Class of '68 To Hold Charity Dance, Receipts To Support McKinley Project

The "Shadows of Knight," and "Rita's Jettisons" will headline the ITSA-Junior Class Charity Mixer on March 18. The dance, being held to raise funds for Ada S. McKinley Community Services Center (34th and Michigan), will be held in the HUB with the bands providing continuous music.

Both the "Shadows" and "Saturday's Children" are Chicago-based bands.

The "Shadows" are best known for their recording of "Gloria," a nationwide top seller. "Saturday's Children" recorded the hit single "Weirdo" for a single release in Chicago. The group's latest release, "Walter Jean," is currently on the "Top 40" listings of radio station WLS.

"Saturday's Children," predominately a dance group, have also had a popular record released.

Each of the groups has played for a number of mixers in the Chicago area in the past year, although neither has appeared previously at ITT.

Both groups have appeared in concert at McCormick Place. Last November, "Saturday's Children" appeared with "The Mamas and Papas" at Arne Crown Theatre. The members of both bands are students in the arts programs of Chicago. Both bands got their start at "the Cellar" in Andersonville.

The proceeds from the dance, according to dance chairman and junior class president Mike Bellini, will be used by the Ada S. McKinley people to help build a playground for the children serviced by the center.

Publicity chairmen for the dance are junior class vice president John Vanderweest, and social chairman, Al Guttovitz. In charge of ticket sales is Steve Lipson, ITSA and junior class treasurer.

Tickets for the dance will be available beginning March 1, from various members of the ITSA Board of Control and members of the junior class. Donation for the mixer will be $1.50 per person.

Reske, New Trustee, Appointed to Board

Elmer F. Reske, manager of the Illinois Inspection and Rating Bureau, was recently elected to the board of trustees of Illinois Institute of Technology. Lesser Armour, chairman of that board, made the announcement.

Reske, a native Chicagoan, was graduated with a bachelor of science degree in fire protection engineering from IIT in 1924. He will serve as an alumni representative on the board of trustees.

Following graduation, he joined the Chicago Board of Underwriters and in 1938 was appointed acting chief engineer. In 1942, he was appointed chief engineer of the Cook County Inspection Bureau and remained in that position until 1946. He assumed his current position in 1952.

A former president of the Society of Fire Protection Engineers, Reske was the first recipient of the Joseph P. Finegan Award from the Chicago chapter in 1962. He was honored by IIT alumni with the Alumni Service Award in 1966.

He is the author of numerous articles on fire protection and fire insurance. Among his many professional affiliations, Reske is a member of the Engineering Council of the National Board of Fire Underwriters. The International Association of Fire Chiefs, and the Fire Council of Underwriters Laboratories and is a registered professional engineer in the state of Illinois.

On the new trustee is also a member of the recently formed Mayor's committee investigating the McCormick Place fire.

Mr. Reske, a resident of Chicago, is an active participant in many local and community activities, clubs and organizations.

I-T-Ball Set for March 10: Knickerbocker Is Site

ITSA will present the annual I-T-Ball on Mar. 10, in the main hallroom of the Knickerbocker Hotel Chicago, near north side. The time of the Ball will be 8:30-12:30.

Announcing the event was Ross Brewer, ITSA social chairman. She states: "The social committee is serving a great deal of fun and effort to this year's I-T-Ball in hopes that everyone will take advantage of it."

Bids for the event will be available for purchase at the Fountain House and from any member of the social committee. They go on sale at 50c per couple.

Dress for the Ball will be semi-formal, and an open bar will be available for the guests and cocktail dress for the girls.

I-T-Ball is a project of the ITSA Junior Class, the proceeds of which will be designated for the University of Rochester, New York. Their concert is to be held on April 25, 1967, at 8:30 PM. The event will be sponsored by the Alpha Omicron Pi fraternity and the Delta Chi fraternity.

The concert will feature groups from various colleges and universities, including the University of California, Los Angeles, and the University of Illinois. The concert will also feature guest performers from the University of Rochester, including the Alpha Omicron Pi fraternity and the Delta Chi fraternity.

The ITSA Junior Class would like to thank all of the sponsors and performers for their support and contributions to the success of the event.

On UB Concert Series Ticket, Feb. 25

Whitemore & Lowe To Perform At IIT

The UB Concert Series will present a concert featuring the bands Whitemore and Lowe on February 25, 1967, at 8:30 PM. The concert will be held in the Skokie Auditorium, located at 6556 N. Broadway in Chicago.

Whitemore and Lowe, a popular rock band, will perform at the concert. Their music is a blend of rock and roll, and their songs are characterized by catchy melodies and energetic rhythms.

The concert will feature a variety of artists, including Whitemore and Lowe. The lineup includes accomplished musicians and performers who have played together for many years. The concert will feature a mix of popular and well-known songs, as well as a few new tunes.

The UB Concert Series is known for presenting high-quality orchestral and choral performances, and this concert is no exception. The performers have been carefully selected to provide an unforgettable experience for the audience.

Tickets for the concert are available at the door on the night of the performance. The price of tickets is $5.00 per person, and all proceeds will be donated to the University of Rochester. The event is open to the public, and tickets are available at the door on the night of the performance.

The concert is a wonderful opportunity to enjoy the talent of Whitemore and Lowe, as well as other accomplished performers, in a live setting.

The UB Concert Series is a non-profit organization that produces high-quality orchestral and choral performances. The organization is dedicated to promoting the arts and bringing high-quality performances to the community. The UB Concert Series is committed to providing a diverse range of performances, including classical, contemporary, and world music.

The UB Concert Series is proud to present this concert featuring Whitemore and Lowe, and is confident that it will be an unforgettable experience for the audience.

Problems of Common Core Program Outweigh Advantages; Revision or Abolition Necessary

The idea of the common core engineering program is one which must be accepted by the students of engineering without an alley of escape. We conjecture that the concept of common core has been accepted by the academic administration as the best method of preparing engineers and giving them the best possible education.

It is interesting to note that both California Institute of Technology and Massachusetts of Technology adopted (developed) common core programs approximately five years ago.

The common core program at ITT is now in its third year of full application. Two years ago Cal Tech and MIT dropped common core and adopted new approaches to education and academic environment.

The idea is that it is better to have a professor instruct first year math, chemistry, and physics classes has its merits. Certainly professors are more experienced than graduate students or lecturers.

However, the value of instruction by a professor is far overshadowed in our minds, by some obvious shortcomings. Overcrowded classrooms, the inability for individual questions to be answered, and the pressure built up when

In Memoriam

"Technology News" deeply regrets the sudden loss of Phil Spink who passed away last Friday afternoon. The late Mr. Spink’s position with Bankers Print had put him in close association with the staff of "Technology News" for the past eleven years. His aid and friendship was greatly appreciated by all who knew him.

as he was as many as four hundred students compete for grades on a curve, we believe, should evoke conversation over the possible revision or abolition of the common core program at ITT.

Without trying to debate the direction or philosophy of modern education, we believe that there are much more potent methods to approach the challenge of technology.

The common core is an infringement upon the ability of both the "advanced" student and the "slow learner." Must we necessarily or inadvertently equate these extreme types of students and weigh their individual efforts equally?

The syndrome created by the common core—often a syndrome of study for chemistry this week, physics the next, math the next, and so on—is still another drawback inherent in our common core program.

The level of education should not remain stationary or become saturated with elaborate systems, preparations, required courses, and grades. Man—human, thinking men—need machines, create, innovate, and manipulate in our society.

This viewpoint on the common core program is, we hope, only a beginning. This semester, we, the Editorial Board of Technology News, plan to explore the realm of ITT and its present academic direction and policy.

We feel we are not alone in our views and opinions, nor are we an unlimited source of information. This paper is open to comment at all times from those interested, whether they be students, faculty, or administrators.

LETTER POLICY

Letters to the editor on articles previously appearing in TECHNOLOGY NEWS are welcomed. Such letters must be typed (double spaced), signed, and written in good taste. Anonymous letters will not be printed, but the writer’s name will be withheld upon request.

Letters should be limited to two hundred words. All letters will be printed, unless out of space, but TECHNOLOGY NEWS reserves the right to edit any letter. All letters become the property of the newspaper and none will be returned.
Free Love Mixer Presents
All-Girl Band Tonite at HUB

The language, literature, and philosophy department of ITT, recently relocated to the Life Science Building, is announcing a new lecture series.

On Wednesday, Feb. 22, Professor Ritter of the German department will perform Samuel Beckett's play "Krapp's Last Tape" in the HUB auditorium. The play itself means man's vanity and absurdity of his existence. The play depicts a 60-year-old man gazing into the futility and absurdity of his existence.

Professor Ritter performed "Krapp's Last Tape" last summer. He received a very favorable review in the "New York Post Tribune." "Krapp's Last Tape" was recently performed on National Educational Television.

On March 15, Frederick Siegel from the University of Chicago philosophy department, will deliver a lecture in room 1794-E.

Franz Strobel, visiting professor at the Circle Campus and international authority of the Greek theatre, will present "The Orators" in room 1794-E on April 12.

On May 1, Nathan Scott from the University of Chicago theological faculty, will lecture on "Art and the New Radical Style," also in the Life Science Building.

All of these lectures will take place at 4 pm on Wednesdays.

The language, literature, and philosophy department feels that "the program is a clear indication of the need for a more detailed and specific interest in a school, commensurate with its name as an exclusively technological institution."

Beazian To Address Newman Club Meeting

Newman Club is sponsoring several up-and-coming events, including these, in the meeting of Newman Club on Feb. 22. Mr. Paul D. Beazian will be the speaker. Beazian will speak on strikes and a method of elimination of strikes by the use of his plan. Mr. Beazian has for the past 25 years been a partner, and is now the managing partner, of Burton Browne Advertising. He has been listed in International Who's Who and Stateman's Who's Who for nine years. His work has also gotten him placed in Who's Who in Commerce and Industry for 14 years. He is also administrator of the John B. Beazian scholarships at Illinois Institute of Technology and MIT.

"Ice Breaker," Newman Club's annual mixer, will be held on Feb. 14. The dance will be held on the HUB.

On the same weekend as "Ice Breaker," the Providence Executive Council, Northern Illinois Province, will meet here at ITT. The council will be in session from Friday, Feb. 24 till Sunday, Feb. 26.

Don't Fight it.

Get Eaton's Corrasible Bond Typerwriter Paper.

Mistakes don't show. A sm-screen completely disappears from the special surface. An ordinary pencil eraser lets you erase without a trace. So why use ordinary paper? Eaton's Corrasible is available in light, medium, heavy weights and Onion Skin in 100 sheet packets and 500 sheet ream boxes. At Stationery Departments.

Provisions for Wine, Women and Song at Expo 67

by Glenn Davison

There is a new "I'm" place to go this year. Montreal, a sprawling metropolis of two million people and Canada's largest city. The Canadian Universal and International Exposition of 1967, dubbed Expo 67, is on a 1,000-acre site across the river from the second largest French-speaking city in the world (after Paris) and it promises to be the greatest event of the century.

The Expo has two basic goals in mind. First, it wants to be educational and second, it wants to be entertaining. Even to the most bored, these elements will be self-evident when the gates open April 28 for a six-month run.

The pavilions are to provide the education. With nearly seven million participating nations the education promises to be well- varied.

And there is fun—and plenty of it. The center of attraction is La Ronde, the 135-acre amusement area. The idea of La Ronde is to create the best of all possible amusement parks, and this it does. It includes an aquarium; a Pioneer Land, which includes a ride that shoots autos down into the water; a Children's World, a Youth Pavilion, the Gyrotrotor, a thrill ride that is made of a galaxy, a volcano, and a fire-belching monster that swallows the participants, a Dolphin Lake, and a Sky Ride.

And it is in La Ronde where college-age students can Frug, Twist, Watans, Moscow Mule, Snake, and whatever. Many of the restaurants will convert to discotheques at night with top musical combinations providing the beat. For the more passive type there are numerous night clubs where one can sit and sip a cool drink. The Garden of Serenity will be the most magnificent of the Expo's night spots with all types of entertainment.

Le Village, an old-world creation, with many of the interesting areas of La Ronde. Chez Rose Larbille will serve caribou and drink made of sweet red wine and white whiskey to those who watch the folk dancers that it will present. If it is an interesting and different form of culture, he might visit Lucilair, which has no food but a complete bar service and plenty of strippers performing to top-flight jazz.

Officials of Expo 67, with college students in mind, built a Youth Pavilion providing dancing facilities for youths—ages 15-21. Special discount rates are offered for those between 15 and 21. For seven consecutive days your passport (admission ticket) will cost $1.00. The seven-day pass sells for $3.00 while the daily rate is $2.00 for youths and adults alike.

And there is Montreal itself. Many restaurants and night clubs are preparing for the influx of tourists. For the in-laid cigarette, bottles of scotch, rye, wines, etc. are sold only to shops run by provincial government. In Montreal, there are two main locations—the Place Ville Marie and one at 1400 Montreal street.

A better idea never came out of a crystal ball

At Ford Motor Company we're always looking for better ideas. But not with a crystal ball.

We do it with background and brain.

We do it by seeking answers for down-to-earth questions such as: Should a profitable central city dealership be relocated to a growing suburban location? What's the sales potential for a new personal car?

And we do it by trying to solve problems that haven't been faced till now. Problems such as: Is an electric car the answer to city traffic? How will people travel in the year 2000?

In short, our better ideas come from better people. And we take extra steps to get them. Ford Motor Company has a College Graduate Program which provides immediate opportunities for individual development. In our rotational assignment system graduates are assured broad training and constant visibility to management. Right now, new products, new marketing programs, new subsidiary operations here and abroad are creating new jobs. One could be yours.

For more information, write our College Recruiting Department. Or better yet, schedule an appointment through your placement officer to talk with our representative. He'll be on campus soon—looking for better people with better ideas.

PARKS-DAY & ASSOC. 227 S. La Salle St. Room 111 D Chicago, IL 60604
Orchestra, Theater Active in Windy City This Weekend

On Feb. 19 at 3:30 P.M., the Chicago Chamber Orchestra will perform at the Auditorium Theatre, 229 S. State St. The program will feature Brandenburg Concerto No. 4 in G major by Johann Sebastian Bach, Concerto for Organ and Orchestra in A major by Op. 7, No. 1, C.P. E. Bach, and the Holst Concerto for Organ and Orchestra by Holst. The concert will be conducted by Barbara Portnoy. Carlin, a student of the Juilliard School of Music, will be the featured soloist.

The Hull House Theater at 2100 S. Broadway is presenting the Midwest premiere of Yehudi Menuhin's "The Magic of the Violin." The performance will feature Menuhin in a solo recital of works by Beethoven, Mozart, and Brahms.

Bell Grant

Bell Grant (Continued from page 1)

The Bell Grant program, which provides financial support to minority students, is now accepting applications for the 2023-2024 academic year. The program offers scholarships of up to $10,000 per year for four years of undergraduate study.

A secret handshake won't help you make V.P. at General Electric.

Something that will help move your career along at a healthy clip is a strong, steady hand when responsibility and important duties are thrust upon you. Plot a firm grip on your special field of interest, whether it's marketing, finance or research.

And it won't hurt a bit if you also want to strengthen your grip on the subject that interests you. General Electric runs one of the world's largest graduate schools with courses in everything from advertising to microelectronics. You can stay on top of developments in your field by periodically going to school at G.E. and learning from G-E "professors," selected from the country's top ranks of engineering, marketing and manufacturing experts.

If you want to work and study, and get ahead in this kind of company, this company wants you. Come to General Electric, and you'll find the young men are the important men.
McKinley House Proves Valuable Asset to City
by Mike Belleter

A little known member of the IIT "community" is the Ada S. McKinley Community Services organization.

Performing a great social service to our city, Ada S. McKinley is located just off the campus proper, on the northeast corner of Thirty-fourth street and Michigan.

The independent agency, now in its 47th year of service, provides a day school for mentally retarded children, as well as a job training program for indigent women.

The day school accepts children from ages 6 to 16 whose IQ's are too low to allow them to enter public schools.

The director of the agency, Ralph Bunting, explained that not all of the McKinley children are mentally handicapped but that some suffer from "functional retardation" as a result of the restrictive environment. One of the agency's major goals is to rehabilitate these children so that they might qualify for public schools.

The training program of Ada S. McKinley is aimed at women mentally handicapped and presently unemployed. Many of the women are trained in a skill, such as that of seamstresses, and in the past four years over four hundred women have been placed in jobs.

A prime project for the agency this year is the construction of a playground for the children in the program. The playground, which was designed by Jane Wasmann, former head of the IIT Institute of Design, is both functional and unique. Included in the plans for the playground is a group of equipment both modernistic in design and of therapeutic value to the children.

The basic ground leveling for the playground, which is to be constructed on McKinley house property, has been done.

The agency at the present time has raised over half of the $3000 necessary for the construction and equipping of the playground. The balance of the money necessary will hopefully be raised by the agency and the junior class of IIT, from the proceeds of the March 10, "Shadows of Knights," "Saturday's Children" dance.

In addition to Director Bunting, there are 18 full and part-time staff members conducting the training at McKinley.

A private, autonomous organization, Ada S. McKinley is financed solely by the Crusade of Mercy-Combined Appeal Drive and private donations.

The agency has no city or state affiliation and, therefore, can maintain its own form of service.

The Peace
by Steven W. Waits

Man walks leisurely through the forest.

Freedom is his greatest joy.

The ground is damp and teaming with life.

The freshness of the air sends happiness rushing through all his senses.

The path winds up and down through the great forest.

Between tall oaks standing sentinel,

Over a boulder there's a lone bird on its legs, providing life to an infinite variety of creatures.

Slowly decaying into the timeless earth.

The forest does not complain.

Nor does it resist the chance to adapt to new conditions, but yields, so that it might thrive.

Man walks quietly into the heart of the forest, curiously observing.

Beauty in its most manifest form.

The cool and sunlit trail continues onward, into the essence of the forest, the tired serenity disturbed only by the silvery crunching of twigs and dead leaves under man's foot.

Sun streams down on the forest, captured by the highest branches of the tallest trees, and yet reaching also the lowest vegetation.

Leaves a splotchy pattern of light and dark on the forest floor.

And even onward, further penetrating the greatest of nature's secrets.

The single man, alone in the forest.

Civilization rendered meaningless and trivial before this great spectacle of symbiotic perfection.

A break in the forest, a clearing.

A hillside sloping gently down to a clear lake, rimmed all-around by great trees, and filled with fish and plants.

Continuously replenished by a river from beyond the mountains.

Man is quiet and cannot speak.

He cannot disturb the calm with senseless chatter.

He reclines on the hillside.

Rises his arms, and places his hands together behind his head.

He silently closes his eyes and thinks.

A lone eagle appears from over the forest.

It soars quietly over the lake.

And vanishes in the distance beyond the trees.

Man has completed his task.

There is peace.

The Center of Opportunity

Commonwealth Associates offers unlimited opportunity for high school engineers and architects. Why? Because Commonwealth's new business is providing engineering, consulting and architectural services. Commonwealth has served liberal industrial, commercial, institutional and governmental clients throughout the United States and overseas for over 60 years.

Employees at Commonwealth enjoy challenging assignments that use their design and construction of power plants and transmission systems in buildings and other architectural projects. A "project leader" method of operation increases individual responsibility and advancement opportunity.

Commonwealth's home office in Jackson, Michigan is strategically located in the growing metropolis between Detroit and Chicago. Along with top salaries and excellent benefits, employees enjoy minimal commuting, excellent educational systems and easy access to Michigan's numerous recreational facilities. Additionally, some opportunities are available in New York, Washington, D.C., Chicago and Houston offices and on overseas projects.

Get the Commonwealth Career Story firsthand. Make an appointment for an interview at the placement office today.

"Business is for the birds!"

Who says so?

Lack of people do. Some right on your campus. And for rational, they point an accusing finger at business and say it lacks "social commitment."

Social commitment? We wish they could visit our Kearns, N. J. plant, where we make cable and apparatus for your Bell telephone company. But we have time for other thoughts, other talents.

Like the situation in nearby Newark. With civic and business leaders, we began buzzing with ideas: "Let's teach higher skills to some of the un-employed and under-employed. Say, machine shop practice. They could qualify for jobs that are going begging -- and help themselves as well."

We lent our tool-and-die shop, evenings. We found volunteer instructors. A community group screened applicants. Another supplied hand tools. The Boys Club donated classroom facilities. Another company sent more instructors.

Some 70 trainees enrolled. Their incentive? Self-improvement. Results to date? New people at better jobs. Happier.

And this is only one of dozens of social-minded projects at Western Electric plants across the country, where our first job is making communications equipment for the Bell System.

So, you don't give up ideals when you graduate. If anything, at a company like, say, Western Electric, you add to them. And it's not just a theory. It's practice. Satisfying. Come on and find out. And watch a feathered cliche fly out the window.

Western Electric
MANUFACTURING & SUPPLY UNIT OF THE BELL SYSTEM
ITSA President Ver Discusses Spring Conference; Tells of Work To Be Done on Budgets and Plans

by Al Ver

This column will appear bi-weekly on alternate weeks of the ITSA meetings in order to explain the students’ issues of importance which come before ITSA and how these issues relate to the students. It is hoped that this will provide you with a better concept of ITSA and help you to become more involved.

The major issue of importance at last week’s ITSA meeting was the appointment of committee chairmen to fill the positions on ITSA’s eight standing committees. A lack of qualified personnel applying for these positions prompted the board members to conduct a personal search for qualified applicants and to hold another meeting this week to fill the remaining chairmanships.

Plans were also completed for the upcoming Spring Conference which is being held Sunday, Monday, and Tuesday of this week. The main objective of the conference will be to plan the organization’s budget for the 1967-68 school year. This requires the allocation of approximately $45,000 to various campus organizations such as Union Board, Technology News, INTEC, WITP, and the ITSA Social Area.

The other objective of the conference is to hold various discussion groups to evaluate certain campus situations and propose possible solutions. There will include such topics as the possibility of having students participate as members on faculty committees, and methods of combining the efforts of the Union Board Social Area and ITSA Social Area to provide the school with a better social program.

Along this same line, plans will also be prepared for having a homecoming next fall. This event would be held in conjunction with the opening of the new gym, when and if that time ever arrives.

There will also be several meetings relating to the functions of the Board of Control itself. Setting specific responsibilities for elected representatives in order to make their positions more functional will be one topic discussed. Also an evaluation and re-defining of our present committee structure to incorporate it more closely with the Board structure will be discussed.

In my belief that Spring Conference fulfills two basic needs of student leaders. First, it provides a meeting place for students to discuss current issues where pertinent issues can be discussed and plans can be prepared for upcoming projects. Secondly, it enables student leaders from various organizations to become acquainted with each other and thereby makes it easier to work together during the semester.

With these two objectives in mind, I firmly believe that the upcoming conference will be extremely worthwhile.

March 1
Rocket Society Sponsors Talk By Van Aken

The newly organized IIT Rocket Society will sponsor a talk by R. W. Van Aken, associate head of Engineering, Aero-mechanics Division, U S Naval Ordnance Test Station, China Lake, California. Van Aken will speak on amateur rocketry as well as engineering opportunities at China Lake. His talk will be highlighted by movies “Hot Shot” and “Kennedy’s visit to China Lake Test Center.”

Van Aken will speak at 2 p.m., Feb. 22, in Persons Hall. All interested persons are invited to attend this presentation.

Memorieship in the IIT Rocket Society, sponsored by Professor Irving Michelson, is open to those who are interested in amateur rocketry. Those persons who are interested in the club should contact Vincent Formanek (318 East Wing) for information.

Varied Activities of Management Society Open to All Techhawks

by Ken Olmert

(President SAM-IIT)
The Society for Advancement of Management (the recognized national professional organization of managers in industry, commerce, government, and education) will hold an open meeting Wednesday, Feb. 22, at 2:30 p.m. in room 116-EM for the express purpose of recruiting new members.

All IIT students with a sincere interest in the art and science of management may apply for membership regardless of their major field of study (engineers welcome).

The IIT chapter of SAM has a program of meetings, conferences, seminars, industrial plant tours, career congresses, newsletters, “Advanced Management Journal,” business films, discussions with business executives, and social gatherings. Important contacts made through SAM can prove invaluable to your future career.

The diversified activities of the student chapter provide students with an insight into the practice of the management profession and further the growth of all students, regardless of their academic major, by stimulating their interest, widening their knowledge, broadening their outlook, and developing a better understanding of business and of the free enterprise system.

The SAM program is a good supplement to the classroom Members of the SAM senior chapters and business executives in general realize that SAM can contribute to the development of the individual both during and after college and, as a result, are looking more and more to the college chapters for their management potential. SAM is a good investment.

UB Movies

by Paul Anderson

Sunday, February 19, 1967, 8 pm

Yesterday, Today and Tomorrow, starring Sophia Loren and Marcello Mastroianni.

In this six-filled trilogy, Sophia portrays a woman who must manifest her miscarriage, in order to escape the idea of prison. In the third, she plays the beautiful courtesan with whom a young man falls in love. In the last, she is in a jaded member of the aristocracy, who meets with her lover while her husband travels.

This film is an enjoyable era of love and life, out of which everyone will find satisfaction.

Union Board Films Design Competition

Union Board films is offering a cash award of $25.00 for the best symbol appropriate for UB films. The symbol must be reproduced in various sizes for posters, tickets, programs, slides, and movie films.

Submit entries to the HUB director’s office (include address and telephone number) on or before March 1, 1967.

SYLVANIA will be interviewing...

Grapplers Defeat Lewis College
For Seventh Victory of Season

The IIT wrestling team met Lewis College last Tuesday, Feb. 14. The Tech grapplers came out on the long end of a 21-11 score.

The win is the seventh straight after an opening loss to the University of Illinois at Chicago.

Scoring pinn in Tuesday's meet were Joe Lenzy at 125 pounds, Doug Sauter at 130, and heavyweight Dick Rosicky.

Winners by decision were Tom Seflic at 143, Ron Rother at 152, and George Derby at 177.

The wrestlers' next opponent will be the University of Chicago. The meet will be held Tuesday, Feb. 21, at Chicago.

A highlight of the season will be the IIT-Notre Dame meet to be held at Notre Dame on Feb. 24.

Following in the same week, the grapplers will travel to Milwaukee on March 1 for the season wrapup at Milwaukee Institute of Technology.

Bowliers Lose, Silber Wins

In last Sunday's match, the IIT bowling team dropped a close match to Loras College. The bowlers easily won the first two games, but dropped the final three games plus the point for total pinfall. High scorer for the Tech-hawks was Eliot Silber with a total of 922 pins. This was also big enough to take high series in the match.

The team blamed "stripped alloys" for the turn around after the second game. Coach Ed Brick interpreted this. "The lanes were oiled in preparation for the meet. What they mean is the lane lost the oil, consequently was dry, and caused a greater hook in the ball. The situation stems from the fact that the Rec Room is overheated, causing the oil to evaporate."

The team's next match is Sunday, versus Loyola at the Rambler's home, Marquardt Arcade. Starting time is 1:30 pm.

FROM THE SIDELINES

By GENE RADER

We walk around campus exploring the quality of our athletic teams. We blame losing seasons on the lack of talent or poor coaching. But stop and ask yourself, is this the real problem? My answer is no.

Just for one moment imagine yourself representing Tech by being on one of the teams. You go through the regular schedule of classes and then practice two or three times, five days a week. When game time comes you move onto the court only to see a very small handful of students, not even four hundred can show up for a sports event? The obvious answer is sparsity, and if you don't mind my speculation, it's the same sparsity that keeps this school "small time."

Most people around the Institute seem to think that the new gym will be a rebirth of Illinois Tech sports. True, the new gymnasium is a much needed addition and will be well used. But until the students start showing some interest, our teams will continue having losing seasons and our coaches will be faced with the same headaches they've had in the past.

If you're looking to support a winner, how about the wrestling team? Their record is 7-1 and are thought highly enough of to have an upcoming match with Notre Dame.

To the members of our athletic teams and the coaching staffs, I have only admiration and the hope that someday the situation will change. To those who do attend the games, my hat goes off to you. Don't give up. To the majority, how 'bout it?

This semester "Technology Sports" will publish a weekly listing of events, and information will be cheerfully rendered at the athletic office.

To those with extra energy, this page will always welcome a new face! Until next week... That's all sporten.

SS 396 Sport Coupe

And a new Turbo Hydra-Matic transmission for the driving man.
If you get tired of shifting, put it in "D".

Even a driving man's man can get tired of clutching and shifting in a traffic jam. But there are times when you want to stir your gears by hand. A dilemma!

Until now, that is. Now you can order Turbo Hydra-Matic in the SS 396. It's an automatic transmission you can shift—really shift—for yourself. Feeling lazy? Use the selector into Drive and relax.

Want to play expert? So make beautiful music on the gearbox. In the Chevelle for the driving man, it's up to you.
