and the event filled the Auditorium. Also of note is the fact that IFCS is publishing Aspect, an all-house monthbook.

The Council is also in the process of setting up a fraternity tutoring program for grade school children of the area. IF Sports have, on the whole, been quite good.

Next we come to Greek Week, the College sponsored off-program of Greek Week. In all honesty, was a huge success, in that all the houses participated in all the events, and the competition was quite close. Despite this, however, the week's events were rather disorganized, and for the most part lacking consistency and competent officiating.

Finally, we turn to the Cancer Drive. The American Cancer Society asked the Council if they would participate in the drive as the houses had done in the past. The Council agreed and the event was made part of Greek Week.

Each house was required to have 50 percent of its members participate.

Participation in the event was thus decided by the members of the Council. One year the night of the drive IFCS conveniently scheduled a meeting so the Council members didn't have to (or apparently want to) participate in the event they committed the houses to.

Unfortunately (for both the Cancer Society and IFCS), on the night the drive was scheduled, rains were heavy, and the event had to be postponed.

The drive was rescheduled for the next day of Greek Week. Primarily because of this reason, few of the houses seemed to feel their obligation to the Cancer Society still existed.

The time was ripe for IFCS to show how strong they are and prove the Council right or wrong. In two hours, the houses sent out 16, and two of the houses sent none at all.

The Council has run into one other problem. They seem to have run substantially over their budget. So much, in fact, that they had to levy an assessment on each of the houses of $1.00 per man.

Maybe we are being too critical of IFCS. The answer lies in a true analysis of the time and objectives of the Council.

For now one thing can be said; The Council is active, and is moving in the right direction, yet, there seems to be a lack of organization, and no clear picture of how to best assure success.

Letters to the Editor

Dear Editor,

Monday, I found myself barred from the IITRI cafeteria. I cursed them for letting popular food go to the head, then grudgingly made way to the HUB.

After eyeing the fare, I almost decided to forget about it and head for the end of the line at the HUB. I snapped at the cashier, "Why is the IITRI cafeteria so much cheaper?"

She patiently explained, "IITRI subsidizes their food services. We enjoy no such subsidy. Often the whole mess goes into the red."

Sighed. I headed for a table and thought, "Whole mess... no wonder they don't know if you're going to eat in the HUB, the HUB or the IITRI cafeteria."
The Commons cafeteria. The Commons cafeteria seems, well, vestigial. Why not eliminate it and open the budget during the day?" Then the Book Store could take over the cafeteria space, stock and sell enough, maybe, to compete with the Loop. Then maybe they could find yet another doctor, preferably with a different lunch hour, and expand the Medical Center into the existing Book Store.

Alas, out of my fog I thought, "'Nah, it'll never fly."
But to those of you who like me, find your beer money and disposable tract strained by recent discrimination at the IITRI cafeteria, I say forget the good old days. Food Services is too smart to allow that again.

John Shabat

Editorial Board Favors Proposal To Dismiss School for 2 Days

There is presently being circulated a petition for dismissal of classes on May 26 and 27. This petition seems to me to be worthwhile and not simply from the fact that it gives the students more time in preparation for their final exams. I know that their are those who will use the extra days to go to the beach, drag races, or just plain goof off. I feel, however, that the additional time will be used more for study by the majority of students.

Most of the instructors at this school do not grade on a curve but use an absolute or semi-absolute system. For these courses the additional time will be extremely beneficial. Also, many instructors grade on improvement and a good final exam grade can salvage a respectable grade in a course in which one has been doing poorly all semester.

With the growing importance placed on academic standing and grade point average, this school and draft deferment, the time will be well used.

I would like to encourage all who haven't signed to do so. The petitions are presently being circulated over the entire campus, just ask around.

Also I would like to encourage the administration to approve this measure.
Election of Class Officers To Be Held on May 17, 18

Applications for class officers for 1966-67 are now available in the Dean of Students Office. These applications must be returned to the office by 5 p.m. next Friday. The order of the candidates on the ballot will be determined by the order which the applications are received. Class officers will be elected by their fellow students Tuesday and Wednesday, May 17 and 18. Positions open are president, vice president, treasurer, secretary, and social chairmen of the seniors, junior, and sophomore classes. Four polling places will be strategically deployed for the election. They will be located in McCormick lounge, a freshman house, the HUB, and Crown Hall. To facilitate voting by archit ecture and ID students, the polls will be open from 11 a.m. to 2 p.m. and from 4 p.m. to 6 p.m. on both days.

All eligible candidates will be notified concerning campaign regulations. Speeches and pictures to be printed in Technology News are due by May 9. Campaigning must cease by May 12.

Paul Gordon, Elections Committee chairman, commented, "I hope all students will realize the importance of this election and vote. I will try to distribute information on the preferential system of voting so that more students will understand how it works."

Information on the preferential system will be printed in the next issue of Technology News.

Rettialata Institutes A Faculty Incentive

President John Rettialata will give the first award for excellence in graduate teaching at the end of this semester. Nominations may be submitted by any student organization, individual students, faculty members, or department chairman. There is no set nomination form, but each nomination should contain a statement of support for the job.

Sinfonietta Presents Free Concert Sunday

The Sinfonietta, under the direction of Armand Baker, will present a free concert at IIT on Parents' Day at 7 p.m. The concert will be held in the HUB auditorium.

The program will feature both classical and semi-classical works.

Walden Strings Four Presentation May 8th

The Walden String Quartet will present a concert of chamber music and contemporary works on May 8, at 3 p.m. The quartet was founded in 1941. They have appeared as soloists with the Cleveland Orchestra and at leading music festivals in this country and abroad. They were featured artists at the Columbia University Festival of Contemporary Music. The public is invited to attend this concert. The HUB has a summer concert series sponsored by the Arts in Residence.

The Walden String Quartet

"A building full of exotic animals, big buildings, big grass, huge parade, ferocious tigers, biggest long hair dogs, monkeys, oblige, bears, and others. ANIMAL WONDERLAND, 1960 6th Avenue, Cicero, Ill., 60655"

VOLUNTEERS ARE NEEDED

in an after-school center in the Wallis-Darrow housing project near campus, individual and group work with children are conducted Monday through Thursday from 3:30 to 5:00 p.m. and on Tuesday evenings from 6:00 to 7:00 p.m. The project is supervised by Gayle Janiwits. Transportation is available, and there is a two-hour commitment of time once a week. Applications are available at the following: Office of Student Affairs, 255-1277, in the evening. For further information, call 255-4027.

AXE Will Hold Conference On Vocations in Chemistry

"Chemistry and You," a conference on careers in chemistry, is planned for Saturday, May 14, in Herman Hall and the Chemistry Building. It is the second annual conference of its type to be presented by Alpha Chi Sigma, the professional chemical fraternity.

The conference is designed for high school students desiring information about chemical and chemical engineering professions. The program includes speeches by HU professors Dr. Peter Lykos, Dr. Robert Filler, and Dr. Octave C. Lengyel.

Also on the agenda are tours of HU's chemistry and chemical engineering facilities and a movie provided by the chemistry department.

There is no admission charge for the conference. 200 people are expected to attend.

Brubeck Performance Great, Sell-out Crowd in Hub—Fox

by Jay Fox

The Dave Brubeck Quartet played to a sell-out crowd last Saturday night in one of the finest concerts offered this season. Listening to Brubeck was an experience in diversified jazz performed by the master of his trade.

The group opened with "St. Louis Blues," and featured each member of the quartet. Each man is second, if not on top, in the major jazz polls taken each year, e.g., the Playboy poll and Downbeat awards.

Merrill was, as usual, at his best, and still remains the best drummer around as the polls of the last few years have confirmed. Indications and so it was the best performing in the best group in the country for their tenth straight year.

The "Take Five" exemplified the diversification of Brubeck and his ability to feel jazz in anything. It's impossible to remain indifferent to jazz; you feel it, and Brubeck really came across.

In the last three years that I have attended Brubeck concerts, I have noticed that the sounds have mellowed somewhat. "Take Five" really needs no comment, if you were there, there is no more to be said. Bill Evans once said that he couldn't describe jazz, you had to listen to it. Well, that's the way Brubeck went.

The Image

by Janet Fox

We were made for violence.
Created in the image of the hurricane.
The flood, the fire, the driving rain.
Mindlessly using the best of ourselves.
To find new methods to destroy.
The little world—This clockwork toy.
Wound up one day in a pleasant mood.
We're taking it apart now. He is hot.
Finding out the who and the how of it.
And never thinking of the question: Why?
When we were given life and breath.
We were conceived in the image of death.

Evening

by Janet Fox

Against the blue backdrop of dusk.
A milk-pale moon.
White as my two hands.
Flowers above the belly buttons
Like a dancer in flying sails of silk.
Peck Comments on Growth, Development of Chem Eng Dept.

by Bob O'Connor

ITT has long held a distinguished position for its chemical engineering department. This is attributable in good part to the director of the curriculum, Dr. Ralph Peck, who was educated at the University of Minnesota and specialized in kinetics and thermodynamics.

During his career at ITT he has witnessed and helped to bring about many innovations both in and out of the department. Once housed in the Main Building on the fourth floor, Professor Peck remembered an incident in which one of Dr. McCormick’s research students left his condenser on over the weekend and the hose came off. The water spilled forth from Saturday morning until Monday and all the offices in the building below the fifth floor were thoroughly soaked. This occurrence was one of the many that led to Perkins Hall.

A change Dr. Peck is in a good position to discuss concerns size of the department. In 1959 there was one professor, one associate professor, and one instructor covering all of the classes of chemical engineering. Now there is a faculty of 11 with a wider diversity of interests.

As there are approximately the same number of students today (about 500) as there were when Professor Peck first came here, this development has had widespread results as far as the quality of our department, the size of our students, and the quality of the graduating engineer.

Dr. Peck also noted the orientation of the department towards the mathematical sciences especially where fundamental calculations and predictions are required. Years ago, the students learned purely industrial chemistry whereas now there is a mixture of the basic research and fundamentals approaches.

The other major change includes the graduate program which was first starting 29 years ago. ITT was as hard to find as was IIT, and then consisted in essence of a few imposing edifices like Main Building and Chapman Hall interspersed with adjacent slums. Six of the men worked in ITT and the foundation was just going up. Now, of course, it speaks for itself.

Dr. Peck has lent his support to other departments around the world. He worked for the United Nations as a technical expert in the Middle East and gave a series of lectures at the colleges in Saudi Arabia. (Continued on page 7)

LATE NEWS

for

ENGINEERING GRADUATES

- Expanding military and commercial business
  has created even more openings.

As you contemplate one of the most important decisions you have yet had to make, we suggest you consider joining us at Pratt & Whitney Aircraft. Like most everyone else, we offer all of the usual "fringe" benefits, including our Corporation-financed Graduate Education Program. But, far more important to you and your future, is the wide-open opportunity for professional growth with a company that enjoys an enviable record of stability. You will be working on challenging new problems of propulsion.

And make no mistake about it...you'll get a solid feeling of satisfaction from your contribution to our nation's economic growth and to its national defense as well.

Your degree can be a BS, MS or PhD in MECHANICAL, AERONAUTICAL, ELECTRICAL, CHEMICAL, ENGINEERING, PHYSICS, CHEMISTRY, METALLURGY, CERAMICS, MATHEMATICS, OR ENGINEERING SCIENCE OR APPLIED MECHANICS.

For more specific information (and immediate action) concerning a career with Pratt & Whitney Aircraft, write today (or use coupon) to Mr. William L. Stoner, Engineering Building 1-A, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

Yesterday, you may have had a reason for missing a good, nourishing breakfast.

Today, you don't.

Now you can have new Carnation instant breakfast—makes milk a meal that's too good to miss.

Each glass delivers as much protein as two eggs, as much mineral nourishment as two strips of crisp bacon, more energy than two slices of buttered toast, and even Vitamin C—the orange juice vitamin. It comes in a lot of great flavors, too. Look for them in your cereal section.
Nothing can take the press out of Lee-Frést slacks

Not that it's on his mind right now. And it needn't be. Those Lee-Frést Leesures can't help but stay out of mind. No matter what you put them through. They have a new permanent press. So the crease stays in. The wrinkles stay out. Permanently. And that's without ironing. No touch-ups, either. They're made from Lee's special blend of 50% polyester and 50% combed cotton. For wash and wear... with conviction.

Incidentally, that permanent press is the only change we've made in Leesures. They still have that lean, honest look... smart, tailored fit. New Lee-Frést Leesures. Test their permanent press yourself. It isn't necessary, but it's a great way to spend an evening. From $6.00 to $8.00.

Lee-Frést Leesures®

In Canada: Lee Company, Inc., music Hall, Holland. All available in Canada.

**UFO's, Mystery of the Heavens; Do They Really Exist?**

by Ron Demski

“In view of the recent saucer sightings, do you believe that the earth has been visited by intelligent beings from space?”

This was the question asked of several Technes at the time when the Midwest's saucer sightings were at a premium. The corresponding replies ranged from the typical Air Force denial characterized by the response of Joe Darganus, MAE 2, to the religious "I do believe" opinion of Tom Grunthamer, ME 2. The number of dissenters proved to be relatively few, this statistic being further reflected in a Chicago television survey which discovered that 82 percent of the neighboring college students shared an affirmative attitude on the subject. On what basis, then, do today's students justify their particular viewpoints about flying saucers?

Joe Darganus seems to entertain a rather unique theory on this subject by admitting that while there is a strong possibility favoring the existence of extraterrestrial intelligence, that "... if any of them have ever visited the earth... is another matter." The average observer, being unskilled in identifying these mundane phenomena, will undoubtedly mistake them for any given number of things, while other people will, if given the right provocation, admit to witnessing objects which were virtually never sighted. In addition, Darganus even refuses the reports received from seasoned airline pilots as being the products of a kind of flying-fatigue, using the results of a recent Air Force study as a proof of this belief. Why anyone, who supposedly possesses such overwhelming intelligence, would travel over such enormous expanses of space and yet not attempt to seek recognition in a world which still remains unanswered. Pursuing this premise further leads us to ask why they generally restrict their appearance to magnificently observed objects rather than the recognized authorities.

Tom Grunthamer, meanwhile, agrees to the extent that several of the sightings are certainly hoaxes or otherwise imaginative illusions, but quickly explains that it's unacceptable... that there are no other intelligent life forms in existence. By extending this philosophy, Grunthamer leads us to believe that, "there's no plausible reason that some of them couldn't be more advanced than we are."

While admitting to our own rapid advancement in the relatively short span of our own earth's history, we fail to see the possibility of the existence of a race whose productive history with respect to the age of the universe surpasses ours. While admitting that the peoples of earth have been anything but fruitful, we must also realize it personal failure in regard to establishing any exchange of thoughts or ideas.

These two opinions are fostered by people of all levels of prominence throughout the world, modified versions of either are also apparent. It is my firm belief that a reappraisal of both attitudes, with a course of action based on one, will be of instrumental significance in determining the destiny of our planet.

**Gym**

Greek Week
(Continued from page 1)

House flags made in honor of Greek Week were the subject of final competition. Using smart decoration as the theme and house symbols and colors as the tools, each house made a flag to be hung on the quad. The Theta Xi flag was chosen best while Alpha Epsilon Pi and Phi Kappa Sigma were awarded second and third respectively.

The events were scored with ten points for first, eight for second, six for third, four for fourth, and two for fifth. Each participating house received one point. The final standings show Phi Kappa Sigma as first with 24 total points, Triangle second with 22, Theta Xi third with 17, Alpha Sigma Phi fourth with 14, Delta Tau Delta fifth with 13, Alpha Epsilon Pi sixth with 12, Sigma Phi Epsilon with 11, Phi with 9, and Tau Epsilon Phi with 7 points.

The Comber Drive, the second aspect of Greek Week, was postponed until the Tuesday after the festivities.

Who is your ideal date? Thousands use Central Control and its high-speed computer for a live, flesh-and-blood answer to this question.

Your ideal date — such a person exists, of course. But how to get acquainted? Our Central Control computer processes 10,000 names an hour. How long would it take you to read and form an opinion of that many people?

You will be matched with five ideally suited persons of the opposite sex, right in your own locale (or in any area of the U.S. you specify). Simply, send $3.00 to Central Control for your questionnaire. Each of the five will be so perfectly matched with you in interests, outlook and background as computer science makes possible.

Central Control is nationwide, but its programs are completely localized. Hundreds of thousands of vigorous and alert subscribers, all sharing the desire to meet their ideal dates, have found computer dating to be exciting and highly acceptable.

All five of your ideal dates will be delightful. So hurry and send your $3.00 for your questionnaire.
